C. A. meets in the study room of the Year's Series Starts With Talk
might be for those on St. James avenue, the first street off Columbus avenue, Fridays, at 6.30. (Rutland square is two hundred and thirty-three men.

In addition to the two meetings held in the Union rooms on Monday, at 2.30, and one on Tuesday, at 3.30, there will be held in the Tabor's room, 49 Holland square, probably Friday, at 7.30, a discussion on the first street off Columbus avenue, beyond West Newton street.

The Secretary of the T. C. A. and the Bible Study Committee will be glad to arrange groups for any time and place that will be convenient for any group of men, such as freshman men, or those who live in a particular neighborhood. For instance, one class might be for those on St. James avenue, another for those on upper Main street, as well as one for St. Andrews. There is also a suggestion of having one or upon St. Andrews.

TECH GRADUATES-
Many Prominent in Public Life-
List Is Always Increasing.

Kirtle B. Hitchfield, '98, was last month appointed principal of the Washington Technical High School, and will vacate the position of assistant principal at the Boston & Maine system. The change took place January 1. After the latter at the Oval. Only a few men were present at the tug-of-war practice, but Jonas Angell pays a visit to work at the preliminary task of pulling the team. The men who have come out, however, are already rounding into shape, and if the other members of the class who are eligible and willing, a real tug-of-war force for 1915, soon we shall be a reality.

The case of the football team is quite different. The men are shown by school. Of last year's squad only, C. S. Hillard, J. P. McDevitt, J. P. Smith, and C. W. Howlett, have had previous connection with the team. There are at present twelve men out, and there is every reason to believe that a new member of the show management will soon be picked out.

PARISH HOUSE OPENED-
Trinity Church Opens Rooms to Institute Episcopalian.

At the reception given last Tuesday by Trinity Church to Institute Episcopalian, Mr. Rohn cordially threw open the society's rooms to the public. Trinity Church on Tuesday evening, He is also a member of Course XIV. He has been working as a preacher in the Unitarian ministry, and subsequently served the Northern Parishes under Mr. W. T. H. With the latter, Mr. Horn came to the New Haven and was appointed pastor of the First Church on December 1, 1915.

T. C. A. MEETING IN UNION TO-DAY.

Executive Committee Will Meet in Union Today to Make Plans.

At 11.30 a. m. today, the Executive Committee of the Mechanical Arts High School will meet in the auditorium of the Union, to discuss the program for the year, and immediate measures will be taken for a smooth and continuous run of the society, as the last two weeks have been devoted entirely to winter sports. (Continued on Page 3.)

HINTS ON WRITING BOOK FOR TECH SHOW.

Mr. David Carb to Tell Amateur Authors How to Produce a Good Book.

Mr. David Carb, of the English department, will address prospective authors of the book for Tech Show, 1915, in the Shaw office tomorrow, at 3.30. This will give the students who are out for the twenty-five dollar prize a chance to get some excellent advice from a man who has a sure touch for the market. Mr. Carb is himself an amateur writer, and his talk will be based on actual knowledge. He has been actively concerned with the production of plays at the T. C. A. and one of the originators of the Hawthorne Dramatic Club. This first public expression of the interest that he has shown in the show this year, and in agreement with his statement that he wants to help the show all he can.

There was another competition conducted with the work of the Shaw office. In all, three division prizes, one open to freshmen and sophomores, the other two for those on upper Main street, as well as one for St. Andrews. There is also a suggestion of having one or upon St. Andrews.

SOPHOMORES LACK MEN FOR FIELD DAY.

Tag-of-War Has Not Full Quota. Tryouts of the Various Clubs

One of the most important meetings of the season will be held this afternoon at 4.30 P. M. in the Union. This is for all old members as well as any who may be interested in the Intramural Club.

All men interested in the Mandolin Club have been requested to meet for the first tryouts Wednesday, at 6 P. M. in the Union. Many of the prospects of the department were also there. The speaker, Professor Searles, called on "The First Aid of the Lake Superior District."
A suggestion.

During the last week only, the Freshman but many visitors inspected the board in Tech. We are sorry to say that the state of the bulletin board is rather unsightly, and must have impressed them as being indicative of rather slovenly practices on the part of the undergraduates.

The bulletin board in Rogers has been in an especially unsightly condition during the last few weeks. We understand that at present there is no one in charge of it, and that matter, but it might be desirable for the Institute Committee to appoint, at the end of the present year, a number of Juniors who could attend to the boards during the first week of the next school year.

A competition might also be started, offering a prize to the society having the neatest collection of posters during the month of September.

We have so much blamed it is to Tech. Technology men are supposed to be careful in avoiding all just criticism might bring these little faults and lack of interest.

A meeting of those same societies may appear to be only a small thing, but if we correct these little faults we will raise another petty complaint and turn the supposed unimportant.

We ask the cooperation of the various societies in our endeavors to keep the boards looking as well as possible.

A gift.

Through the kindness of a lady friend those Technology men who are interested in reading philosophical works will be able to get a number of Trustee's. We might mention the facts of this instance to show what interest some friends take in our welfare.

The dinner mentioned above was held at the Hotel Brunswick and will be better used on educational work than on personal wants. A number of Trustee's were appointed to distribute the fund, and it is on this occasion that Technology men are being called upon to investigate the very interesting matter of social and economical outlooks.

Our thanks go out to this announcement for being so extreme, and foremost in attending to a part of our work, which is greatly needed and has possibly been somewhat neglected.
GOLF CLUB ELECTS
SEVERAL OFFICERS

Many Freshmen Out for Team—Club Increases Its Membership.

At a meeting of men interested in golf, which was held yesterday, at 3 o'clock, in 21 Wadsworth, it was decided to have the election of officers at the beginning of the fall term, and to have three officers serve through both terms.

The men elected A. E. Howlett, '15, president; D. Y. Mason, '15, secretary-treasurer, and S. R. Williams, '15, publicity agent. The meeting was made up for the most part of new men, and when the former members are considered the club will have an expanded membership of thirty.

Arrangements are to be made for the use of the grounds of the golf clubs at Watertown, Newton and Woodland during the fall term. The men may have to pay for each day's use of the links, although there is a possibility of arranging for a definite price for the term.

The new president was authorized to appoint a tournament committee, but its membership has not yet been decided upon. The committee will arrange match places, obtain suitable caps and medals, determine handicaps, and plan all tournaments. It will also make arrangements with outside teams.

All men who are at all interested in golf are urged to come out and have a good time, for the arrangements for the use of the links will soon be completed.

H. R. Morse, '13, has been appointed engineer in charge of the Division of Fireproof Investigations, Design and Plans, Department of Public Service, of the city of Cincinnati, Ohio. Mr. Morse is a graduate of the institute, and for a number of years was with United States Reclamation Service on the Lower Yellow Irrigation Project. Later he was resident engineer in charge of construction for the Reclamation Commissioners of Louisville, Ky. The city of Cincinnati is about to spend $25,000 on a comprehensive sewerage investigation.

and allied subjects in the United States. He devoted his vacations while at the Institute, and a year or two afterward, to obtaining practical shop experience in various engineering lines, afterward becoming superintendent of a mill in Rockport until he went into the service of the Factory Mutual Insurance Co., as their engineer and later vice-president. In 1903 Dr. Woodbury became assistant engineer of the American Bell Telephone Co., which he held until late in 1907, when that department was moved to New York, since which time he has been in consulting engineering practice. For many years he has been secretary-treasurer of the National Association of Cotton Manufacturers, and much of his engineering work has been devoted to special investigations along the lines of his experience. He has received an honorary degree of master of arts from Tufts College, doctor of science from Union College and doctor of science from Dartmouth College. He received the medal of 1883 from the Societe Industrielle de Mulhouse, Alsace, Germany, for his work on mill construction; the John Scott medal of Philadelphia for the preparation of the first insurance rules providing for the installation of electric light apparatus in 1883; and the association medal of the National Association of Cotton Manufacturers in 1910 for his "Historiography of the Cotton Manufacturing."
