

THE TECH

VOL. XXXII. NO. 8

BOSTON, MASS., TUESDAY, OCTOBER 8, 1912

PRICE TWO CENTS

T. C. A. DISCUSSION CLASS STARTS TODAY

Year's Series Starts With Talk On "Friends and Friendship."

The first Discussion Class of the T. C. A. meets in the study room of the Union (the one with the round table), this noon, at 1.30. The subject for discussion will be "Friends and Friendship."

These discussions are informal, and every man who attends is free to take part and to express his opinion. The class meets once a week in divisions to suit the schedules of as many as wish to come. Last year there were three divisions, but since this year two hundred and thirty-three men have said that they would like to join in some discussion class, it is probable that several more will be arranged.

In addition to the two meetings held in the Union (one on Mondays, at 5.15, and one on Tuesdays, at 1.30), there will be one meeting in Mr. Talbot's room, 40 Rutland square, probably Fridays, at 6.30. (Rutland square is the first street off Columbus avenue, beyond West Newton street.)

The Secretary of the T. C. A. and the Bible Study Committee will be glad to arrange groups for any time and place that will be convenient for any group of men, such as fraternity men, or those who live in a particular neighborhood. For instance, one class might be for those on St. James avenue, another for those on upper St. Botolph street, as well as one for lower St. Botolph street. There is also a suggestion of having one on upper Newbury street.

TECH GRADUATES.

Many Prominent in Public Life—List Is Always Increasing.

Edwin H. Blashfield, '69, was last month appointed by President Taft to fill the vacancy on the National Commission of Fine Arts caused by the death of F. D. Millet, who was lost on the Titanic.

Henry J. Horn, '88, has been selected to succeed Frank Barr as operating vice-president of the Boston & Maine system. The change took place June 30. Mr. Horn will be in charge of the road's operations. He has been operating vice-president of the New Haven system since January 1. After being graduated from Technology he was connected with the Burlington's Western lines, and subsequently served the Northern Pacific under Mr. McLean. With the latter, Mr. Horn came to the New Haven and was appointed assistant to President Mellen on December 1, 1910.

Paul B. Nash, '97, is American consul general at Budapest. After studying at Hobart College, the Institute of Technology and at Columbian University, Washington, D. C., where he acquired a knowledge of international law, he traveled in the Far East and in Europe studying industrial and commercial conditions. He has been consul general at Bangkok, consul at Venice, Vladivostok and Rheims, and was appointed consul general at Budapest in 1908.

C. J. H. Woodbury, '73, is one of the most widely known writers on textile

(Continued to Page 3.)

HINTS ON WRITING BOOK FOR TECH SHOW

Mr. David Carb to Tell Amateur Authors How to Produce a Good Book.

Mr. David Carb, of the English department, will address prospective authors of the book for Tech Show, 1913, in the Show office tomorrow, at 4.15. This will give the students who are out for the twenty-five dollar prize a chance to get some excellent ideas about how to write a musical play. Mr. Carb is himself an amateur playwright, and his talk will be based on first-hand knowledge. He has been actively concerned with the production of plays at the Toy Theatre, and is one of the originators of the Harvard Dramatic Club. This is the first public expression of the interest that he has taken in the Show this year, and is in agreement with his statement that he wants to help the Show all he can.

There is another competition connected with the work of the Show. This is the one for the position of treasurer, which is open to Juniors and Seniors. Whitwell, of the Show, says that all of the men who have come out have previously been connected with some activity at the Institute where they have become acquainted with bookkeeping, and many have had previous connection with the Show. There are at present twelve men out, and there is every reason to believe that a new member of the Show management will soon be picked out.

PARISH HOUSE OPEN.

Trinity Church Opens Rooms to Institute Episcopalians.

At the reception given last Tuesday by Trinity Church to Tech Episcopalians, Dr. Mann cordially threw open the reading and smoking rooms of Trinity House on Tuesday evenings. He urges all Tech Episcopalians to use these rooms freely as a place of meeting and of study. The Brotherhood of St. Andrews has agreed to have an upperclassman at the rooms whenever they are open, and this man will be glad to meet all new students.

Any man who is interested in the Tech Chapter of the Brotherhood of St. Andrews will receive all the information he desires if he will visit Mr. Kneeland of the Chemistry Department at his room in 44 Walker. The Brotherhood has been very active during the past year in bringing the Episcopalians of Tech into more intimate relations with each other, and this year it expects to accomplish fully as much as it did last year.

M. A. H. S. SMOKER.

Executive Committee Will Meet in Union Today to Make Plans.

At 1.30 P. M. today, the Executive Committee of the Mechanic Arts High School Club will meet in the reading room of the Union.

There will be discussed at this time the program for the year, and immediate plans will be made for a smoker to be held within two weeks.

SOPHOMORES LACK MEN FOR FIELD DAY

Tug-of-War Has Not Full Quota of Men—Football Team Prospering.

The Sophomore tug-of-war men and football men were at practice yesterday, the former at the Gym yard and the latter at the Oval. Only a few men were present at the tug-of-war practice, but Manager Blodgett put them to work at the preliminary task of pulling the iron post. The men are not responding readily to the call of the manager, and no opportunity has yet been available to secure a full team. The men who have come out, however, are already rounding into form, and if the other members of the class who are eligible and who can pull a rope would come out and get to work the tug-of-war team of 1915 would soon be a reality.

The case of the football team is quite different. The men are showing up nicely. Of last year's squad, C. W. Howlett, J. N. McDevitt, J. H. O'Brien, C. L. Morse, Fletcher, Wiswell, E. E. Proctor, F. E. Murphy, K. K. Boynton, J. A. Kelleher, G. G. Haslam and Captain F. P. Scully have reported, as well as some new men who are already giving indications of developing into first-team material.

The men were put through the usual preliminary practice. Several good punters will evidently be developed. A schedule is under way and probably the team will play its first game within a week. Manager Frye is having some difficulty in completing his schedule as the High School teams are showing increased reluctance to meet college class teams. A good schedule is expected, however, and a successful season is looked forward to.

Arrangements are being made with Contoy, of former English High fame, to coach the team, and before long the Sophomores expect to have a perfectly finished team to take the field.

PROGRESSIVE CLUB.

Ratification Meeting Tomorrow—More Members Expected.

Yesterday noon the Nominating Committee of the Progressive Club met in the Union. After the names of several men had been discussed the committee decided on the names that will be presented to a meeting of the Club to be held tomorrow at 1.30. This meeting will be held in the two small rooms of the Union, and any man who is interested in the party will be given a chance to join before the election of officers occurs. The Committee decided to leave the matter of the Constitution of the Club until the meeting tomorrow.

TALK ON IRON ORE.

The American Institute of Mining Engineers held one of its regular meetings last night at 261 Beacon street, and as it was an open meeting several of the members of the Mining course attended. Many of the professors of the department were also there. The speaker, Professor Smythe, talked on "The Iron Ores of the Lake Superior District."

MUSICAL CLUBS TO HOLD BIG MEETING

Tryouts of the Various Clubs Come in the Middle of This Week.

One of the most important meetings of the year to Institute musicians will be held this afternoon at 4.15 P. M. in the Union. This is for all old members as well as any who may be interested in the Musical Clubs.

All men interested in the Mandolin Club are requested to report for the first tryouts Wednesday, at 4 P. M. in the Union. The candidates for the Glee Club will meet in the same place Thursday, at 4.15. Then at 5.00 the Banjo Club holds its own tryout in the Union.

The plans for the coming year have been materializing for some time, and it is the intention to enlarge the clubs to a considerable extent so as to allow all men an excellent opportunity of making some one of them. The leaders of the respective clubs have all had considerable experience and are fully capable of handling the music well, especially as they are to be assisted by G. L. Lansing, who has been secured as coach for the Banjo and Mandolin Clubs for the ensuing year. Mr. Lansing has a wide experience and has acquired a considerable reputation, which should assist the clubs in keeping up the traditional high standards of excellency.

Among the delightful trips planned for the coming year are several in the near neighborhood of Boston, where concerts will be held. These will furnish good practice for the winter concert and also for the long trip after mid-year exams, which is planned if sufficient co-operation can be secured from the alumni.

Freshman: "I don't see why we have to drill in an engineering school."

Sophomore: "Oh, that's so, the mining engineers and the railroad fellers will know how to handle men if there is a big strike and a riot."

Freshman: "Is that so? Well, any way, I don't see why the rest of us have to drill just so they can."

Sophomore: "Oh, that's because if they were the only ones that had to drill nobody would take either of those courses."

And the Freshman receives it all as gospel truth.

The members of Course XIV, are planning an Electro-Chemical Society. They will have an organization meeting Thursday in the Union.

CALENDAR.

Tuesday, October 8, 1912.

1.30—Executive Committee M. A. H. S. Club—Union.

4.15—Musical Clubs—Union.

7.30—Brotherhood of St. Andrews—Trinity House.

1.30—T. C. A. Discussion Class—Small Room in Union.

Wednesday, October 9, 1912.

1.30—Progressive Club—Union.

4.00—Mandolin Club—Union.

Thursday, October 10, 1912.

1.30—T. C. A. Talk, Dr. Murlin—Union.

4.15—Glee Club—Union.

5.00—Banjo Club—Union.

A SUGGESTION.

During the last week not only the Freshmen but many visitors inspected the buildings of Technology. We are sorry to say that the state of the bulletin boards in the various corridors must have impressed them as being indicative of rather slovenly practices on the part of the undergraduates.

The bulletin board in Rogers has been in an especially unsightly condition during the last few weeks.

Some time ago the Institute Committee drew up regulations limiting the dimensions of the posters advertising the different societies' meetings. We understand that at present there is no committee actively in charge of this matter, but it might be advisable for the Institute Committee to appoint, at the end of the present year, a number of Juniors who could attend to the boards during the first week of the next school year.

A competition might also be started offering a prize to the society having the neatest collection of posters during each term.

We have so much biased criticism levelled at Technology that it behooves us to be very careful in avoiding all just criticism that may arise through our own laziness and lack of interest.

This matter of posters may appear to be only a small thing, but if we correct these little failings we will rise above the petty complaints that are made against us on every possible occasion.

We ask the co-operation of the various societies in our endeavors to keep the boards looking as well as possible.

A GIFT.

Through the kindness of a lady friend those Technology men who are interested in reading philosophical works will in future be able to indulge in the very latest treatises on economical problems.

We might mention the facts of this instance to show what an interest our friends take in our welfare.

The donor mentioned above was left a legacy, which she considered might be better used on educational work than on her own personal wants. A number of trustees were appointed to distribute the fund, and it is on this account that Technology men are being able to investigate the very interesting matter of social and economical outlooks.

Our thanks go out to this anonymous donor for her extreme kindness and foresight in attending to a part of our needs, which up to the present has possibly been somewhat neglected.

COSMOPOLITANS PLAN FOR FIRST MEETING

Temporary National Chairmen Elected — Reception to Be Held Within Two Weeks.

On yesterday afternoon the officers and executive committee of the Cosmopolitan Club held their first meeting to make plans for the coming year and appoint temporary national chairmen for the reception to the entering students which will occur on October 19 in the Union.

Several new men were elected to membership in the club, and the following appointed temporary national chairmen: E. D. Peck, America; Edward Hurst, British Empire, Cadenas, South America; Abd-el-Noor, Ottoman Empire; Ishii, Japan; H. K. Chow, China.

A meeting has been called for the temporary chairmen on Wednesday, October 9, when they will discuss the program and general plans for the reception.

The members of the club extend a most hearty welcome to all foreign students and urge that all of them make every effort to attend the reception which is given primarily for their benefit. It will be remembered that foreign students are members of the club without election, and that they and any Institute man who is interested in the welfare of the club are cordially invited to be present.

MANY OUT FOR PRACTICE.

Freshman Class Yields Several New Candidates for Track.

There were many men at the Field yesterday busily practising for the second meet to be held on Columbus Day. Though the times of the runs were rather slow and the distances in the field events were far from records in the first contest, the games brought out the new candidates, who bid fair to develop into varsity material. In response to the interest already shown for track a number of new men reported from the Freshman class.

Since the second meet comes on a holiday and many of the runners may wish to go to their nearby homes, it may be expedient to either hold the meet on the Friday preceding or to postpone it to the following week. In order to ascertain the number of men that will be able to compete on Saturday, Captain Germain will have posted a look in the dressing room at the field. All men who will be able to be present will sign their names as soon as possible so that the officials can decide whether a meet can be run off.

HUNT. HALL LECTURE.

Appalachian Club Will Have Talk on the Himalayas.

The Appalachian Mountain Club promises a rare treat to the members of the club and the general public in the lecture on Wednesday evening, in Huntington Hall, by Charles A. Gilchrist of Philadelphia. Mr. Gilchrist has been stationed in the Philippines, and while there was one of the first to visit the great Taal volcano, the story of which was the subject of his last talk before the club. The nearness of the islands to the Continent of Asia has given Mr. Gilchrist an opportunity to visit the Himalayas, which he has viewed and climbed with the ardor and interest of a practical alpinist. The subject of his lecture is: "The Himalayas of Sikkim," which are among the giants forming the roof of the world, and his camera is certain to have caught some more of the delightful views for which it is famous among mountain-loving people. The time of the meeting is 8 o'clock.

GOLF CLUB ELECTS SEVERAL OFFICERS

Many Freshmen Out for Team—
Club Increases Its Membership.

At a meeting of men interested in golf, which was held yesterday, at 1 o'clock, in 21 Rogers, it was decided to have the election of officers at the beginning of the fall term, and to have these officers serve through both terms.

The men elected A. E. Howlett, '15, president; D. V. Mason, '13, secretary-treasurer, and N. R. Willett, '16, publicity agent. The meeting was made up for the most part of new men, and when the former members are considered the club will have an estimated membership of thirty.

Arrangements are to be made for the use of the grounds of the golf clubs at Wollaston, Newton and Woodland during the fall term. The men may have to pay for each day's use of the links, although there is a possibility of arranging for a definite price for the term.

The new president was authorized to appoint a tournament committee, but its membership has not yet been decided upon. The committee will arrange match plays, obtain suitable cups and medals, determine handicaps and plan all tournaments. It will also make arrangements with outside teams.

All men who are at all interested in golf are urged to come out and have a good time, for the arrangements for the use of the links will soon be completed.

H. S. Morse, '03, has been appointed engineer in charge of the Division of Sewerage Investigations, Designs and Plans Department of Public Service, of the city of Cincinnati, Ohio. Mr. Morse is a graduate of the Institute and for a number of years was with United States Reclamation Service on the Lower Yellowstone Irrigation Project. Later he was resident engineer in charge of construction for the Sewerage Commissioners of Louisville, Ky. The city of Cincinnati is about to spend \$125,000 on a comprehensive sewerage investigation.

TECH GRADUATES

(Continued from Page 1.)

and allied subjects in the United States. He devoted his vacations while at the Institute, and a year or two afterward, to obtaining practical shop experience in various engineering lines, afterward becoming superintendent of a mill in Rockport until he went into the service of the Factory Mutual Insurance Co. as their engineer and later vice-president. In 1894 Dr. Woodbury became assistant engineer of the American Bell Telephone Co., which he held until late in 1907, when that department was moved to New York, since which time he has been in consulting engineering practice. For many years he has been secretary-treasurer of the National Association of Cotton Manufacturers, and much of his engineering work has been devoted to special investigation along the lines of his experience. He has received an honorary degree of master of arts from Tufts College, doctor of science from Union College and doctor of science from Dartmouth College. He received the medal of 1883 from the Societe Industrielle de Mulhouse of Alsace, Germany, for his work on mill construction; the John Scott medal of Philadelphia for the preparation of the first insurance rules providing for the installation of electric light apparatus in 1885; and the association medal of the National Association of Cotton Manufacturers in 1910 for his "Bibliography of the Cotton Manufacture."
