TECHNOLOGY LOSES TO DARTMOUTH SEVEN

Wanamaker the Big Star of the Hockey Game at the Arena
Last Evening.

Dartmouth outplayed the Tech hockey team at the Arena last night and won by a score of 5 to 1. Wanamaker of the Green team was the real star feature of the game. He stood in front of the net. Hurlbut shot an errant shot from his team, two of them being due to his individual efforts alone. Hartwell edged the only score made by the Institute seven, shooting a clean goal and shoulders above the other players scoring for the goals shot by his team, two of them being due to his efforts alone. Hartwell scored four of the goals shot by Wanamaker and won by a score of 5 to 1. Wanamaker, a Princeton star who made such easy scores were made at these times. Donahue put himself in the way of the right time and blocking the shot. The referee ruled it out. Another of his goals was also ruled out before. The variety of lyrics to the songs of the Institute was enjoyed in the arch.
ARCHITECTURAL SOCIETY.

(Continued from Page 1, Col. 5.)

leading to architecture is best seen in the results of this particular undertaking. Three hours weekly were to be devoted by each student to this work. As the years went by, the classical examples were brought nearer to the means of the average student through inexpensive reprints of the standard authorities. Magazines increased in number, and recognized, besides, the importance of both ancient and modern examples in their illustrations. The pocket camera also became an important if supplementary. These may be considered sufficient reasons why the three-hour track each week was gradually reduced until, at the present time, only one track is received during the three years active membership in the society, and this one track requires only about three hours for its execution. The society, however, has in its possession about two thousand tracings, films and plates of many valuable examples, the majority being plans of a great variety of types, and prints from these can always be had by any member of the society at nominal cost.

Early in the spring of 1897 the society was well established. Regular fortnightly meetings were held, and the work required complete by thirty-five minutes. At first judgment was passed on the finished drawings by a committee of their own members, but later they invited some of the instructing faculty to do this.

At other meetings original papers were read, prepared by the students on subjects of architectural interest. There were also smoke talks given by celebrated architects who were interested in the society, and essays were read and discussed given from time to time by the instructors. Translations made by the students on works on architectural subjects were read.

For a number of years these meetings were held regularly. Now it was decided to hold all meetings at a set time. This change does not seem to have been made from any lack of interest in the aims of the society, for in 1902 a new constitution was adopted, and the society still further enlarged. The broader outlook caused no sacrifice of the old standard authorities. The annual now contains illustrations and works of promised drawings on the courses of Architectural and Structural Design, and also of the current work in freehand drawing, pen and pencil, modeling, etc. The "Annual" grew from a pamphlet of a few pages to a handsome bound volume.

The Year Book, or Annual, also has been published by the society since 1891. The results of the work are too generally known to need further description. It is sufficient to mention that this Annual contains illustrations and works of promised drawings on the courses of Architectural and Structural Design, and also of the current work in freehand drawing, pen and pencil, modeling, etc. The "Annual" grew from a pamphlet of a few pages to a handsome bound volume. It has resisted, besides, in the establishment by the society of a fund, the proceeds of which are to be devoted to the use of needy students. It became such an important factor for undergraduates before the public that the work of the department and being useful in other ways that it has been made a Quarterly.

Thus from a very small beginning as a sketch club, the Architectural Society today in its possession about two thousand tracings, films and plates of many valuable examples, the majority being plans of a great variety of types, and prints from these can always be had by any member of the society at nominal cost.

TUESDAY, DECEMBER 31, 1912

After a short vacation we return to our studies at the Institute to be confronted with mid-year examinations. These examinations form a check upon the year's work, a commentary on our progress. It is to be considered work throughout the year as being in the nature of a preparation for life, a, a grooming of one's intellectual power, or the building up of his equipment. The instructor has the broader point of view over the whole of the year's work in freehand drawing, pen and pencil, modeling, etc. The "Annual" grew from a pamphlet of a few pages to a handsome bound volume. The results of this work are too generally known to need further description. It is sufficient to mention that this Annual contains illustrations and works of promised drawings on the courses of Architectural and Structural Design, and also of the current work in freehand drawing, pen and pencil, modeling, etc. The "Annual" grew from a pamphlet of a few pages to a handsome bound volume. It has resisted, besides, in the establishment by the society of a fund, the proceeds of which are to be devoted to the use of needy students. It became such an important factor for undergraduates before the public that the work of the society still further enlarged. The broader outlook caused no sacrifice of the old standard authorities. The annual now contains illustrations and works of promised drawings on the courses of Architectural and Structural Design, and also of the current work in freehand drawing, pen and pencil, modeling, etc. The "Annual" grew from a pamphlet of a few pages to a handsome bound volume.
HOCKEY GAME
(Continued from Page 1, Col. 1.)

A great event in college history—and so is Fatima.

DON'T BE SO LAZY!

Limber up and Stretch those muscles at the

Trinity Court Bowling Alleys

Right Across from the union. Come in after lunch, after dinner, anytime

A DOLLAR GOES TO THE MAN

with the highest candle pin score each day.

Come and Get it.
