

THE TECH

VOL. XXXIII. NO. 1

BOSTON, MASS., WEDNESDAY, APRIL 2, 1913

PRICE TWO CENTS

PROMISING OUTLOOK FOR TRACK SEASON

Team Is Strong in Running Events—Wilson, Germain and Bylund Should Star.

The interest in track athletics is now increasing, and the men around the Institute are beginning to wander out to the track occasionally to watch the progress of the team. The prospects are the best in several years, and for this reason much interest has been aroused, and the discussion of the prospects in the different meets has become general.

There are many veterans out for the team, and also several promising Freshmen. In addition to these men there are several who were out for the team last year, but failed to make it. Many of these have improved greatly since that time, and Coach Kanaly expects much of them.

To date only three inter-collegiate meets have been arranged. These are a dual meet with Worcester Polytechnic Institute, the New England Inter-collegiate and the big Inter-collegiate at the Stadium. It is desired, of course, that the dual meet result in a victory, but this should not be difficult. The efforts of the team must then be bent almost entirely upon the New England Inter-collegiate in a desperate effort to win.

Tech's strength, and only hope of victory, rests in the runners. The field men may win a few points, but very little will be counted upon from them. The sprints show Tech exceptionally strong. L. A. Wilson, '14, was a consistent winner last year until kept out of competition by an injury to his leg. This year he seems to be almost as strong as ever and though obliged to slow up in some of his indoor races this year it is hoped that he will be in excellent condition at the time of the Worcester meet. He

(Continued to Page 3, Col. 1.)

HIGH SCORE FOR TECH.

Final Shoot For Rifle Team in Intercollegiate Competition.

The final shoot of the M. I. T. Rifle Team was made yesterday afternoon at the First Corps Cadets Armory on Columbus avenue. This contest was against the Massachusetts Agricultural College, whose team held their shoot at Amherst. An unusually good showing was made by the Institute men in their last match, their score of 960 being second to the best record made thus far in the intercollegiate competition. As this week marks the closing of the series, the final results will be known in a few days.

The score made by the Institute team this afternoon is as follows:

	Standing	Prone	Total
Capt. J. S. Stewart	97	98	195
W. S. Chandler	94	100	194
G. G. Haslan	94	99	193
E. J. Casselman	94	97	191
C. T. Dunn	92	95	187

FRESHMAN GYM CUTS.

It has been announced that the time allowed the Freshmen for making up gym cuts will expire in two weeks. According to the faculty rules anyone who fails to make up all their cuts by that time will be required to repeat the course next year. The men who have a large number of cuts to their credit are warned that there will be no exceptions to this rule.

ELECTIONS TO MANAGING BOARD OF VOLUME XXXIII OF THE TECH ANNOUNCED.

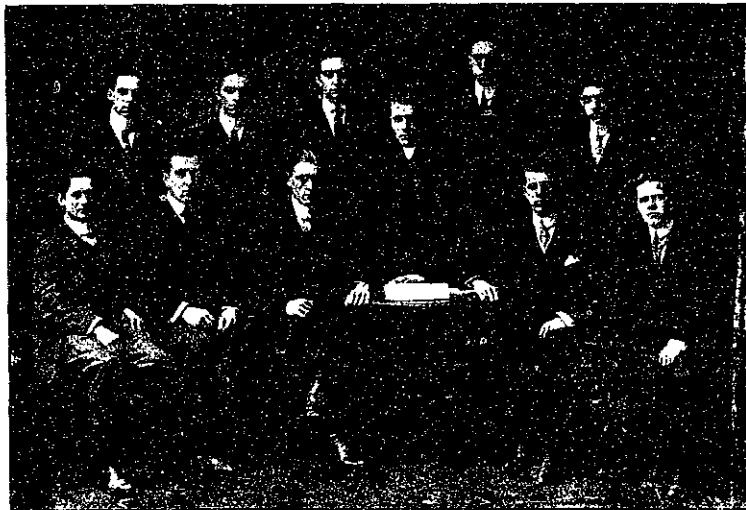

S. H. Taylor Chosen General Manager For Coming Year—Successful Close of Vol. XXXII After Many Hardships.

With the publication of this issue of THE TECH, Volume XXXII is succeeded by the new staff of Volume XXXIII, the elections to which are published in the editorial column. As was enacted last year, the old board gives place to the new on the first of April for the purpose of giving the men a chance of getting assistance from the former members. Under these conditions the paper may commence publication next year with experienced men.

Volume XXXII retires leaving the publication in excellent condition, both financially and with respect to men capable of running the paper properly. The conditions under which the old board commenced the year were far from favorable. There were only a few men working on the news end,

were justified by the excellence of the results and bid fair to become permanent.

The idea of establishing an editorial staff similar to the news and business staffs was suggested. Men who came out for the paper worked in the editorial department, and thereby increased its efficiency. The members of the staff are always on the lookout for anything that is worthy of note or criticism, and in this way more Institute news is treated editorially than would be possible with but one man doing all the work. This system has also the advantage of developing men who later will be capable of holding the position of editor-in-chief. The editorial contest conducted by the journalistic fraternity Pi Delta Epsilon

FROM LEFT TO RIGHT STANDING, MUNN, LAMB, PARIS, FOOTE, ROGERS. SITTING, WAITT, TAYLOR, GIBSON, FLEMING, THAYER PECK.

and it was with difficulty that the daily editions were published. Calls for men brought little result, and the strain on the few who did the work was great. Finally publication was suspended.

It was not until then that the students and others realized the importance of the paper. Activities, especially athletics, found that the bulletin boards were totally inadequate for their necessary publicity, and at a mass meeting held in Huntington Hall the Dean, Germain, captain of the track team, H. D. Peck of the Advisory Council of THE TECH and General Manager A. T. Gibson, all expressed the same feeling that the publication was an absolute necessity and that more student support was essential.

This radical step did its work, and a score or more men came out to work on the paper. Both the news and business departments were considerably strengthened, but there still remained a chance for new men. The Board made several innovations that

helped in arousing interest in this phase of work on THE TECH, and many of the participants in the contest are now members of this staff.

Fortunately THE TECH realized the importance of a closer connection with the students and it offered to place itself under the supervision of the Institute Committee. The latter appointed an Advisory Council made up of the General Manager of THE TECH, an undergraduate member and two graduate members. This committee has done much to improve the standing of the paper. It sees first of all that all men on the paper are standing well in their studies so that this work shall not impair their chances of passing their courses at the Institute. In former years this was a great objection, for the men neglected their school work for work on the paper. It advises on all matters of importance and acts much in the same way as the Advisory Council of Tech Show. This year for the first time in the

(Continued to Page 2, Col. 2.)

ANNUAL DANCE OF CATHOLIC CLUB HELD

Hotel Somerset Scene of Brilliant Affair—Over Four Hundred Attended.

Last night the Catholic Club held its annual dance in the Hotel Somerset. It was a great success, and probably the largest dance ever held by the Club since its foundation, over 200 couples being present. Among the guests of honor were Mrs. R. C. MacLaurin, Mrs. J. A. Walsh, Mrs. J. Fitzgerald, Mrs. M. M. Cunniff, Monsignor Splain and Father Scanlon.

The dance began soon after 8.30, and the beautiful costumes worn by the ladies, together with the decorations, made an impressive sight. The program was especially good, consisting of our best popular songs, opera gems, Tech songs and one or two classical numbers, which were rendered at their best by Moore's 20-piece orchestra. When the favors were given out the dancers formed a large T with the stem of the letter in the centre of the hall and the base at the end near the patronesses. The most novel affair was the sixteenth dance, in which a large Tech banner was dropped from one of the balconies while the hall was dark. In the darkness a searchlight was played on the falling banner and one of the men sang the Stein Song.

The evening sped quickly by and before the dancers realized it the clock was pointing to the hour of 1.

BALLOTS DUE FRIDAY.

Ballots on the proposed Constitution must be in by Friday, April 4, at 4 P. M. With the exception of the Seniors, all the classes have voted. The first returns seem to be favorable to the new measures, but the exact count thus far is not known. The Committee urges every student to vote, as it is essential to obtain the views of the entire student body. Students who were absent from their classes at the time the ballots were distributed may obtain them at the Cage.

"THE TECH JUNIOR."

Poem Dedicated to Danny Shea On His Wedding Day.

Owing to an oversight in making up the paper the poem which was published in the special edition of THE TECH, JR., was omitted from yesterday's issue. It is published today with the heartiest congratulations to Mr. Daniel Shea.

COCK-A-DOODLE-DO.

This is the rooster who crowed in the morn,
Who wakened our Daniel, all forlorn.
After a night at the keyboard he may have been wired,
Proofreading and Tech will make anyone tired,
(Continued to Page 3, Col. 2.)

WEDNESDAY, APRIL 2, 1913

With the close of Volume 32, THE TECH feels that a very successful year has come to a close. It has been a year filled with ups and downs but of a sort which have tended toward a better publication.

The new relations with the Institute Committee are perhaps most important. We feel that we are now a real part of the Institute student organization, and as such can carry out our purpose in a much more satisfactory way. It should be distinctly borne in mind that it is a function of THE TECH to support every worthy Institute activity, and in so far as it is not doing this it is failing in its purpose. Thus we sincerely hope that every Technology man will co-operate with us in bringing about ever-increasing efficiency for carrying out this purpose, and we feel that we have had this co-operation from the Faculty and student body during the present year to no small extent. We wish to express most heartily our appreciation of the help and good will that has been given us.

To the members of the Advisory Council and to these men who are retiring from the paper this year we extend our heartfelt gratitude for their good work and wish them, at the same time, the best of future success. Credit is especially due Mr. Thayer, who consented to step in during his very busy Senior year and take charge of the Business Department.

In making the elections for Volume 32 the Managing Board of Volume 31 has endeavored to get the organization well systematized in respect to positions for upper and lower classmen. In some cases it was not possible to do so but it is felt that the staff which now takes charge will work together very efficiently. The positions which have been filled are published in their regular position at the head of this column.

SHOW REHEARSAL TODAY

The regular Show rehearsal takes place at 4.15 today. As Freshmen are not excused from drill they need not report until 5 o'clock, but all other men must be in the Union promptly at 4.15. The part of the first act which was not taken up yesterday and also the entire second act are to be gone over.

WRESTLING MEET FOR BEGINNERS

Opportunity For All Novices to Prove Their Ability Next Friday.

A novice wrestling meet is to be held in the Tech Gym on Friday evening of this week at 8 o'clock, to which all Institute men who have not competed in Varsity meets are eligible. There will be preliminaries, semifinals and finals in all the classes for which there are enough men entered. All entries should be left at the Cage immediately for H. G. Morse '16. Already several entries have been received by the management, and very close matches are expected. Many Freshmen have substituted wrestling for gymnasium work, and some of these men should make a very good showing after their season of hard work.

A fee of 25 cents will be charged for admission to spectators, so a large crowd should turn out to see the meet. Such meets as this develop men for the Varsity Team and deserve the support of every undergraduate. The Varsity men have had a very successful season, and the game is fast becoming extremely popular among the students of the Institute. Mr. Gracey of the Drawing Department has devoted much of his time to teaching the men the different holds, and to him much of the credit is due.

No great amount of science will be expected of the entrants in this meet; the idea being to give the men who are interested in the sport an opportunity of showing their ability. Any man who would like to try out should send in his entry at once, even if he has not been out for wrestling this year. This is distinctly a novice meet.

MANAGING BOARD.

(Continued from Page 1, Col. 3.)
history of the publication the books have been opened to an auditing committee. In years before, THE TECH not being under the direct control of the student body as it is now by virtue of its agreement with the Institute Committee, kept all accounts private, but now the Treasurer is compelled to make monthly reports to the finance committee.

The circulation department started this year under several handicaps because of the lack of interest among students in buying subscription books. After the paper suspended publication new interest was aroused and circulation increased favorably. It is the intention of Manager Fleming to try and make the circulation of Volume XXXIII the largest and the best conducted in the history of the paper.

THE TECH this year attempted, in a special Walker Memorial Edition, to present to the students the ideas and plans for this memorial to the late General Walker, just as it was presented to the Alumni by letter and in the Technology Review. The plans of the building, although only tentative, were published and an effort was made to arouse interest in the planning of the building. The students supported the special issue, and it resulted in a financial success.

The one thing that the old board has done for the year that is of as great importance as any other is the influence that it exercised in establishing the so-called TECH English section. At the suggestion of Mr. Peck Professor Bates offered to substitute work on the paper for work in the regular English sections of the Freshman year. The effects of this are manifold. A man has more time for his newspaper work and does not lose his valuable English instruction. In this special section each man's work on the paper is counted as equivalent to one-half of the regular course. The section meets once a week and in it journalism and newspaper writing are discussed. The

TRACK TEAM PROSPECTS.
(Continued from Page 1, Col. 1.)

will be closely pressed in both the 100 and 220 yard dashes by H. S. Wilkins, '14. The latter has been developing remarkably since last spring, and may possibly defeat Wilson. Both of these men are at least the equal of any sprinters that can be put on the track by other New England colleges. T. J. Barry, '15, and Adams, '16, are also fast men who may pick up points in the sprints.

W. R. Bylund, '13, and T. H. Guething, '14, are capable of taking care of the 440 yard dash in fine shape. They will battle with each other for first in all the meets, unless Bylund runs the half-mile this year. Bolton, '14, and Thompson, '14, are also looked for to win points in some of the meets. In the half-mile Tech will again prove a strong contender. Captain E. B. Germain '13, is the peer of any half-miler in New England, and if he runs in this event is almost a certain winner. If Germain enters the mile Bylund will probably go in the half, and should have a good chance for winning in everything but the I. C. A. A. A. A.'s. C. T. Lething, '16; M. E. Hill, '15, and K. Dean, '16, may improve sufficiently during the season to score in some of the meets.

H. S. Benson will probably run the two-mile race, as he will be in the New England Inter-collegiate will be very well taken care of by Norman Taber, the Brown flyer. Benson will have a good chance against Ball of Dartmouth in the long event, and should have no difficulty in winning in the Worcester meet. L. E. Best, '15, A. F. Nye, '14, and S. Lee '14, are possible point winners, especially in the competition with Worcester.

R. E. Palmer, has been running well during the year season, and can be looked upon as a likely winner against Worcester in the mile run. He may also pick in the New England's. If Captain Germain should decide to run in the mile he will prove a formidable opponent for Taber, and it is possible that he would defeat the Brown crack. In any event a race between these two would be well worth seeing. Taber won by three feet in the dual with Brown last year, but it is doubtful if he could repeat this performance, as Germain has improved greatly since the two last met.

In the field eyes Tech is very weak indeed. Seal wins may be scored in the Wester meet, but it is difficult to see any first places can be won in the New England championships. All Tech can hope for is to place in this event, although MacLeod may win first the discus. MacLeod is a probable winner in the shot-put, with Crill, '15 as a possibility. In the high jump MacLeod will again be the best man, with Fox, '14, as another who may win points. In the vault Tech has no one except Leon, '16, and he will have to be considerably better before he will be contender in even the dual meet. Hirt, '14, is a good man in this event it is doubtful if he will come over the team.

Tech had through-jumpers of point-winning ability but no one who can jump more than three feet ten. Tesson, '15; Hall and MacKinnon, '14, are all capable of doing close to this mark, and C. Kanaly hopes that these men will show enough improvement to win in the N. E. Inter-collegiate.

In the high hurdles and Curtis are of about equality, and both should prove stragglers in all the meets. These men, with Munch, '14, are expected to win many points in the low hurdles also.

Captain Germain Coach Kanaly are still anxious candidates in the field events, and there are many men in the institute who, if they came out for team, might develop into strong winners. Coach Kanaly will lead to see any men who wish to out.

COURSE VI SOCIETY WILL MEET MONDAY

Mr. Nathan H. Daniels of Stone & Webster Company to Be Speaker.

Next Monday afternoon, at 1.30 o'clock, the Electrical Engineering Society will hold a meeting in Room 6, Lowell Building. The speaker is Mr. Nathan H. Daniels, Jr., who graduated from the Institute with the Class of '98, after completing the Electrical Engineering course.

Mr. Daniels will lecture on the value of statistics in engineering work. Since leaving the Institute, Mr. Daniels has spent most of his time with the Stone & Webster Co., and at present holds the position of chief statistician with that company.

Men from Courses II. and IV. are especially invited to attend, but anyone interested will be cordially welcomed. Before the meeting adjourns the members of the election committee will be announced. Nominations for officers of the society should be signed by five active members and forwarded to this committee when the names of the members are announced next week.

COCK-A-DOODLE-DO.

(Continued from Page 1, Col. 4.)
The telephone rings Back Bay 5527, It's Dan asking for copy at eleven. His voice you can hear, "I'm tired of waiting, You better hurry up and quit roller-skating. Get on to your job; what do you think, I'm a farmer? Send your messenger along for I'm no chair-warmer."
"Oh H—ll, they're the limit, they make me so tired I'll go to the Dean, and have them all fired."
When the messenger gets there at 11.45, Dan feels somewhat better and hits a good stride. The bell rings again, it's the same number I'm sure, And Dan with a swear word he opens his jaw.
"Well, I don't know; get your copy down in time And quit this here late stuff; what do you think, I'm a shine. Get onto your job, it's now almost the limit, And you don't think I can plug all your type up in a minute."
Without any doubt Dan stands it right well, But sometimes we'll excuse him if he says "Go to — well, But now that he's married and settled right down We'll never look for a cross word or fear of his frown. We hope that his pathway thro' life will be pleasant, And we all join hands in giving him a present To show him we feel that he is a good fellow, And hope that his helpmate will make his life mellow. So all join together and drink to a toast, "Long life and a pleasant one and children a host."

MANAGING BOARD.

(Continued from Page 2, Col. 2.)
men get a valuable training in journalistic work and at the same time are able to do something for one of Technology's activities.
To the new board there is left the task of carrying on the work where the old board has left it, and to do that men are needed. There is just as much chance for a new man as there ever was, for he will have the advantage of seeing the commencement of a new volume and helping attain the reputation of "the best ever."

Don't forget the Sophomore-Freshman track meet. It will be a fight to the finish.

THE ADVANTAGES WE OFFER

PROGRESSIVE methods, large resources and two conveniently located, thoroughly modern bank buildings, combine to make this institution the most desirable depository in New England.

Interest-bearing accounts subject to check may be opened either at Court Street or Temple Place, and the two offices used interchangeably for the transaction of your banking business.

You are cordially invited to inspect the modern Safe Deposit Vaults at either office.
