IMMENSE TORCHLIGHT PARADE THIS EVENING

Progressives of Boston to Participate in Monster Celebration.

At 7:30 this evening the announced monster demonstration of the Progressive Party will take place and all Roosevelt men and others are invited to participate. At 7 P. M., sharp, all M. J. T. Progressives are to meet in Copley Square, where they will be joined by hundreds of others representing various other Massachusetts colleges. Ten or twelve bands in all will take part in the parade, and two or three de luxe wagons will be on hand to greet the Tec enthusiasts, while several will escort the Harvard and Cambridge clubs to this point. From Copley Square the parade will proceed toward town, being joined by the five or ten thousand Boston men and women who will also aid in the celebration. The parade will then proceed to the Boston Common, where many of the people are to be given prominent leaders of the Progressive Party.

The State committee has arranged all, including the reservation of the Commonwealth stage, red flags and music to be furnished free. The only expense incident will be the cost of the fence for torches. Men are urged to bring signs. Transparency and flags, red fire and music will need to be furnished free. The only expense incidental to the parade will be expense for second assistant business manager.

The Freshmen who were to compete in Monster Enthusiasm Great Among Students, with Wilson Club being given the decision unanimously. Professor Clark of Boston University, on giving the announcement of the judges, said that the Progressives improved greatly in their rebuttal. He stated, however, that the Wilson men were the better speakers, had the better argument, and that their points were better sustained.

Pastore as the first speaker of the Wilson Club put the high tariff and the trusts as the cause of the high cost of living. He said that while the Democrats took this as the main issue of the day, the Progressives had cocoonized the question of the day. The protective tariff, he claimed to have been, as it was not a logic club, was present and discussed. The tariff board proposed by the Progressives is considered to be unprofitable for dealing with the great problems of the day. The protective tariff tends toward a raise in prices of all goods which come under it. The taxes paid by the dealer. The tariff in one sense was unnecessary, as the Wilson Club had said.

The tenor of the debate was unimportant, as it was not a debate. The next question was, do the Wilson men have a plan for a Trust Commission similar to the bill passed by the Infant industries commission?

The tariff crisis was attacked in regard to its use for the trusts. The Wilson Club had said the trusts were the cause of the high cost of living. He said that the trusts were the cause. The trusts, he said, were that a large number of candidates will be put up for his employees. The Progressive platform was attacked in regard to its (Continued on Page 2.)

ASSISTANT MANAGER.

Competition for Second Assistant Manager.

W. P. Keith, business manager of the Tech Show, has called a competition for second assistant business manager. The competition will start Monday, November 4. The show will be three days long and the competition will last through the early part of December. The first job of the contestant will be to sell tickets for the Kornman Dinner, and the next work will be to see that advertising is done. The Show will include aeronautics, a fine opportunity for becoming acquainted with the work of advertising. The Show is one of the largest of the student activities, and a position on the business board makes an important opportunity of becoming General Manager in the candidates' future careers.

The Varsity Team Will Lay Out Course for Annual Chase.

The Varsity team is going to run the full handicap course Saturday afternoon, November 2, the race being held at the North Station at 1:15 o'clock and over the Wakefield course, which was used last year. The Varsity team is to be published in the Tech Show, has called a competition for second assistant business manager, and possibly four. The competition will need three assistant business managers and possibly four. The competition will be announced in THE TECH on Monday.

PROGRESSIVES HOLD RALLY IN THE UNION

Mr. Connolly Talks on Characters of Candidates—Calls Roosevelt "Deep Thinker."

Yesterday noon, in the Union, Mr. James B. Connolly, a candidate for Congress on the Progressive ticket, gave a talk on which he spoke of the characters of the candidates for President and of Mr. Birg’s candidacy for Governor in this State. The names of the candidates and so considers himself capable of speaking of them.

Of the Presidential candidates he knows Mr. Roosevelt best, Mr. Roosevelt, he said, is a fine lawyer, but he views the Progressive movement as a sort of a stepping stone. He said Mr. Roosevelt had put a lot of it, he could not commit himself as long. He said that probably Roosevelt would not be as keen as he thought he was. In coming to the South and in the South, he said that he had the reputation of being a progressive and as such he is called a progressive because he was the man in power and that in all probability the Bull Moose party would be just as bad twenty-five or thirty years from now.

In turning his attention to Mr. Bird and Mr. Roosevelt he said that he had a little better than that, and that in all probability the Bull Moose party would last twenty-five or thirty years from now. In turning his attention to Mr. Bird and Mr. Roosevelt he said that Mr. Roosevelt had the better man for the presidency and that he was a man who entirely suited him. Roosevelt was fooled at first but not for long. In speaking of the corruption of the parties he said that the Republican party had been allowed to be the worst because it was in power, and that in all probability the Bull Moose party would be just as bad twenty-five or thirty years from now.

WEATHER

Forecast for Boston and vicinity: Saturday, fair and colder; high southwest to northwest winds.

ELECTION RESULTS
OF CLASS OF 1914

A. T. Wymans, Elect President
For Class "Results Are
Close.

The election of officers for the Class of
1914 was held with the following
results: The number of votes cast
was quite large and the result in
many cases was surprisingly close.
A. T. Wymans was elected
president with a vote of 53 against 22 by
For vice-president, P. E. Morrill led with
35, while D. D. Dunn was second,
with 33, and H. H. Richards next, with 20.

For class secretary, P. H. Taylor
won with 49 votes. C. H. Ober received
second, with 22, and A. R. Stubbs
third, with 13. The vote for the
class treasurer was very close. T. J. Dur-
field received 25, L. F. Hamilton 25,
and A. T. Wyman 23.

For executive committee, G. E. White-
well, with a total of 55 votes; and,
H. Mayer, with 46, were elected.
W. R. McIver had 41; F. Mackenstape,
with 39, came next.

T. H. Clane and A. H. Waitt re-
ceived 60 and 43 votes, respectively.
The vote was divided into 59 votes.
C. E. Pox and T. H. Garding were elected
for the athletic association, with 62
and 43 votes, respectively; C. D. Bryant
received 49 votes, and A. P. Nye 27.

JOINT DEBATE. (Continued from Page 3.)

The contest this year will be of
unusual interest. It has been four
years since an even closer has won,
and it is determined to win back
at any cost the lost laurels, while
1915, ascertain lest the idea of the
candidate, work hard, and make his name
more
prominent, and the result in
the elections is very close.

SOPHOMORE GAME.

Second Year Team Will Play Lowell Textile School.

The Sophomores play their last football game before Field Day this afternoon, when they meet the Lowell Textile School eleven at Lowell. The Lowell team has a bunch of heavy men, and this will give the Sophs a chance to see what they can do against a heavy line.

Captain Scully requests that all men be at the North Station at a quarter to one to take the o’clock train for Lowell. The probable lineup for the game, with the exception of the tacklers, will be as follows: End, Howlett and Fletcher; guards, Murphy and Quirk; center, Boynton; quarter- back, Scully; halfbacks, O’Drury and More, and Hershey, fullback. All the others who are out for the team will also probably get in.

WIRELESS MEETING.

All Men Interested Are Invited to Attend.

At 8 o’clock this evening the New England Wireless Society will hold its first meeting of the year in 21 Walker Building, and all men interested are invited to attend. The membership of the New England Wireless Society is open to all men who are in any way interested in wireless and its applications, including members of the M. I. T. Society and those of other Massachusetts colleges.

Among the prominent men who will speak are Mr. Melville and Richmond Eastman, the president of the New England Wireless Society, and Mr. H. B. Richmond, vice-president of the M. I. T. Society, who will explain the aims of the club and those of other Massachusetts colleges.

The uses of uranium and its compounds are comparatively few, the mineral being chiefly employed principally for making yellow glass, for yellowing glass on pottery, and in a less degree as a chemical reagent. Yellow glass made with uranium oxide is known as “opaque yellow.” Direct light shining through it gives a yellow color and indirect light a peculiar yellow. Some of the forms which have been attempted to use uranium in the manufacture of steel have been abandoned such experiments, the uranium being made that it apparently has the same properties as tungsten and is very much more expensive.

FIELD DAY EDITORIAL PUBLISHED ON PAGE TWO

One of Best Submitted for Contest — Subject for Optional.

The first of the editorials written by the competitors for the prize of value from five to ten dollars, given by the Pi Delta Epsilon Society for the best of a series of editorials that are to be submitted, each one for a period of six weeks, is printed today on page two. This editorial was selected from among those that were submitted, but it does not necessarily imply that it was the best, but rather the best entered in the contest.

The subject for the editorial that is due on Tuesday is optional, the choice being wholly with the contestants. No restrictions are placed upon the field from which the subject shall be chosen. Following are the rules of the contest as formulated by the committee:

1. All contestants must have the same, class and address of its writer on each page.
2. Each editorial must be addressed to Pi Delta Epsilon Contest Committee and left at the Cage or in the upper TECH office by 5 o’clock on the day on which it is due.
3. Each contestant must have written an at least successful per cent of the subjects to qualify, and more credit will be allowed the contestants who writes on all subjects.
4. Contestants shall use their own judgment as to style and way of handling each subject, but shall refer to the editorial columns of THE TECH for the proper length.
5. Two subjects will be given out weekly during the first period of the contest, the first of which will be due on Tuesdays, and the second on Fridays. The subject for the editorial due on Tuesday will be published Saturday, and the second on Wednesday.
6. The information upon which editorials are based may be obtained from any source.
7. The manuscript of the editorials must be neat and present a good appearance.

URANIUM PRODUCTION.

United States Prominent in Mining of This Element.

There is considerable popular interest in uranium in the United States on account of its connection with radium, the properties of which appear so marvelous when compared with those of more familiar materials. But very little uranium is mined in this country except as it is incidentally taken out from the ores used for the extraction of radium. In 1911 the uranium mined amounted to about 21.2 tons. A few hundred pounds of pitchblende, mined from the German mine, at Central City, Colo., but this material was not sold, as it was said to have been used in experimental work. The extraction of radium has been attempted in the United States by several persons and firms. Some of these have given up their efforts, but others are still at work, with what success is unknown.

The uses of uranium and its compounds are comparatively few, the mineral being chiefly employed principally for making yellow glass, for yellowing glass on pottery, and in a less degree as a chemical reagent. Yellow glass made with uranium oxide is known as “opaque yellow.” Direct light shining through it gives a yellow color and indirect light a peculiar yellow. Some of the forms which have been attempted to use uranium in the manufacture of steel have been abandoned such experiments, the uranium being made that it apparently has the same properties as tungsten and is very much more expensive.

Another Year Ahead of Him

May it be a happy one—may he always have Fatimas.

We wish you a happy New Year.
