PROPOSED ASSOCIATION OF UNDERGRADUATES

By-Laws to Constitution Coming Before Student Body for Consideration.

At the All-Technology dinner which was held in the Union, December 9th, 11. D. Peck read to the students who were there the constitution for proposed organization of the student body. This constitution is printed below in full, for the Institute community to consider. It is designed that it receive much thoughtful consideration by the student body, so that it may be thoroughly criticized and be quite familiar to the men before any vote is taken as to whether it shall be accepted.

The proposed constitution has received no criticism other than the remarks made by individual members, that it is hard to pick flaws in the draft.

But tomorrow, at the Institute Committee meeting, the by-laws to this constitution will be presented to the student body and these, taken in connection with the body of the constitution, may prove valuable consideration.

The constitution reads as follows:

CONSTITUTION

of the M. I. T. Undergraduate Association, Preamble.

Whereas, It seems wise that all students at Massachusetts Institute of Technology should be organized and conducted as to work for the good of the student body as a whole and for the welfare of the Institute as a whole. It being that some central organization, representing the student body, should, as representing that body, have and exercise general powers of supervision over the student activities and in so far as they affect the student body.

To this end it seems necessary that the entire body of undergraduate students, through some central organization, in order that legislation and executive power may be centralized in a single body as is mentioned in the preceding paragraph. It is, therefore, submitted for the consideration of the Massachusetts Institute of Technology (Continued on Page 2)

FRESHMAN TRACK.

Freshmen to Meet Lowell—More Candidates Wanted.

Arrangements have been made for a dual meet on February, the fifteenth, from 4 to 5 o'clock, to be held at 990-yard and 600-yard races. All college events will doubtless be similar to those run in the meets here. These events include the mile, high jump, pole vault and the 40-yard dash. A complete list of the events, as well as the names of those who will run in those events, will be announced as soon as the final decision has been made by the coaches.

Coach Kanaly wants every man who is going to run to come out for the track team. He wants the men to practice all day long until the time the meet is to be held. The track team is still looking for new men to fill the spots on the relay team, and to be ready for the big meets. There are many opportunities for some healthy work.

MANY HAVE ENTERED INTERCLASS MEET

Fast Field in 30-Yard Dash and Half-Mile Run—Several Good Jumps.

Already about thirty entries have been received for the interclass meet this year, and it is expected that the number will be greatly increased by tomorrow night. It is most essential that the members of the student body do not neglect to sign up for the meet, as it has been decided that the members who do not do so will not be allowed to enter the events at the meet.

REV. CUSICK SPEAKS BEFORE CATHOLIC CLUB

Gives First of Series of Talks on "Evolution"—Large Attendance.

Yesterday evening at half-past six o'clock, about seventy men, members of the Catholic Club, and men interested in the Catholic Club, were present in the Union. The talk was given by Bishop Joseph F. Cusick, who gave the first of the series of talks on "Evolution." His talk was so clear and convincing that many of the hearers felt that evolution was the only possible truth.

PRELIMINARY TRIPS FOR TWO-MILE TEAM

Coach Kanaly Picks Twelve Men at Trials Yesterday Afternoon.

Yesterday afternoon, in the Gym, the Registrar, W. A. R. Brown, held the trials for the two-mile relay team. About forty men ran in these trials and all made very good time. Besides those who took trials yesterday there are several others who will take trials at a later date. Among these is Bylund, a member of the track team, who is expected to be one of the stars again this year.

The trials were run two men at a time, which lasted the time for running them off and caused the men to do better than they have done alone. The trials were also of more interest to the spectators than when each man ran alone. Henwood and Hill, who ran together, did very well and made very good time. Haff was getting good and would, if he had made excellent time but for the fact that he had an unfortunate fall at one of the turns. From this trial there are no more trials.
Institute Committee Meeting tomorrow

Many Important Reports to Be Presented for Consideration.

The Institute Committee is to hold its very important meeting tomorrow afternoon, at 4:15, in S. Enz C. The Board matters to be discussed include the relation of the committee to those societies which were deprived of representation at the beginning of this year on account of non-payment of their membership dues for the two years. Then there are many important reports of the standing committees, especially that on the Construction of the proposed Undergraduate Association. It is expected that all of the following committee reports will be reported: Point System Committee, the Committee on Constitution and By-Laws, the Bulletin Board Investigation Committee, the Tech Athletic Council, the Tech Shoe Advisory Committee, the Al-Technique Dinner Committee, the "Concluding M. I. T." Committee.

The group picture of the Institute Committee for Techniques will be taken at Hemenway’s Tuesday.

PEABODY COMPLIMENTED

Scientific American Prints His Speech on Towboats.

The Scientific American in its last supplement pays a very high compliment to Professor Peabody. It devotes nearly two pages to a discussion of the Towboats, the Peabody and the Paton. The article is a popularized summary of a paper delivered by Professor Peabody before the Society of Naval Architects and Marine Engineers at its New York meeting.

Professor Peabody brought out a number of new facts. He showed that a long tow-line in about ten per cent. better than a short one, one-sixth the length. This long line has about the same efficiency as if the tug were actually alongside the tow. The writer explained that there is no reason why the traditional wide-squeezed propeller blade be used for tow-boats as it has absolutely no advantage over the round form. There is, moreover, no reason for the continued use of wood for the tow-boat construction; steel would do just as well.

CATHOLIC CLUB.

cathedral situation and which also had a long neck. Then, as Darwin says, the long- necked giraffes of today was gradually evolved by a series of fortunate circumstances like that above. This is what Darwin calls “natural selection.”

It is certain then to say that this theory was regarded by the Catholics. The Catholic religion does not uphold it because, first, it is insuf.

PROPOSED CONSTITUTION
(Continued from Page 3.)
Amendments.
Article VI.
Amendments to this Constitution may be recommended by the Institute Committee or by a petition of one hundred (100) members of the Association. Any amendments so recommended shall be submitted by the Institute Committee to the entire student body for consideration and adoption. A full notice of such proposed amendments shall be submitted to the entire student body for consideration by publication or posted at least thirty (30) days before the date set for voting; two-thirds of the votes cast shall be necessary to adopt the same, provided 25 per cent. of the total membership vote.

Write Ideas for Moving Picture Plays

YOU CAN WRITE PHOTO PLAYS AND EARN $25. OR MORE WEEKLY

We Will Show You How!

If you have ideas—-if you can think—-we will show you the secrets of this fascinating new profession. Positively no experience or literary excellence necessary. No "flowery language" is wanted.

The demand for photoplays is practically unlimited. The big film manufacturers are "moving heaven and earth" in their attempts to get enough good plots to supply the ever increasing demand. They are offering $100, and more, for single scenarios, or written ideas.

We have received many letters from the film manufacturers, such as VITAGRAPH, EDISON, REELTY, LUBIN, SOLAX, IMP, REX, RELIANCE, CHAMPION, COMET, MILBYS, ETC., urging us to send photoplays to them. We want more writers and we'll gladly teach you the secrets of success.

We are selling photoplays written by people who "never before wrote a line for publication."

You will earn $100 monthly for spare time work.

FREE SEND YOUR NAME AND ADDRESS AT ONCE FOR FREE COPY OF OUR ILLUSTRATED BOOK, "MOVING PICTURE PLAYWRITING."

Don't hesitate. Don't argue. Write now and learn what this new profession may mean for you and your future.
