BELIEVE GHOST TO BE WANDERING AT LARGE

Wied Being Continues to Haunt The Tech's Adds Mystery to Mystery.

An attempt was made yesterday to capture the ghostly visitor, but he, or she, is (the stuff cannot determine the gender), vanished into thin air with a loud report. It was thought that if one might find the ghost, the visitor might be captured. Shrewdly, it is to be feared to give up its secret as this the report, for it is, however, evaded capture. It has been sug-
gested that a aunt is to be pur chased and set in the lower TECR office. If any future engineer can suggest the method be feasible way of captur ing this disturber of the peace THE GHOST, he is sure to be pleasant surprise. It does not rest on foolish methods this time. When the name or other fallacies of childhood to be dispelled, this attempt will be made.

In yesterday's TECH appeared an account of a new and unclassified room of the institute, floating through those offices over and over, since that article was

COMMUNICATION.

To the Editor of the TECH:

Referring to my friend, Mr. Peck's article, in yesterday's issue, I do not agree with his proposition that twelve men cannot properly represent fifteen hundred students, as this principle is carried on in every railroad or industrial corporation in the world. This rule, as to the number of delegates, is rightly the principle.

In the Technique 1913 is published by the Tech Club and the Undergraduate Society, and by-laws, or what such clubs can think of as by-laws, is subsidiary to the constitution and by-laws, or what such clubs can think of as by-laws, is subsidiary to the constitution and the position which they expect to fill. The team shot as follows:

Gere .......... 96 101 193
Huffer .......... 199 201 281
Palmer .......... 201 203 283
Stewart .......... 197 201 281

INTERESTING SLIDES ON OLYMPIC GAMES

Splendid Series of Pictures Exhibited Before Cercle Francois.

An interesting lecture, accompanied by a series of excellent slides, was given last evening by F. E. Stern, '15, under the auspices of the newly organized Cercle Francois. As official photographer for the American Press, Mr. Stern was in position to obtain the best photographs the event afforded, and he made the most of his opportunity. His slides are remarkable for the close view of the men in action in all the more important events. His snapshots of the high jump are especially good.

RIFLES BEAT CORNELL

Tech Club Has Lost Only One Match Out of Eight.

Technology won its seventh victory by defeating Cornell, yesterday, in a close race. The ride team has been slowly improving, and has achieved their highest average for the year. The team shot as follows:

Dane's .......... 29 29 29
Hathaway .......... 4 100 104
Patterson .......... 22 22 22
Gere .......... 26 26 26
Catskill .......... 19 19 19

T. C. A. TALK

Mr. Henry Abrahams Will Speak

Literally and the Church.

Mr. Henry Abrahams, who is to ad dress the student body at 12:30 today, is a well recognized leader. He is unusually well qualified to speak on his subject, "Labor and the Church" on account of his position as secretary of the National Cigar Makers' Union and secretary of the Boston Central Labor Union. At a college like this, where students must at some time deal with labor in a more or less immediate manner, the speaker should have a large audience. The subject promises to be interesting not only on account of its brevity, but also on account of the unusual grouping of objects like Labor and the Church. To surpass the excellence of the Thursday morning talk would be a hard task; but nevertheless the officers of the T. C. A. think Mr. Abrahams has the ability to do it.

ILLUSTRATED TALK

Mr. Jewett Will Address Them on Problems in Electrical Engineering.

Tonight, at 6:45 o'clock, the Electrical Engineering Society will hold its February dinner in the Union dining room. The speaker for the evening will be Mr. F. H. Jewett, who graduated from the Institute with the class of '00. His wide experience as an electrical engineer is of great help to the Institute, and as Assistant Chief Engineer of the Western Electric Company, fit him to tell the society about "Problems in Electrical Engineering." During his professional career, Mr. Jewett has collected and prepared numerous lantern slides, which will show in connection with his talk.

The officers of the society are confident that Mr. Jewett's talk will prove highly interesting. Men who are taking electrical courses, and any who might be interested are urged to attend this lecture. The price of tickets, which may be obtained from the officers of the society, is 10¢.

After the conclusion of Mr. Jewett's talk, the officers will give its report. The proposed change in the name of the society is under consideration among members of the society, and this report will probably receive considerable discussion.

PROGRESSIVE CLUB

This afternoon, at 5 o'clock, there will be a meeting of the Executive Committee of the Progressive Club in the Union. The most important business to be taken up will be the question of dues for the club. Up to the present time these have been given on members. The following are expected to be present:

FRESHMAN BASEBALL

All freshmen in the freshmen baseball team are asked to hand in their names at the Club, stating the position which they expect to fill. As the spring is rapidly approaching it is necessary that the team be organized at once so that it may have sufficient practice before the opening games.

Basketball Game.

Sophomore Team Plays Haverhill Tomorrow Night.

Tomorrow night the Sophomore basketball team plays the Haverhill quintet at Haverhill. The team to take the trip will probably be: Neill, center; Moran, Scully and Quick, forwards; and Wilson, O'Brien, and others. The home of the boys, no doubt, will be on the road tomorrow night, against Haverhill, and several other eminent stars. To place them this at least as well as at Providence.

THE TECH

THURSDAY, FEBRUARY 27, 1913

THE NEW CONSTITUTION.

We have heard much talk about the Constitution established for the Institute Committee and it is not hard to see that they are the ones who have failed to read the various articles, criti- 
cisms, and above all, the document itself, which has appeared from time to time for the last few weeks in these pages. These men are among those who will later be asked to vote on the question of retraction or adoption of this important matter, and are more than glad to see that their interest has been sufficiently aroused to the point of seeking information which will enable them to criticize and vote intelligently.

We have understood that the Constitution Committee will post copies of the proposed constitution in various places about the Institute and we sincerely hope that all men will use this opportunity to become thoroughly familiar with the conditions under which this constitution will affect the government of the student body.

STUDENT RANK.

Among the names of those men who have not yet registered for Professor Rodwell's popular course in Sanitary Science, but who have been regularly attending the lectures, is that of P. H. Rand. The Junior occupies a prominent seat in the front row during thelec- 
tures and shines out among all the others. It was very careless of him to neglect to register, and be risks con- 
ing with the wrath of Registrar Humphreys. The Junior's appearance is a living example of the famous old adage; that "one is never too old to learn." Although he may be attending the lectures because of interest in the subject, there is a vague possibility that he may be a self-appointed commis- 
te to see whether Professor Rodwell's work's services are a paying invest- 
mantage.

Perhaps it is the ghost of "Varsity basketball.

Do you believe in ghosts?

Is it the spirits of ancient basketball.

TECH: SHOW CAST AND
CHORUS REHEARSAL.

Real Work Starts Today With
Thorough Reading of Book.

Today, at 3:30 o'clock, there will be a rehearsal of the cast of the TECH Show, while at 5 o'clock the chorus will also meet. All new material out for the chorus must be present at this time, and this will be the first opportunity to order the shows.

The real work of the show will start this afternoon. Up to this time the main idea has been the choosing of the men to take the different parts, but from now on the rehearsals will be more even, and every man is expected to be punctual. The entire book will not be read over at the meeting of the committee. The men will not be required to test their voices by singing. Mr. McCorrath will be present to help out in this task and will also start on the music of the show.

There will be no cutting at either of the rehearsals. It is necessary for every competitor to be present, as the work now is fundamental and very important.

COMMUNICATION.

To the Editor of THE TECH:

It grieves me beyond words to see THE TECH featuring articles like the one which was inserted upon an unsuspecting group body in the "West End" per- 
formance. This new rumor which you are circulating is plainly nothing more than another of those abominable advertising schemes. Why are circulating is plainly nothing more

"..."
MOLDING MACHINE.

The machine itself appears to be a large, flat cylinder, on the top of which is mounted a flat cast steel plate, 36 inches in size. The whole and the machine, which is almost a cylinder, serves as a support for the table and flask dropping on it. The table is then raised by four springs in the lower cylinder.
