WIRELESS SOCIETY HOLDS FIRST MEETING

Eleven New Members Elected
Purpose of the Society Explained.

Thursday afternoon the Wireless Society held its first meeting of the year at which twenty men interested in wireless in this branch of science were present. President Affo presided and gave an outline of the aims of the society for the benefit of the new men present.

The principal object, he said, was to get the men together in the Institute who are interested in wireless, in order that they may learn more about it and be able to carry out experiments that should increase its useful ness. The society maintains a lab of its own for experimenting, and all the members of the society are at liberty to use the instruments at any time and to try out experiments of their own. At the regular monthly meetings it is planned to have men prominent in wireless work speak to the fellows, and it is also planned to have a member of the society present at a paper at one of the meetings.

The Vice-president, Mr. Richardson, then addressed the society. He proposed the following names for membership to the society: L. W. Curniff, Y. M. Chu, L. L. Connelly, R. E. Windle. They were unanimously accepted by the society. Mr. Richmond explained and the men will be told how to get the men together in the Institute for experimenting, and all the members of the society are at liberty to use the instruments at any time and to try out experiments of their own. At the regular monthly meetings it is planned to have men prominent in wireless work speak to the fellows, and it is also planned to have a member of the society present at a paper at one of the meetings.

EDITORIALS

The fact that there have been several cases where members of the Union were seen wearing their hats in the Union during the last few weeks is evidence of a condition among many of the students where all men should be constrained in their style of writing. The Union was established as a club for the proper length. It is, however, true that writers will not be constrained in their style of writing. The Content Committee must be asked to enter the competition. The following are the complete rules:

1. All editorial writers must have the same, close and address of its writer on which day on which it is due.

2. Each editor must be addressed at least seventy-five per cent. of the subjects to qualify, and more credit will be allowed the contestant who writes on all subjects.

3. Content Committee shall use their own judgment as to style and way of handling each subject, but shall refer to the editorial columns of THE TECH for the proper length.

4. Two subjects will be given out weekly during the first period of the contest, the first of which will be due on Tuesdays, and the second on Fridays.

5. Each subject for the editorial columns of THE TECH will be written on Saturday, and the second on Wednesday.

6. The information upon which each editorial is based must be obtained from some source.

7. The manuscript of the editorials must be neat and present a good appearance.

The subject for Tuesday's editorial is: "The Value of Professional Societies.
The subject for Tuesday's editorial is: "The Value of Professional Societies."

M. E. SOCIETY TRIP TO WATERTOWN ARSENAL
First Trip of the Year Proves To Be a Big Success.

Yesterday afternoon about forty members went with the Mechanical Engineering Society on the first trip of the year to the Watertown Arsenal. The party was shown the different shops in the making of guns. They were first taken to the foundry, where they saw the metal poured into the molds. The men also had a chance to see a pneumatic converter in operation. From there they went to the testing shop, where the gun carriages are assembled. Next the machine shop and the forge shop were visited, where trip hammers and drop hammers were in operation. From there the visitors went to the testing house, where they saw the 1,000,000 pound testing machine which is used for testing out all materials. Everybody had an enjoyable time and expressed themselves as having been on the best trip ever taken by the society.
