

THE TECH

VOL. XXXII. NO. 4

BOSTON, MASS., THURSDAY, OCTOBER 3, 1912

PRICE TWO CENTS

MERRILL TO LECTURE ON AERONAUTICS

**Interest in Aviation Warrants
Introduction of Option in
Course II.**

A new course of lectures on aviation has been introduced in the Mechanical Engineering department. These are to be given by Mr. A. A. Merrill, a Boston man, who has held the office of secretary of the Boston Scientific Society, and has been carrying on investigations in the Institute laboratories for over seven years.

He will take up both the historical and technical sides of aeronautics in a very thorough manner. The latter will cover the methods of obtaining and putting into practice the coefficients of air resistance on various kinds of surfaces, the mathematics of flight, and the efficiency of different systems of control. With regard to the history of aviation, Mr. Merrill will discuss the gradual development of the art of flying and the methods of research used by Lillenthal, Langley, Maxim, Hargrave, Chanute and Eiffel. This course is open to all Seniors in Course II.

For several years the Mechanical Engineering department has maintained a "blowing tube" about three feet square and capable of delivering an air current at a speed of from ten to twelve miles per hour. This has been used by the Seniors in their thesis work and by Mr. Merrill for performing experiments somewhat similar to those carried out in the well equipped laboratories of Eiffel in Paris. Worcester Polytechnic has also allowed the Institute professors and students to use their large whirling table in investigations with regards to propellers.

Aeronautical engineering has been steadily growing in favor with students at the Institute, and last year no less than ten Seniors decided to follow it as a branch of their professional work. One of the Spanish students intends to specialize in army aviation. Without doubt a complete course in aeronautical engineering will grow out of this Course II option, just as electrical engineering has long since ceased to be a branch of the physics department.

At present no other American college is offering a course in aviation even as extended as the one given by Mr. Merrill.

FINANCE COMMITTEE.

**First Monthly Meeting Comes
Tonight in the Union.**

The first meeting of the Finance Committee will be held tonight at the Union, at 6.15 sharp. The affair will begin with a dinner (price, fifty cents), at which the new men on the committee may get acquainted with the older members. Then the party will adjourn to one of the small rooms for the transaction of business.

It is very important that every man, especially the new members, be present on time for this first meeting of the committee.

A brief account of the committee may be of interest to the new men. It includes representatives of all the Institute activities that involve finances. These include: The four class organizations, the seven professional societies, the Athletic Association, the

(Continued to Page 2.)

COMPETITION FOR TREASURER OF SHOW

**Juniors and Seniors Eligible For
Position on Show
Management.**

For the first time in a dozen years the position of Treasurer of the Tech Show is open to competition among members of either the Junior or the Senior class.

This innovation is the result of the management's decision to lighten the duties of the Business Manager, who has found his work more and more exacting from year to year.

The Show management expects all candidates to have had some previous experience in holding a responsible position, preferably financial, in a student activity. The men chosen in this competition will have co-ordinate powers with the Business, Stage and Publicity Managers, and he will choose suitable assistants who will succeed him in the office. The Show wishes it understood that this will be the first and only opportunity for upperclassmen to earn a place on the Management.

The Show office will be open and Manager Weeks will be ready to meet all candidates after 4.10 P. M. today. The work of the Treasurer will consist of such matters as keeping all accounts, writing checks, handling all the Show money, taking complete charge of the ticket sales, and keeping the minutes of the meetings of the Show Management. This position carries with it nine points in the Point System rating.

THURSDAY NOON TALKS.

**T. C. A. Starts Talks With a
Popular Speaker.**

The Thursday noon talks of the Technology Christian Association will begin a week from today. President L. H. Murlin, of Boston University, the man who attracted the record crowd to the Union last year, will be the first speaker. On the 17th, Dr. Gordon, pastor of the Old South Church, will talk in the Union for the T. C. A., and a week later Dr. George A. Crawford, formerly chaplain in the United States Navy, will have something to say.

These T. C. A. meetings are now a regular feature at the Institute. They are held Thursdays in the Union, at 1.30, and they are finished in plenty of time for the 2 o'clock classes. The speakers are men active in college, social and church work, and each brings a message with him.

Secretary Talbot says that many of the men here, especially Freshmen, have not yet received their copy of the Tech "Bible." Any man who has not one yet can get it at the T. C. A. office in Eng. B, in exchange for one of the filled-out information blanks that were distributed at registration.

DRILL OFFICERS.

Major Cole wishes all upperclassmen who will take up work at the Armory this year to let him know immediately on what days they can attend drill. He desires to confer with those whose schedules interfere with this work before they give the matter up. He is reached most easily by an unstamped note left at the Faculty postoffice.

FIRST FRESHMAN DINNER SATURDAY.

**New Men Have Class Dinner
Saturday Night Under Aus-
pices of The Tech.**

Saturday night comes the most important social gathering of the year for the Freshmen. At that time the new men sit down to a dinner provided by THE TECH as its annual welcome to the entering class. The four men who are to give informal talks are as truly representative of the Institute as any four could be. Dean Burton, with his reputation as a good speaker, will be sure to have something worth saying about his side of the Institute. Professor Talbot has a thorough knowledge of the needs of the Freshmen, for as head of the Chemistry Department he has met generation after generation of them. In Major Cole the Freshmen will find a man who in the short time that he has been here has gained the reputation of being well worth meeting. He is head of the Military Science Department, and comes in touch with all the new men as instructor of the Cadet Corps. The last speaker, Mr. Kanaly, has always something to say about the student activities, especially that one ever important to the Freshmen, Field Day.

This is the first of the annual meetings which the Class of 1916 will hold throughout life, first as undergraduates, and then as alumni. The hour-long dinner will give the men a chance to strike up acquaintances that may last through years, and it will engender class spirit to such an extent that the prospect of winning Field Day against the wild and woolly 1915s will not look so hopeless.

Last year 1915 turned out almost to a man to enjoy Steward Colton's dinner. This year he will again provide the "eats," for the dinner will be held (Continued to Page 2.)

MILITARY SCIENCE.

**Major Cole Introduces Several
Innovations This Year.**

Before a large audience of Freshmen, yesterday afternoon, Major Cole went into detail on the drill work for the coming term. The entire course is to be systematized and organized to a much finer degree than it has been in past years. Instead of one battalion, which has been customary, there will be two, which although not the regulation number, enables all maneuvers to be performed. This will allow more officers to be used and will assist in the primary object of the course, that of training students for positions as officers in time of war.

Several changes have been made in the uniform, including braids on caps, gold stripes on sleeves, and blue stripes on trousers.

Major Cole spoke also of the needs of the United States army for more men, and the difficulties the country would be in, in case war with a nation of well-trained soldiers should take place, for our volunteers are not sufficiently trained to take the field and perform the work successfully.

He explained that every student who completed the military course at Technology or other similar institutions would be that much more fitted to fight for his country and take a responsible position in the volunteer service.

REP. WOOD TO SPEAK TO PROGRESSIVES

**Bull Moose Candidate Coming
Here Friday Noon For
Organization.**

The speaker at the meeting of Bull Moose enthusiasts tomorrow noon will be Russell A. Wood of Cambridge. He is the candidate of the Progressive party for the office of Secretary of State of this Commonwealth. Last year he ran for the Republican nomination for this office against Albert P. Langtry, the machine's nominee, who is the present Secretary. He is a young man, having graduated from Harvard in 1903. He has already been sent to the Legislature to represent Cambridge.

Secretary Talbot of the T. C. A. has offered to preside at the organization meeting of the Progressive Club. Several of the professors have signified their interest in the club, and they may be in the Union tomorrow noon. To make the meeting a success requires the co-operation of every Bull Moose in the Institute.

The club will provide an outlet for the enthusiasm of the Progressives of Technology, for they will be given a chance to work for the party either here or at party headquarters.

SOPHOMORE FOOTBALL.

**F. P. Scully Elected Captain of
Football Team Yesterday.**

At the meeting of the Sophomore football team, held in the Union yesterday noon, Francis Paul Scully was elected captain, to fill the vacancy caused by Captain Hadley not returning to school.

Scully, who led the team to victory last year in the position of quarterback, has had considerable experience in the game, and is sure to work his men up to a high degree of efficiency. He came to the Institute from Rindge, where he captained the eleven and was selected as the all-interscholastic quarterback the season before last.

Hadley is now at Tufts and is playing as a regular half-back on the varsity team.

TECH ISLAND CLUB.

**New Project of Class of '85 May
Be Ready Next Summer.**

The Class of '85 is developing a plan which will be a great advance to the social side of Technology. It is making preparations for the establishment of a "Tech Island Club" to be located on an island at the mouth of Onset Bay, about a mile from the entrance to the Cape Cod Canal. This (Continued on Page 2.)

THE WEATHER.

FAIR.

For Boston and vicinity: Fair today. Brisk east to southeasterly winds.

ANIMALS.

In the beautiful woods of the Northern States of New England, far away from the usual haunts of man, an animal exists, found in two genders, male gender, cognomen "Bull Moose."

Within the last few months, as is known to all, a sporting politician, with aspirations to the Presidency of this splendid country has adopted the symbol of the aforementioned animal for his coat of arms.

During the present week many admirers of the famous diplomat have banded themselves together to form a political party to be called "The Bull Moose Party" of the Massachusetts Institute of Technology. The idea is excellent, the debates which will undoubtedly arise in the school on the Presidential nomination question will bring out much new talent in the oratorical line.

It is unnecessary for us to state our views on the oratorical side of a man's Institute work. We all agree that a correct method of address is invaluable to an engineer's career, and there can be no doubt that this new club will serve the double purpose of increasing the patriotism of its members, as also their efficiency.

Now, why do not the admirers of the other aspirants to office also form clubs? If the question of insignia is the only hindrance we would suggest that the followers of the gentleman from Ohio might adopt "The Cow" as their symbol, with the motto, "Slow but Sure."

The men in favor of the New Jersey candidate might adopt "The Parrot," with the motto, "I am sometimes original but always a talker," and then the menagerie so successfully begun at our school would be furnished with three extremely interesting beasts, truly an excellent start.

A final suggestion might be offered, that a necessary constituent of the Freshman Course could well be the new study of Zoology.

The clock in the Union refuses to get to work again after its summer vacation.

TECH GRADUATES WIDELY DISTRIBUTED

New Register of Former Students Published During the Summer.

One of the most interesting of Technology events that occurred during the summer is the publication of a new Register of Former Students, in which is listed ninety percent, of all living past students of the Institute.

The distribution of these graduates throughout the country and indeed the world is an interesting study, and an analysis of the figures serves to show what are the technical centers of the country, and what the demand is for men of special training. New England retains nearly half the past students of Technology, the total number in the six States being over 4500. The Middle States, with their strong centers of industry, have more than 2000. In ten Southern States are 325, and more than 1000 in the Northern Central States.

West of the Mississippi, the three large Northern States have 250, while Missouri, Kansas and Iowa have 145. Colorado has 114, 43 in Montana, and 23 and 26 in Utah and Arizona, with the rest of the 323 in the mountain States, in groups of twenty to a State.

On the west coast are 461, California taking the lion's share, with 270. In the territories are 62, 3 in Alaska, 8 in the Canal Zone, 18 in Hawaii, 22 in the Philippines and 11 in Porto Rico. Out of the United States and her territories are 436 men, 40 in South America, 43 in Asia, 6 in Africa, 5 in Australia, and over 70 in Europe. There are 157 in Canada, and in Mexico 82.

FINANCE COMMITTEE.

(Continued from Page 1.)

Cosmopolitan Club, the Musical Clubs, the Orchestra, the Dining Room Committee, the "Concerning Technology" Committee, the Wireless Club, the T. C. A., Tech Show, Technique, THE TECH and the Institute Committee. A report of the financial condition of each activity is presented at each monthly meeting of the committee.

FRESHMAN DINNER.

(Continued from Page 1.)

in the Union at 6.30. As usual, only men who are Freshmen will be allowed within gunshot of the meeting. The tickets may be obtained today from members of THE TECH and from the 1916 Class officers.

TAKEN FROM LIFE.

This little article was taken from Life via The Technology Review: "During the Spanish-American War the Navy Department, by way of a graceful compliment to the great universities, renamed two converted cruisers 'Harvard' and 'Yale.' Not long after Commodore Dewey was asked what new names should be conferred upon two little Spanish gunboats that had been captured in Philippine waters. 'Oh,' said the Commodore, 'we'll just call one 'The Massachusetts Institute of Technology' and the other 'The Pennsylvania College for Physicians and Surgeons.'"—Life.

The Victrola was going last night for the first time this year.

Technology is probably the first in the country to have a country club.

The Freshman football team have a good, live schedule for this season.

THE TECH

Morning Delivery

THE TECH is prepared to deliver the paper before 8 a. m. to all students rooming on the following streets - St. James Avenue, Newbury St. The Fenway, Westland Avenue, Huntington Ave., below Massachusetts Ave., St. Botolph and cross streets.

WE CATER ESPECIALLY TO STUDENTS

RECORD ATTENDANCE EXPECTED THIS YEAR

M. A. H. S. Sends Largest Number of Men to the Freshman Class.

The Massachusetts Institute of Technology begins its new year with the large figure of 1460 students enrolled. This number has been surpassed only once at this date, when last year the crude figure was about fifty greater. This indicates no falling of in the popularity of Tech, for certain groups, like the students who come for special work, numbering up to between fifty and seventy-five, have hardly yet given in any names.

A most interesting feature is the large percentages of students, averaging for the regular lower classes not less than seventy-five percent, who have returned to continue their studies in regular form, the third-year students of last year returning for their fourth year, with eighty-five percent of those who were registered when school closed in the fall. This is a fine record, which is testimony to the consistency of the courses. The men new to the Institute, more than five hundred in number, have the usual characteristics in point of distribution; there is the usual preponderance of New England men, the many others who come from the ends of the earth to study in Boston, and the large number—now already 150 on the rolls—who come to the Institute from other colleges.

Of the 353 students registered in the first year, 222 are from Massachusetts, the preparatory schools in the vicinity of Boston contributing the greater part of these. As usual, Mechanic Arts High School leads in this respect, sending 35 of her number to enter the Freshman class this year. English High comes second, with 18; Dorchester High and Boston Latin each three; the High School of Commerce, two; Rindge Manual Training School, eight; Chauncy Hall, sixteen; Phillips, Exeter and Andover, ten, and Berkeley, five.

The Western States are represented by a few; the South, twelve, and Alaska, one.

Many men from other colleges find it advantageous to round out their education by coming to the Institute, as is evidenced by the fact that Dartmouth and Williams each have sent seven men; Yale, six; Harvard, four, and either one, two or three from Amherst, Boston University, Colorado, New York City, Nebraska, Pennsylvania, U. S. Naval Academy, West Point, Bowdoin, Princeton, Smith, Radcliffe and Wellesley.

TECH ISLAND CLUB

(Continued from Page 1.)

island was offered to the class of '85 by F. H. Page, on condition of the establishment and proper maintenance of the Club.

The plan is to raise from three to five thousand dollars from members of the class as a gift to the project, and then invite other Tech men to join the club, at an initiation fee of about forty dollars, the dues being twenty-five dollars a year. This, it is hoped, will make possible the erection of buildings and the improvement of the island, to the extent of about twelve thousand dollars.

The location is an ideal one near Burgess Point, where are some of the most beautiful residences on the bay. It has an unobstructive view of Buzzards Bay to Monmouth Point. Except at high tide it is connected with the mainland, and a roadway will probably be built. The committee believes the club should be run in a first-class manner so that members can take their families and friends there at any time during the summer.

Technology Men will make no mistake in depending upon this Great Store for the Newest and Best Ideas in.

Clothing, Hats,

Shirts, Haberdashery,

Shoes, Hosiery

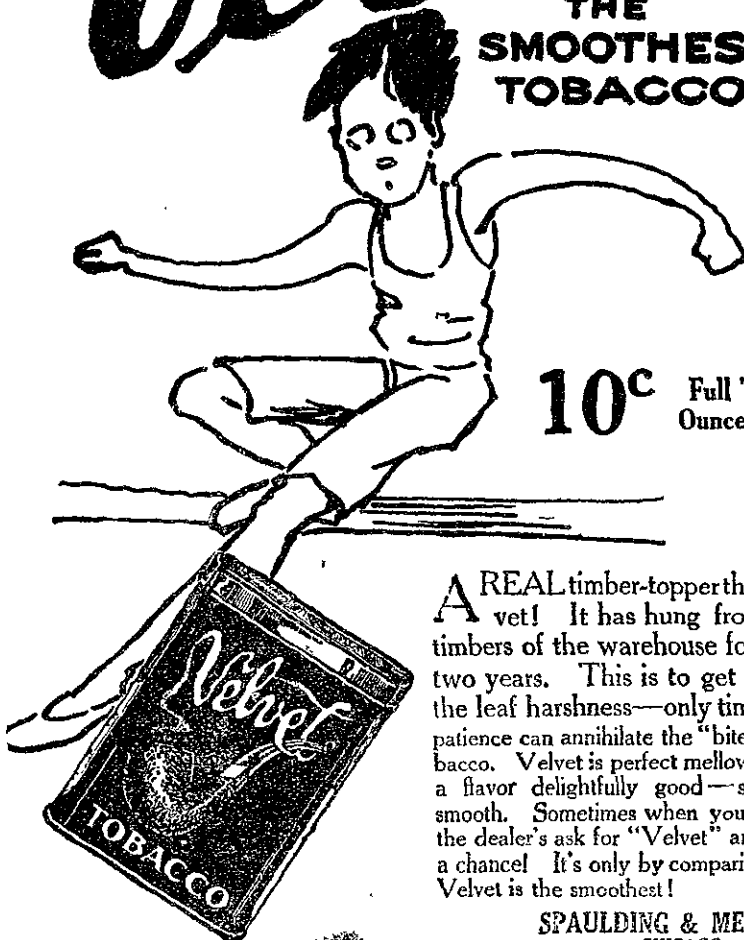

and in fact everything -- that has a place in the College man's wardrobe.

All Men's Goods are in our "men's store section" separate from other parts of the store and having direct entrances from Avon and Summer Streets.
