ASSISTANT PUBLICITY
MANAGER TECH SHOW
Duties Outlined—Order Of Promotion Given—Meeting Of Candidates.

Candidates for Assistant Publicity Manager of the Tech Show will meet Monday afternoon at 4:15 with R. W. Lucas, Assistant Publicity Manager.

There are three publicity managers at present. Each man has been given a certain amount of work to do, depending upon his position, which has mainly to do with write-ups in THE TECH and other papers: but this year a new plan has been inaugurated by which the first assistant will be under the direct supervision of the stage department after Christmas of each year. This gives a man in the publicity department an insight into the working of the Show. The position will better fit him for general manager when a Senior.

Before this the publicity manager has not had a fair chance for this office, and the qualifications which he will now receive his chance will be as good as that of any manager. The only competition in the department is in selecting the first assistant and then publicity manager. From among the three heads of the departments and the treasurer the general manager is chosen, so there are no outside influences.

The first assistant will be under the direct supervision of the head of which the first assistant will be appointed. The position of the publicity manager is mainly to do with write-ups in THE TECH. Duties outlined—order of promotion given—meeting of candidates.

SPECIAL REHEARSAL
Basketball Subsidized—Committees

At a meeting of the Sophomore Governing Board held yesterday noon reports were received from the Pipe and Dine Committee, both of which were accepted. The treasurer reported that the financial condition of the class was such that there was not in the treasury more than enough money to meet all obligations. Therefore another meeting was called to the Class Basketball Team and a like amount to be devoted to specialties for the Class Dinner. G. M. Lovejoy was elected manager of the Sophomore Baseball Team.

SUGGESTIONS RECEIVED

The Tech, Boston, Mass., December 13, 1913.

The Christmas vacations of several of the large eastern colleges are the same this year, the average length of time being 16 days. Yale and Syracuse have the longest, and getting 18 days. The class figures are: Columbia, 14; Cornell, 16; Harvard, 15; Pennsylvania, 16; Princeton, 16; Syracuse, 18; and Yale, 16.

It has been computed that at Brown 71.5 per cent of the student body are holiday makers. Last year the figures were only 68 per cent. The percentage by classes in 1912 were: Junior, 68.7 per cent; Sophomore, 66 per cent; and Freshman, 62.1 per cent. This year they are: Senior, 86.3 per cent; Junior, 78.8 per cent; Sophomore, 66.7 per cent; and Freshman, 65.9 per cent.

The Undergraduate Chapel Committee at Penn has decided to inaugurate a new Chapel schedule with the idea of arousing interest in the daily services and fostering a closer class spirit. Each class will have one day a week set aside as its special Chapel morning. On that day every member of the respective class will be expected to be present. Friday will be reserved for a general convocation of the student body.

Now that the students of St. Lawrence University have fully established the Honor Code with its Hon or Court to try offenders against the Code, they are trying their best to revive the whole system. Their principal object is what is called the "squeezing clauses," which read, "An student or group of students subject to the Honor Code, may voluntarily report to the Honor Court any violation of this constitution.

NAVAL ARCHITECTS MEET

A. L. Todt '14 Elected Vice-President Yesterday.

The Naval Architectural Society held a meeting in Room 8 Engineering C yesterday morning. Mr. A. L. Todt '14 was elected vice-president of this body at the annual meeting held on the morning of the Society's representation in Techni que 1915.

WEATHER

Per Boston and vicinity: Fair and warmer today; moderate to brisk westerly winds.

Good Dividends

The business-like spirit evidenced by the Freshmen in organizing their basketball team, and by the Advisory Council in subsidizing the wrestling team, has produced results which fully justify the expenditure.

The students of the Student body are struggling along without help until they are able to finance themselves on a firm basis. The announcement some time ago of the sale of season tickets for the wrestling meets, and the publication this morning of the terms on which it will be possible to subscribe for Wrestling games, are ample proof of that aid and encouragement pay big dividends.

CHAUNCY HALL CLUB
HOLDS PLEASANT SMOKER

Very Auspicious Occasion Enjoyed
By Alumni Of Prep. School.

When President A. V. A. Swift of the Chauncy Hall Club called the meet-
ing to order last evening at 8.30 in the Union, a goodly number of enthusiastic alumni of the school were present to greet Mr. Kurt, the Principal of the institu-
tion, and two of his able assistants, Messrs. Hartmann and Farnsworth, be-
side a few of the students of the school.

A short business meeting preceded the smoker, at which it was definitely decided that the club should put an in-
ject in this year's Technique, provided that the necessary payment was first se-
cured, the club wishing to avoid the possibility of incurring debt.

After some little discussion the idea was adopted that in the future officers shall be selected in the same man-
ner as last year, the class officers being elected at the season's beginning, the

Mr. Kurt's suggestion that a small dinner be ordered some day in the near
future to transport the club to some place down the bay where a clambake
and general good time could be enjoyed, was almost unanimously accepted.

The president was deputed to select a com-
mittee of three to look into this matter.

After the business affairs were dis-
posed of, Messrs. Kurt, Hartmann and Farnsworth were called upon to speak.

All three delivered very interesting short talks relative to the objects and
value of such an organization as the Chauncy Hall Club.

Sandwiches, pretzels and cider were
then served, and the meeting was con-
cluded by the singing of a number of
Tech songs, in which all heartily joined.

PROF. SEDGWICK SPEAKS

Discusses Public Health Movements
In This Country.

Professor William T. Sedgwick of
the Institute spoke Thursday at the
meeting of the Association of Life Ins-
urance Presidents of America which
was held at New York. His subject
was, "The Public Health Movement
in America Today and Tomorrow."

Professor Sedgwick is now in
Washington attending a meeting of
the Advisory Board of the Hygienic
Laboratory of the United States De-
partment of Public Health to which
he was appointed a member by Ex-
president Taft.

SOPH BASKETBALL

Competition For All Positions Keen
-Line-up Published.

This year's Sophomore basketball
team is even better than last year's
in Captain Dewson's opinion.
Miller at left guard and Jimmy Mer-
ritt on the forward line are showing up especially well. Jack De Merritt,
who was a regular center for the Tufts Sophomores last year, and
Captain Dewson are both considered for center position with the odds
about even.

The present line-up is:
James Merritt, left forward.
Ziner, Keery, right forward.
Dewson, Jack De Merritt, center.
Miller, left guard.
Wilde, Hamman, right guard.
Substitutes--Lewis, sub-forward.
Leuchan, sub-guard.

THE TECH WRESTLING BEVERLY
Y. M. C. A. TONIGHT
Train Leaves 7:10 From North Station—Close Match Expected.

Tonight the Tech Wrestling Team will meet the Beverly Y. M. C. A. Team at Beverly. Last year Tech was defeated Beverly by a score of 7 to 2, but the meet was by no means an easy one as all the matches were long and very close. For this reason it is hard to prophecy in advance the outcome tomorrow, although the team feels confident of a victory.

Unfortunately the team has been handicapped by Treat's injured rib. This has kept him out of practice for the past two weeks. He will try to compete tonight. As Beverly has no men entered in the 115 and 116 pound class, according to Captain Kelly, Loo ought to be able to overcome this disadvantage and win his match.

The team will leave for Beverly on the 7:10 train from the North Station, Manager Smythe-Martin would like as many men go up to Beverly with the team so as to give them plenty of encouragement.

The following men will make the trip:

115-pound class—
125-pound class—Means, Loo.
135-pound class—Darkus, Smythe-Martin, and Captain Kelly.
145-pound class—Treat, Morse.
150-pound class—Heavyweight Class—Leslie, Crowell.

ARREST MADE

Last evening at six o'clock a suspicious looking man was found loitering near the corridor close to the office of Engineering Building I. Waiters in the Union dining room have reported a man hanging around considerably, especially in the court located to the immediate left of the building, and the waiters were recently held up near here. Authorities believe that this man is responsible for the trouble that has been caused. He was taken to the Department Sixteen Police Station.

THE TECH DEPARTS TUFTS

(Continued from page 1)

end of this period Winton and Lowengard were back in their old places for Tech and Kelly for Tufts.

The last period opened with a rush. Tufts determined to even up and Tech was equally determined to keep their advantage. Tech got in some of its fine team play and would have scored several times but for the good work of Adelson of Tufts goal. However, Winton got one by him on a long side shot.

The next ten minutes the best hockey of the evening was played last goal. Fletcher and Winton were whirlwinds. Whitaker of Tufts made the Tech supporters hold their breath more than once. Winton was penalized two minutes for loafing off-side; but his six men-mates were able to hold off their opponents until he got back into the game again. Immediately after his return, MacLeod stumbled, the puck down the ice and his pass to Wijtson resulted in Tech's last goal. Tufts scored for part of the time on a lone rush. Good goal tending by Lowengard prevented power scoring.

The line-up—
Tufts:
Kep, (capt.), 1w.
Laurie,
Winston.

CIVIL ENGINEERS VISIT INSTRUMENT, FACTORY

Trip To Berger's Factory Proves Very Instructive—Few Men Go.

Members of the Civil Engineering Society took a very instructive trip through the factory of L. M. Berger and Sons in Roxbury. About twenty-five men took the trip in two parties, under the leadership of M. H. Berger, junior member of the firm, who showed them through the factory. They were first shown samples of all the different types of transits and levels the firm is now making, among them the large stereoscopic transit used for the U. S. Government. These instruments were all explained in detail. The complete instruments from castings to tripod legs are made at this factory. An item of special interest to the students was the manufacture of the dividing engines which mark off horizontal and vertical scales. The testing room also proved to be of much interest. The room is considerably small, but by sliding through the telescopes, the instruments are adjusted and set. The great importance of true centering of all the parts was impressed upon the student engineers, and it was shown how the inaccuracy of a single part often made the complete instrument worthless.

About eighty-five men are employed in the factory, and the entire instrument shop was visited. The total number of machines put out was brought up to ten thousand a day, and a little celebration of the event was held. The visitors listened to a talk delivered by Mr. L. M. Berger, head of the firm, to the men. The manufacturer had expressed more men to take advantage of the good opportunity to get acquainted with the details of the construction of their professional instruments.

ELECTRICALS MAKE TRIP

See Motors for Panama Canal—Twenty-Eight Men Go.

Twenty-eight men from the Electrical Engineering Department of the Institute went on the inspection trip to the River Works of the General Electric Company at Lynn, Mass., yesterday afternoon. The party arrived at 2:30 and were through at 5 P. M. The management furnished three guides, who took the students through the entire plant.

The Turbine room was first visited, and here the large Turbine-Generators were seen. The plant power department, which was next visited, was an exceptionally complete equipment. From the power department the men were brought to the apprentice department, which comprises the school of the company. The graduates of outside schools are given their first work in here. The arc-light and transformer departments were then visited. The inspection trip offered much interesting material.

Among the specialties shown were the large direct-current engined motors for the Panama Canal. In order to make these motors serviceable at the climate conditions the windings are water-cooled, and make these motors serviceable at the Panama Canal the windings are made water-proof.
