teams defeated

The fresman Basketball Team lost its game with Malden Y. M. C. A. Team Saturday evening by a score of 32 to 24. Tech '17 outplayed the Y. M. C. A. men in the first half, he score at the end of the half being 12 to 5 in Tech's favor. Malden came back strong, however, and won by clever team work and good shooting. Ramsey and Rushing were the individual stars of the game.

The second team game resulted in a defeat for Tech '17 by a score of 11 to 5.

Candidates For Assistant Publicity Manager Meet Today.

This afternoon E. W. Lucas, the Assistant Publicity Manager of the Tech Show will meet all candidates for the position of Assistant Publicity Manager in the campus Cage at 4:15. The duties and plans will be explained in detail to all men at the meeting.

Thus far there have been three publicity managers, each one being given a certain amount of work, consisting chiefly of write-ups for THE TECH. Under the new plan which has been inaugurated this year, however, the first assistant publicity manager will be under direct supervision of the stage department of each year. Thus he will be given a better insight into the workings of the Show, and will be particularly fitted for the position of General Manager when he becomes a Senior.

The contest employs only the time from 4 to 6 in the afternoon period—which is ordinarily wasted, so the work will not interfere with studies.

All freshmen who are interested are requested to be present at this meeting.

juniors hold class dinner

Professors Bates and Miller Deliver Addresses—Every Bout Goes To Tech.

One hundred and forty-three members of the Class of 1915 gathered in the Orion dinner room Saturday evening for the annual Class dinner. President F. P. Scully, who acted as toastmaster, introduced Professor Arlo Bates as the first speaker.

Professor Bates said that there are at least 32 techies nearly ideal. Each instructor has found conditions of teaching favorable, and to such an extent that in some institutions a degree is granted after one year. His master's degree is given after two years, and a Ph.D. after three. In some cases the school is not even necessary, but a payment of tuition is all that is required.

One theory of education compiles training in ability to think, to establish a position in life, and to develop a character as a unit; the other is merely a system of accumulation of facts and knowledge. The real value of a college education lies in the requirement of that training which makes a man fit to take out the valuable and important things in life. A college is a training ground which makes a great man. Assistant Publicity Manager. He thus arranged the program for the meeting, so that the students would be present at 4:15, and the meeting would start promptly.

The program for the meeting included speeches, songs, and recitations. The students were divided into two classes, and the members of each class were asked to give speeches on their own experiences. The speeches were well received by the audience, and were a great success.

The Tech Show met for the first time in the campus Cage, and the first speaker was Mr. Edmun McTredy, the former editor of THE TECH. Mr. McTredy spoke on the subject of publicity, and gave the students some valuable advice on the subject.

The next speaker was Mr. John M. McTredy, the former editor of THE TECH. Mr. McTredy spoke on the subject of publicity again, and gave the students some valuable advice on the subject.

The last speaker was Mr. John M. McTredy, the former editor of THE TECH. Mr. McTredy spoke on the subject of publicity again, and gave the students some valuable advice on the subject.

A very small squad reported for preliminary track practice at Brown last Wednesday.

The pole vault was not run off at the Gym last Saturday, because no one entered for the event. This is an excellent opportunity for some one with spirit to come out and help Tech athletics. A first in this event counts five points in any class meet, and it is in the field events that M. I. T. makes such a poor showing in Intercollegiate competition.

John Francis Monkevich, the well known Cornell track coach, was fifty years old last Wednesday. He has coached at Cornell for fourteen years and celebrated his birthday by working out with his men on the board track.

Williams is still having hare and hounds runs. They will need snow plows soon if they keep it up.

The high jumpers are showing up well in their daily practice at the Gym. Teeson's jump of 5 ft 8 in. is still the high jump record. Besides, the sprints, he was in the candidate for the Dupont cup this year.

The decisive victory over Beverly last Saturday night leaves the Tech football team with a clean slate for the remainder of the season. The decisive victory over Beverly last Saturday leaves the Tech football team with a clean slate for the remainder of the season. This should be a decided improvement.

Both the long and short races attracted a large number of competitors last Saturday. About twenty-five were out for the dash and as many for the two runs.

If Donnelly keeps coming, he should do a lot towards filling the gap left by Germain's graduation.

There are nineteen laps to the mile of the indoor track.

Wilson and Pease are among those who were unable to make any headway on the short track, with the field ahead of them at the start.

Sullivan '17 should be a good candidate for the Dupont cup this year.

The controller will have to take the initiative in granting the team a varsity letter, w.t.

Sullivan '17 should be a good candidate for the Dupont cup this year.

The controller will have to take the initiative in granting the team a varsity letter, w.t.

The moral of this story of success is not difficult to read. For years the Institute has been noted for its leadership in the recognition of new lines of study—young but growing professions and branches of professions, and it is not for her students to fall behind and take their cues from other colleges in athletic affairs. The recognition of the wrestling team has so far been amply repaid. Let the A. A. and Freshmen play this a little more this season, and the convergent comes before it for recognition.

let them look carefully, and not close their eyes to new possibilities.

ELECTRICALS TO HOLD SMOKER TOMORROW NIGHT
Mr. L. L. Elden of The Edison Company To Be The Speaker

Tomorrow evening the Electrical Engineering Society will hold a smok- er in the Union at 7:45 P. M. and Mr. L. L. Elden of the Edison Electric Illuminating Company of Boston will address the members on the subject of "Distributing Systems."

Mr. Elden has had a wide experience in this subject and is now the chief engineer of the Edison Company. This company maintain a very elaborate system of feeders and distributing mains which serve an area of several hundred square miles. Most of the energy for this system is furnished by the power station at L Street, South Boston, and from here it is sent out on high tension cables to substations where it is trans- formed to voltages suitable for power and lighting distribution. The substations are all connected together by a system of mains in such a manner that if one station were to be out of commission because of a break in its supply cable it would be possible to send the entire load from another station without interrupting the service.

The officers of the society regret the conflict which occurs between the Winter Concert and the Smoker, but arrangements were made with Mr. Elden before the final date of the concert was decided upon and was therefore unavoidable.

There are still a few pins left to be called for and therefore Mr. A. A. Judge will have these pins at the smoker. All men who have not obtained them should do so tomorrow night. Miss Fayson has several shingles in Room 14 Lowell which have been paid for, and the owners are requested to call for them at their earliest convenience.

JUNIOR DINNER

(Continued from page 1)

The test of the student's power of adaptability is easily made. If, when he is brought out of the atmosphere of the engineering studies to his general studies' classrooms, he should be able to forget his other work and set his mind working in this more general direction. Most students, however, find it hard to cast one set of ideas out of their minds and get ready to receive another. Some students come from the preparatory schools, mere machines. Of such students, it might be said that they have on receiving his theme for correction, time calculated among Juniors by the Tech- union in his Union at 7:45 P. M. and Mr. L. L. Elden of the Edison Electric Illuminating Company of Boston will address the members on the subject of "Distributing Systems."

SCRIB MEET
(Continued from page 1)

The feature event of the day was the 8-lap run. Donnelly '17 ran a very handy race. Allowing the men to slow down considerably towards the end of the race, he let loose a burst of speed that swept all before it. A. F. Nye '14 ran a pretty race also, but in the final rush he had to take third by a foot, with Gagnon second. With four yards handicap Donnelly finished in 1:45:5, Gagnon had forty yards and Nye eight.

Teeseon '15 showed good form in the high jump, winning first with an actual jump of 5 ft. 8 in. Doon '17 got second with an actual jump of 5 ft. 2 in. and 4 in. handicap, while Clark '17 got third, jumping 4 ft. 9 in.

The shot put is attracting several good men. Sewell '17 won the 14-pound shot put with a heave of 36 ft. 7 in. Seymour '17 got second and Lee '17 third.

As most of the men were dressed, no relay race was held.

The practice this week for freshmen substituting track work will be Monday, Wednesday, and Thursday. They may come Saturday if they like; but the first three days are compulsory.

WINTER CONCERT

Glee Club Holds Special Rehearsal Sunday
The exchange of tickets for the Winter Concert of the Combined Musical Clubs began last Wednesday afternoon, and so far the sale of tickets has been most gratifying. A special rehearsal of the Glee Club in the Union yesterday was well attended, and now everything is in readiness for the concert on Tuesday evening.

JUNIOR DINNER
(Continued from page 3)

A. E. BURTON, Dean.

Several yards, Graff was second and Lee a good third. Time—3 minutes, 42 seconds.

The first three days are compulsory.

FACTORIAL NOTICE

First Year
Professor Walker's conference in regard to Coerce X on Wednesday, December 17, has been changed from Room 52 Pierce to Room 11 Eng. B. A. E. BURTON, Deam.

disqualified the St. Lawrence University for playing unregistered basketball with the Ottawa Y M. C. A.

the German trade schools are closed to close inspection.

The work on New Technology, comprising as it does the best and most effective of engineering construction, offers an opportunity to Tech students that should not be shunned. Close observation of the methods and innovations at the New Technology Site for the next two years will be more beneficial than ten years of theoretical class room work.

A regular M. I. T. cheer with three 12s on the end concluded the evening's celebration.

Useful Christmas Gifts for Men and Boys are listed alphabetically and priced in our booklet

"Christmas Suggestions"
which we will be pleased to send on request.
