I will tell all.

Given the large number of specimens classified by the Registrar's office, it is impossible to comply. The lists for small metals (classified by the Registrar's office as large and is eligible to hold a position on the Sophomore class) by class. This will be out at the end of this week.

It is true that it does not tell all, and the passing was of excellent quality. At IIT, I wish I could have seen it, and had no passing for a very long time. The Sophomore team is made up of former high school stars, and is one of the finest teams which ever represented a freshman class.

Captain Dewon is a very aggressive player and a good shot. Although rather short for the position of center, he has a good spring, and is a tireless player. He played for the Davidson-Chilton High School team last year. Merritt is the best forward on the team, and was the center after two years as captain of the Notre Dame High School team. He and Dewon also play the forward position, and both are very capable players. Merritt has good size in the back, and is a strong, consistent player in that position. Last year, Merritt was on the Harvard (Corn.) High School team. After the Sophomore team has been elected, a splendid list will be made up of the best students for the Sophomore team.

In this freshman game, the Sophomore team was divided by Captains John Morgan, Jack. The Sophomore team has an excellent player, and is a very good defensive player.

After the Sophomore team has been elected, the Sophomore team has a splendid list.

EUGENE N. SANGER

The Show next year, Thursday afternoon, will be for the Junior and Sophomore teams in the auditorium. The competition is only one in the Sophomore class, and to the last chance that will be in the Sophomore class, and to the last chance that will have for becoming connected with the management of the Show.

1916 CLASS DRESS

The class of 1916 has subdivided itself into four groups: the Junior and Sophomore teams in the auditorium. The competition is only one in the Sophomore class, and to the last chance that will have for becoming connected with the management of the Show.

MEXICAN REBELS AT LAST OVERCOME

Maduro and Cabinet Imprisoned

Provisional President Appointed.

According to a report received at 10 o'clock last night, the Mexican army has been brought to a close. Maduro, the leader of the rebels, has just been arrested and locked up by General Plancur. Besides the President of the Provisional Government, who was imprisoned, the Cabinet has been captured and is being kept in confinement. The government of Mexico City has also been entirely stopped. In their place a new government has been set up, with-General Huerta as the provisional President.

This news is welcome to all of the civilized world, especially to the United States, which, on account of the Mexican crisis, felt the responsibility of protecting foreign citizens during the recent uprising.

LECTURE ON ALUMNUM

Representative of Worcester Firm Speaks Friday Afternoon

An address on aluminum and other refractory materials will be given in 22 Walker, at 4 P. M. next Friday afternoon. The lecturer, Mr. E. F. Herrick, representing the Norton Company, will make a speech which contains many valuable facts and statistics. All students interested in these materials and their manufacture are invited to attend, but Professor Talbot will be required to give the attendance of students in the Chemistry and Chemical Engineering College. An aluminum and similar substances are now playing a very important part in manufacture and will continue to take advantage of this opportunity, and it is believed that this company will have for becoming connected with the management of the Show.

FROM SIGN-UP BOOKS

Upon request to be given First Choice.

At a recent meeting of the Junior Committee certain plans were discussed which will prove useful in the consideration of this matter. As the Provisional Government is now in a more efficient state, it is evident that the class of 1916, which has been somewhat overestimated, only a hundred members will be selected. The list of sign-up books will be given to Juniors and Sophomores on February 21, and will be preserved for the class. The list of sign-up books will be given to Juniors and Sophomores on February 21, and will be preserved for the class. The list of sign-up books will be given to Juniors and Sophomores on February 21, and will be preserved for the class.

PROPOSALS MADE TO ALUMNI COUNCIL

President Fay Endorses to Interest Alumni in Student Activities.

In a recent letter to the members of the Alumni Council, President Fredrick H. Fay, several proposals were made in connection with undergraduate student activities. As one way of obtaining more accurate knowledge of the various activities carried on by the undergraduates, it is recommended that the meeting of the Alumni Council be wholly devoted to this matter by allowing the representatives of the student activities to tell what they have been doing. At the same time, a good idea of the Institute publicity might be given to the Alumni.

It was also suggested that the Alumni take a more interest. A Tech Show, Heretofore, on account of the difficulty in securing a theatre, the Show has been given in the afternoon, and for this reason the attendance of the Alumni has been very small. If the Boston Opera House could be obtained this year, to the intention of the management, the Alumni Council will endeavor to make the Show an Alumni society event, just as it is now one of the chief events for the undergraduates.

Several important facts were brought out in President Fay's message. One was in regard to the publication of class directories and the collection of data regarding class reunions. The latter refers more especially to lists of "place available for the reunions, their accessibility, cost of transportation, the size and cost of accommodations, the facilities afforded," etc. It was also suggested that the classes cooperate with the Alumni Association in getting the names of all Alumni who might be brought into the work in connection with the Club reunions and the next Tech Reunion.

There were given some very interesting facts with regard to the Alumni Fund which on February 13 amounted to almost five hundred thousand dollars. Although great progress has already been made it will be necessary to practically double the fund if it is expected to interest outsiders in the success of the New Technology. It may be difficult to do this, for only over two thousand dollars a year, and only one thousand Alumni have yet subscribed. President Fay emphasized the statement that "it is not what a man gives, but the fact that he gives, which is given to the Alumni."

MEETING POSTPONED

M. J. T. Progressive Club Will Elect Representative Next Monday.

The meeting of the Progressive Club which was to be held Friday soon in the Union has been postponed until Monday, February 23. It will be held in one of the smaller rooms in the Union, at 1:30 o'clock.

In addition to the election of a representative to the Massachusetts Federation of College Progressive Clubs and discussion regarding a large IMG_PASION ENSURING, the Committee of the Progressive Clubs of all the Massachusetts colleges, as was reported in yesterday's issue of THE TECH, the matter of drawing up proposals concerning a possible centralization plan will be brought up and some action may be taken on that subject.

Most of the Alumni at the Institute, who are already enrolled in the branch, but there are still a few who are not yet members, and there will be an opportunity for these men to join at the meeting Monday noon.

THE ADVANTAGES WE OFFER

PROGRESSIVE methods, large resources and two conveniently located, thoroughly modern bank buildings, combine to make the Old Colony Trust Company the most desirable depository in New England.

Interest-bearing accounts subject to check may be opened either at Court Street or Temple Place, and to the offices used interchangeably for the transaction of your banking business.

You are cordially invited to inspect the modern Safety Deposit Vaults at either office.

RIFLE TEAM DOING WELL THIS YEAR

Loses But One of Seven Matches—Shoot to Be Held With Pennsylvania.

The Technology Rifle Club has been doing remarkably good work rec- ently. It has played seven of its scheduled matches, and has thus far lost but one. Of the other six matches five have proven victories
while the results of the sixth have not yet been reported. The only team to defeat our men was that of Prince- ton University, and in this case the score was but 999 to 915. The club's officers say no reason why the team should not continue in the same form in which it has begun, and if it continues its good work, the chances are that it may win the league championship.

The one event, if any, that will tend to weaken the Rifle Club's term is the withdrawal of President Rudolf from the club. Mr. Rudolf has been a member of the club for four
years, and for two of these he has been its president. He has likewise held the club championship for the past two years, and his presence will be badly missed, especially in the long-range work.

A special shoot will be held in the very near future. Although the Uni- versity of Pennsylvania was omitted from the National Rifle Association's Eastern League, we have arranged a game with her, and from all that is known at present we seem to have the stronger team of the two.

From the complete returns up through the fifth shoot the Institute
stood fourth among the fourteen teams of the league; Columbia, Har- vard and the Mass.Args had perfect scores, while we had an average of eighty per cent. Our average is now even better than that, but the results of the other colleges are not known.

NEXT ALUMNI REUNION.

Member of the Alumni Council

Recommends 1915 As Date.

It has been suggested by members of the Alumni Council that the next
general Technology Alumni Reunion be held some time in 1915, and prob- ably at the New Technology. If the precedent set by the large reunions
held in 1904 and 1909 be followed the next would come during 1914. Not an account of the fiftieth anniversary of the opening of the Institute, and because the new buildings will then be nearing completion, it is thought better to postpone it until the follow-
ing year. Another argument used by those who favor the postponement is that the Technology Clubs Associated intend to hold a general meeting at Chicago during 1914, and this event
should not conflict with the larger re-
union in Boston. The Chicago gath- ering will be similar to that in New York, only a few weeks ago, which was attended by Technologies from all over the country. Succeed-
ging as the former resolutions have been, it is hoped that the one commemorat- ing the fiftieth anniversary of the In-
situte's founding, and at the same
time celebrating the completion, or at least the rapid growth, of the New Technology, will exceed them all.
