

THE TECH

VOL. XXXII. NO. 66

BOSTON, MASS., WEDNESDAY, JANUARY 1, 1913

PRICE TWO CENTS

HARVEY S. BENSON TO BE MARRIED

Miss Vera M. Legg, a Wellesley Graduate, Betrothed to Tech Man.

The announcement of the engagement of Harvey S. Benson, M. I. T., 1912, to Miss Vera M. Legg was made recently at a party at one of the Wellesley sorority houses. Mr. Benson was prominent in athletics, being manager of the 1910 track team, manager of the 1911 track team, a member of three varsity relay teams, and captain of the 1912 cross-country team, besides being president of the New England Intercollegiate Athletic Association. Since his graduation he has been connected with the Elwyn Shoe Company of New Hampshire. Miss Legg was graduated from Wellesley in last year's class, and is at present a resident of Dorchester. Her father is a prominent marketman in Fanueil Hall.

DESIGN EXHIBITION.

Term's Work of Course IV Is on Exhibition in Pierce.

An exhibition of problems in Architectural Construction and Design will be held on the fourth floor of the Pierce Building until after "mid-year's." Practically the entire term's work of all the classes is on exhibition, from the worst to the best. This exhibition gives the students of other courses a very good opportunity to view the work that the students of design are accomplishing. The second, third, fourth and advanced year classes' work is very varied, and the amount is considerable. Visitors will be able to obtain a very good idea of the stages and development in the teaching of design.

The second year class has just finished their first drawing, an elevation for a building of the Doric Order. The third-year class have designed small libraries, while the fourth year have designed a small theatre problem. The advanced class have dealt with landscape problems.

PROF. CURRIER ILL.

The students of the Institute will be glad to learn that Professor Currier will be able to meet his classes the latter part of this week. Professor Currier has had a severe attack of the grippe and has been unable to meet his classes the past three weeks. His recovery has been very rapid the past week and he was able to arise yesterday.

MANDOLIN REHEARSAL.

The Mandolin Club will have two rehearsals this week, Wednesday and Friday, at the regular time, in the Union. It is very important that every member be present as new music will be given out and as there are many matters to be discussed.

TRINITY RECEPTION.

This afternoon, from 4 to 6.30 P. M. there will be a reception at the Trinity House. It is an informal reception and all men who are interested in the work that they are doing are invited.

When in need of anything, no matter whatever it is, be sure and patronize our advertisers.

NEW GIFT OF \$15,000 TO THE INSTITUTE

Money Subscribed by Friends of Mrs. E. H. Richards for Research.

A fund of \$15,000 is the New Year's gift to the Institute in memory of the late Mrs. Ellen H. Richards. This money is to be used to promote sanitary research, and will be called the Ellen H. Richards Fund for Sanitary Research. Mrs. Richards, a graduate of Technology and connected with it through a life of constant activity, is to be borne in memory through a number of memorials. One plan is ambitious, calling for perhaps \$100,000, and lies in the future, but that of a memorial in the way of scholarships in the Institute has been quietly carried forward by her friends, and yesterday the money was handed to the treasurer by Geo. Wigglesworth, the treasurer of the committee.

By the terms of the gift the income is to be used for fellowships to advanced students who shall be competent to pursue sanitary research, for the employment of research assistants or in such other ways as may best promote the cause of the chemistry of research.

Mrs. Ellen H. Richards died in March, 1911, after a life devoted to, as she called it, eugenics, the hygiene of the present. When a mere girl she began her efforts in domestic science. And instead of reaching women with it as a domestic science, she tried another method. She established laboratory kitchens, the growth of which was watched with great favor all over the country. Finally she founded a National Home Economics Association with an annual conference at Lake Placid, where thousands met for discussions on food sanitation.

Ever broadening, the movement, despite Mrs. Richards' death, has gained great strength. Still it has not attained its full growth, its advocates say. Meanwhile, every method is being made to complete the fund of \$100,000 that is being raised to her memory. This will be used in carrying on the special departments of the work she organized.

Mrs. Richards' success in domestic science was ascribed by many who knew her to her belief in the family home, with a roof of its own, and a plot of its own. She did her best to preserve this ideal. And she did not believe it inconsistent to work for such a home and at the same time seek to have the most modern educational opportunities and walks in life open to women.

PAVING BLOCKS MAILED.

The first contribution of Gary, Indiana, to the parcels post is a consignment of one thousand paving blocks, weighing six pounds each. The blocks are being sent out as samples by a manufacturer who found that he could send them cheaper by parcels post than by express, and each stone is wrapped in a separate package.

Two big drays carried the blocks to the postoffice and the entire office force were set to the task of carrying the six thousand pounds of stone into the building, so that the stamps could be cancelled.

Women excelling in athletics at the University of Kansas will be awarded "K's" by the Women's Athletic Association.

WALKER MEMORIAL PLANS DEVELOPING

Building With Lounging, Reading, Trophy, Billiard and Grill Rooms.

The Walker Memorial was discussed at the All-Technology dinner held December 9th, by Dean Burton and Harold Kebbon, president of last year's Senior class.

The Faculty committee appointed by President Maclaurin, with Prof. Tyler as chairman, held meetings every two weeks during the summer, and have held weekly meetings since the beginning of the fall term. Harold Kebbon, an employee of J. R. Freeman, '76, who is in charge of the engineering operations for the New Technology, was appointed by the Faculty committee to visit neighboring colleges to gather ideas for a student's club house. A letter from him is given below.

A committee, composed of the undergraduates, L. Hart, S. H. Taylor, T. L. Chase, C. P. Fiske and G. R. Thayer, was appointed to aid the Faculty committee on the memorial.

The Walker Memorial is to be a building or group of buildings to further the social interests of the students. The Alumni have raised about \$150,000 for this purpose. An athletic field, a gymnasium and club rooms have been suggested.

It has come to my attention that a good many Tech men, and the undergraduates in particular, have only a hazy notion as to just what the Walker Memorial is.

Therefore, as this should be a subject of interest to all Tech men, especially at this migratory period at the Institute, I am contributing this article.

To indulge in a bit of history, during the presidency of General Walker an urgent need was apparent for some kind of gymnasium or social center for the students. Owing to the more important necessities for the growing Institute, General Walker was unable to provide for this want although keenly interested in the students' welfare. On his death the Alumni undertook to raise funds for a memorial to him, and considered a gymnasium building as the most fitting Walker Memorial. It was soon determined to combine social provisions with the gymnasium. By 1901 the fund of \$100,000 was completed and a definite tract of land was assigned for the erection and plans were prepared.

No further steps were taken, however, until the present year on account of the indefiniteness of the location of the Institute. In the meantime the present Union has served and the fund has grown to \$130,000.

Since the site was decided to be on the opposite bank of the Charles, a committee of the Faculty have taken charge of the problem. They have held bi-weekly meetings during the summer and fall and have gone over a mass of data and information collected at other schools throughout the country by special commissaries, of whom I am one.

On account of the changed conditions at the Institute they have reached the conclusion that the Memorial should be the student club house, entirely separated from the gymnasium, as each can be better adapted to their purposes if kept distinct.

Plans have been drawn up and they contain all of the features met with in other institutions.

(Continued to Page 2.)

WIRELESS MEETING AT HARVARD

All Men Interested Are Invited to Hear a Talk By Dr. Pierce.

All men who are interested in the subject of wireless telegraphy will have a splendid opportunity on next Saturday evening to hear a lecture by one of the "big men" in this new and fascinating science. On that evening a regular monthly meeting of the New England Wireless Society is to be held in the Jefferson Physical Laboratory at Harvard College, similar to the one held in Walker Building two months ago. Dr. G. W. Pierce of Harvard is to speak, and his talk will doubtless be of great value to all interested in the subject. Dr. Pierce has done a great deal of experimental research work in this field, and his "Principles of Wireless Telegraphy" is perhaps one of the most widely read books on the subject. It is very clearly written and at the same time is a very comprehensive work which is readily understood by beginners. Several copies of it are in our Physical Library.

For some time recently Dr. Pierce has been experimenting with his wireless telephone, and all amateurs around Boston have doubtless heard him speaking words and singing tunes into the ether instead of merely flashing out the Morse dash and dot characters. He has also invented a very accurate and serviceable type of wave meter besides other sundry wireless appliances.

The New England Wireless Society has this year affiliated with its organization the wireless societies of Technology, Harvard and Tufts. All members of the local society are urged to attend, and all others who are interested are cordially invited to join them. Keep the date in mind and watch for further particulars in the columns of THE TECH.

AMUNSDEN TO LECTURE.

Students May Get Choice Seats—President to Introduce Him.

Captain E. Amundsen, discoverer of the South Pole, will give a lecture on his trip in Tremont Temple, on January 21, at 8.15 P. M. His lecture will be illustrated with slides and motion pictures. As a further inducement, Doctor Maclaurin will introduce this famous explorer and discoverer.

Students may obtain tickets before the general sale is opened to the public, thus securing better seats. E. B. Stockman has over two hundred seats for sale, ranging in price from 50c to \$1.50. Persons desiring any may obtain them from him at the Union, from 1 to 2 P. M., today, tomorrow, or Friday.

CALENDAR.

Wednesday, January 1, 1913.

4.15—Mandolin Club Rehearsal—Union.

Friday, January 3, 1913.

5.00—Chemical Society Business Meeting—Walker.

4.15—Mandolin Club Rehearsal—Union.

Saturday, January 4, 1913.

1914 Basketball—New Hampshire State College.

WEDNESDAY, JANUARY 1, 1913

A HAPPY NEW YEAR.

A new year has dawned, and with it an opportunity. It is a solemn and serious thought, and in the profundity of our contemplation we offer this: True prayer is a matter of work and strife,
Let us pray for a happy new year and life.

Unhappy indeed is the man who needs no new resolutions.

THE NEW DADO.

In addition to feeding those who have a hunger for food only, the Union some time ago innovated its estimable orchestra to cater to the man who also likes music with his meals. And now the patron who would have bright things to look at is also satisfied in our own and exclusive restaurant.

No one who has entered the Union dining room since the reopening of school could possibly have failed to notice the new decorative treatment of its walls and ceiling. The room is done over in red and gray with a suggestion of gold. The dado, ah that dado! rises from the floor to a height of about four feet, and is of a peculiarly touching, not to say penetrating color. A band of gold about two inches wide separates this dado from the gray which covers the rest of the wall surface. The ceiling is white. It is a new year's introduction of which Mr. Colton should feel proud.

Seriously, this is another evidence of the Bursar's desire to make the Union dining room as pleasant as possible for the students, and is another reason why we should favor it. The profits of the restaurant are spent on the entire Union in improvements and on the students' conveniences. Our continued patronage seems a logical conclusion.

1914 CLASS PICTURES.

The 1914 Class Pictures will be distributed at 1.30 P. M., in the Union, on Thursday and Friday. Pictures will be given only to those who have ordered them.

In a recent investigation of the pawn shops of Park Row, New York city, a number of fraternity pins were found. The prices paid for these pins range from 75 cents to \$10. It is believed the pins were stolen or lost in most cases.

GIFT FROM THE WEST.

Puget Sound Club Gives Flag Staff for New Campus.

The Institute is not to be without a seasonable gift just to know that it is Christmas time, for from the West Coast there comes word of a novel memento. It is to be the best and biggest flag-staff of Oregon pine that can be found, which is to be shipped around the Horn. "A gift from the Northwest to the Campus by the Charles." The gift originated with the Tech Club of Puget Sound which is heartily seconded by the Portland Association. In this Washington and Oregon join hands. The gift has more of significance than a mere memento, for these splendid sticks are not to be bought for a song. The one that is standing in Franklin Field cost not less than \$1,500, and the Western Technology men will not be content to stop here, but will get the very best to be obtained. Such a gift goes hand in hand with the one announced last year at this time, that of two or three thousand dollars for the addition to the Institute navy, which has been built and launched and has done a season's work full of value, namely, the busy little tugboat, which the "Fulton" in reality is.

WALKER MEMORIAL.

(Continued from Page 1.)

The Walker Memorial therefore will be a gentleman's club house, where student gatherings, both large and small, may be held. It will have accommodations for large and small dinners, dances, shows, receptions and concerts. Offices for all the important student organizations will find a place here. There will be lounging rooms, a library, a reading room, a billiard room containing ten tables, a trophy room, studies, and a grill room seating two hundred men, will serve meals equal to those in the best of Boston's cafes.

In architecture, the Memorial will be treated in accordance with the Institute buildings and will be situated so as to have a commanding view of the river front.

Its administration will be that of an organized club, with an active membership to include all male undergraduates.

In short, the Walker Memorial will fill a long felt want in Institute life, and the present undergraduates at Tech are to be congratulated on the fact that they may watch grow on the opposite bank of the river the best student club house in the country.

(Signed)

HAROLD E. KEBBON, '12.

CLASS BASKETBALL.

Schedule of Junior Team Announced—Good Prospects.

With the season well under way, and the critical part approaching, the basketball teams of the different classes are hard at work. Practice is being held regularly in the Gym, and each team is trying hard to keep up the good work which they have done so far. The season does not end until the middle of March, so there is still an opportunity for new men to come out.

The teams have all been very successful so far, but are now reaching the harder part of the schedule, and the remaining games will probably be more closely contested.

The schedule of the 1914 team is as follows:

January 4—New Hampshire State College.

January 6—West End Athletic Club.

January 10—Quincy A. C.

January 13—Cushing Academy.

January 20—West End Athletic Club.

February 15—Brockton Y. M. C. A.

March 5—Newton Y. M. C. A.

The schedules of the other teams have not yet been completed.

COURSE CONFERENCES.

Talks to Be Given Soon on the Different Courses.

In a few weeks the Freshmen will be called upon to make a choice of their course of study. In order to better prepare them and to give them a better idea of what the different courses lead to, talks will be given by the heads of the several courses and detailed explanations of the kind of work the men will have to do, and to what each course leads. The choice of a course which must be filed soon is not necessarily final however.

The various conferences will be held as follows:

Courses I and XI—Prof. Spofford.
Will meet students on Friday, January 10th, at 4 P. M. in Room 49, Eng. A.

Course II—Prof. Miller.
Will meet students on Friday, January 3rd, at 1.30 P. M. in Room 11, Eng. B.

Course III—Prof. Richards.
Will meet students on Friday, January 10th, at 1.30 P. M. in Room 2, Rogers.

Course IV—Prof. Taylor.
Will meet students on Monday, January 6th, at 4.15 P. M. in Room 42, Pierce.

Course V—Prof. Talbot.
Will meet students on Thursday, January 9th, at 1.10 P. M. in Room 6, Lowell.

Course VI—Prof. Jackson.
Will meet students on Tuesday, January 7th, at 1.30 P. M. in Room 6, Lowell.

Course VII—Prof. Sedgwick.
Will meet students on Wednesday, January 8th, at 4 P. M. in Room 27, Pierce.

Course VIII—Prof. Cross.
Will meet students on Monday, January 6th, and on Tuesday, January 7th, at 12.15 P. M., or by special appointment, in Room 11, Walker.

Course X—Prof. Walker.
Will meet students on Friday, January 10th, at 1 P. M. in Room 11, Eng. B.

Course XII—Prof. Lindgren.
Will meet students on Monday, January 6th, at 4 P. M. in Room 10, Pierce.

Course XIII—Prof. Peabody.
Will meet students on Wednesday, January 8th, at 1.30 P. M. in Room 32, Eng. C.

Course XIV—Prof. Goodwin.
Will meet students on Thursday, January 9th, at 4 P. M. in Room 2, Walker.

December 31, 1912.

TRAVELING UNIVERSITY.

Of the many plans for extending the influence of State universities, the project of the University of Minnesota is particularly novel and is accomplishing much definite good. This plan is something more than university extension. To all intents and purposes a portion of the university is temporarily detached and transferred to other parts of the State, thus actually extending the benefits of the State's costliest educational plant to a wider field than ever before. Faculty, students and equipment go "on tour," and exhibit to the townspeople of various places its most characteristic activities, staying with each community a week, known as "University Week." The plan is considered by the United States Bureau of Education an excellent device for bringing together for mutual profit a State university and the people who support it.

What "University Week" really is may be seen from a typical program. Each day of the six is devoted to some special topic, with lectures and demonstrations during the day time and high class entertainments at night. Thus Monday is Business Men's Day; Tuesday is Art and Literature Day; Wednesday is Home

Welfare Day; Thursday is Public Health Day; Friday is Farmers' Day; Saturday is Town and Country Day. Such topics as various business problems, libraries, civic betterment, "Art in Common Things," "Why Babies Die," "How Minnesota Educates Her Children," public health, farm policies, "The Social Possibilities of Rural Communities" and "Social Life in Town and Country" are taken up.

Genuine interest is aroused in the towns visited. In most instances the people take the visit of the university as the business of the week, and devote all their attention to it. Not only the villagers, but people from outlying districts as well, attend the sessions. Last June eighteen small towns were visited, and all the communities were so well pleased that they unanimously have asked that the tour be repeated this year.

It is estimated that there are several ways in which this novel plan will have a direct effect. In the first place, it will make the work of the university well and favorably known where it has before been known only vaguely, or even mistakenly; it will break down the already weakening barrier of educational exclusiveness; and, more important still, it is one more link in the chain of rural betterment.
