CRIMSON WRESTLERS MEET TECH TONIGHT

Undefeated Varsity Squad Expects to Make Good Showing in Matches.

Tonight at the Gym the Tech wrestling team will meet the Harvard team in what promises to be one of the most hotly contested meets of the season. On account of the number of teams which Tech has won, it seems to be the general opinion that Tech has a pretty good chance of winning this one. The team is composed of a number of stars but is not a "one man team" by any means. One notable addition which adds materially to Tech's weight is that of Matthias, who made an excellent reputation for himself on the not lost season (1913). There are 158 lb. and heavyweight classes. The team has sustained two losses in Smith-Martin in the 158 lb. and Wilson in the heavyweight classes. Smith-Martin has injured an ankle and will be out of the team, while Wilson has not yet returned. Although these losses reduce the strength of Tech, who was not as large number of these Christians were scientists would have to rediscover Darwin's theory of natural selection as it is only a higher form of animal, his theory of natural selection and the development of human cannot be that of a machine, leaving the other only thorough than man has two component parts, namely, the body and soul. Darwin and his followers upheld their statement that man was only a higher form of animal. This is not supported by Catholicism, for if man is only a higher form of animal, his mind would not be so high as they supplant Darwin's, Haeckel and his followers who held that the soul of man was descended from an animal but in the statements they offered in support of these assertions, they confined the soul with the brain and thus he fixed his proofs in a fallacy. And furthermore, the human body is not the expression of the 19th century especially, this idea of the Freshmen winning the meet being a stunt, while in the 1909-yard race and the mile run the Freshman surely ought to take first place without much difficulty.

CREW CANDIDATES

Big Meeting in Union This Afternoon at 4:15.

All students who are interested in the Crew are requested to attend the meeting held today in the Union at 4:15. The crew situation is very critical at this match with Annapolis is very good.

INTERESTING TALK ON "EVOLUTION" GIVEN

Father Cusick Continues Discussion at Large Meeting of Catholic Club.

Last evening the Catholic Club holds a large meeting of attendance when about eighty men turned out to enjoy the speech of the Father in the conclusion of Father Cusick's talk on "Evolution." The meeting was held at about half past six o'clock. Father Cusick introduced his talk by mentioning several prominent writers who attempt to correct the mistaken belief that the world was created with certain forces cease to be a Christian. This is very prevalent. These writers state that the man who would entirely reject Christianity and henceforth with the world of Christian activities would have to rediscover Chemistry and Physics and in fact all the sciences, for the reason that such a large proportion of the man whose work resulted in our science as they are Christians. He then went on to show that a large number of these Christians were Catholic and cited several specific instances. Father Cusick then turned his attention to "Evolution." First he took there is a theory of natural selection which applied to man. At the present time there are many men who are called materialists or non-religious, who believe that man is a machine, a combination of physical and chemical forces. In the 19th century especially, this idea was very widespread. The speaker then gave proof of the fact that the soul of man cannot be that of a machine, leaving the other only thorough than man has two component parts, namely, the body and soul. Darwin and his followers upheld their statement that man was only a higher form of animal. This is not supported by Catholicism, for if man is only a higher form of animal, his mind would not be so high as they supplant Darwin's, Haeckel and his followers who held that the soul of man was descended from an animal but in the statements they offered in support of these assertions, they confined the soul with the brain and thus he fixed his proofs in a fallacy. And furthermore, the human body is not the expression of the 19th century especially, this idea of the Freshmen winning the meet being a stunt, while in the 1909-yard race and the mile run the Freshman surely ought to take first place without much difficulty.

HOCKEY TEAM TRIPS.

The proposed trip by the hockey team to Williamsburg and to Amherst has been postponed on account of the recent fever epidemic of the latter college. As the team was to play the game on the same trip it was decided advisable to postpone the Williamsburg trip until it would be possible to play the Argus on the following day on which the Williams game was played. It is probable that arrangements can be made to meet Williamsburg on Wednesday of next week on Tuesday. and Thursday AT. A. C. from Wednesday of next week. On Saturday this week the team to meet the Providence Hockey Team at the Union. This team is made up of a number of old college players and is quite a formidable aggregation. Two years ago this team played Tech and defeated them, but this year, if the team continues play in the manner in which they cleaned up Syracuse and West Point, they stand a very good chance of coming out with the long end of the score in their favor.

CALENDAR

February 14, 1913.
4:00—Bandanna Club—Union.
4:00—Crew Candidates Report at 12:00 P.M.
4:00—Meeting of "Cercle Francas"--Union.
5:00—Donation Meeting of "L'Ami de l'Europe"—Union.
8:00—Wrestling, Harvard vs. Tech—Gym.
February 15, 1913.
2:00—East and Shore Candidates for M.I.C.—Union.
4:30—Train Leaves North Station—Boston.
5:30—Civil Engineering Society Moving Pictures of "Steel Making" at Huntington Hall.
Second Term T. C. A.

Discussion starts

Many New Men Signify Intention of Attending Meeting—Recommanded

The first discussion in the series of "Problems of a Thinking Man," which is to be held today, Friday, at 1:30 in the T. C. A. office. Many new men have signified their intention of attending this class, and it is probable that the place will be changed to some classroom in Room II, which will accommodate all who wish. If the change in the program is necessary, notice will be posted on the door, telling where the class will be held so that any who come late may not be put to inconvenience.

The T. C. A. is anxious to increase the attendance at these discussions and wants to make them of interest and value to all Tech men. They are in every sense of the word discussions, one man's opinion is as good as another's, and the aim is not so much to come to an agreement on to get a frank interchange of ideas, so that each man may have clear in his own mind his own attitude toward the fundamental problem taken up. Suggestions are always welcomed.

The class Fridays at 1:30 is led by the T. C. A. secretary. Talbot also leads another class at 9:30 Friday in his room at 49 Keating Square, in which all are invited.

It is hoped that more classes will be formed to accommodate those who wish to come to an agreement as to get a frank interchange of ideas, so that each man may have clear in his own mind his own attitude toward the fundamental problem taken up. Suggestions are always welcomed.

The topic today is "Discouraged or Encouraged?"

Moving Pictures.

Manufacturing of Steel to Be Shown Tomorrow.

Tomorrow night the Civil Engineering Society will hold Ladies' Night. The entertainment, which is of a very simple kind, is planned to get one of the iron ore from the earth into the steel in its final shape of bars, rods, sheets and other manufactured products. The bessemer is led by Mr. Bissell and the open-hearth process will be fully presented, and should serve a good purpose to anyone in fully understanding the essential differences between them. The pictures themselves are entitled "From Mine to Moulder" and were first shown at the annual Convention of the American Iron and Steel Institute.

The ADVANTAGES WE OFFER

Progressive methods, large resources and two conveniently located, thoroughly modern bank buildings, enable to make the Old Colony Trust Company the most desirable depository in New England.

You are cordially invited to inspect the modern Safety Deposit Vaults at either office.

COMMUNICATION.

To the Editor of THE TECH: Being familiarized with the accomplish-
ments of the Union Committee, the institute Committee recently
drafted a few set of men to care for
our Union. Maybe the committee took
the right measures to correct the prob-
able, maybe not. Frankly, I think not.

Curtain shows are annually ex-
pected to take place. The Union's
with the committee and binders have been provided as con-
tent. Of course, I think it likely that the publishings companies amid the
monthly regularity, but may I in-
quire what subsequently happens to
them? An inspection of the Union
will show one magazine of February
date, none of January, none of Decem-
ber. The name seems of either uninter-
understand it is the duty of the House
Committee to care for these. Why are
they not doing it?

The banners hang at varying angles,
a notice in room 118. In our eyes that
the Orchestra rehearses Tuesdays, the
play is in need of repair, there is
no better place to put rubbish than on
the floor, a soap box holds apparatus
in its basin and is placed on
top of the reading desk; the last
curtain is carefully draped over show
the library—but what's the use of
having better apparatus?

It is high time the new committee, made out of
hand by the powers that be—and I re-
ject to agree with them—joined the appointment—resigned or got busy.
Don't you think?

Sincerely yours.

CATHOLIC CLUB.

(Continued from Page 1.)

Can anyone refute the similarity of
man's brain with that of the ape, from
which it is claimed man descended.
And yet, man is often termed a
lower state of civilization, but other-
wise exactly the same as the man of
today, at 4 o'clock, to discuss the
language are
would prove that man
de-scended from that of an ape, for the
existence of God and the immortality of
the soul. In reality, Haeckel based his
statements upon facts which are not
facts at all.

Father Casieak said that the Catholic
Church was free to accept any theory
which might be proved, for the Church
had not made any assertions one way
or another. He said that Catholicism
would cease to be Catholicism if it ac-
cepted the theory that man's soul de-
sended from that of an ape, for the
fact that the soul was made by the
Church, is the basis of its belief, the
departure from faith.

Mrs. Haeckel thought he was
failed when he proclaimed that
he had at length found the missing
link, which would prove that man de-
sended from the ape. This missing
link consisted of a skull and several bones!
which evidently were not those of an
ape nor those of man, but were sup-
posed to be those of a form which
formed the immediate step between
man and ape. However, science easily
proved that the skull was not that of
an intermediate form, and that
therefore it did not show the descen-
dancy of man from animal. Science
easily proves that the missing link was not
Haeckel claimed to have found, for if there were any
nobody would have not been annihilated
completely.

The man of the first age is known as
Glacial Man, and the theory which is
most plausible is that the man of the
Glacial period was just as human and
perfect as the man of today. The
volume of his brain was relatively
the same as the volume of the average
brain of present man. The only dif-
ficulty in this is that the Glacial man was in
a lower state of civilization, but other-
wise exactly the same as the man of
the present time.

The large number of men who at-
tended the meeting, showed that
Joyed Father Casieak's talk, and after
the meeting concluded a business ses-
sion was held, during which a very
important discussion took place.

The club will hold another meeting
on the second Wednesday in March
on the 12th.

FINANCE COMMITTEE TO AUDIT ALL BOOKS

All Treasurers' Accounts to Be Examined Twice During This Term

The Finance Committee held its reg-
ular meeting at the Union last
night, with about fourm members
present. After the usual dinner of
4,9 the men went up to the Show
office, as the small room of the Union
was in use. The two members of the
committee who met in no room were:
Hilton of the Portfolio Committee
and Walsh of the Union Dining Room
Committee.

The committee on auditing reported
that it had looked over the books of
the Freshman Class and the Cosmopol-
tan Club, and in so far as an
Audit was possible the books were all
correct. It was moved and passed that
in both of the books all the activities
be taken immediately, and that
they be examined by the auditing com-
nitee again in the middle of May.

It was found that it would be convenient
for many of the treasurers to meet the
auditing committee Tuesday night
in the Show Office at 7.00 P. M. It
was expected that any of the trea-
surers of activities who were unable to
be at the meeting last night will be to
the audit Tuesday night, bringing their
account books, all bills, both paid and
unpaid, and a statement from the bank.

The committee will publish its report
in the next issue of the Tech.

COMMUNICATION.

To the Editor of THE TECH:

Although we are glad to have some good, snappy weather, typical of the old Bay State, we realize that it causes some inconveniences, and those men who are obliged to force their heavy overcoats into small, overcrowded lockers realize one of them. I refer in particular to the coat lockers provided for the chemical students in the Walker Building. It requires little mathematics and only a bit of experience to convince us that those lockers were not built to hold. In a proper hanging position, four heavy winter overcoats, one or two sweaters, and huge crumpled in "any old way." Such conditions quickly spoil the appearance of a good overcoat, especially if it changes to be damp, by making it a "dead blanket."likewise producing no little wrinkles." likewise producing no little wrinkles. "
