CATHOLIC CLUB

First Meeting Comes Tonight—Reception to New Men.

The Catholic Club of the Institute holds its reception to new men and its first meeting of the year tonight in the Union. The meeting will be given a special character by the presence of some prominent Catholic clergymen of the city. The club has had a number of meetings this season at the homes of its members, and the committee in charge is working hard to make this first meeting a success.

WORK ON TECHNICAL

Many Drawings Have Already Been Submitted.

S. A. Smith, Art Editor, of Technical, announces that several men are at work on the drawings for the 1911-1912 year. It is expected that all of them will be finished and sent in by the first of February, as the time for making the drawings is short. The committee has already received many good drawings and has selected some of the best for immediate publication.

SENIOR NOMINATIONS

The list of the nominees for all offices of the Senior Class, except those of the Executive Committee and Clerk, has been published and is now on file. The partial list is as follows:

MINING ENG. SOCIETY

The Mining Engineering Society, which is one of the oldest in the school, has chosen as its first meeting tomorrow night at 8 o'clock. The meeting will be held in the Union, and the principal attraction will be Professor Richards. The members will have the opportunity to discuss Mining problems with the professor, and the meeting will be open to all students interested in the subject.

CATHOLIC CLUB MEETING TONIGHT—UNION—8 P. M.
THE TECH
October 16, 1912

TECH SHOW NEEDS PUBLICITY MAN

Position of Assistant in Publicity Department Open to Freshmen.

A competition for Assistant Manager in the Publicity Department of the Tech Show will commence on Wednesday noon, October 16, at 1 P. M. Publicity Manager Whitcomb will meet the candidates in the Show office, Room II, in the Union, at that time.

The competition is open to all men in the Freshman Class, and it is hoped that a large number of men will enter. This department has charge of the advertising of the Show, writing articles for the papers, taking charge of the poster competition, the mail and paid advertising, the work is excellent training for anyone and is not difficult. All men who enter must bring in an article before Stage Manager Fiske.

The candidates for the Tech Show will meet in the card room of the Union this afternoon to practice before Stage Manager Fiske. Those men who are unable to meet Stage Manager Whitcomb in the Show office at 1 P. M. can do so at any time this afternoon.

SOPHOMORE TEAMS.

Football and Track Progressing Fairly Well Now.

The largest squad to date reported for practice at the Oval last night to help Dr. L. W. A. Smith form a championship TWALL team. Seventy men in all turned out, including twenty new men. J. H. Harkins and Allen. The team was able to have a make-shift scrum and a preliminary of eleven and five against the other and filling in as much as possible with the men they had. The eleven is round-up to complete the party and will meet tomorrow afternoon, will meet in a system that will equal in efficiency the uniform practice which has proven so successful.

UNIFORM MINUTE BOOKS.

The Institute Committee has taken notice, through one of its committees, on the importance of proper minute books for the various Institute subcommittees and committees and expectation of this is a matter which has needed attention for several years, and it is hoped that the meeting of all the secretaries, which takes place tomorrow afternoon, will result in a system that will equal in efficiency the uniform practice which has proven so successful.

CHEMICAL SOCIETY.

(Continued from Page 1, Col. 2)

who cannot possibly attend this meet- the society is planning a series of lectures, which may be held in the afternoon in one of the lecture rooms of Walker Building.

ELECTRO-CHEMISTS MEET.

The question of holding the meeting of the Electro-Chemical Society in Walker instead of in the Union has not been definitely decided. The date of the meeting, Wednesday, at 1:30, has not been changed, however. The men who are interested hope that the all members of Course XV will attend the meeting tomorrow and express their opinion of the advisibility of forming a new society, since in the event of their support desirable which ought to decide the fate of the society.

Herbert R. Barnes, Proprietor
DRAUGHTSMAN WANTED.

Prominent Engineer in Mexico Makes Peculiar Request.

A prominent engineer in Mexico has just telegraphed the Mining Department, asking that a mechanical engineering draftsman be procured for him. He offers a starting salary of between one hundred and thirty-five and one hundred and forty-five dollars per month, and also offers to pay all the traveling expenses incurred. The engineer does not require a graduate, but states that only men, graduates or undergraduates, who are proficient in this line of work is eligible for the position.

The importance of this request lies in the fact that the engineer is willing to take his chances on any man that is a Tech man, and is willing to pay well for the work. In doing this he is paying Technology the same compliment that Edison has so often done in his praise of graduates of the Institute in his selection of Tech men for his most responsible positions.

COAL CONSUMPTION.

Pittsburgh Greatest Coal Burning City.

More fuel is consumed in the city of Pittsburgh and its immediate vicinity, and more coal is shipped to and through Pittsburgh district than in any other district in the world, according to Edward W. Payker, of the United States Geological Survey. With a population of about one million of that of Greater New York the consumption of coal alone in Pittsburgh is nearly equal to that of the much larger city. Greater New York consumed in 1914 approximately 19,000,000 short tons and Pittsburgh used about 15,500,000 short tons. But Pittsburgh consumes several million tons of coke and considerable quantities of natural gas, which, added to the coal consumption, gives that city a good lead over New York as a fuel consumer.

In the quantity of coal handled the comparisons are still more striking. Pittsburgh's business exceeding that of New York by nearly 50 per cent. In 1911 the total coal traffic in New York Harbor included the city consumption, the traffic of New England and upper river points, and the bunker and export trade, amounted to approximately 32,000,000 short tons, whereas the coal traffic of Pittsburgh including rail shipments East and water shipments West amounted to nearly 53,000,000 tons.

In the total movement of coal to Pittsburgh and points east and west thereof there was an increase in 1914 of 1,974,795 tons over 1910, all of the increase being in the shipments through or from the district. On account of the depression in the iron and steel trade the local consumption of coal at Pittsburgh decreased about 1,650,000 tons, or from 18,666,246 tons in 1910 to 14,245,644 tons in 1914. The rail shipments to Pittsburgh decreased about 1,900,000 tons and the water shipments about 200,000 tons. The decrease in the consumption of coke was, of course, much larger. The movements of coal both east and west, however, showed increases, western shipments increasing from 24,453,882 tons to 25,392,264 tons, all in water shipments to lower Mississippi River points, and eastern shipments, all rail, increasing from 10,781,444 tons to 13,169,866 tons. The water shipments were the largest since 1907.
