SECOND ATHLETIC MEET SATURDAY

PROGRESSIVES INVITE ALL TO FREE SMOKER

Richard Washburn Child and Professor George B. Haven to Speak.

Tonight, at the Union, the Progressives of M. I. T. will give what they hope will be one of the biggest surprise programs ever to be presented to the faculty and students of the Institute. Professor George B. Haven, who has been one of the most progressive conservative of the Institute, has been brought to the campus by the Progressives to speak on the free smoker. In his address, Professor Haven will explain the cost of smoking and the menace it presents to the health of the individual and to the welfare of the nation. He will also discuss the various methods of quitting smoking and will offer practical advice to those who wish to give up this harmful habit.

CHEMICAL SOCIETY BEGINS INTERESTING TALKS

Professors Talbot and Walker Give Very Interesting Talks.

The Chemical Society began its new year last month with a well-attended dinner in the Union. After the dinner, the following溢eers were elected: R. D. Perk, 1912, president; E. L. Thomas, 1912, secretary, and A. J. Pantar, 1912, treasurer.

A large number of men turned out to inaugurate this new club and to welcome the speaker of the meeting, Mr. N. M. McDermott, after an enthusiastic reception. He briefly reviewed the work of Mr. McDermott, who first originated the novel organizer College Men's Woodrow Wilson Club, of which the Technology Club is a branch. A large number of political radicals, he said, that college men must unite if they wish to be effective in the present political situation.

The speaker said that the various meetings scheduled by the College League of Massachusetts for next week has been postponed because of Governor Wilson's determination, not to make any speeches until October 21. When Colonel Roosevelt will probably be able to continue his stump campaign.

The Harv and Hounds run at Dedham tomorrow afternoon. The names and dates of a previous run will be made at the high School Gymnasium. Blue and drawing rooms will also be available.

The winners are returners to come out if possible. The train leaves Dedham at 3:30 P.M. The annual tour trip is a quarter.

The winners of the University of Illinois have a novel small specialty made University cup to all athletes who have taken every year that have been sold.

Guess I'll have to see "Good Old Burke the Tailor" pretty soon.

That big brother of mine told me to be sure to call on him at 18 School St., or to see Tom Hayes at 133 Washington St., as soon as I landed in Boston, and the bunch here tell me that was good dope.

THE TECH

Morning Delivery

The TECH is prepared to deliver the paper before 3 a.m. to all students residing on the following streets: St. James Avenue, Newbury Street, The Fenway, Westland Avenue, Huntington Avenue, below Massachusetts Ave., St. Boltoph and cross streets.

Send a Postal to Circulation Manager

and the Service is yours. All men on these streets who have bought Subscription Books, can have this service by turning in Book to us with name and address.

ELOQUENT T. C. A. TALK
BY DR. GEO. A. GORDON
Spokes on Most Vital Phases of Christian Life and Character.

Dr. G. A. Gordon was introduced by C. W. Brett. He began his talk with a compliment to Technology, which he heard from an English nobleman who is regarded as an authority on the subject. The latter stressed the idea of sending one to the Institute instead of to some English college, that "the Massachusetts Institute has no peer in the English-speaking world.

Dr. Gordon then dwelt on the subject of human brotherhood, particularly as exemplified in prayer. He quoted the two direct objects of the Christian religion as the production of light and of power, which he termed by the idea of theory and practice.

He went on to say that there were two great results of Christianity, the first being the establishment of ideals and religious results in the world, out of which is evolved the idea of duty, the back-issue of Christianity.

The second great result is the conception of the dignity of human nature, and the effort to subdue the lower elements of one's character, which, he believed, compared to a hound-headed monster. He concluded with an exhortation that, although we have only one life to live, we should make the most of it, and devote it to the service of the human race.

Before Dr. Gordon's talk, Harold Tenseit, '15, who has been active in Goya Club work, urged the men to take part in the production of power chemical

The Freshmen of Oberlin College, overwhelmingly defeated the Sophomores in their annual "Gating-up" contest. At the end of festivities it was discovered that only five Freshmen were left, while all the Sophomores, numbering sixty, were within the Freshman enclosure.

Our Prof's faults are many, Freshmen's are only two;
Everything they say
And everything they do.

CAHMLIC SOCIETY
(Continued from Page 1)

stories of the more personal side of the Congress of Applied Chemistry that he has just been attending. He said that the spirit of the whole Congress was one of appreciation of the great progress that chemistry is making and will make in the coming years.

He spoke in detail of the two papers on the station of atmospheric nitrogen. Besides the oxidation process, there is a new one which attains a much higher efficiency than the old reaction of hydrogen with nitrogen in form

He also described the lecture given by Professor Dostler, the head of one of the gigantic chemical companies of Germany. He told of the production of electrochemical iron and zinc from nitric hydrogen that when it is used in the construction of electrical machinery, it increases the magnetic efficiency of the latter 50 per cent. He also spoke interestingly of production of power chemically, of artificial refrigeration, of almost perfect dyestuffs, of synthetic medicines and beauty of the artificial production of rubber.

As a startling finish to his speech he said that he had already arranged for two leaders in chemical engineering to come within a month or two to address the society. He also said that the note that the members of the society could do to help it was to attend all the meetings enthusiastically and in large numbers.
