1913 PORTFOLIO MAKES RAPID PROGRESS

Seniors Should Sign Up at Once to Aid the Committee.

Work on the Senior Portfolio is advancing with much rapidity. During the past two weeks, Mr. C. W. Hearn, the official photographer, has been rushed off his feet by the men desiring to make appointments for pictures to be taken. But as yet there are a number of men who are especially desired by the committee as to be in the portfolio, and they have made no movement to have their pictures taken. As March 16th is the time limit on which these pictures must be ready for the book, the men can readily see that they can afford no delay. The Portfolio Committee is making special dates for sittings for all men in the class, and the men are asked to hand them in at the dates for sittings for all men ready for the book, the men can read-

OPPOSITE YOUNG'S HOTEL
FIVE HOURS PER DAY. FIVE DAYS PER WEEK
Also Five Dollars Per Hour, is the
Sparking Statement Made
By Union Labor Leader.

Yesterday, at 1:30 P. M., Mr. Abrahams, the T. C. A. speaker, delivered a talk that made those present sit up and take notice. He started out to speak on two subjects, 'Is it a living wage, and the Church,' but before he ended he had succeeded in shocking every conservative in the room by his radical statements.

He was sponsored by stating that the aims of the church and labor unions are one, and therefore they should work hand in hand. The methods by which they approach this same end are radically different, with church appealing to the spiritual side and the labor union to justice on the economic side. He stated that the church is not performing its duty, and showed how the labor union was more efficient in helping man than is the church alone.

The unions have a number of institutions by which their members are benefited in various situations, such as in sick benefit fund, loaning fund, death fund, etc. He gave various instances in which the union was of benefit and the church was not. He stated further, that the church was progressing, rather slowly, but still in a manner that one can help noticing. A number of years ago a representative of a labor union, or even a man that advocated a living wage, was not permitted to speak in a church, now the church is willing up to the fact that it has to face the same problems, and is treating them accordingly.

Then he explained what he meant by a living wage, and said that all the studying of social economics in the world is not going to acquaint one with actual working conditions. Only the man who is suffering under the dead end in the one who really understands what it means. A living wage, according to the speaker, is enough to support a man, his wife and family, and also allow him to save a little for old age. He talked of the eight-hour day and his expression of the opinion that it would become universal. Then he broke out and said that the thing the labor unions are working toward today is not the eight-hour day, but "a five-day, five days a week, and five dollar an hour." One day for God, one day for man, one day for man, and time enough for a man to have a chance to study and learn. The prediction sounded very radical to most of the men present, but so do all new propositions pronounced by the leaders of the men who are lower down in life.

NAVY WORK.
(Continued from Page 1.)

Leaders of the whole group upon the recommendation of the faculty of the institution or the men themselves. The men will be furnished with handsome bags and ditty boxes, but they will provide their own bedding. Numbana place will be provided for the storage of their civilian clothes which will not be allowed when on duty. The men will be required to keep their quarters and equipment in order.

In the course of instruction every effort will be made to give the individual the training which will be the most advantageous to him and in laying out the work the Naval Officers will confer with the Presidents of the Institution and with such professors as the Presidents may designate to arrange the summer work in such a manner that it will be profitable to the Naval and the Department may each receive the maximum benefit.

In order that the students may have some idea of the students' work, the nature of the battleship cruise during the summer may be described as follows:

FREE SPANISH COURSES.
Tech Men Wanted—Language
Conflicts May Be Made Up.

Are you interested in taking up a course of Spanish? If so, there is a splendid opportunity offered you in a free class in Spanish which is being held in the Continuation School of this city. Special courses in Spanish, French, and Italian are arranged to be of immediate value to men who intend to enter the commercial life of countries where these languages are spoken, and also to scientific Spanish for engineers. Instruction is given by thoroughly competent native masters. These courses can readily supplement any given by the Institute, and it is English spoken in class, they afford a careful training to the ear. Men who have language constrictions at the Institute will receive credit for these courses. New classes meet two days a week, from 4:30 to 5:30, and are given for the first time. The latter classes have been held since December, but students having some knowledge of the language may be admitted to these. New men should apply at once to the office of the principal, Paul V. Donovan, Room 31, No. 48 Boylston street.

E. F. DINNER.

many, the Western Union Telegraph Company, and several others are sub- stitutes. In the Bell Company alone there are 150,000 employees, and in the last seven days alone they have had 2,000,000 employees, and in the last seven days alone they have had 2,000,000 employees.

The unions have a number of institutes, in which they approach this same end. The most important of these is the American Telephone and Telegraph Company, the members of which study it and develop the received article. This company has the Patent Department which is expected to answer but two questions: "Is it free from other patents?" and secondly, "Is it patentable?" If it is free from other patents they go ahead, but if not, they go on with a new device. If it is patentable it is not patented, but this is not necessary to

NAVY WORK
(Continued from Previous Page)

The whole fleet, including destroyers, submarines and auxiliaries, will rendezvous somewhere on the New England coast to manœuvre at Grand Bay. It is, in general, the custom for the batteries to be divided into two fleets or squadrons which are stationed about these important questions.

The exercises at sea are of a character, simulating war navicoreuse. The fleet is divided into two fleets or squadrons which are stationed about these important questions.

In the course of the summer, the work in port is not spent by the men on yachting trips or summer excursions, but rather for personal effects bought by the officers. The week there are carried on all day and night, and the amount of work carried on by ships at anchor, or the week in port, however, is not an idle week. During that week there are carried on all day and night, and the amount of work carried on by ships at anchor.

The week in port, how-
