## TECHNIQUE'S 1915 ELECTORAL COMMITTEE

### Nominating Committee Appointed—Ballots Out at End of This Week.

At an important meeting of the Sophomore Executive Committee, held in 22 Rogers, yesterday afternoon, the election of the 1915 Technique Electoral Committee was taken up. The nomination committee was appointed and is made up of the following men: T. J. Parry, chairman; G. B. Hilton, W. Africa, T. A. D. Fessenden and M. E. Hill. The ballots will be out at the end of this week and must be handed in at the Cage not later than 4 P. M., February 28, if they are to be counted.

As is usual, every man who is a member of the Sophomore class, by reason of his taking the majority of his subjects with the class of 1915, and has paid both his first and second year class dues, is allowed to vote and is eligible to hold a position on the Electoral Committee. The ballot will contain the names of all the men classified by the Registrar's office as members of the class of 1915. Of these twenty-five men will be elected to the Technique Electoral Committee.

## GOVERNMENT ASSAYS.

Attention is called by the United States Geological Survey at Washington to the fact that it does not make analysis or assays of ores or metals for private parties. Many specimens and samples are received by the Survey, accompanied by requests for such treatment with which it is impossible to comply. The force of chemists employed in the Survey is small, and their time is fully occupied by their regular duties. The Geological Survey has no facilities at all for making gold and silver assays. The most that can be done is for the Survey geologist to give an off-hand opinion based on a simple examination of the specimen. If any assay is desired, the proper course is to employ a private assayer or to send the specimen to one of the government assay offices, where a regular charge is made for such work. When specimens are sent to the Survey for examination, applicants should be particular to state whether they wish them returned, as otherwise they will be destroyed. Government assay offices are located at Carson, Nev.; Seattle, Wash.; Boise, Idaho; Helena, Mont.; Salt Lake City, Utah and Charlotte, N. C.

## RELAY TEAMS PREPARE.

### Given Workout Previous to Final Selection of Teams.

Yesterday afternoon Coach Kanaly gave the track men a hard workout on the B. A. A. oval on Irvington street. Barry, Adams and Reed were sent through a fast three laps, the former setting the pace. This work was preceded by several starts. Next, T. H. Guething, Penson, Bolton and C. T. Guething took five laps at a good clip, the older Guething setting the pace. On the last lap T. H. Guething drew away from the others and finished strongly twenty yards ahead.

The men who will make the trip to Providence will be announced later. The train which the team will take will leave the Back Bay Station at 3:30 P. M. on Saturday afternoon. This will get the team to Providence in good time for the evening races.

## FRESHMAN TEAM MEETS SOPHOMORES TONIGHT

### Important Basketball Game to Be Held in Gym—Close Contest Expected.

Tonight, in the Gym, at 8 o'clock will occur the first basketball game between the Freshmen and the Sophomores. Both teams had hard practice yesterday afternoon and will put forth their best efforts to win this important game. The Freshmen practiced team work and passing for the most part, and had no practice game. All the men showed good speed, and the passing was of excellent character. The Freshman team is made up of former high school stars, and is one of the fastest teams which ever represented a Freshman class.

Captain Dewson is a very aggressive player and a good shot. Although rather short for the position of center, he has a good spring, and is a tireless player. He played for the Dewitt-Clinton High School team last year. Merritt is the best forward on the team, and comes here after two years as captain of the North Adams High School team. He is a fast man, a splendid shot from the floor, and also shoots the foul for the Freshmen. Ziner and Raycroft also play the forward position, and both are very capable players. Ross is the best guard and is a strong, consistent player in that position. Last year Ross was captain of the Hartford (Conn.) High School team. Wilde plays the other guard position, and is also a very good defensive player.

After the Freshmen left the floor the Sophomores were divided by Captain Morse into two squads, the first squad to play the second. The ensuing game was very fast, and although the shooting could have been improved upon, the passing and team work was excellent.

Scully and Captain Morse play the forward positions; both are fast men and very good shots, Morse being probably the better of the two, especially in shooting. Neuman plays the center position, and is a fine jumping center, with lots of snap. He is also a very good shot, and has been one of the stars of the team throughout the season. Johnny O'Brien is one of the guards and not only displays strong defensive power, but also the same speed which he shows upon the track. He is also a fair shot. Wilson has been playing guard, and is a fair player in all departments of the game. The other guard is McBride, a recent addition to the squad, who because of his combined speed and defensive strength should make an excellent running mate for O'Brien. He is a good shot from the floor, and displayed this fact yesterday in practice. The probable lineup as announced by the captains of the respective teams is as follows:

Freshmen.	Sophomores.
Merritt, I. F.	J. F. Morse
Ziner, Raycroft, R. F.	Scully
Dewson, C.	Neuman
Ross, G.	O'Brien
Wilde, G.	McBride, Wilson

Exports of copper for the week ending December 5 totaled 6,225 tons; since December 1, 5,850 tons; same period last year, 8,411 tons.

## SHOW CANDIDATES TO MEET THIS WEEK

### Coach Sanger Will Talk to Men Out for "Money in Sight."

Thursday and Friday of this week will be days of the greatest importance to those interested in Tech Show. At that time Coach Sanger will come up from New York to meet all the candidates for cast and chorus of Tech Show, 1913, "Money in Sight." Every year most of the chorus is made up of members of the Freshman class, and this is a splendid opportunity for the men who wish to gain the experience which will stand them in good stead when they apply for more advanced positions on

EUGENE N. SANGER.

the Show next year. Thursday afternoon, everyone who is out for a principal's part should be in the Union dining room promptly at 4:15, while Friday is reserved for the candidates for the chorus. The Show management wish it especially emphasized that Thursday is for the principals and Friday for the chorus, so that there may be no misunderstanding of the arrangement.

Also, at 4:15 on Friday afternoon, the stage manager, Charles E. Fiske, will meet all competitors for Second Assistant Stage Manager in the Show office. This competition is open only to the members of the Freshman class, and is the last chance they will have for becoming connected with the management of the Show.

## 1916 CLASS BABY.

The class of 1916 has suddenly risen to great and almost unprecedented distinction! They wish to announce that a class baby is now in their possession. Mr. Emory Leopold Kemp, '16, is the fortunate father of a bouncing baby boy, who arrived Wednesday, February 12, 1913. The members of the class of 1916 feel highly honored in their new acquisition and extend to their fond parents their heartiest congratulations.

When in need of anything, no matter what it is, be sure and patronize our advertisers.

## MEXICAN REBELS AT LAST OVERCOME

### Madero and Cabinet Imprisoned—Provisional President Appointed.

According to a report received at 10 o'clock last night, the Mexican war has been brought to a close. Madero, the leader of the rebels, has just been arrested and locked up by General Blanquet of the federal forces. Besides the President of the short-lived Republic the whole Cabinet has been captured and is being kept in confinement. The firing on Mexico City has also been entirely stopped. In their place a new government has been set up, with General Muegas as the provisional President.

This news is welcome to all of the civilized world, especially so to the United States, which, on account of the Monroe doctrine, felt the responsibility of protecting foreign citizens during the recent uprising.

## LECTURE ON ALUNDUM.

### Representative of Worcester Firm Speaks Friday Afternoon.

An address on alundum and other refractory materials will be given in 23 Walker, at 4 P. M., next Friday afternoon. The speaker is Mr. K. E. Herrick, representing the Norton Company of Worcester, which manufactures abrasives of this character, and he will fully illustrate his talk with numerous slides and samples. All students interested in these materials and their manufacture are invited to attend, but Professor Taihol, especially urges the attendance of students in the Chemistry and Chemical Engineering courses. As alundum and similar substances are now playing a very important part in manufacturing processes of all kinds it will well pay all engineering students to take advantage of this opportunity to learn of their composition and manufacture.

## PROM SIGN-UP BOOKS.

### Upperclassmen to Be Given First Choice.

At a recent meeting of the Junior Prom Committee certain plans were decided upon which will prove somewhat of an innovation. As the Prom is essentially an upper class affair, and as the hall in previous years has been somewhat overcrowded, only a limited number of tickets will be issued, the upperclassmen being allowed first choice. The sign-up books will be open to Juniors and Seniors on February 21, and will be reserved for them exclusively until March 3, when the Freshmen and Sophomores will be given a chance if any tickets remain unsold at that time.

## CALENDAR.

Wednesday, February 19, 1913.  
4:10—Lecture on "Aviation," by Mr. A. A. Merrill—11 Eng. B.  
4:15—Boat Club—Union.

WEDNESDAY, FEBRUARY 19, 1913

The new TECH English section has now started with a vim, which Professor Bates expects to increase as the work progresses. The course as a whole promises to be one of the most interesting in the Institute, and will certainly be one of the most useful.

The course in Journalism will follow regular newspaper practice as far as it may apply to THE TECH. The students will acquire facility of expression and the ability to say what they have to say in a few words and in an understandable manner, for, says Professor Bates, the "basis of journalism consists, not in saying something in a way which may be understood, but in a way which cannot be misunderstood." Even the Freshman class baby could see the advantages in a special training along these lines, and no doubt the new arrival in the ranks of 1916 would jump at the chance to study journalism under the head of the English department. But, strange to say, many of his more brilliant god-fathers of mature years fail to grasp the splendid opportunity which is lying right within their grasp. Many and varied are the excuses these men give for not taking up the work on THE TECH and entering the new English section, the most common one being that the recitation comes at an inconvenient hour. Is that any reason for neglecting the opportunity now offered for the first time in the Institute? Nothing can be gained without sacrificing a little personal comfort. The trouble with the men who offer this lame excuse is that they are looking only to the present and have no care for the future. They are what is known as "penny wise and pound foolish."

Technology has the reputation of doing well whatever she sets out to do. The new English section will be no exception to this rule, as is evidenced by the fact that Professor Bates thought it worth while to take personal charge of this new course. Freshmen, wake up! You are neglecting an opportunity to get something which you could not get in your ordinary courses, and which you could hardly get as thoroughly in any school but Technology!

## PROPOSALS MADE TO ALUMNI COUNCIL

### President Fay Endeavors to Interest Alumni in Student Activities.

In a recent letter to the members of the Alumni Council from its president, Frederick H. Fay, several proposals were made intimately connected with undergraduate life at the Institute. As one way of obtaining more accurate knowledge of the various activities carried on by the undergraduates, it is recommended that one meeting of the Alumni Council be wholly devoted to this matter by allowing the representatives of the student activities to tell what they have been doing. At the same time a good idea of the Institute publicity may be given to the Alumni.

It was also suggested that the Alumni take more interest in Tech Show. Heretofore, on account of the difficulty in securing a theatre, the Show has been given in the afternoon, and for this reason the attendance of the Alumni has been very small. If the Boston Opera House can be obtained this year, as is the intention of the management, the Alumni Council will endeavor to make the Show an Alumni society event, just as it is now one of the chief events for the undergraduates.

Several other important facts were brought out in President Fay's message. One was in regard to the publication of class directories and the collection of data regarding class reunions. The latter refers more especially to lists of "places available for the reunions, their accessibility, cost of transportation, the size and cost of accommodations, the facilities afforded," etc. It was also suggested that the classes co-operate with the Alumni Association in getting the names of Tech men who might be brought into the work in connection with the Technology Clubs Associated and the next Tech Reunion.

There were given some very interesting facts with regard to the Alumni Fund, which on February 13 amounted to almost five hundred thousand dollars. Although great progress has already been made it will be necessary to practically double the fund if it is expected to interest outsiders in the success of the New Technology. It should not be difficult to do this, for only a little over two thousand out of every nine thousand Alumni have yet subscribed. President Fay emphasized the statement that "it is not what a man gives, but the fact that he gives something, that now counts toward the success of the Fund."

### MEETING POSTPONED.

M. I. T. Progressive Club Will Elect Representative Next Monday.

The meeting of the Progressive Club which was to be held Friday noon in the Union has been postponed until Monday, February 24. It will be held in one of the smaller rooms in the Union, at 1.30 o'clock.

In addition to the election of a representative to the Massachusetts Federation of College Progressive Clubs and discussion regarding a large mass meeting attended by members of the Progressive Clubs of all the Massachusetts colleges, as was reported in yesterday's issue of THE TECH, the matter of drawing up resolutions concerning the Munsey amalgamation plan will be brought up and some action may be taken on it.

Most of the Progressives at the Institute have already enrolled in the club, but there are still a few who are not yet members, and there will be an opportunity for these men to join at the meeting Monday noon.

## RIFLE TEAM DOING WELL THIS YEAR

Loses But One of Seven Matches —Shoot to Be Held With Pennsylvania.

The Technology Rifle Club has been doing remarkably good work recently. It has played seven of its scheduled matches, and has thus far lost but one. Of the other six matches five have proven victories, while the results of the sixth have not yet been reported. The only team to defeat our men was that of Princeton University, and in this case the score was but 929 to 915. The club's officers see no reason why the team should not continue in the same form in which it has begun, and if it continues its good work the chances are that it may win the league championship.

The one event, if any, that will tend to weaken the Rifle Club's team is the withdrawal of President Rudolf from the club. Mr. Rudolf has been a member of the club for four years, and for two of these has been its president. He has likewise held the club championship for the past two years, and his presence will be badly missed, especially in the long range work.

A special shoot will be held in the very near future. Although the University of Pennsylvania was omitted from the National Rifle Association's Eastern League, we have arranged a game with her, and from all that is known at present we seem to have the stronger team of the two.

From the complete returns up through the fifth shoot the Institute stood fourth among the fourteen teams of the league; Columbia, Harvard and the Mass. Aggies had perfect scores, while we had an average of eighty per cent. Our average is now even better than that, but the results of the other colleges are not known.

## NEXT ALUMNI REUNION.

Member of the Alumni Council Recommends 1915 As Date.

It has been suggested by members of the Alumni Council that the next general Technology Alumni Reunion be held some time in 1915, and probably at the New Technology. If the precedent set by the large reunions held in 1904 and 1909 were followed the next would come during 1914, but on account of the fiftieth anniversary of the opening of the Institute, and because the new buildings will then be nearing completion, it is thought better to postpone it until the following year. Another argument used by those who favor the postponement is that the Technology Clubs Associated intend to hold a general meeting at Chicago during 1914, and this event should not conflict with the larger reunion in Boston. The Chicago gathering will be similar to that in New York only a few weeks ago, which was attended by Technology men from all over the country. Successful as the former reunions have been, it is hoped that the one commemorating the fiftieth anniversary of the Institute's founding, and at the same time celebrating the completion, or at least the rapid growth, of the New Technology, will exceed them all.
