

THE TECH

VOL. XXXII. NO. 53

BOSTON, MASS., MONDAY, DECEMBER 9, 1912

PRICE TWO CENTS

"WAS IST LOS"

"Was ist los, December 19?" Nobody knows, but the question is reverberating and resounding from one end of the Institute to the other. Old Rogers's historic halls are ringing with the question, and the Union is one buzz of excitement. Everywhere the mysterious and exciting question, "WAS IST LOS?"

Whatever it may be, something strange and wonderful, something exciting and delectable, something interesting and phenomenal is going to be pulled off on December 19th. Already men who had steeled their consciences to cutting three days before the holidays have given up their reservations, and have decided to stick around until the 19th, to see what it is that is being sprung on the bunch.

Detective Burns warns us that he is about to spend two or three hours of his highly valuable time in unraveling this mystery, so any one who is by any chance getting curious and who wants to know, "was ist los" anyway, will only have to watch this space in THE TECH until the great and internationally famed detective shall have given to the world the results of his investigation. We only hope that he will be able to find out what it is all about before the awful something is ancient history.

Now don't forget the date—it only comes once, and the date is December 19th, so whatever you do keep that date open! The biggest secret of the century, the mystery now baffling the brightest of the bright minds on our Faculty will be dissolved on December 19th, and you will again be able to sleep the slumber of the unjust without this unanswered question to bother your tired and fevered brain.

"WAS IST LOS?" DEC. 19TH.

INSTITUTE COMMITTEE.

To Appoint Members to Walker Memorial Committee.

An adjourned meeting of the Institute Committee will be held at 5 o'clock this afternoon, in Room 8, Engineering C. The business before the committee is the appointment of five members from the student body to assist the Walker Memorial Committee in planning the Walker Memorial. The meeting is very important, and it is of importance that all be present. The discussion of unfinished business will also be in order. It is earnestly requested that all the members who are able will attend to assist in performing this important business which the committee will consider well, in order that it may be carried out.

ALL TECHNOLOGY DINNER A GREAT SUCCESS, MAY BE ANNUAL FUNCTION.

New Constitution for Institute Committee Submitted for the Approval of the Student Body. Many other Interesting Talks.

DR. WILLIAM BARTON ROGERS, Founder and First President of the Institute.

The largest gathering of students for a purely social purpose ever held at Technology took place last Saturday night in the Union. The occasion was the celebration of Founder's Day and the All-Technology dinner. The official count showed 179 men present and a noticeable fact was that there was a larger proportion of upper-classmen present than has been the case at any of the previous dinners of this year.

Dr. Rogers's Life.

Founder's Day is celebrated on the birthday of the first president of the Institute and the man who did more than any other to make it possible—William Barton Rogers.

William Barton Rogers was born in Philadelphia, December 7th, 1804. He was educated and graduated from William and Mary's College in Virginia, where he later held the chair of Natural Philosophy for seven years. He was then called to the University of Virginia.

In 1853 Dr. Rogers resigned his professorship in the University of Virginia and moved to Boston with the avowed purpose of building up a Polytechnical Institute in this city. He was able to begin work on his

project a few years later, when the newly filled lands of the Back Bay were to be sold by the State. Governor Faneuil had suggested that the proceeds might be devoted to "such public educational improvements as will keep the name of the Commonwealth forever green." This was the opportunity for which Rogers had been watching and waiting, and he promptly suggested that the land on which the present Walker and Rogers buildings now stand be set aside for scientific and technical museums and a college of Mechanic Arts. Articles of incorporation were drawn up, and on April 10, 1861, Governor Andrew signed the articles creating the Massachusetts Institute of Technology. Several years later the Legislature, at the suggestion of Rogers, allotted one-third of the annual sum granted to the State by the national government and thereby made it a State School of Mechanic Arts.

In founding a Polytechnical Institute, Rogers's aim was not to establish a school which should teach merely the technical details of commercial operations, but it was his earnest desire that the Institute

(Continued to Page 3.)

PROPOSED ASSOCIATION OF UNDERGRADUATES

At All-Technology Dinner Constitution Is Presented to Students.

Last Saturday night the constitution of the proposed M. I. T. Undergraduate Association was presented to the student body. As was stated at

H. D. PECK, Chairman of Committee.

the dinner, THE TECH will receive all communications and they will be printed in the next issue of THE TECH. The students should take this matter to heart very seriously and give it a great deal of thought. This association is of the utmost importance to the undergraduate body, and in order that they may become familiar with the proposed constitution it is printed below. Criticism is wanted by the committee in order that they may obtain the opinion and views of the students.

The constitution is as follows:

CONSTITUTION of the

M. I. T. Undergraduate Association. Preamble.

Whereas, It seems wise that all activities among the students of the Massachusetts Institute of Technology should be so organized and conducted as to work for the good of the student body as a whole and for the welfare and renown of M. I. T., it is fitting that some central organization, chosen and controlled by the student body, should, as representing that body, have and exercise general powers of supervision over all individual activities in so far as they affect the student body as a whole.

To this end it seems necessary that the entire body of undergraduates should be brought together as a unit in order that legislation and executive powers may be transferred upon such a central body as is mentioned in the preceding paragraph. It is, therefore, enacted by the undergraduates attending the Massachusetts Institute of Technology that such a general organization should be effected, and to this end the following Constitution governing the student body is adopted:

CONSTITUTION.

Name of Organization.

Article I.

The name of this organization shall be the "M. I. T. UNDERGRADUATE ASSOCIATION."

Purpose of Organization.

Article II.

The purpose of this organization is (Continued on Page 2.)

MONDAY, DECEMBER 9, 1912

Any man who attended the All-Technology dinner Saturday evening and is not filled with a far deeper respect and love for President Rogers and his lasting monument, which we are now fortunate enough to represent, is indeed not deserving of a place on the rolls of Technology. It would have been inspiring at any time to hear of the life and works of this wonderful man, but to have been gathered together under such circumstances as the men were on Saturday evening, and to have heard the personality and activity of President Rogers spoken in such fitting and exalted terms made the whole occasion one of much greater inspiration.

It would have been most pleasing to President Rogers to have known that the undergraduates were honoring him by coming together socially, and he would have been still more delighted with their whole attitude and general feeling, for he was always well aware of the tendency in such an institution as Technology toward narrowness, and deplored the conditions which seemed to draw the men apart. Again, the suggested plans for the Walker Memorial in the New Technology and the new constitution for the Institute Committee only made the evening more complete, for both are advancing Dr. Rogers's ideas.

When we consider the character of this man we can say that he is indeed one of America's noblemen, from whom no one of us embryo scientists, engineers and architects, can help but get an impulse which will carry us through many hard places of our future experience. We should follow him as a leader, should love him as a man, and should honor him as the founder of dear old Technology throughout our lives.

Let us all make every effort to carry on Founder's Day from year to year by giving it our support, not only for the one day on which it occurs, but by being ever mindful of its spirit throughout every day of the year.

C. T. GUETHING ELECTED FRESHMAN PRESIDENT

Bickford Vice-President, Shakespeare Treasurer, Adams Secretary.

The results of the election of Freshmen officers have been announced. The election closed December 4th, and the results were announced Saturday night. C. T. Guething, of Hollis, N. H., was elected president. Guething prepared for Tech at Exeter, and while there was prominent in athletic circles. At the temporary election held by the Freshmen early in the Fall he was elected temporary president and proved to be a very satisfactory one.

H. L. Bickford of Brookline was elected vice-president, and B. E. Adams of Brookline was elected secretary. William Shakespeare of East Orange, N. J., who was the temporary treasurer, was elected to fill this office for the remainder of the year.

The men elected as members of the Freshman class on the Institute Committee are: George P. Allen of Boston and T. C. Jewett of Buffalo, N. Y. The members elected to the Athletic Association are P. H. Buxton of Dorchester and A. C. Lieber, Jr., of Jamaica Plain. The Executive Committee members are: J. F. C. Hyde of Chestnut Hill, and H. M. Warren of Melrose. Of these men, five prepared at the Mechanics Arts H. S., while Buxton and Lieber were managers of the Freshman football and relay teams, respectively.

M. I. T. ASSOCIATION.

(Continued from Page 1.)

to regulate and control the acts of the student body in relation to the Institute and to the general public, and to exercise such supervision over the several student activities as will insure that the same are conducted in the best interest of the student body as a whole and to the credit of the Massachusetts Institute of Technology.

Membership.

Article III.

All registered students at the Massachusetts Institute of Technology are by virtue of such registration members of this organization, such membership to be subject to such rules and regulations as may be hereinafter enacted by this organization.

Government of This Association.

Article IV.

Section 1. All the legislative and executive powers of this Association are hereby vested in a representative body to be chosen as hereinafter provided. This body shall be known as the Institute Committee.

Section 2. All acts and decisions of the Institute Committee shall be considered to be the acts and decisions of this Association, except that on petition presented in writing by fifty (50) students, within ten (10) days of the enactment of such acts and decisions, any and all acts and decisions of the Institute Committee shall be presented to the Association for ratification or rejection as provided in Section 3.

Section 3. On receipt of a petition as provided in Section 2, the Institute Committee shall within four (4) days issue a call for a general vote on the matter in question, the same being taken by ballot within fourteen (14) days, but not earlier than seven (7) days after the issue of such a call. Two-thirds of the ballots cast shall be necessary to annul any act or decision of the Institute Committee.

Section 4. The Institute Committee shall consist of three members of each class, of whom one shall be the Class President, the other two to be elected at large, and one from each of the following undergraduate organizations:

TECHNOLOGY DINNER
(Continued from Page 1.)

PRESIDENT, MACLAURIN.

should give a broad foundation in the pure sciences, for he held that only in that way could a well-rounded engineer be produced.

Rogers's first class contained only fifteen pupils and, as one of the speakers on Saturday, Mr. Munroe, remarked: "They were a pick-up lot." The Institute soon grew to larger proportions under the leadership of President Rogers. He held the office of President until 1870, when he resigned, but was called back in 1878 to carry the school through a very critical period. It was due to his hard work at this time that we have the Institute today, for it was tottering, and were it not for the aid of Rogers it would surely have fallen. President Rogers's death was typical of his whole life, for he died, as his successor said, "in harness" while addressing the graduating class of '82 in Huntington Hall.

All-Technology Dinner.

Because of the fine administration of President Rogers and the fact that the success of the Institute has been due in a great extent to him, it has often been thought that the appreciation of the students should be shown in some way. Saturday the anniversary of the birth of President Rogers is known as Founder's Day, and the Institute Committee, after considering the matter for some time, decided to have a dinner upon this date in commemoration of him.

This dinner will be held annually, and will serve a two-fold purpose. It will keep in the minds of the students the excellent work and character of the man who founded the Institute and gave it the start which has done so much to bring to it the success which it now has. This dinner also brings the students together and tends to bring about a greater loyalty to the Institute.

Dr. Maclaurin.

Mr. W. R. Mattson, '13, acted as toastmaster of the dinner and introduced as the first speaker the President of the Institute, Doctor Maclaurin, who spoke of the movement westward of the center of population of the Institute graduates. The main center of course is but a little west of Massachusetts, but the center of population of students, outside of Massachusetts, is at Toledo, Ohio. He stated also that the proportion of foreign students at the Institute is far greater than that at any other American college. The nearest competitor which Technology has for foreign students is Pennsylvania, with four per cent., as compared with the Institute's seven.

The Doctor's talk was well received and he was applauded to the echo.
Mr. Munroe.

The second speaker on the list was Mr. James P. Munroe, an alumnus of Technology. The principal topic of his talk was the life and works of President Rogers. He gave an interesting description of the man, both as to person and character. He also found a use for the lengthy name attached to the Institute. After imitating a man somewhat under the influence of liquor trying to pronounce the name, he remarked: "That's one good thing about our name—it keeps the men sober. No man under the influence of liquor could possibly boast of being a student here."

He then stated that Dr. Rogers was the main pillar of the Institute, and that only his extreme modesty made the men who were working with him return from calling it Rogers's Institute of Technology. His talk was most inspiring and one which will be long remembered by the men who attended the dinner.

Mr. H. E. Kebbon, '12.

Before introducing the third speaker, Mr. H. E. Kebbon, '12, Toastmaster Mattson refuted the argument of Mr. Munroe that the length of the name of Technology kept her men sober by remarking that "we can always say 'M. I. T.'"

Mr. Kebbon gave a brief and interesting outline of the new Walker Memorial to be erected on the new site. This building is to occupy one of the principal locations on the site and will, of course, conform in architecture to that of the rest of the buildings. It will be a general meeting place for the students and will contain besides the lounging room various study rooms a small auditorium, a grill room, offices for the various activities, bowling and billiard rooms. It has been designed with a view to having the most complete student club of any school in the country, and is a composite of the good points discovered by a committee which traveled over the whole country to the many colleges.

Mr. L. H. Lehmaier, '13, was the fourth speaker, and gave a very inter-

H. E. KEBBON,
President Class of 1912.

esting comparison of college life in England and in Technology. He told of the good work done for the Institute by many Alumni and of the help given foreign students by the Institute.

Mr. H. D. Peck, '13, was the last speaker, and brought an entirely new matter to the attention of the student body. For years the Institute Committee has had no written authority for its actions, so it was proposed that a constitution be drawn up giving it

Section 5. Any other activity now existing or hereafter duly organized by the undergraduates may, by a two-thirds vote of the Institute Committee, be granted representation thereon, and any activity having a representative on the Committee may, by a similar two-thirds vote, be denied such a representation, provided notice of the proposed action of the Committee shall have been given the members of the activity and full opportunity granted them to present arguments and reasons why such action should not be taken.

Section 6. After the acceptance of this Constitution by the student body, the election of representatives on the Institute Committee on the part of class organizations or other student activities shall be deemed an acceptance of this Constitution and its authority.

Organization of the Institute Committee.
Article V.

Section 1. The officers of the Institute Committee shall consist of a President, Vice-President and Secretary-Treasurer, who, with two members elected from the Committee at large, shall constitute an Executive Committee.

Section 2. The President of the Senior Class shall be the President of the Institute Committee. All other officers of the Committee shall be chosen annually by the Committee by written ballot.

Section 3. The Institute Committee shall enact such By-Laws as may be deemed necessary, and not inconsistent with the provisions of this Constitution.

Amendments.
Article VI.

Amendments to this Constitution may be recommended by the Institute Committee or by a petition of one hundred (100) members of the Association. Any amendments so recommended shall be submitted by the Institute Committee to the entire student body for consideration and adoption. Full notice of such proposed amendments shall be submitted to the entire student body for consideration by publication or posting at least thirty (30) days before the date set for voting, two-thirds of the votes cast shall be necessary to adopt the same, provided 25 per cent. of the total membership vote.

TECH HOCKEY TEAM WINS SECOND GAME

Again Victorious Over the Fast Pilgrim A. A. Seven at the Arena.

Technology again defeated the Pilgrim A. A. hockey team Saturday night by the score of 4 to 3. Though both teams showed an improvement over the first game in the matter of team work, there was still chance for development in that line.

In the first quarter there was no score made, the playing being rather slow, because neither team could get in any effective team work.

Tech started the second quarter with a rush, and in a little less than a minute Stucklen caged the first goal of the game. Later in the quarter Storke, by clever dribbling and a pretty shot, scored another point for Tech. After an interval of two minutes Fynan, the fast rover of the Pilgrim A. A., made the first tally for his team.

In the third quarter Hurlbutt received a pass from Fletcher in front of the goal and shot the puck into the net for the third count for Tech. Fletcher followed with another, making the score 4 to 1.

Captain Ranney saved his team from defeat time after time in the last quarter by wonderful goal tending. Fynan, however, managed to cage the puck twice more, making the final score 4 to 3.

The lineup was as follows:
Technology. Pilgrim A. A.
Hurlbutt, c. Dennesha
Foote, r. Fynan
Storke, l. w. Fritz
Fletcher, r. w. Toulan
Stucklen, c. p. Shriver
Eichorn, p. Bray
Ranney, g. Linnehan
Substitutes: McRae for Eichorn,
Wholly for Toulan.
Officials: Messrs. Davidson and Telford.

ATTENTION SENIORS—Pipe Committee will be in Union from 1 to 2 Monday and Tuesday. Last chance to obtain pipes.

LOST—At Winter Concert, a lady's small gold bar pin. Reward if returned to TECH upper office.
(Mon-Tues)

SOPHOMORE CLASS nominations are due a week from Monday, December 16. All nominations must have ten signatures.
(5-2t)

TECHNOLOGY DINNER

the powers which it has heretofore held by precedent. Mr. Peck read this constitution and recommended it to the thoughtful consideration of the student body as a whole. A copy of this document appears in another place in today's issue of THE TECH.

Various M. I. T. songs were sung between the talks, and after singing the Stein Song the gathering broke up, many students, however, remaining in the Union to talk over the new constitution.

FRESHMAN TEAM WINS.

Basketball Team Defeats Revere H. S., 16 to 14.

Saturday night, at Revere, the Tech Freshman basketball team defeated the Revere High School by the score of 16 to 14. The game was close and exciting, a period of seven minutes' overtime being necessary to decide the game.
