EV. J. A. FRANCIS
TO ADDRESS T. C. A.
The Real Dynamic Behind Civic Betterment," Subject of the Talk.
The regular Thursday noon talk of the T. C. A. is to be given by Rev. James A. Francis, D. D., pastor of the Union Street Baptist Church, one who heard Dr. Francis speak one of the T. C. A. talks last year that he developed the subject. "The Real Dynamic Behind Civic Betterment" will be a talk that is both interesting and educational.

Mr. Francis served last year on one of the teams of speakers for the Men's Religion in Forward Movement organization, which was composed of men of the Protestant Churches who were trying to get more men to some regular church worship.

In a recent trip to Minneapolis he wanted to see how had the years of his work with the Forward Movement been the year. He is much in demand as a speaker on vital problems of the

...he was at the C. A. talks last year which did not rightfully belong to him. But the C. A. talks last year were so well

BIG JUNIOR SMOKER
IN UNION TONIGHT
Free Smokes, Free Vaudeville-
Discussion of Junior Work Plans.
Tonight, at 7:45, the much heralded Junior Smoker will start. This Junior Smoker will start before the faculty is finished with its free speeches in fact, free everything will be finished. The speaker promises all who attend the time of their lives. An excellent program is released today. It will be entirely the work of members of the class, and for this reason it should prove exceedingly interesting.
The Faculty, although invited, will be allowed absolute control of the program. The only exception will be for those of the free smokes; this great departure from the usual custom will probably add much not only to the Junior Smoker but to all the classes.

A discussion of the affairs of the Junior Smoker will also be held, so that all present will be given ample time to express their opinions concerning this important event.

COMMUNICATION.

To the Editor-in-Chief of THE TECH:
Dear Sir—I desire to raise three points in the proposed Constitution for the Junior Smoker, which has a graduate advisory committee. One, the term "Smoake" is not very familiar, as far as I know, in any society or organization. There is no necessary connection between the two, it is simply a title that has been used in the past, and I think it should be changed.

In the particular case of representatives this point is more important. The constitution section 3, provides for a change in any representatives by vote of the Institute Committee. This matter of changing representatives will be brought up at the next Institute Committee meeting, and any member interested in this matter may call this meeting. The Constitution should be presented and the good opinions of the subject, in the interest of the functions of the Constitution to which it is intended.

We trust that every man will vote in favor of adoption as he sees fit, it being decided at the discretion of those in the voting on the Constitution.

RESPECTFULLY YOURS,
H. B. Peck, Chairman.

JUNIOR BOARD.

There will be a special meeting of the 1914 Executive Committee this afternoon in 35 F. M., at 2:30 in the afternoon, in charge of Mr. H. D. Peck, Chairman, and others.
NEW CONSTITUTION

Mr. Peck's communication, which appears on page 3, brings up a point that should be kept in mind very clearly in voting on the new Constitution. It is evidence of an advantage of having this Constitution adopted, for, under it, there is no possibility of changing unsatisfactory features as they introduce themselves. The democracy of membership should, however, be well thought over and considered at this time in order that they may be the ultimate result.

The reason that members of the student body, although the matter resolves itself now into a question of intelligent criticisms may be made on the constitution and these cards sold to the supporters of athletics here and in other institutions. In connection with this a watch was to be given to the student who happened to buy the lucky post card. Last Monday Mr. Kanaly, with the members of the Cross-Country Team, decided which number should be used to real playing and abate the feeling of nervousness which usually felt by even the most seasoned players at the first game. Those who turned up yesterday were DeRosa, Hall, Bauer, Place, Caffey, Frank, Moore, McVay, Thomas, Waterman, Cattell, Sears, Weld, Wirt, Heffler, Spencer, Macaulay, D. F. Murphy, H. J. Murphy, Pickham, Hall, Anderson, and Hysem.

COMMUNICATION.

To the Editor-in-Chief of THE TECH:

Dear Sir:—Because of financial difficulties, last fall, it became necessary for the Cross-Country Team to pay the majority of the expenses incurred by the Ithaca trip. According to a picture of the team was printed on post cards and these cards sold to the supporters of athletics here as well as in other institutions. In connection with this a watch was to be given to the student who happened to buy the lucky post card. Last Monday Mr. Kanaly, with the members of the Cross-Country Team, decided which number should be the lucky one. The particular instant it happened to be is 310. To the person holding the card this week to present it at the Court, the time being, the watch will be presented to him. The Cross-Country Team wishes to thank the Men's Institute for their support.

Alfred F. Nyce.

COMMUNICATION.

To the Editor of THE TECH:

Dear Sir:—Quite recently Professor Lawrence has started the custom of locking the door to his lectures. Last year, Course VI met, for five minutes past the hour, which seems very unjust, as he is not only treating the students as children, but also those who may be delayed a few moments while talking to some professor about their work or whose train may be a few minutes late, is deprived of a full hour's instruction rather than a few minutes. The students do not object to men coming in late, quietly, and it seems to me that they are the ones to object, as they do, a sense, but the professors are justifying the money for the purpose of receiving instructions. Professor Lawrence is one of the best men in his field, and his lectures are not just interesting, but he has many important things to add to them.

It is, therefore, the wish of many of the faculty that this 'lock out system' be discontinued.

Student.

How are you going to like two hours of drill?
A. MUTT'S OPINIONS ON TECHNIQUE GIVEN

Sees Something on Bulletin Board Which Aroused His Wrathful Muse.

(As reported by A. Mutt.)

When walking through Rogers corridor the other day I nearly split my sides with laughing (poor Jeff wasn't there to hold onto those filthy maps for me) at something I saw adorning the wall, it makes me roar so now I can hardly write. I'll grant the thing was quite a work of art, but oh! some of the things it said and the language that was used! From the ignorance displayed. It is a wonder that the writer of the hopeless cause is now in business.

CHEMICAL SOCIETY.

Interesting Talk on Paper Mills Expected.

Tomorrow night the Chemical Society will hold its second meeting of the month in the Union. Mr. H. P. Carruth of the American Sugar Company has decided to discuss the problem which the chemical engineer is being especially interested in to realize the advantages of handling a maximum amount of material with the least amount of capital. Subsequent courses have dealt with a large variety of cultural objects, and have attracted considerable attention.

CHEMICAL SOCIETY.

Season Closes

Last of Successful Series of Public Lectures to Be Given Today.

This afternoon, at 5 p.m., the last Lowell Institute lecture for this year will be given in Memorial Hall, which will be held in Huntington Hall, as usual. It is the end of Prof. George F. Baker's series on Dynamic Controls. These previous talks have been very interesting to all concerned, and many who expected to hear him were unable to secure seats. This afternoon, Prof. Baker, speaking on "The Total Effect," will give a summary of the points presented in his previous talks so that those who have heard the earlier numbers of the series may talk about it to all concerned. The meeting is free to all members and handles no money.

TECH.

Season Closes

The season of Lowell Institute lectures will remain very successful. The first course, which has been very interesting to all those who attended, and many who desired a place, was given in a large audience at Technology. It remains, however, to hold onto them for some weeks longer. The Council has decided to publish in the columns of THE TECH, BOSTON MASS., MARCH 27, 1918 announce the arrival of a complete chemical engineering society next Friday, at 4:30 P. M., in 11 Engineering. The subject of the talk is "Oil Burning," and it is to be illustrated with lantern slides, some of which have been taken from "Blaschke Brothers," a book written by Professor Peabody and Miller. Owing to a misunderstanding Prof. C. H. Peabody was announced as the speaker at the meeting in yesterday's issue of THE TECH.
