PRESIDENT MACLAURIN OUTLINES IDEALS
OF NEW TECHNOLOGY AT ALUMNI REUNION

He Announces to Enthusiastic Tech Alumni that
Education Buildings will be Completed in
Fall of 1915, a half Century After
Rogers Was First Used.

Yesterday afternoon an unusually large number gathered in the spacious Hotel Plaza, New York City, to hear President Maclaurin enthusiastically receive and apply to the subject of the President, who recently presented the Alumni Association with its annual meeting in New York. All Tech men are justly proud of the successful lantern slides shown by the committee. We must not allow our pride to blind us to the fact that the Institute in its scope and influence, and, consequently, that any great centre of life and culture within the Union is as appropriate as Boston to a place to which to summon the Alumni for their annual gathering. Also come to the Institute in large numbers from every section of the Union, passing by institutions nearer their homes for reasons that seem to them good. The centre of the Industrial Revolution in the United States today is in the western part of the State of New York, near the borders of Pennsylvania. The corresponding centre of the students of engineering is St. Louis, Boston, Toledo, Ohio, while the Alumni centres are New York and Chicago.

Alumni associations are springing up all over the nation, from the Pacific, and from the borders of Canada to those of Mexico. The large centres of the future are obviously those with their headquarters in Boston, New York, Chicago, and St. Louis. Whether the Alumni generally appreciate at its true value the solid achievements of the parent organisation in Boston. It has certainly set a very high standard for all the younger associations to live up to, for there seems to be no limit to the self-sacrifice of its members in their efforts to further the best interests of their Alma Mater.

New York is a seat of boundless possibilities, and one may reasonably expect a magnet for the able and ambitious engineers graduating from the University. The Alumni Association isdestined to play a great role in the development of Technology in the United States. It is one of the features of the University that the New York Alumni Association is destined to play a great role in the development of Technology in the United States. It is one of the features of the University that the New York Alumni Association is destined to play a great role in the development of Technology in the United States. It is one of the features of the University that the New York Alumni Association is destined to play a great role in the development of Technology in the United States. It is one of the features of the University that the New York Alumni Association is destined to play a great role in the development of Technology in the United States.

New York, it may be said, is the greatest city in the world, and the one in which the leaders in any field can be found. The Alumni Association is destined to play a great role in the development of Technology in the United States. It is one of the features of the University that the New York Alumni Association is destined to play a great role in the development of Technology in the United States.
THE TECH

WRESTLING TEAM GOES TO MARBLEHEAD

Last Meet Before Mid-Year—Two Freshmen Will Wrestle.

Younted the fast Tech wrestling team goes to Marblehead to meet V. M. C. A. team of that town. The Marblehead team is a new organization and not much is known about them. But Edward Anderson, former middleweight champion, is their coach, and under his guidance they ought to develop some pretty good material. The Tech team has shown each good form in their previous meets, as well as in practice, and they ought to get away with a majority of the bouts. Sayer, the fast little Freshman, who won his bout at Salem in the remarcable time of 45 seconds, is going into the 115-pound class. Means is unable to wrestle in the 125-pound class, and Lone, the second freshman, is going to wrestle in the 135-pound class, and Captain Treat will wrestle at 155 pounds. The Tech team is fortunate in securing the services of "Crosscut," Zeller, as a coach. He will accompany his new charges to Marblehead tonight and get a line on the work they are doing. The train leaves the North Station at 5.55 P. M., on the Portland division.

CONCERT AT WOBURN.

Show Orchestra Gives Very Successful Musicalie.

The concert began promptly at 8:30 and continued for about two and a half hours. The performance was witnessed by a large audience which seemed well pleased with the rendition of the music. The program was practically the same as the one given at Lowell, with the addition of a few new numbers.

Mr. D. M. Gower who took the place of Mr. Osborne McCarthy as conductor, proved to be very efficient and helped to make the concert a most successful affair. Credit is due, in great measure, to Mr. Eckman for his violin solo, and to the quartette and M. G. Mann, '16.

The proceeds are to be devoted to the X-Ray fund of the Charles Curtis Memorial Hospital of Woburn, under the auspices of which the performance was conducted.

THE PERFECT PIPE TOBACCO

THE REVIEWS TO THE CIRCUIT WHICH WERE DISCUSSED BY DR. G. W. PIERCE AT THE LAST MEETING OF THE AMERICAN RADIO SOCIETY

WIRELESS SOCIETY

Meeting yesterday New Government Examinations Explained to Members Present.

Yesterday afternoon the Wireless Society held a monthly meeting in Room II, King, B. After some pages had been read President Affel gave the members an idea concerning the examinations for amateur wireless operators which are being held at the Charlestown Navy Yard. He said that the growing idea was laid upon a clear understanding of the principles and operation of simple transmitting and receiving sets, and that the candidates are expected to be familiar with a code of wireless known as the Berlin Conference. Mr. Affel then explained a form of receiving circuit which was displayed in the Walker Building, at 8 o'clock. Dr. Fessenden, a well known wireless expert and inventor, is to speak, and a very instructive meeting is expected. All members of the social society are eligible to membership in the New England society.

A consideration concerning membership on the Institute Committee was then taken up, and it was unanimous that the first meeting of the New England Wireless Society Harvard University, would be held on April 19th.

The plans for the various buildings and the requirements for factory construction, and some for factory construction,

In the making. Mr. Freeman's co-operation, and the unbounded confidence in Mr. Simms. He believes that we have the right to expect, and hereupon imposes a heavy load of responsibility on us all.

To raise, we do not fail for lack of thoroughness in the mode of attacking. We want beautiful buildings, and in the great practical ends for which they are designed. At the same time we want buildings that are as efficient for educational purposes as are the best factories. That is their purpose. Is it possible in this way to create beauty and utility? I do not see why not, although, of course, the problem is a difficult one. We are convinced that the architects are more likely to give us beauty than utility, and many horrid examples of inefficient buildings are placed before us for our edification. However, that the implied criticism of the architect is, in many cases, entirely unjust. In many cases the client does not really know what he wants, or, even if he does, cannot state his own needs with sufficient clearness or present them with sufficient correctness for the architect to fully understand them. We have gone through a long process of self-education as to our own needs. Our first step was to formulate the requirements of Mr. Freeman's co-operation, and we cannot easily overestimate the great obligation of the great organization that has placed the Institute by itself and by the general will of the country, to reflect information, and at the same time there is a national educational Institution in Europe about whose buildings many important facts were not obtained. The obvious danger of this process is that we may become overwhelmed with the mass of facts to any extent, and that we may have been freed from this danger by having the plans for the new building. Mr. Freeman's hands. He is a master of detail and an expert in the setting of evidence, and he has presented the plans and specifications of the elaborate investigations that have been made in so clear a form that no architect worthy of the name will fail to derive great benefit from the studies that have been made. We feel that by this process we are ready to place the load on the architect's shoulders. Great is his opportunity, but great is his responsibility. In the past he has been eulogized for his success, and sometimes he has been condemned for his failure. The time has come, we believe, when the architect should be held responsible for his work, and his plans shall be made to bear his name. In the past, when the work was done by others, the architect was not called upon to explain himself, and the public was not made to understand the architects. He is no easy one. We are warned that the candidate does not really know what he wants, or, even if he does, cannot state his own needs with sufficient care or present them with sufficient clearness for the architect to fully understand them.

Write Ideas for Moving Picture Plays

YOU CAN WRITE PHOTO PLAYS AND

EARN $25, OR MORE WEEKLY

We Will Show You How!

If you have ideas—if you can think—you will see how we will show you of this fascinating new profession. Positively no experience or literary excellence necessary. No "flowery language" is wanted.

The demand for photoplays is practically unlimited. The big film manufacturers are "moving heaven and earth" in their attempts to get enough good plots to supply the ever increasing demand. They are offering $100, and more, for single scenarios, or written ideas.

We have received many letters from the film manufacturers, such as VITAGRAPH, EDISON, ESSANAY, LUBIN, SOLAX, IMP, REX, RELIANCE, CHAMPION, COMET, MELIES, ETC., urging us to send photoplays to them. We want more writers and we'll gladly teach you the secrets of success.

We are selling photoplays written by people who "never before wrote a line for publication.

YOU WILL EARN $100 MONTHLY FOR SPARE TIME WORK.

FREE SEND YOUR NAME AND ADDRESS AT ONCE FOR FREE COPY OF OUR ILLUSTRATED BOOK, "MOVING-PICTURE PLAYWRITING." Don't hesitate. Don't argue. Write now and learn what this new profession may mean for you and your future.
