Not finished.

Notices.

- This score is not final as the Discus is to be thrown Tuesday.
- The result, perhaps, changing the relations of the Freshmen and Sophomores.

Saturday afternoon the Juniors easily defeated all the other classes in a Fall Handicap Meet at the Field, before a large crowd, with a total score of 245 points.

The meet was the best that the Association has conducted for a long time.

The list of entrants was large and each event was closely contested and exciting.

The handicaps in each case were liberal, and only in a few events did the scratch men win.

Williams, in the hundred, with a splendid effort, worked his way through the crowd and finished first with only a 10-yard lead. The 220 was a close race.

C. S. Reid, '15, 10 yards, won the final heat by just the throw of his arms at the tape, the crowd being out Crucikshank, '14, T. H. H., '15, 1 yard.

The score was 180 points in favor of the Juniors.

The winners were:

- 100-yard dash—Won by C. S. Reid, '15
- 110-yard dash—Won by T. H. H., '15
- 110 hurdles—Won by T. H. H., '15
- Mile run—Won by C. S. Reid, '15
- Two-mile run—Won by T. H. H., '15
- High jump—Won by A. B. Curtis, '15
- Hammer throw—Won by T. H. H., '15
- Discus—Won by C. S. Reid, '15

Not finished.

The field events were heavily burdened with jumpers and throwers.

McLeod, the Junior, again showed his ability by getting a first in the shot-put, broad jump and hammer throw.

The discus throw was not finished because of the coming of darkness.

The score was 351 points in favor of the Juniors.

The summary is as follows:

- 109-yard dash—Won by H. S. Williams, '15
- 110-yard dash—Won by T. H. H., '15
- 110 hurdles—Won by T. H. H., '15
- Mile run—Won by C. S. Reid, '15
- Two-mile run—Won by T. H. H., '15
- High jump—Won by A. B. Curtis, '15
- Hammer throw—Won by T. H. H., '15
- Discus—Won by C. S. Reid, '15

The ballots for the Sophomore and Freshman elections must be paid. For the most part, trying only one forward pass, which did not meet with much success, ran Scully more closely for the majority of the game.

The Sophomore eleven played all the kindred circles around the Rindge Calendar, with the exception of the Sophomores, due to a large crowd, with a total score of 381 points.

The summary is as follows:

- 109-yard dash—Won by H. S. Williams, '15
- 110-yard dash—Won by T. H. H., '15
- 110 hurdles—Won by T. H. H., '15
- Mile run—Won by C. S. Reid, '15
- Two-mile run—Won by T. H. H., '15
- High jump—Won by A. B. Curtis, '15
- Hammer throw—Won by T. H. H., '15
- Discus—Won by C. S. Reid, '15

The summary is as follows:

- 109-yard dash—Won by H. S. Williams, '15
- 110-yard dash—Won by T. H. H., '15
- 110 hurdles—Won by T. H. H., '15
- Mile run—Won by C. S. Reid, '15
- Two-mile run—Won by T. H. H., '15
- High jump—Won by A. B. Curtis, '15
- Hammer throw—Won by T. H. H., '15
- Discus—Won by C. S. Reid, '15

It is understood that the results will be published in the Rindge Technical.
Sir William Ramsay to Discuss the Discovery of Argon

Tonight Sir William Ramsay will give the third lecture in his course on "The Discovery of the Gases of the Atmosphere." At the lecture Thursday he concluded with the discussion of Cavendish's discovery of argon.

Tonight he will begin with the rediscovery of argon, which Rayleigh and he made while investigating the natures of the air. He said at the end of the lecture Thursday that he would be able to illustrate the production of argon on a date on the scale.

A week ago last Friday Sir William Ramsay was given the honorary degree of Doctor of Laws at the John Hopkins University at Baltimore. John Hopkins has in its president a man who is one of the leaders of chemical thought and progress in America, its Rumania. Ramsay is well acquainted with Sir William Ramsay, for he was assistant in the laboratory of the University of Tubingen, where Ramsay entered the laboratory as a student. It was related that Ramsay came to the little-used front door, and after having knocked and as the sound Ramsay came to the door with his hands grasping the cold door from which he had been working.

After receiving the degree Sir William made a brief speech of thanks, mentioning his kindly recollection of the long essay which Professor Hutton used to make him write at Tubingen, and expressing his gratification at being honored by an institution which was practically responsible for the present methods of higher education in America.

Guys I'Il have to see "Good Old Burke the Tailor" pretty soon.

That big brother of mine told me to be sure to call on him at 18 School St., or to see Tom Hayes at 843 Washington St., as soon as I landed in Boston, and the bunch here tell me that was good dope.

ROGERS STEPS FOR TECH SHOW.

Why does no writer of the Tech staff ever write of his acts or Rogers Steps, with a chorus of humming students and the passing of cadets? The scenes which belong to the Steps are varied, and might include the a little-known best ruse, with perhaps the cool heroines bravely dash- ing into the crowd of triumphal Hornemans, demanding or implying that they set free her captured Wilder Freeshman, and not stain their hands in their innocent blood. The possi- bilities of the suggestion are certainly large enough to make the idea worth consideration by watchful drama- nauts.

MEETING OF N. E.
WIRELESS SOCIETY
New Law to Be Discussed at
Public Gathering in Walker
Building.

An open invitation to all those interested
in wireless has been extended by the
New England Wireless Society to attend
the first meeting of the year, which is to
be held next Monday in Room 23 Walker
Building, at 8 o'clock. This society was
formed last year and numbers of the
M. I. T. Wireless Society, the Harvard
Wireless Society, the Tufts Wireless Society
and the original N. E. Wireless Society are
eligible to join it. All business men interested
in the advancement of wireless and the
protection of the amateur are also invited to
join, as the society was formed by a number of such men.
This meeting is to be public and
to help revive the society. Mr. Mel-
vilie Eastham, the president of the
society, will tell those present about
its aims, and also take up the
subject of membership. The dues
are one dollar a year, and up to January
first no initiation fee will be charged.
The principal talk of the evening will be given by H. H. Rich-
mond, the vice-president of the M. I.
T. Wireless Society, who will discuss
methods of reducing wave lengths to
50 meters without reducing the
efficiency of the station.
In connection with Mr. J. H. Ellis,
an instructor in physics at the In-
stitute, and Mr. M. Eastham, of the
Clapp-Eastham Co., Mr. Richmond
has been conducting experiments
that he will tell about. Mr. H. E.
Upton, the former president of the
society, will discuss the new wireless
law which has recently been enacted
from the legal point of view. He
will tell its principal requirements
and how to meet them and also how
to obtain a license to operate a sta-
tion having a wave length of over
500 meters. Mr. Richmond is to tell
how to make a high-powered station
conform with the letter of the law
without hurting its efficiency, and
Mr. Upton will tell those who don't
want to do that how to keep their
original station and still be obeying
the law.
Mr. P. L. Ducharme, who has been
doing some experimental work with
the Clapp-Eastham Co., and who is
now with Stone & Webster, will de-
scribe some of the recent develop-
ments in wireless apparatus. He will
take up the Guiney spark gap in de-
tail and also some of the newest ap-
paratus now used.

TECH EPISCOPALIANS.
Stanley King to Speak at Supper
and Talk Tuesday Night.

Tomorrow evening, at 6:30 o'clock, the
Brotherhood of St. Andrew will
hold a supper and talk in the
Trinity House, 25 St. James avenue.
The talk will be held after the supper,
and is to be given by Stanley King, of
Saint's Haven, in Charlestown. Mr.
King has had a great many interest-
ing experiences and is much sought
after as a speaker.
The Trinity House is always open
to Technology Episcopalians, and
Tuesday night is Technology night.
All who go may be assured of a good
time, and the Brotherhood hope for
the usual large attendance. Similar
affairs will be given Tuesday nights
during this winter. The evening's en-
tertainment will cost any cents.

THE TECH
Morning Delivery
