

# THE TECH

VOL. XXXII. NO. 32

BOSTON, MASS., WEDNESDAY, NOVEMBER 6, 1912

PRICE TWO CENTS

## SOPHOMORE DINNER COMES FIELD DAY

Dinner to Be Held in the Union  
Just Before Theatre Time—  
Tickets Out Soon.

The Sophomores will hold their annual class dinner at 6 o'clock on the evening of Field Day, November 8th, at the Union. The price is fifty cents. Tickets will soon be on sale at the Cage, and are also to be sold by several members of the class.

The class would have been notified earlier except for the delay occasioned by the tie in the class elections. The management wishes it understood that the affair will be over in ample time for Tech Night at the Shubert Theatre. The speakers will be announced later.

## FRESHMAN FOOTBALL.

Maier Elected Captain—Team  
Does Fine in Hard Scrimmage.

After their drubbing at the hands of the Juniors, the Freshman eleven went through a hard drill yesterday, in which they gave plenty of evidence of being able to play a snappy game. Coach Cuddy worked the men severely, and after the hard session he seemed well satisfied with the showing the men made, and is quite hopeful for a win by his charges on Field Day. Several new men have come on the squad recently and some of them will undoubtedly make good. Among them is Foote, a former Newton High and Stone School player, who promises to be a valuable addition to the team, and Krieger, who is playing a slashing game at left tackle.

Today a practice game is scheduled with the Day School of the Boston Y. M. C. A., which will be the last scrimmage work the men will have before Field Day.

The Freshmen chose their captain Monday. The popular man was Maier, who has been playing a great game at fullback, and is the star of the team.

## MEETING OF CATHOLICS.

Dinner and Gathering to Be Held  
in Union Tonight.

Tonight the Catholic Club will hold the first of its regular monthly dinners and meetings in the Union at 6 o'clock. Steward Colton will serve a special dinner upstairs, and Mr. John C. Johnson, a prominent Boston lawyer, will address the fellows afterwards on "Socialism."

The arrangements for the annual dance will also be discussed at this meeting. Judging from the success of this affair last year, a dance second only to the Junior Prom is looked for this year. Many have signified their intention of attending the meeting to-night and a large attendance is looked for.

## INSTITUTE COMMITTEE.

On Thursday afternoon, at 4.15, an important meeting of the Institute Committee will be held in the regular meeting place, Room 8, Engineering "C."

## SIR WILLIAM RAMSAY LIKES POINT SYSTEM

Famous Chemist Makes Interest-  
ing Comments on Education  
in America.

Sir William Ramsay, who is to speak at the Convocation this afternoon, has made some very favorable comments on the American plan of college education when interviewed in regard to his views on student life in this country.

He said he was struck by the power the American student has of taking care of himself. Unlike the students of the English universities, the men in the larger institutions here live for the most part away from the college in fraternity or society houses. There they are under no supervision other than that assumed by the older students, while in England the men are under the guidance of a preceptor. Sir William Ramsay said that he thinks our way is much the better as it gives the student a far greater opportunity for the training of character.

The various student governing bodies, such as our Institute Committee or the student councils of other colleges, he said, were excellent institutions, and had a parallel in the "Unions" of the British universities. As an instance of the way that the students dealt with offenders, he said that while he was at Williamstown two students were brought before the Student Council there and were given for their misdemeanor a punishment far more severe than any that the faculty would have given.

He said that he was very much impressed with the way that the Point System worked out here at the Institute, and thought it would be an excellent thing for him to start at his own university.

Sir William has had very little time during this visit to America to observe the student life here, but on his previous visit he became acquainted with the more prominent features of American college life.

His speech at the Convocation this afternoon, and his lecture before the Lowell Institute tomorrow night will probably be the last affair that he will attend before returning to England.

## TECH NIGHT SEATS.

Tickets on Sale for Last Time  
This Noon in Rogers.

This noon will be the last chance to get seats for Tech Night. After that the seats are returned to the theatre and sold to the public. Those who want to take part in the celebration should be on hand this noon in Rogers' Corridor.

About three-quarters of the orchestra seats have been sold, and five rows in the balcony. Seats will be exchanged this noon for the sales slips first issued.

The Freshmen have to face the Gym work just as soon as Field Day is over. They will have, however, a few upperclassmen to keep them company for a few months. This year Mr. Kanaly's assistant will be Rooney, '15.

## TALK ON BUILDING OF EAST BOSTON TUNNEL

Civils Will Listen to Illustrated  
Lecture by C. P. Gow  
Tonight.

Tonight, at 8.15 o'clock, at the Union, the Civil Engineering Society will listen to a talk on tunnel construction by Mr. C. P. Gow, a member of the Boston Transit Commission. A part of his time will be spent telling about the building of the East Boston Tunnel, on which he was consulting engineer.

This tunnel was completed about 1905, after two years of hard labor. The Boston end is at Scollay Square in the Tremont Street Subway. From here it goes under Boston Harbor to East Boston. It was the first tunnel to be dug below the basin of a harbor, and was therefore a very difficult engineering feat, because the work had to be carried on with the use of shields and under a pressure of about 40 pounds to the square inch.

The Boston Transit Commission builds all the tunnels and subways in the city, and then the street railway companies of the Elevated Railway Company leases them from the Commission. This Commission, of which Mr. Gow is a member, has constructed the Cambridge Tunnel and done other engineering feats around the city which will be worth hearing Mr. Gow talk about.

## CONVOCATION TODAY.

Sir William Ramsay Will Ad-  
dress Student Body This Noon.

At the Convocation this afternoon Sir William Ramsay, who has been giving a series of lectures before the Lowell Institute on "The Discovery of the Gases of the Atmosphere," will speak on some very interesting topics. He is known the world over for his work in connection with gases, for he is the discoverer of most of the elements of the argon group, and has made extended investigations of their properties and applicability. He is head of a university, and as such is interested in student government.

Sir William Ramsay received the Nobel medal for his work, and has received scores of other honors. Just before he began the series of Lowell Institute lectures he was given the honorary degree of Doctor of Laws at John Hopkins University, the home of his old friend and teacher, President Ira Remsen. Sir William Ramsay has proven a very interesting man, and so the desire of President Maclaurin, that all students be present, will meet with a hearty response from the student body.

## FOOTBALL OFFICIALS.

Major Briggs has announced that the officials chosen for the football game between the Freshmen and the Sophomores on Field Day will be men not connected with the Institute. Mr. J. B. O'Reilly of the Dorchester High School will act as referee. Mr. S. L. O'Brien, English High School, will be umpire and Fred J. Hoey of the Boston Journal will be head linesman.

## SUBJECT OF EDITORIAL CONTEST GIVEN OUT

"Tech Songs in Union" Is Subject  
of Next Editorial, Due  
Friday.

"Tech Songs in the Union" will be the subject of the next editorial in the Pi Delta Epsilon editorial contest, due Friday at 5 P. M. This is the fifth subject, and there are eight more to be written upon. The subjects have received due consideration from many of the students, and the editorials have been, for the most part, well written. It may be said that because a man's first work is not printed, he must not assume that he is by any means out of the contest. One of the conditions for first prize is continuous and progressive work. A prize will be given to the winner of the contest, and he, with other contestants, will be elected to the editorial board of THE TECH.

Following are the rules of the contest:

1. All editorials must have the name, class and address of its writer on each page.
2. Each editorial must be addressed to Pi Delta Epsilon Contest Committee and left at the Cage or in the upper TECH office by 5 o'clock of the day on which it is due.
3. Each contestant must have written on at least seventy-five per cent. of the subjects to qualify, and more credit will be allowed the contestant who writes on all subjects.
4. Contestants shall use their own judgment as to style and way of handling each subject, but shall refer to the editorial columns of THE TECH for the proper length.
5. Two subjects will be given out weekly during the first period of the contest, the first of which will be due on Tuesdays, and the second on Fridays. The subject for the editorial due on Tuesday will be published Saturday, and the second on Wednesday.
6. The information upon which editorials are based may be obtained from any source.
7. The manuscript of the editorials must be neat and present a good appearance.

How many of the lectures by Sir William Ramsay did you miss?

## WEATHER.

Forecast for Boston and vicinity:  
Warmer today and unsettled weather;  
moderate southwest winds.

## CALENDAR.

Wednesday, November 6, 1912.

WEDNESDAY, NOVEMBER 6, 1912

We are more than glad to print another editorial, which was considered among the best in the Pi Delta Epsilon Contest, on the first subject, "Field Day." We shall publish others from time to time on the several subjects as the contest progresses.

### FIELD DAY.

The statement is oftentimes made that Tech men are noticeably lacking in what is popularly known "as college spirit." To a certain extent, perhaps, this may be true, for the nature of the work at the Institute leaves little time for social life as it is carried on in other colleges, and the distribution of students in so many different parts of Greater Boston makes it correspondingly difficult for the entire body to assemble very often. Still the opportunities for class spirit are many, and probably the greatest of these is on Field Day, when the two lower classes meet in friendly rivalry on the athletic field. In recent years Field Day has come to be recognized as the most popular event in undergraduate life, and the attendance and enthusiasm have greatly increased with each succeeding class. In later years, after we have left the Institute and entered upon our life work, we will always look back with pleasure upon these brilliant days in our college life, and events such as Field Day will be remembered long after everything else has been forgotten. After all, these gatherings form no small part of our college life, and the man who misses them is losing a great deal. And so let us strive to make Field Day this year more successful than ever before. Let us turn out in a body to cheer our classmates at the Field and encourage them with our support, and let us make "Tech Night" at the theatre a night which will linger long in the memory.

### WERLICH IS PRESIDENT.

Sophomores Elect P. M. Werlich On Second Ballot.

P. M. Werlich defeated E. E. Alt for the presidency of the Sophomore class by the close vote of forty-two to thirty-six on the second ballot. Werlich has been captain of the 1915 relay team both last year and this; he was on the crew last year, and has been prominent in class activities. He was prominent in athletics at the Asheville High School, N. C.

## ALL TECH SHOW BOOKS DUE THIS AFTERNOON

### Students Who Have Not Finished Are Expected to Submit Parts of Books.

This afternoon, at 5 o'clock, the books for Tech Show, 1913, must be in the Show office. Attention is called to the requirements as stated by the management some days ago. The books must be typewritten or very neatly written by hand, and the pages must be written on one side only and securely fastened together with a suitable cover. The management of the Show are anxious to have as much material to choose from as possible, and all who are writing books and have not finished them are urged to submit them just the same. Should any partly finished book show exceptionally good qualities more time could be allowed for finishing it later. It is probable that about six books will be submitted, and the indications point toward the best book ever written for the Show. All books should be plainly marked for Manager Charles P. Fiske of the Stage Department, with the number corresponding to the one on the sealed envelope. These envelopes, already numbered, may be obtained at the Cage. Each author should number his book with the number on the envelope and write his name on the card in the envelope and hand both the sealed envelope and the manuscript in at the Show office.

### IMPORTANCE OF WATER.

#### California's History Shows Value of Water Supply.

The great part which the water resources of California have had in the development of the State is evident throughout its history. In 1848 some repair work being done on a mill race near Georgetown, in Eldorado County, led to the discovery of gold, and this was followed by the rush of the "forty-niners," whose exploits have become classics in mining literature. The subsequent development of gold mining in California was due largely to the location of the deposits near the water necessary for hydraulicking. Moreover, the water available for irrigation and domestic supply has been the chief factor in the development of southern California, which now has a population of over a million people. The growth of the extensive irrigation systems in the great interior valley of the State is bringing about the subdivision of this area into small ranches devoted to intensive farming, which affords almost limitless opportunities to the agriculturalist. Again, an increased water supply for the city of San Francisco is urged as one of its greatest necessities, and more water for Los Angeles is to be brought from Owens Valley—a distance of more than 290 miles—at a cost of \$23,000,000.

Many torrential streams of California afford abundant power, the utilization of which in manufacturing enterprises and in transportation has been made possible by the progress of electric power transmission during the last decade; today California probably leads the United States in the number and length of her power-transmission lines.

Information concerning the quantity of water carried by California streams has therefore been and will continue to be a highly important factor in the development of all these resources, for the fundamental importance of stream-flow data is now so thoroughly recognized that it is almost impossible to finance any project depending upon stream flow without presenting authentic records of flow covering a period of years.

# PINKOS

## College Tailor

338 Washington St.  
BOSTON

Harvard Square  
Cambridge

Please call to see my line of Foreign and Domestic woollens which I make at **\$35.00 to \$50.00**. This line embraces every desirable Cloth and Pattern and no other tailor has as large a variety to select from.

## Special Announcement

To prove the value of this advertisement I will allow a discount of \$5.00 to every man who orders a suit or overcoat within two weeks if a copy of this advertisement is presented.

## Pinkos

College Tailor  
Cambridge  
Boston

Guess I'll have to see "Good Old Burke the Tailor" pretty soon.

That big brother of mine told me to be sure to call on him at 18 School St., or to see Tom Hayes at 843 Washington St., as soon as I landed in Boston, and the bunch here tell me that was good dope.

**TENNIS TOURNAMENT REACHES SEMI-FINALS**

Woodbridge, Fisher, Stewart, Roy and Tirrell to Pair for Semi-Finals.

This week the Fall Tennis Tournament has reached its fourth round with one more match to be played in this round. The winners of these matches will get directly into the semi-finals as all other matches have been defaulted because they were not played within the time limit. The doubles have progressed through the first round with one match yet to be played. As with the singles, the winners of this round will be in the semi-finals.

The results of the singles: B. E. Woodbridge, '16, defeated T. C. Fisher, '13. Score, 1-6, 6-1, 7-5. H. R. Stewart, '16, defeated J. B. Wirt, '15, in straight sets. Score, 6-1, 6-0. W. G. Tirrell defeated G. W. Blakely, '14, in two straight sets. Score, 6-4, 6-3. K. W. Roy, '15, and H. A. Sweet, '13, have not played their match as yet.

The results of the doubles is as follows: First round, G. W. Blakely, '14, and F. Hurlbutt defeated F. B. Bartlett and M. S. Mumford in three sets. In the first two sets the games were close, but in the last game the winners allowed no games to the losers. Score, 4-6, 7-5, 6-0.

**GASOLINE FROM GAS.**

During the last three years the separation of the more volatile grades of gasoline from natural gas issuing from oil wells has become a profitable industry of increasing importance. The industry did not progress as rapidly in 1911 as was expected. Undoubtedly it will eventually become a settled and flourishing business, for millions of cubic feet of gas that is now wasted on leases might be converted into gasoline, should the demand and price warrant it. The United States Geological Survey last year attempted to compile figures of production of gasoline from natural gas, but many plants were operated intermittently and no records were kept of the output. Statements from such producers could only be estimated. However crude the method of manufacture, a report of the quantity of gasoline produced shows an output in 1911 of 7,425,839 gallons, with an estimated value of \$531,704.

**FIELD DAY TICKETS.**

Field Day grandstand tickets now on sale at the Union every day during the noon hour are fast going. The middle section is entirely sold and only a few seats left on the side sections. W. G. Thomas, who is managing the sale of tickets, says that with fine weather conditions a record crowd may be expected.

Ice hockey is likely to become a regular sport at Brown University this winter. The growing interest in the Canadian sport is noticeable everywhere and the College hill men have good material with which to build a seven. There is no indoor rink at Providence, but there generally is good skating on the river there. It is likely that an indoor rink will be built if it is decided to adopt the game this year.

Technology Men will make no mistake in depending upon this Great Store for the Newest and Best Ideas in

Clothing, Hats,

Shirts, Haberdashery,

Shoes, Hosiery

and in fact everything -- that has a place in the College man's wardrobe.

All Men's Goods are in our men's store section separate from other parts of the store and having direct entrances from Avon and Summer Streets.
