

THE TECH

VOL. XXXII. NO. 68

BOSTON, MASS., FRIDAY, JANUARY 3, 1913

PRICE TWO CENTS

WIRING EXHIBIT IN N. E. DEPARTMENT

Manufacturers to Contribute Apparatus for Complete Model Room.

Space has been set apart in the Electrical Engineering Department for a permanent exhibit of wiring devices. Panelboards showing various devices and equipment are arranged about the walls of the exhibit space. In the center stands a single room of frame-house construction, which is equipped in accordance with the approved methods of open and concealed wiring, illustrating the regulations of the National Electrical Code. Many manufacturers have contributed sample boards and literature to this exhibit, which is likely to become one of the most comprehensive of its kind in the country. The model room and samples of electrical devices are made use of in connection with a course of lectures on "Electrical Wiring of Buildings" by Mr. Ralph G. Hudson, of the Electrical Engineering Department. All men interested are welcome to attend the exhibit.

THREE MEN ELECTED.

New Members of Corporation Are Prominent Business Men.

The announcement was made last evening by the Executive Committee of the Alumni Association of the election of three new term members of the Corporation—Messrs. Cass Gilbert, '80, of New York; Charles Hayden, '90, of Boston, and Charles T. Main, '76, of Boston.

Cass Gilbert is a New York architect, distinguished among his fellow citizens through having designed and constructed the world's tallest skyscraper, the Woolworth building. He has been with McKim, Mead & Whites, and later in business for himself in St. Paul, and is now in New York. He has designed many fine buildings and is a past president of the American Institute of Architects.

Charles Hayden is a banker of Hayden, Stone & Co., and is a director of the Shawmut National Bank. He is also a director of several street railroads and mining companies, and was a member of the Technology Council in 1910-11.

Charles T. Main has been closely related to Lawrence as well as to Boston. He was assistant at Technology after graduation, and is a specialist in power and industrial engineering. He has already served one term on the Corporation of the Institute, and with two years' interval is again eligible.

The Technology Corporation is composed of fifteen members, three of whom are elected annually for a term of five years. This election is conducted by means of a postal ballot, and the large interest manifested is shown by the fact that about two thousand votes are cast annually. The members of every class five years out of the Institute are entitled to participate in the election. A choice is always necessary because of a rule which requires that more than three names shall appear on the ballot.

ELECTRICAL SOCIETY MEETING TONIGHT

Mr. Blood, of Stone & Webster, Will Speak on "Suggestions for Young Engineers."

Tonight, in the Union, at 7.45, the Electrical Engineering Society will hold an important business meeting and smoker. There are several important matters to be discussed and the meeting will be of great interest to its members. After the business meeting the members will enjoy a talk given by Mr. Blood, of the Stone & Webster Company. His subject will be: "Suggestions for Young Engineers."

Mr. Blood is a native of Boston and began his education in the schools of Newton. After he left the Newton schools he entered the Institute, where he graduated from the course in electrical engineering, in 1888, and immediately entered the Lynn works of the Thomson & Houston Electrical Company. He then went to the old North Western Thomson Electrical Company, and later spent six years in contracting work in Kansas City, erecting lighting, railroad and water works plants. In 1897 he became connected with the Stone & Webster Corporation, with which he has been ever since. Among his other duties with Stone & Webster he has charge of the expert department which examines and makes reports on outside hydro-electric, electric lighting and railroad developments.

In addition to this he was elected President of the National Electric Lighting Association, and for the past two years has been President of the Electrical Vehicle Association of America, which has been carrying on an extensive advertising campaign with a view to increasing the use of electrical vehicles—both commercial and pleasure.

At the business meeting the names of the new men who have applied for membership will be passed on and the proposed trip to Niagara Falls will be discussed. This trip promises to be a very interesting one, and the itinerary is as follows:

Sunday, February 2—Leave North Station at 4 P. M., on the Western express for Niagara Falls, over the Boston and Maine and New York Central lines. A specially electrically lighted sleeper is to be provided for the party.

Monday, February 3—Arrive at Niagara Falls at 7.32 A. M. The men will stay at the Hotel Imperial, American plan, and have an opportunity to visit the Shreaded Wheat factory and the mammoth electrical plant. A ticket may be secured for one dollar covering the Belt Line trip to Lewiston and return, passing en route the whirlpool and rapids, Brock's monument and other places of interest.

Tuesday, February 4—Most convenient train to Buffalo.

Wednesday, February 5—Leave Buffalo at 1.15 A. M. (Sleeper open 10 P. M. Tuesday night) on N. Y. C. & H. R. R. Arrive in Schenectady at 8.10 A. M. Leave Albany at 7 P. M. on the Empire State Limited. Arrive in New York at 10.10 P. M., and stay at Hotel Imperial or Prince George (European plan).

Thursday, February 6, and Friday, February 7, will be spent in New York. The party will leave New York at 5.30, Friday, on the Fall River Line steamer, "Pier 14."

(Continued from Page 3, Col. 2.)

ADVISORY COUNCIL OF TECH SHOW EXPLAINED

Evolution of Management and Perpetuation of Its Organization.

To correct a general impression that the Advisory Council of the Tech Show has the power to force the management to act as it bids, this letter from M. L. Emerson, '04, is printed. The Advisory Council is merely advisory in its action, and if the Show management sees fit, it may act as it pleases, provided, of course, that the Institute Committee, who has the final word on all disputed cases, sanctions this action. The present Advisory Council consists of two members of the Alumni, I. W. Litchfield, '87, and M. L. Emerson, '04, and W. R. Mattson, president of the Institute Committee.

"The Evolution of the Tech Show Management."

Who appoints the Tech Show management? To whom is the management responsible? Why does it have an Advisory Committee?

These three questions are proper ones for the man who does not know, and every man should know, for the Show is given under the auspices of the entire student body. The questions are especially pertinent at this time, since beginning with the Komers, the campaign is well started for the 1912 Show. To clearly answer these questions it is necessary to go back fourteen years, to the beginning of the Tech Show. The original reason for the Show was the poverty of the Institute's Athletic Association, and as is well known, this is today one of the good causes for the Show's continuation. The original Show was started for purely mercenary causes, and the other and equally important results which the Show has brought out, as its service in promoting democracy and good fellowship, and in advertising the fair name of the Institute, were probably not even considered at that time.

The birth of the Show was due not to any undergraduate organization of the Institute, but to a few energetic and public spirited fellows, who realized the circumstances of the Athletic Association and resolved to better its condition. These men were the self-appointed managers of the original Show, and naturally with such enterprising fellows, the Show was a great success. From this small beginning the Show was continued in the following year with still greater success, and with practically the same fellows looking after it. It has been continued year after year up to the present time with ever increasing success, and with constant development and expansion.

The Show from the first was given under the auspices of the student body of the Institute, but as already mentioned, was originated by a self-appointed body of men. These men were lost in time by graduation, and as was natural, their places were filled by the remaining from those they considered best qualified to continue the work. In this way the Show management became self-perpetuating, and while giving a Show under the auspices of the student body, it was in no way responsible to any controlling organization. The success of the Show was therefore in a great measure dependent on individuals and great credit is due these men who so

(Continued on Page 3.)

DEPARTMENTAL LUNCHEON AT THE CONVENTION

Well Known Men as Speakers— Each Course to Have Special Room.

One of the biggest events during the Technology Convention in New York will be the Departmental luncheon at the Plaza. This luncheon is at 1 P. M., Friday, January 17, the first day of the reunion. On account of the large number that are going to New York each course will have separate rooms and speakers.

The professors and other men who will speak are as follows:

Course I—Professors C. M. Spofford and G. F. Swain.

Course II—Professors E. F. Miller and G. Lanza, and Dean Goss of the University of Illinois.

Courses III and XII—Professors R. H. Richards and W. Lindgren.

Course IV—Professors J. Knox Taylor and F. W. Chandler.

Courses V and X—Professors H. P. Talbot and W. H. Walker.

Course VI—Professor D. C. Jackson, Professor Elihu Thomson and Mr. Ganot Dunn.

Courses VII and XI—Professor W. T. Sedgwick and Mr. Rudolph Hering.

Courses VIII and XIV—Professors C. R. Cross and H. M. Goodwin.

Course IX—Professors D. R. Dewey and H. G. Pearson.

Course XII—Professor C. H. Peabody.

The various departments will have six private dining rooms and the banquet room of the Plaza. The luncheon and the speeches will last until 3 o'clock. Following the luncheon will come the large mass meeting and general gathering.

The reception committee for the reunion is composed of the following graduates: G. M. Basford, '89; D. C. Fenner, '98; J. P. B. Fiske, '89; H. W. Leonard, '83; A. R. McKim, '86; G. F. Sever, '87; P. H. Thomas, '93; G. V. Wendell, '92; C. V. Rice, '90, chairman.

JUNIOR PROM REPORT.

The Junior Prom Committee, after a most careful consideration of all the places available for the affair, has determined to follow the precedent of previous classes and shall hold the 1914 Prom at the Hotel Somerset on Friday, April 18, 1913. The Prom Committee has arranged the time and the place, and so now it is up to you to invite the girl, for the sign-up books will be out immediately after mid-year's.

CALENDAR.

Friday, January 3, 1913.

1.30—1914 Class Pictures Distributed in Union.

5.00—Senior Portfolio Ballots Due at Cage.

8.15—E. E. Society Meeting and Smoker—Union.

Saturday, January 4, 1913.

Show Music Competition Closes.

8.00—N. E. Wireless Society Meeting—Harvard.

Monday, January 6, 1913.

1.15—Senior Class Officers' Pictures—Notman's.

FRIDAY, JANUARY 3, 1913

KEEP TO THE RIGHT.

It was 10.06 by the clock one morning recently when some fellow, who evidently had a 10 o'clock class "way up in Rogers," came tearing up Rogers Steps, and without stopping to see where he was going, made a dive for the left-hand side of the swinging doors at the entrance. As a result, the door collided with another man who was coming out with less velocity, with such force that he sustained a blow which would be far from pleasant even to an experienced "human wedge" of the gridiron. In the winter season these swinging doors must necessarily be kept closed and thus more or less hinder rapid transit, but such an accident would have been entirely avoided if the man in question had been a little more courteous and careful of others and had obeyed the universal rule of "keep to the right." When we are hurrying between classes it is perhaps natural that our supreme thought and effort should be to "get there," but we should be mindful of the convenience and safety of others.

A person does not have to be at the Institute long before he notices the congestion often occurring on some of the narrow stairways during "rush hours." This is often very annoying, and yet it may usually be entirely avoided if everyone will be careful to keep to the right and avoid unnecessary jostling and pushing. Again, in the case of passing between the first and second floors in Rogers Building, where two stairways are provided, would it not be better if we always use the right-hand stairway whichever way we are going?

A second's forethought will often save these inconveniences in daily life.

CHEMICAL SOCIETY.

Today's Meeting to Be Postponed Until Next Week.

The business meeting of the Chemical Society, which was to come this afternoon, has had to be postponed until next week, owing to the inability of many of the members to attend a meeting today. The program committee has nearly completed the arrangements for a speaker for the early part of this month, and it is probable that the matters which were to be discussed today will be presented to the members at a short session before his talk.

FIRST RELAY TEAM TRIALS SATURDAY

Indoor Handicap Meet Will Also Be Held Then—Open Class Meet Next Week.

The first time trials for the 390-yard relay team will be held Saturday afternoon. All men expecting to take a trial are requested to take it on this day. It is required that all men entering these trials should enter no event other than the thirty-yard dash in the meet to be held Saturday.

This meet on Saturday will be similar to those held during the Fall and the one held a few weeks ago. The entry books are now open for this meet, which all Freshman track candidates are expected to enter, and it is desired that many of the old men also run. The meet will be a handicap one, thus giving the slower man a good chance.

On Friday, January 10, in the Gym, will be held the annual open indoor class meet. Numerals will be awarded to point winners in this meet, in which there is always much rivalry between the classes.

FEBRUARY DATE CHOSEN.

Twenty-eighth Selected for Regimental Hop.

February 28, the last day of the first month of the second term, has been selected as the time to hold the Regimental Hop. This is a Friday evening, and is in the third week term.

Tickets will soon be on sale by the officers of the regiment. The price of tickets will be one dollar per person, but this will include refreshments. It is expected that a large number of upperclassmen will attend, as well as members of the regiment, who are expected to wear their uniforms. As there are many new ones this year, and as the additions to them are decorative, there should not be such objections as formerly have been raised. The dance will be held in Horticultural Hall, and will be a twelve o'clock affair.

COMMUNICATION.

To the Editor of THE TECH:

Dear Sir:—It has been necessary for the class of 1915 to apologize to Professor Cross for the child-like action of one of its members during one of the recent Physic lectures. A matter of this kind reflects unfavorably upon the class, and we wish it to be understood by all that the class does not support any such action.

Throughout Professor Cross's lectures a few have persisted in creating disturbances of one kind or another. It is to be regretted that the whole class must suffer for the lack of consideration shown by these few. We hope in the future these persons will be decent enough to allow others to profit from the lectures, if they do not care to themselves.

Executive Com. of the Class of 1915.

COMMUNICATION.

To the Editor of THE TECH:

Wednesday evening, the writer was one of the audience in Tremont Temple who listened to an account of hunting the biggest game in this country and in Africa without the use of firearms—only lariats, horses and men—real horses and real men, as the moving pictures show. The story is modestly told by Col. "Buffalo" Jones himself, and it would do every Tech student good to hear what he has to tell, and to look upon a man who is without fear. Unfortunately for Boston, the only opportunities are this week.

ACTIVITIES LOSE REPRESENTATION

Institute Committee Excludes Several for Non-Payment of Dues.

It was announced last night that THE TECH, the Mechanical Engineering Society, the Architectural Society and the Naval Architectural Society have lost their representation on the Institute Committee because of non-payment of dues.

The ruling under which these activities lose their representation is as follows, as quoted from the minutes of the committee: "At the regular meeting of December 6th it was moved, seconded, and passed, that all activities having representatives on the Institute Committee shall lose their representation if the dues for the school years of 1911-12 and 1912-13 are not paid by January 1st, 1913." Heretofore a great deal of trouble had been experienced in trying to collect dues from the different activities concerned, and these drastic measures were finally taken in order to better conditions.

SHOW MANAGEMENT.
(Continued from Page 1, Col. 3.)

well observed their trust and saw to it that the best possible men were appointed their successors to continue the Show.

The ever increasing development and expansion of the Show, however, with its large financial dealings and the great responsibility of appointing proper men to continue the work, finally forced the General Manager of one of the recent Shows to appeal to some of the Show Alumni to aid in these matters, to audit the accounts, and to advise on business questions. An informal Advisory Committee was therefore appointed and was found to be a great help to the management.

It was still realized, however, that the Show was not established on a sound basis, and that while it was given by the student body, it was not responsible to the student body. It was further felt that the method of perpetuating the Show management was a danger to the democratic spirit of the Tech Show; that charges of favoritism in appointment might sometimes be raised; and that the entire procedure was inconsistent with the other methods of the Show. The subject was given very careful consideration by the Show and by certain of the Alumni. The conclusion reached was very simple. The Show was given under the auspices of the student body, therefore, the student body should say who should manage the Show, and what its policy should be; also the student body should audit the Show accounts, and should receive and disburse the Show's profits. The procedure was equally simple. The official representative of the undergraduate body is the Institute Committee, and to this body the Tech Show management formally acknowledged allegiance.

The Show management went still further with their organization—the informal Advisory Committee had been a help, and it was desired to put it on an official basis. It was, therefore, suggested that the Institute Committee should request the Alumni Council, as representatives of the Alumni, to appoint two men who, with the Chairman of the Institute Committee, should act as Advisors to the Tech Show. The functions of this committee are: First, to consider all appointments to the management and to make recommendations regarding same to the Institute Committee; second, to audit the Show accounts; third, to form with the Show management the Tech Show Committee. The results of these changes have been most satisfactory, and the following procedure is now carried out with each Show:

1. The retiring General Manager

recommends to the Advisory Committee his three managers, viz.: Stage Manager, Business Manager and Publicity Manager, as candidates for General Manager of the succeeding Show. The committee, after careful investigation, determines on one of these men, and recommends his appointment to the Institute Committee. The two remaining men automatically drop out of the management.

2. The retiring General Manager recommends the different assistants as candidates for Manager of Departments, and the same procedure is followed.

3. The retiring General Manager, with his board, wind up the entire business of that Show; the committee audit the accounts, and all profits and accounts payable and receivable, except a small working account and the fixtures of the Show, are turned over to the Institute Committee. The Institute Committee audit the accounts, and the General Manager, who is under bond, is then relieved of his responsibility.

The next management is a new organization with no debts, and no assets, except the good will of former Shows. Competition is opened for the remaining places on the management, and the procedure as above is again carried out. The new management receives a small working account as a legacy from the retiring management. A bank account is opened, a loan made to cover preliminary expenses, and business started. Competitions are opened for book, posters, etc., contracts are made, bills are paid by check, and every check, contract and bill is signed in approval by the Department Manager, General Manager and a member of the Advisory Council.

In this way this successful undergraduate organization, which handles approximately \$10,000 yearly, is perpetuated from year to year.

M. L. Emerson, '04.

(Continued from Page 1, Col. 2.)
Saturday, February 8—Arrive South Station 8 A. M.

The ticket for this trip is \$33.75, and it is open to all men, whether members of the society or not. Any non-society men are requested to make application to the officers of the society at once.

WIRELESS MEETING.

Tomorrow evening a meeting of the New England Wireless Society is to be held in the Jefferson Physical Laboratory at Harvard. Dr. G. W. Pierce, an eminent wireless investigator, is to address the meeting, and all men interested in the subject of radio telegraphy are invited to attend. Further particulars will appear in Saturday's TECH.
