PRICE TWO CENTS

## FRESHMEN WIN ANNUAL INTER-CLASS MEET

Four-Forty And Mile Run Feature—  
E. W. Curtin '17 Stars In  
Shot Put.

By winning the first inter-class track meet of the season over the seniors by a score of 28 1-2 points to 23 1-2, last night, the freshmen made their debut into track athletics. The juniors and sophomores tied for third honors. Although none of the times were exceptional, the men showed up well and the outlook for the coming season is unusually bright. There is evidently much material among the first year men which can be developed with steady and consistent practice.

The meet open with the 40-yard hurdles. It was necessary to run two heats and a semi-final. The first heat was closely contested by K. H. Day '17 and C. H. Leeper '17. The second heat was won by T. Huff '15, who finished with a good lead on K. E. Bell '17. A semi-final run between Leeper and Bell was won by Leeper. The final resulted in a close finish, Huff jumping for the tape, beating out Day by a few inches. The time was not exceptional, being 5 4-5.

The next event was the 35-yard dash. L. A. Wilson '14 finished first in the first heat with W. Thomas '15 very close behind. The second was won by C. W. Loomis '16 with a lead of a yard on Huff. The third heat was won by F. P. O'Hara '17 with Day close behind. R. C. Erb won the fourth heat with G. L. Reid '16 and C. Fox '14 close together. The semi-final was won by Wilson by a few inches over Erb and Thomas. O'Hara won the second semi-final with Loomis close at his heels. Day got third. The final heat was closely contested. O'Hara won in 4 2-5. Wilson was second, Loomis third and Erb fourth.

The best run of the evening was the 440-yard dash. Thursday the eliminations were held, so that only six started. This gave the men a splendid opportunity to present a fine exhibition. Guething had the pole at the start with Fox on the extreme outside. At the crack of the pistol H. F. Nye '15 jumped to the front with T. H. Guething '14 close behind and C. Fox '14 third. These positions were maintained throughout the first two laps, despite several attempts made by Guething to take the lead. In the third lap Guething took the lead, Nye falling back. At the beginning of

## GLEE CLUB REHEARSAL

There will be a regular rehearsal of the Glee Club at 5 p. m. in the Union on Tuesday, January 13.

## WEATHER

For Boston and vicinity: Rain or snow tonight and Saturday; colder Saturday; increasing easterly to westerly winds.

## TECH AND HARVARD TO CO-OPERATE IN FOUR ENGINEERING DEPARTMENTS

### Unparalleled Educational Triumph---Courses Given In New Tech Buildings---Separate Existence Unaffected.

By a coincident vote last evening the Corporation of the Massachusetts Institute of Technology and Board of Overseers of Harvard University effected the most important forward movement that education in this country has ever witnessed. The two great institutions have agreed to co-operate in a conservation of educational forces which is without a parallel in history. This is nothing more nor less than an arrangement to work together in the conduct of the four courses leading to degrees in Civil and Sanitary, Mechanical, and Electrical Engineering, and Mining and Metallurgy, as well as in the promotion of research in these branches of applied science.

The two institutions have already co-operated in the School for Health Officers which has been eminently successful in its initial year; but the new arrangement, in its comprehensive scope and far-reaching consequences and in its single purpose of advancing the interests of the whole community, is a complete novelty in this hemisphere at least. Its greatness of conception, particularly in its unselfish effacement of private considerations, for common good, make its accomplishment the mark of a new era in education.

The very novelty of the movement renders it liable to possible misunderstanding, and yet, like most great plans, it is essentially simple. Neither institution is affected at all in individual identity, organization, name, title to property or complete control of its own financial resources, or in any way not specifically mentioned in the agreement. Each is to be absolutely independent in regulating the courses leading to its own degrees. The co-operation is definitely limited to the four branches of engineering mentioned above.

#### Use New Institute Buildings.

The tremendous unnecessary expense of acquiring and maintaining for these branches complete separate-instructing staffs, laboratories, and equipment by each institution has led to this endeavor to concentrate effort and eliminate waste and lost motion. The agreement provides that all work of education and research in the aforesaid departments shall be carried on in the Institute's buildings to be erected in Cambridge, which will undoubtedly surpass in fitness for their purpose the buildings existing in the world. This will necessitate a delay of a couple of years before the full degree of co-operation can be attained; however, temporary arrangements will be made whereby some of the

advantages may be gained immediately.

#### Financial Arrangements.

For the maintenance and equipment of these laboratories and for the payment of salaries, the University agrees to set aside practically all the money that it would otherwise be free to devote to education of this type. Technology, on its part, agrees to devote to the same general purpose all the funds or the income of funds that it now holds for carrying on work in these departments. Both institutions agree that their respective measures of support may be increased from time to time if disposable funds are available.

Since the work of education and research in these great fields of education is to be carried on within the walls of Technology, it is provided, for business convenience, that the money available shall be expended through the Bursary of the Institute. No arrangement has yet been made concerning the fees to be charged; that and other details will be worked out later.

#### Administration.

The use of Institute buildings also rendered it advisable to put the executive control of the combination into the hands of the President of the Institute. As an evidence of his double responsibility the President is to make an annual report to both corporations. Also, when in future the Corporation of the Institute is selecting its President, the President of Harvard is to be invited to sit with the committee that recommends the appointment.

#### Faculty and Appointments.

The Faculty of Technology shall be enlarged by the addition to it of the Professors, Assistant Professors and Associate Professors of the four departments in the Harvard Schools of Applied Science, who, retaining their titles and privileges in Harvard University, will acquire the corresponding titles and privileges in the Institute. Similarly, the officers of corresponding rank in the four departments in the Institute will acquire the same titles and privileges in the University. The work of instruction and the laying down of courses leading to degrees is entrusted to the enlarged Faculty of the Institute. Outside the departments of engineering that have been named, the Faculty of the Institute will be appointed as at present—solely by the Corporation of the Institute. However, with-

(Continued on page 5)

## SCHEDULE OF SEMI-ANNUAL EXAMINATIONS

Complete Provisional List On Page 3—The Term Ends Jan. 22

The provisional schedule of the mid-year examinations, which begin on Friday, the twenty-third day of this month and extend over a period of seven consecutive days, ending Saturday, the thirty-first, is published in full. This schedule, except for a few possible changes, will probably be the same as the official schedule to be distributed during the early part of next week by the Registrar.

The last exercises of the term will be held Thursday, the twenty-second. Major Cole has already suspended lectures in Military Science, and the last drill of the term will take place the Friday preceding the exams, in order to give the Freshmen an opportunity for a more extensive review of their subjects than would otherwise be possible. Prof. Carrier will conclude his course in Sophomore H2 with a test Thursday, the twenty-second.

The mid-year vacation will extend from Saturday noon of the thirty-first until Monday morning, the ninth of February, when the second term will begin. Registration is to be completed at this date, and the second installment of the tuition fee must have been received before permission to carry on the work of this term will be granted.

Following, on page three, is the schedule of examinations according to the present arrangement:

## MAJOR COLE SICK

Lecture on "Rapid Fire Surveying" Postponed.

Major Cole was unable to deliver his lecture on "Rapid Fire Surveying" before the Civil Engineering Society yesterday afternoon as was his intention, owing to the fact that he was incapacitated for the day because of a very sick headache. The talk has been indefinitely postponed until after mid-year's. Major Cole regrets very much that he was forced to break his engagement, but the demands which have been made upon him of late have been so heavy as to temporarily undermine his health. It is hoped that a few days' rest will restore him to his usual good health.

SATURDAY, JANUARY 10, 1914

In Charge of This Issue:

Editor—B. N. Stimets '16.  
Associate—A. E. Keating '17.

The event which this issue commemorates can be regarded as nothing short of epoch-making in its scope, since not only will this co-operation maintain a school of unrivalled standing, but the act of co-operating introduces a new era in education. Heretofore, educational progress has been purely extensive, taking the form of duplication, or rather multiplication of facilities, with little or no regard for that economy of resources and of effort which constitutes true efficiency. The present plan is the first significant step taken by the Institute toward intensive development—toward making two students grow where only one grew before, and grow twice as well, without additional expense to the community.

The saving in equipment, while enormous, is not by any means the greatest advantage of the scheme. As Dr. MacLaurin says in his report to the Corporation, printed a year ago (which, by the way, forebadows just such action as has been taken), "More serious than any duplication of machinery is the loss that falls upon the community by excluding students of each institution from the benefit of coming under the influence of the pioneers of science in the other institution, men whose character and attainments make any charge of 'duplication' absurd." Nothing stronger could be said in praise of the arrangement which has been effected.

Like every radical step in the di-

## COLLEGE NOTES

It was the hope and repeated rumor that the name of the donor of the \$65,000 chapel at Bates College, Lewiston, would be announced on the day of dedication, but the identity of the woman was not made known yesterday at the exercises.

Last night twenty Harvard juniors banqueted one of their classmates at the Quincy House in honor of his recent election as a member of the Board of Aldermen in his home city, Woburn. The student, who is but twenty-one years of age, received the highest number of votes ever cast for an aldermanic candidate in Woburn.

More than one hundred students of Wellesley College returning from the West after their Christmas holiday vacation are anxiously awaiting a decision of the faculty as to whether they will be punished for late registration. The special train on which they were traveling was delayed by snowfall in the Middle West, and although the railroad authorities rushed it through on short-cut routes, it was impossible to make up the time lost.

The penalty for late registration after vacation is heavy. The girls are debarred from their half-year examination in one full course, and this counts as a complete failure in the course, and must be made up similarly to a regular failure.

On Monday night at one of his lectures, Professor Yocum of the University of Pennsylvania said that the lazier a boy is, the more idle, the more stubborn, immoral or stupid, the greater the reason for insuring the things he must remember by and think with through the most effective sort of instruction and never-ending review.

The Associated University of Pennsylvania Clubs will hold its next meeting in Chicago.

The Brown Herald has now returned to a smaller sized sheet in accordance with strictly business principles. With the larger sheet several inches of "dead ads" were run every day and this entailed a very considerable loss. This change does not decrease the news space.

rection of progress, this action will undoubtedly for a time be regarded with disfavor by some conservative sentimentalists. Some Harvard men will think it a terrible come-down for the great University, while to a few Tech men it will savor of the hated merger which was agitated several years ago. But those who weigh coolly the advantages to the community, and, above all, to the students, will see that it is an instance of that spirit of brotherhood, that desire to co-operate for the good of humanity, which is beginning to replace the competitive idea which has ruled so long in human affairs.

Particularly inspiring is Harvard's broad-mindedness in the matter. With her long-standing reputation and wonderful spirit, she might have preferred to pursue her own course in absolute independence, yet she does otherwise for the sake of increased efficiency and benefit to the community.

The keynote of the plan is altruism, each institution giving up trivial and selfish considerations for the common good.

TECH WRESTLING TEAM

### TECH TO MEET BROWN AT WRESTLING TONIGHT

Continuation Of Winning Streak  
Expected—Meet Starts At  
8.00 P. M. Sharp

Tonight at a p. m. in the Gym the Tech Wrestling Team will meet the strong Brown team. This meet will probably be one of the most interesting contests of the year, for, according to Manager Smythe-Martin both teams are in the best of condition. The Brown team is especially strong in the heavy-weight class as well as in the 125-pound class. On the other hand, Tech is exceedingly strong in the lighter classes. Captain Kelly has succeeded in making the 125-pound class and his bout with Beacher, the Brown captain, should be the star event of the evening.

In accordance with the Intercollegiate rules, each bout will be divided into two six-minute periods and a three-minute period. Dr. W. F. Provan, ex-middleweight champion of New England, will officiate as referee, while R. B. Cady, Tech's official timekeeper, will act in that capacity. The winners of the various bouts are to receive gold and bronze medals.

Although Brown is the newspaper favorite, the Tech team has been the winner in every contest this year, and, according to Captain Kelly, has every chance of continuing its winning streak in the meet tonight. Tickets may be obtained at the door and also at the Cage until 6 p. m. today.

Following is a list of competitors and the classes in which they will compete:

- 115-pound class—Rice, Brown; Loo, Technology.
- 125-pound class—Beacher (Capt.), Brown; Kelly (Capt.), Technology.
- 135-pound class—Brackett, Tewhill, Sullivan, Brown; R. S. Martin, Durkee, Rounds, Technology.
- 145-pound class—Owens, Wells, Davenport, Brown; Treat, Morse, Wood, Technology.
- 158-pound class—Blue, Brown; Walter, Technology.
- Heavyweight class—Gottshall, Maxwell, Brown; Leslie, Crowell, Technology.

There is a possibility of a handicap bout between Goodell, 155 pounds, and one of the Brown men who is ten pounds lighter than Goodell. In this Goodell will be required to throw his opponent in 15 minutes or forfeit the victory.

### HOCKEY AT PROVIDENCE

This afternoon the hockey team will leave on an early train for Providence, where it will meet the strong Providence Hockey Club septet at 3 p. m. Should there be no ice a notice will be posted in the Union at noon, in which case the team will not make the trip.

The following men are requested to report at the Back Bay Station at 1 p. m.

McLeod, Fletcher, Winton, Cochran, Gould, Storke, Chauder, Sawyer, Gray.

### EXECUTIVE COMMITTEE

There will be a meeting of the Executive Committee of the Freshman Class in the Union at 1 p. m. today. The date and place of the class dinner will be decided at this meeting.

### NOTICE

Will all the wandering Greeks attending the Institute leave their full name, their fraternity and their college at the Cage for the Society Editor of Technique 1915 as soon as possible.

in the departments of mechanical, electrical, civil and sanitary and mining engineering, both corporations will be concerned with the appointments of the instructing staff, but neither corporation will be called upon to make any payment of salary to a professor whose appointment has not been formally approved by it. The enlarged Faculty will have a double duty to perform. Under regulations from the Institute's Corporation, it will lay down engineering courses that lead to the degrees of the Institute, and under regulations from the University, will lay down comparable courses that lead to the degrees of the University; unless the regulations of the two corporations are different, the courses leading to both degrees will almost certainly be identical.

**Legality.**

The agreement is now complete since it has been formally adopted and approved by the properly constituted authorities in both institution. With reference to the legality of the co-operation, a matter that is certain to provoke some discussion at first, it is merely necessary to say that this question has been referred to the Hon. Richard Olney, and in his opinion there is no objection to the procedure.

**President Lowell's Statement.**

From the point of view of Harvard University, its President, A. Lawrence Lowell, makes the following statement, which shows the broadness of spirit with which his institution enters into the agreement.

"Friends of Harvard University and the Massachusetts Institute of Technology—and they have many friends in common—have long deplored the rivalry of two schools of engineering competing on opposite sides of a river. The disadvantages have been made even more evident by the decision of the Institute to cross the Charles; but the difficulty of making an arrangement satisfactory to both parties has hitherto been very great, and in fact, the obstacles to a combination between rival institutions supported by and serving the same community have been one of the grave defects of higher education in America. This difficulty seems at last to have been overcome here by a plan for co-operation in the conduct of one school of engineering and mining. The

plan is favorable to both institutions. Both gain thereby. Which gains the most can probably not be determined, and certainly has not been computed; for the leading motive with the authors of the agreement has lain in another plane. Both institutions exist for the promotion of instruction and research. Each is a means to an end larger than itself, the welfare of the community as a whole; and that both acting in concert can further this end better than either working alone, cannot be doubted. By the combination of resources and momentum a school ought to be maintained unequalled on this continent—and perhaps in the Old World."

**President Maclaurin's Statement**

In behalf of Technology President Maclaurin speaks thus of its acceptance of what it deems to be a movement that is for the benefit of the people:—

"The advantages of co-operation between the Institute and Harvard have long been the subject of discussion. With reference to the present plan of co-operation, I beg to make the following statements:

"1. The Honorable Richard Olney, in a carefully considered legal opinion, says, 'Co-operation between educational institutions for a legitimate purpose common to both is certainly not illegal and in this case wholly desirable. The Agreement seems to me to spell co-operation and nothing more, involves no merger of corporations or their property interests, and can be carried into effect without violation of charters or of the trusts upon which funds are held.'

"2. Its adoption by the Corporation is unanimously recommended by the Executive Committee.

"3. It is approved by each of the last five presidents of the Alumni Association, and by the President-elect. The President of the Alumni Association, Mr. Frederic H. Fay, writes: 'I heartily commend this effort on your part, and I believe that when it is found that an agreement, such as you have proposed, can be carried out to the satisfaction of the authorities of both institutions, you will find that you have the great body of Tech Alumni behind you, and that you will have added to the prestige and usefulness and strength of the Institute.'

"4. It is approved by all the Heads of the Institute's Departments that are directly affected and by all the other senior members of the Faculty who have been consulted with reference to it.

"5. It leaves the Institute so entirely independent that it can appoint any officer or instructor that it pleases with reference to the courses leading to its degree.

"I believe that the adoption of this agreement is a forward step of very great import to the future of education in this country. Incidentally, it would be of great advantage to each of the co-operating institutions, but it would be especially significant in the emphasis that it would give to the fact, so often overlooked, that educational institutions do not exist for themselves and that their sole duty is to make the best provision that can possibly be made for those who are rising to manhood and for their successors. Under the scheme of co-operation here proposed, it would be possible to maintain a much stronger school of applied science than either institution alone could furnish, and it would be possible to keep that school practically unrivalled in America—and indeed, in the world."

 (Continued from page 1)

the fourth lap Fox came up with a rush, passing Nye and coming close to Guething. Although Guething tired perceptibly at the finish, he was able to hold his lead over Fox, and they finished in the above order. The time for the run was good, being within a second of the record.

Much head work was shown by the competitors in the mile run. C. T. Guething '16 took the lead at the start with C. S. Lee '14 second and M. C. Brock '17 third. At the end of the first lap F. L. Cook '15 passed Brock, who dropped back behind R. G. Brown '14 at the end of the second lap. On the fourth lap Cook passed Lee and on the fifth Brown came up to fourth. For several laps the men were unable to change their relative positions, although many pretty attempts at passing were made. On the twelfth lap Brock passed Lee, but he again fell back on the next lap. The sixteenth lap saw Brown pass Guething, but the former was unable to hold his position for more than fifty yards. Brock was now back in fourth position. Cook tried hard to work his way to the lead, but was unable to pass either Guething or Brown. On the last lap it looked for a time as if Brown might finish ahead, but Guething held his lead and finished in the comparatively good time of 4:57 4-5.

The last running event of the evening was the half-mile. This race was the opposite of the mile in that the men showed very little discretion. A. S. Milliken '14 took the lead at the start and fought with L. Thompson '14 to hold his position. A. F. Peaslee '14 was running third with R. F. Pollard '15 fourth. Thompson was slowly forced to fall back because of his premature sprinting and Peaslee moved up to second. On the seventh lap Loomis came up and passed Thompson while Pollard dropped back. On the last lap Milliken blew up, Peaslee taking the lead with Loomis close behind. The finish of the third, fourth and fifth men was very close, Thompson getting third, Pollard fourth and Milliken fifth. Peaslee won with about two yards to spare. On several of the turns there were bad mixups, so that the judges disqualified Thompson for stepping over the pole. The time was slow, 2:19 1-5.

The feature of the field events was the jumping of W. A. Sullivan '17. He and E. A. Teeson '15 tied at 5 ft. 8 in., which is a good mark at this stage of the season. Both Sullivan and Teeson were in fine form, the latter nearly clearing 5 ft. 9 in.

The pole vault was a runaway for L. Lawrason '16, who cleared 9 ft. 3 in. Fox merely entered this event in the hope of winning the meet for the seniors.

The shot put was well contested and E. W. Curtin '17 won with a put of 35 ft. 10 1-5 in. C. D. Winton '17 got second with E. T. Miller '15 and Fox third and fourth respectively. The freshmen showed up well in this event and the outlook is very encouraging. The weight events have always been the weak side of Tech's track team and a little strength in this line will materially help the team.

The last thing on the program was the regular all star relay race that always features the indoor meets. The captains of the respective teams were Tom Guething and Louis Wilson. The Wilsonites took the lead at the start. The men started half a lap apart that they might be better able to bring down the world's record. Day was opposed to Huff for the first set. They both ran fairly even till the second lap when Day,

running for Guething gained a few inches. Sewall and Atwood were the next to uphold the honors of their respective teams, Atwood running for the Guethingites. The latter regained the lost inches. Fox and Guething next tested their metals (otherwise known as spikes). Wilkins and O'Hara then gave a thriller, holding the attention of the large crowd present at fever point for two laps. For the final set-to Louis Wilson was opposed to Alf Peaslee. Wilson finished in a blaze of glory several yards ahead of his humbled opponent.

40-yd. hurdles—1st heat, won by K. H. Day '17, time 5 4-5 sec., C. H. Leeper '17, 2d, E. D. Sewall '17, 3d; 2d heat, won by T. H. Huff '15, time 5 4-5 sec., D. E. Bell, 2d, G. A. Hunt 3d; 3d heat, won by C. H. Leeper '17, D. E. Bell '17, 2d; final heat, won by T. H. Huff, time 5 4-5 sec., K. H. Day '17, 2d, C. H. Leeper '17, 3d.

35-yd. dash—1st heat, won by A. W. Wilson '14, time 4 2-5 sec., W. Thomas '15, 2d; second heat, won by C. W. Loomis '16, time 4 2-5 sec, T. H. Huff '15, 2d; third heat, won by F. P. O'Hara '17, K. H. Day '17, 2d, time 4 2-5 sec.; fourth heat won by R. C. Erb '16, time 4 4-5 sec., G. I. Reid '16, 2d; Semi-final won by L. A. Wilson '14, time 4 3-5 sec, R. C. Erb '16, 2d, W. Thomas '15, 3d; second semi-final won by F. P. O'Hara '17, time 4 3-5 sec, C. W. Loomis '16 2d, K. H. Day '17, 3d; final won by F. P. O'Hara '17, time 4 2-5 sec, L. A. Wilson '14, 2d, C. W. Loomis '16, 3d, R. C. Erb '17, 4th.

440 yard dash won by T. H. Guething '14, time 57 4-5 sec, C. E. Fox '15, 2d, A. F. Nye '15, 3d, K. King '15, 4th.

Half-mile run won by A. F. Peaslee '14, time 2:19 1-5, C. W. Loomis '16, 2d, R. F. Holland '15, 3d, A. S. Milliken '14, 4th.

Mile run won by C. T. Guething '16, time 4:57 4-5, R. G. Brown '16, 2d, F. L. Cook '15, 3d, M. C. Brock '17, 4th.

High jump tied between W. A. Sullivan '17 and E. A. Teeson '15, height 5 ft. 8 in.; L. S. Hall '13, 3d; J. W. Deon '17, 4th

Pole vault won by L. Lawrason '16, height 9 ft 3 in.; 2d, tie between C. Fox '14 and W. A. Wood '17; F. C. Atwood '14, 4th.

Shot put won by E. W. Curtin, distance 35 ft. 10 1-2 in.; C. D. Winton '17, 2d; E. T. Miller '15, 3d; C. Fox '14, 4th.

Officials: Judges at the finish—Mr. J. R. Lambrith, L. E. Best, A. T. Canby, A. K. Atkins. Referee—Mr. A. E. Burton. Timers—Major Briggs, F. M. Kanaly, A. R. Stubbs. Starter—J. M. White. Field Judges—L. T. Hill, P. L. Hunt, N. E. Tourtelotte, D. E. Waite.
