BIG ALUMNI DINNER
IN NEW YORK FRIDAY

An essay written some years ago by a member of the alumni of the Technological University of New York, which was then almost the only national institution of its kind in the country, has been brought to the attention of the alumni. It has been found that the essay was written by a person who, although not an alumni, was very well known in the city.

The essay is about the importance of alumni associations and the need for a new one to be formed. The writer argues that the existing alumni association is inadequate and that a new one should be formed to address the growing needs of the alumni.

In the essay, the writer describes the benefits of having an alumni association, such as providing a forum for alumni to meet, discuss issues, and support each other. The writer also suggests that a new association could be formed to address the needs of the alumni, including the need for a more active role in the university's affairs.

The essay is a call to action for the alumni to come together and form a new association. The writer encourages the alumni to participate in the formation of the new association and to contribute to its success.

The essay has been widely circulated among the alumni, and there is a growing interest in forming a new association. The writer has been asked to speak at a number of meetings and has been invited to participate in discussions about the formation of the new association.

The writer has agreed to speak at a number of meetings and to participate in discussions about the formation of the new association. The writer has been asked to speak at a number of meetings and has been invited to participate in discussions about the formation of the new association.
WRESTLING TEAM GOES AGAINST SALEM TONIGHT

Men Expect to Put Up Strong Flight Against Powerful Salem Y. M. C. A. Team.

Tonight the wrestling team goes to Salem to meet the strong Salem Y. M. C. A. team, which is considered one of the best teams in this part of the State. The team had been picked for a day or two or three, but in the fact that Means is still troubled by a sprain that kept him out a part of recent East Weymouth game, it is probable that Manager Woodcock will have in his line the 165-pound class, under a handicap. J. G. Kelley, the 155-pound man, is probably the best man on the team, as he has had considerable previous experience, and has shown up well, especially at the last match, at East Weymouth. The lightweights on the team in Sayre, in the 143-pound class, are the only man who won his match at Salem last year, will probably meet Sullivan, his old opponent, again this year. Alexander, another man in the 143-pound class, and Crowell, heavyweight, are both classified as good, and are expected to show up well.

New England Course.

(Continued from Page 1, Col. 3.)

There is lots of room on the editorial staff for good men, and all work on the paper are eligible for election to this staff. Because the man knows nothing of the procedure of work in the way real men should be elected for office, he will find that with a little earnest work he can soon master the work which makes possible a daily newspaper at the Institute.

Electrical Society

(Continued from Page 1, Col. 2.)

American Institute of Electrical Engineers, and it is still customary to have a President of the Institute to preside at the meetings each year. This position was held for several years by Professor Jackson, the head of our Electrical Department, who has just returned from his appointment at the request of the British government, of the telephones systems of England.

This society has more than kept pace with the growth of Course VII, and is now the second largest of the professional societies of the Institute. In addition to providing a social meeting ground for students and instructors, it supplements to a considerable extent the theoretical work of the class room with the practical experience of successful men of the profession.

The active membership in this society is limited to the class of graduates, with Sophomores as associate members, of Courses VI, VII, VIII, and XIV. Several members of this class of 1913, and a number of active engineers are honorary members of the society.

The officers of the society at the beginning of the present year were: President, Robert H. Woods, Jr.; Vice-President, F. C. Weiss; Secretary, C. J. McCarty; Treasurer, W. B. Ready. President Woods has recently resigned, his place being taken by Vice-President.
I him. He who knows not, and knows not, is wise; follow him.

Efficiency Test

Investigation Recently Started Involving Professors and Instructors.

The movement for obtaining the highest possible efficiency is extending even to the universities, as shown by a recent action which has been taken at Harvard. During the last week every professor and instructor at the University has received a card from the authority saying how much of his time is taken up by the various courses duties.

Each one was asked to state how many hours a week he had of actual instruction; how long he spent in preparation for each recitation or lecture; what amount of time he spent in outside research work, and how long the marking of examination papers and daily exercises took him. Besides these there were numerous other questions relating to similar matters.

The object of this inquiry has not yet been announced, but it is presumed that it has been done in an attempt to increase the efficiency of the Faculty, and to see that no man has too much work on his hands; also that none has too little.

This is the first time that such a movement has been taken at any of the large universities in the country.

1914, Needs More Photos Also Much Desired.

Technique, 1914, is now rapidly appearing in form, and it is but a matter of a comparatively short time when the loop of pictures, photos and photographs that now fill the Technique office will have entirely disappeared to make a successful Year Book. Matters are progressing nicely, in general, but there are several names that are slow in coming in. In particular, the class histories are causing great concern. Certainly the Freshman history has been accepted. The time limit for these is January 10th. February 1st, not any man intending to write histories will have a part of vacation to work on them. There is about a dozen who are on it, and any of the latter will be gladly renewed. Several men have promised to work some up during the mid-year recess. Very few photographs have been handed in for the group card, and if any man possesses any may still have a purpose. The Technique management would like him to submit them at once.

Electrical Society.

(Continued from Page 2.)

President Weiss. The election of a new Vice-President is now going on. H. E. Randall, Jr., and J. E. Tennant having been nominated.

The society is now planning an extensive trip to include most of the important electrical plants in New York State. This party will start on Thursday, February 4th, at 2 P.M., the trip terminating at 2 P.M., February 7th, in New York, where each man may choose between returning to Boston or prolonging his vacation in the metropolis.

The exact details of the trip are not yet determined, as yet, but it will include the following:

Monday, February 2d, electric furnaces of the Bethlehem Steel Co. and Canadian N. P. Power Co., Niagara Falls, and the electrical development of Ontario; Tuesday, February 3, electric furnaces of the Lackawanna Steel Co. at Buffalo; Wednesday, February 4, laboratories of the General Electric Co. at Schenectady; Thursday, February 5, Waterside stations, large turbines of the New York Edison Co., and Pittsburg street system.

On account of the large number going, special sleeping cars and coaches have been obtained, as well as special rates. The cost of the trip will be $30.75, open to all institute men.

LOWELL INSTITUTE.

This afternoon, at 5 o'clock, Professor Elected will give the fourth of his series on "The Fundamental Problems of Human Life," in Huntington Hall. The topic for this afternoon will be "The Greatness of Kant."

He who knows not, and knows not, and knows not, and knows not, is ignorant; teach him who knows, and knows, and knows not, who knows, is as wise; follow him.

Alumni Reunion.

Write Ideas for Moving Picture Plays

YOU CAN WRITE PHOTO PLAYS AND EARN $25. OR MORE WEEKLY

We Will Show You How!

If you have ideas--if you can think--we will show you the secrets of this fascinating new profession. Positively no experience or literary excellence necessary. No "flowery language" is wanted.

The demand for photoplays is practically unlimited. The big film manufacturers are "moving heaven and earth" in their efforts to get enough good plots to supply the ever increasing demand. They are offering $100, and more, for single scenarios, or written ideas.

We have received many letters from "the film manufacturers, such as VITAGRAPH, EDISON, ESSEX, LUBIN, SOLAX, IMP, SEX, RELIANCE, CHAMPION, COMET, MELIES, ETC., urging us to send photoplays to them. We want more writers and we'll gladly teach you the secrets of success.

We are selling photoplays written by those who "never before wrote a line for publication."

YOU WILL EARN $100 MONTHLY FOR SPARE TIME WORK.

FREE SEND YOUR NAME AND ADDRESS AT ONCE FOR FREE COPY OF OUR ILLUSTRATED BOOK, "MOVING PICTURE PLAYWRITING."

Don't hesitate. Don't argue. Write now and learn what this new profession may mean for you and your future.
