CANDIDATES FOR THE TECH MEET THIS NOON

Candidates For The Tech Meet in Lower Office in Union at 105 O'clock P. M.

This noon, at five minutes past one o'clock, there will be a meeting of all men who intend to come out for a position on THE TECH. The meeting will be held in the lower of THE TECH office in the Union. A large number of candidates are expected out, and already many have signed their intention of competing for a place. It is very vital to THE TECH that a large number of the students take enough interest in the paper to give a small portion of their time to work, and indeed unless there is a sufficiently large number of candidates there is great doubt as to whether THE TECH will be able to continue.

At the mass meeting held in Huntington Hall last Friday it was brought very clearly and forcefully before the student body that THE TECH was a very valuable asset to student life, Institute spirit and the success of Institute activities, and it was clearly shown that support of the shape of men to come out and work on the paper was needed in order that the paper should continue. It is not ten or fifteen men who are wanted, but fifty, and every student who is interested to the extent of devoting a part of his time to the student daily is urged to be present at the meeting of all candidates this noon in the lower office of THE TECH in the Union.

The Alumni of Yale will erect a twenty-story club house on the site of the present one in New York City. It will cost about $1,000,000.

DARTMOUTH CROSS COUNTRY TEAM WINS

Taber of Brown First Man to Finish - Technology Gets Third Place.

By bunching four men at the finish Dartmouth was able to win the first annual cross-country race of the New England Inter-Collegiate Athletic Association over the Technology course in the Union, with a score of 29 points. N. E. Fisher, the crack Brown runner, captured first place honors for his in the time of 23 minutes, 14.5-seconds, after a hard race with Hall of Dartmouth, who finished a second after him. The Institute team finished third with 25 points, while Brown came off with second place with a total of 29 points. H. S. Benson, the speedy freshman, was the first Technology man to come in finishing in sixth place. F. J. Wall and R. E. Palmer finished in 14th and 15th places, respectively, and R. D. Bonney crossed the line in 22nd place.

WALDEMAR LINDGREN COMES TO INSTITUTE

Succeeds Prof. Jaggar as Head of the Department of Geology.

Waldemar Lindgren, chief geologist of the United States Geological Survey at Washington, is coming to the Institute to take the place of Professor T. A. Jaggar, Jr., as head of the Department of Geology. Professor Jaggar is still connected with the Institute, however, and is doing work in Hawaii.

Professor Lindgren is a man of national prominence in geological circles. He was born and educated in Sweden, has been employed by the United States government since 1890, and his specialties have been mining geology and economic geology of metallic deposits. He is a member of the National Academy of Sciences, Geological Society of America, American Institute of Mining Engineers, and of the Mining and Metallurgy Society of America.

1914 CLASS PICTURE.

Men Will Meet On Rogers Steps Tuesday at One P. M.

Tomorrow noon, at 1 o'clock, the 1914 class picture for Technique, 1914, will be taken on Rogers steps. Almost every Junior has Political Economy in Huntington Hall from 12 to 1 o'clock Tuesday, so every member of the class should appear in the picture. The picture was to be taken last Thursday, but owing to the weather conditions was impossible.

LARGE ATTENDANCE ON ARABIAN-INDIAN NIGHT

Cosmopolitan Clubs Present at Entertainment Conducted by Mr. Sallibi.

Never before were so many professors together at a student social as at the Arabian-Indian Night of the Cosmopolitan National Nights on Saturday evening. In nearly every case they were accompanied by ladies, and together with the unique decoration of the Union, which was for the time given the Increased flavor of the East, the gathering was an extremely amusing one.

President Lehman welcomed the audience and announced that on the third night of this month the Anglo-American members of the club will hold a dance in lieu of a national event. All of the foreign students are invited to the affair. In case, said he, that some of the men did not dance, card games and other entertainments have been arranged for them, so that the event will be all inclusive of the cosmopolitan members of the Institute. On December 11 there will be held a Chinese night. Mr. Sallibi, the night's chairman, then took charge of the entertainment.

Mr. Sallibi the speaker of the present conflict in which Turkey is engaged. The cause of the war is not, he said, substantially, a matter of religion, but that it is a clash of the twentieth century with the unreasoning, brutish, and militarized government of the Turks. He extended his welcome as a fellow citizen of the world.

Mr. Abd-er Rahlman Ghorayib, 1914, of Beirut, Syria, then lectured on Arabian civilization. He said that many so-called authorities enlarge
Men Will Not Take Part in Inter-Collegiate Race at Ittaca.

The members of the cross-country team will not go to Ittaca for the I. C. A. A. A. race to be held there on Saturday. This decision was reached yesterday and was brought about by two conditions: the track is not in a good financial condition, owing to the fact that they did not receive much money from Tech last year. If the squad made the trip to Ittaca it would necessitate the borrowing of a large sum of money and Dr. Rockwell, chairman of the Advisory Council, feels that this expense should not be incurred unless the team could make a good showing against the other colleges.

Cross-Country.

It was decided that THE TECH takes its rightful place in the affirmative.
MANY MEN OUT FOR WRESTLING SQUAD.

The wrestling squad has started work regularly for the season. From the present outlook a championship is possible. About 15 of the old men are out, including all of last year. The team has secured a coach for the new men who are coming in, and a class of about fifteen freshmen is being held every Wednesday afternoon from 4 to 6 o'clock in the gym. This year the Advisory Council has allowed wrestling to be substituted for Gym, the same as track work is.

There are a number of men out for the squad who have done fine elsewhere and who will materially strengthen the team, George Kelly, a graduate of the University of Oregon, was on the team there and proved a tower of strength in the 195-pound class. Sayer, a freshman, will fill a vacancy in the 115-pound class. Meen of this weight were lacking last year, so Meen was a man in the class and kept it from being the weakest class. Last year Crowell was at work with the heavyweights and proved himself a good steady affair. He did last year and will prove it again this year. Also in the 115-pound class a big strong man will be on the team; Shack and O'Connell.

The class work is all regular for the team: Smythe-Martin, Treat, corsen, Driggett, O'Connell, Crowell, Wilson, Katzenberger, Fins, Kelly, Hunt, Alexander, Burton, Hunt, Fenger and Dodd. The usual practice is half an hour from 5 until 6 o'clock in the Gym.

GEOLGY HEAD.

(Continued from Page 1.)

In this his work in the institute he will cooperate with the United States Geological Survey in connection with their work on the iron mining districts. He will probably take up a position with the Survey next season. It is rumored that he is visiting the Homestake mine in South Dakota.
