

THE TECH

VOL. XXXIII. NO. 119.

BOSTON, MASS., MONDAY, JANUARY 12, 1914

PRICE TWO CENTS

BROWN WRESTLERS ARE ENTIRELY OUTCLASSED

Tech Loses But One Match—Wood Stars—Smythe-Martin Is Injured.

In the first college meet of the season, the Tech Wrestling Team proved its worth by defeating the Brown men last Saturday night at the M. I. T. Gym. Although nearly all of the bouts were closely contested, the Tech men showed superior skill and aggressiveness throughout. In one match only did the Brown team succeed, and that was because of an injury to Smythe-Martin, the manager of the Tech team. Another bout required a three-minute overtime period for decision, but the Tech, man Rounds, finally won. A big crowd was out to see the meet, and a regular M. I. T. cheer was given after each match.

In the first match, the contestants, Loo and Rice, kept upon their feet for the greater part of the time, and in fact the whole meet was characterized by much footwork. Loo, however, kept after his man, and had no trouble in winning a decision.

The second bout was between Captain Kelly of Tech and Davis. Kelly, at the stroke of the gong, walked deliberately up to Davis, looked him all over, seized him around the waist, threw him down, and got a fall. The whole performance took only forty-nine seconds. The Brown captain, who is an experienced wrestler, was to meet Kelly, but had to withdraw at the last moment. This match, between the two captains, each a crack wrestler, would have been very interesting.

In the next two bouts, the Tech men, Rounds and Durkee, got decisions, although Rounds had to work three minutes overtime for his. The next bout, between Sullivan of Brown and Smythe-Martin of Tech ended unfortunately. In the first period the Tech man received an injury which finally forced him to stop the match.

CHESS CLUB

Woodbridge Wins Tournament—Club Meets Wednesday.

The following are the results of the chess tournament of Saturday: Semifinals—D. E. Woodbridge '16 defeated I. Paris '14, 3-0; C. Deane '17 won from Saladrigas '16, 3-0. In the finals Woodbridge defeated Deane 3-1. All the games were interesting and closely contested.

The results of the matches for rating of the men in the club are as follows: D. E. Woodbridge won from Kenigsberg 2 1-2 to 1 1-2; Dunn '15 won from Neumann '15, 2-0; Neumann defeated Lewiton '17, 2-0. The ranking of the members of the club is posted on the bulletin board at the Cage.

There will be a meeting of the executive committee in the Union at 4 o'clock on Wednesday. All the members of the committee are requested to be present as the team which is to play Harvard on Saturday will be chosen.

The match with Brown has been postponed until after mid-year's.

PRESIDENT MACLAURIN IN ADDRESS TO ALUMNI EXPLAINS CO-OPERATION

Much Enthusiasm Shown At Dinner—Entertainment Features Novel—J. Whiting '89, New Association Head.

RICHARD C. MACLAURIN

With a record attendance of 400, the reunion of the M. I. T. Alumni Association was held Saturday evening at the Hotel Somerset. Besides securing five talented speakers the entertainment committee provided several novel features. After the meeting had been opened by a rousing all-Tech cheer, an orchestral number and the song, "Take Me Back to Tech," someone was heard absentmindedly whistling. When the surprise was over, this proved to be Miss Angela Morgan, who finished her number and the subsequent encore, "Dear Old M. I. T.," standing.

After hearing the encore, one of the waiters said confidentially to his table, "What do you think of this?" and began a few bars of "Gypsy John." Presently he was singing in full voice, and was found to be Percy F. Baker, baritone. As his encore, he

gave the Toreador Song from "Carmen."

The whole assembly joined in singing Tech-nical words to "Mr. Doolley." Then Mrs. Maida R. Colwell, soprano sang from the balcony. Miss Morgan presently joined in with a flute-like obligato. Following this, the "Stein Song" was sung, everyone standing in honor of the writer, Bullard '87.

The speakers of the evening were President Maclaurin, Gov. Walsh, Jasper Whiting '89, the newly-elected president of the Association, Hon. W. Cameron Forbes, former Governor-General of the Philippines, and Martin Egan, editor of the Manila Times. These were introduced by Mr. Fredric H. Fay, the retiring president, who spoke of the growing influence of the alumni and the com-

(Continued to page 3)

FRESHMEN DEFEAT ST. JOHN'S PREP.

Richardson, Gargan, and Rausch Make Fine Showing—Score 34 To 21.

Saturday evening the Freshman Basketball Team defeated the St. John's Prep. team at Danvers by a score of 34 to 21. The game was closely fought throughout, and was marked by the fast playing of Richardson, Gargan, and Rausch, for 1917. L. Smith, Welch, and T. Smith were the star performers for St. John's. Cowlin and Gargan were right at home on the floor, as both are graduates of St. John's.

Before the game and between halves, the St. John midgets were beaten by the Bowditch's of Salem, 25 to 15. The summary of the former game:—

Tech 1917.	St. John's Prep.
Gargan, rf	lb, Butler
Rausch, rf	lb, Bateman, Hull
Richardson, lf	rb, McAuliffe
	rb, Drummey, Murphy
O'Brien, c	c, Welch
Cowlin, Getchel, rb	lf, T. Smith
Kendall, Rausch, lb	rf, L. Smith

Score—Tech 1917, 34; St. John's, 21. Goals from floor—Richardson 8, Rausch 3, Kendall, Cowlin 2, Gargan 3, L. Smith 6, Welch 2, T. Smith 2. Goal from foul—L. Smith. Referee—Sullivan. Umpire—Shea. Scorer—Irwin. Timer—McCarthy. Time—Twenty minute halves.

FRESHMAN DINNER

At a meeting of the 1917 Governing Board, held last Saturday, it was determined to have the class dinner on Saturday, February 14, at 6 P. M. in the Union.

The question of organizing a class baseball team was also considered. A provisional schedule for games with high schools will be made, and, if sufficient games can be secured to make it worth while, the class will support a team.

SOPH BOARD

At the meeting of the Sophomore Governing Board last Friday, G. H. Smart was elected baseball manager for the coming season, succeeding Lovejoy, resigned. A committee in charge of the elections for Technique 1916, consisting of Stetson, chairman, Lawrence, Foster, Hine, and Kaula, was appointed. It was voted to have the Board picture taken at 1.15 Friday at Notman's.

CALENDAR

Monday, January 12, 1914.

7.00 A. M.—Hockey Practice—Arena.

In Charge of This Issue:

Editor—J. M. DeBell '17.
Assistant—S. Berkowitz '15.

It is hard to look with approval on the plan of the Advisory Council to award stars to men who make their T more than once. How far the plan is a scheme to keep in athletics men who have not sufficient spirit to remain after the letter is won, or how far it is the result of an honest desire to give additional honor for additional achievement, we are in no position to judge; but we believe that in the former case the plan is demoralizing, and that in the latter it is superfluous.

The question is one of our choice as a school between ability and spirit. THE TECH believes that the Institute's athletics should be aimed to bring out the manly and earnest striving for soundness of body which is characteristic of our search in the classroom for soundness of mind. If a man has sufficient ability to make his letter, but not sufficient spirit to care for more than the making of it, he is a demoralizing factor of which our sports may well be rid. If a man shows by continuance in athletic work that he really cares more for the Race than for the Laurel, the added respect in which his fellows will hold him will reward him as well as permission to bespangle himself with the proposed stars.

Attendance at a gathering like Saturday's meeting of the Alumni Association is a remarkable eye-opener to a Technology undergraduate.

It is not what is said in the addresses—though they are always full of genuine vital interest—that makes

W. R. Waterman, Brown '15, was elected captain of Brown's cross-country team at a meeting held just before the Christmas vacation. Waterman has been one of Brown's best long-distance men since his first year in college. In his first year he got third to Taber, of Brown, and Shedd, of Tech, in the dual C. C. meet, and in the following spring he got second to Taber, in the two-mile run of the dual track meet between Brown and Tech. In the latter case he furnished an exciting finish by racing up the straightaway and crossing the line a few yards ahead of E. E. Ferry '12.

T. H. Guething's time of 57 4-5 seconds, made last Friday night, shows that he is in good form. It is over a second faster than the time made last year.

Mas. Aggies started track practice last Wednesday. Tech's team has just about five weeks head start.

Sullivan's jumping on Friday is very encouraging. With Teeson to push him to his limit he should be jumping well up to 5 feet 10 inches by April.

Wednesday the Brown track team will hold a Board Track Meet the results of which will materially influence the choice of the relay teams.

Curtin showed up exceptionally well in the shot. With Winton and MacLeod, who will be back when the hockey season is over, there will be a nucleus from which to develop men for the hammer, discus and shot. Several Freshmen are trying out for this work and it is to be hoped that this branch of the track team will be stronger in the coming season than it was last.

The All-American Track and Field Team is still winning in the meets being held in New Zealand. Power of the B. A. A. won the half mile race, Caughey of California won the hammer, and Templeton of the Olympic Club won the high jump.

EPISCOPALIANS MEET

There will be a meeting of the Brotherhood of St. Andrew on Tuesday evening, January 13th, at the society's room in Trinity House, at 93 St. James Avenue. The meeting will begin promptly at 7.15.

As the annual election of officers is to take place at this meeting it is requested that all members be present.

the deepest impression; it is what one sees in the audience.

From the table marked "A Picked-Up Lot," at which were seated half the living members of '68, the first class to graduate, to where the "thirteens" were gathered, only clean-cut, clear-eyed men were to be seen; men in whose faces shone the desire and the ability to accomplish real things in the work of the world. As one of those present remarked to the writer, "If all the results of human endeavor were to be wiped out, this gathering of men could rebuild at least a substantial portion of the loss."

The heritage of a Tech man is indeed a priceless one.

ALUMNI DINNER

(Continued from page 1)

ing reunion of the Technology Clubs Associated to be held in Chicago. In closing, he expressed his great satisfaction that so many of the alumni had the opportunity to hear Dr. MacLaurin.

President MacLaurin's Address

On occasions such as this, it is usual for the President to make some reference to the main achievements of the Institute since the last gathering of a similar character. Much has happened and much of importance has happened since your last banquet, but I feel that everything else is overshadowed in interest and importance by the great doings of yesterday. Probably it will take the public a long time to appreciate the significance of what was then done. Even you who are most keenly interested may scarcely yet realize it. But in due time I expect that most of you will share the opinion of practically all who have had the plan in mind for some months—an opinion expressed yesterday by one of them, Mr. Theodore N. Vail, the opinion, namely, that the acceptance of that plan is one of the greatest things that has ever happened in the field of education here, something that marks an epoch, not merely in the history of Technology, but of education generally in this country.

General Plan of Co-operation.

What, then, is this plan? At least it has the merit of simplicity, for in essentials it is simply this, that in future Harvard agrees to carry on all its work in engineering and mining in the buildings of Technology under the executive control of the President of Technology, and what is of the first importance, to commit all instruction and the laying down of all courses to the Faculty of Technology, after that Faculty has been enlarged and strengthened by the addition to its existing members of men of eminence from the Faculty of Harvard's Graduate School of Applied Science. It may interest you to know that at the outset this means the addition of sixteen men from Harvard to Technology's Faculty of 106, and that of these sixteen men six have already been closely associated with Technology, four as its own graduates and four as members of its instructing staff. It may interest you further to know that at the outset Harvard's financial contributions to the co-operative effort will be about one-tenth of the income of Technology. The plan enables each institution to control the appropriation of the funds that each supplies and limits in no way whatever the freedom of each in laying down such regulations as it pleases with reference to the degrees that it may grant. If any man see loss of independence here, he has a keener sight than I, and if any Tech man is afraid to enter into such an agreement, then I will not say that he is a coward, but that he is peculiarly sensitive to danger.

Effect on Community.

I have quoted Mr. Vail as saying that the adoption of this agreement is epoch-making in education. He had in mind, I think, chiefly two things: first and most far-reaching, the emphasis that is laid on the basic fact in education that it must be maintained solely for the good of the community. We talk of the interests of Technology, and of the interests of Harvard, of the independence of the University, or of the independence of the Institute, but we have no right whatever even to think of these interests or of that independence, except in so far as they affect

the good of the community. All over the country waste of all kinds is being permitted and wrong is being done in the educational field because of the neglect of this fundamental principle. Great is the power of example and great results should follow from the fact that Harvard and Technology, each pre-eminent in certain fields, have so dramatically set aside all other considerations than the welfare of the community. And then doubtless Mr. Vail foresaw the splendid opportunities that lie before this great school opening to its students, as it will, the resources both of Harvard and of Technology, and benefiting, as it will, not only from the splendid achievements of Technology in its chosen field and from the good-will of the community towards Technology that has long been so generously manifested, but also from the power and the prestige of Harvard that are due to its historic setting and to its great record of accomplishment in the broad fields of education.

Merger and Anti-merger.

These, gentlemen, are the larger issues, but there are some minor ones to which with your permission I shall briefly refer. The adoption of this agreement should put an end to all misunderstanding between Harvard men and Technology men. I am told that in earlier days than mine there was a gulf between the two groups; it has been closing slowly for a long time. Differences and misunderstandings should now be buried in any space that may be left, and the gulf permanently closed. This agreement should end, once and for all, the differences between merger and anti-merger men. There can be no more talk of merger, for it has been proved that all the good that was ever claimed therefor can be attained without any merger at all. I believe that in the long run it will be recognized that the old merger fight, evil as it seemed, was a good thing for Technology. If I remember aright, I am associated in some way with a Peace Society, but none the less I believe that a fight is often a good thing. It rallies men to one another and to a cause, and it may be so conducted as to leave no bitterness behind. Certainly, there should be no bitterness here for both sides can see that judged by the issue their main contentions are right. The merger men held that co-operation and intimate co-operation between Harvard and Technology was desirable. The anti-merger men held that co-operation was possible under conditions that would be more favorable to Technol-

WRESTLING MEET

(Continued from page 1)

Treat and Morse repeated their usual performances by winning their bouts; the former getting a fall. Wood, a Tech freshman, won his first Varsity match by throwing his man in the short time of five minutes and seventeen seconds. He should prove a valuable addition to the team.

Walter of the 158-pound class was matched against an extremely powerful man in Blue of Brown. The Tech man's skill, however, was more than a match for the Brown man's muscle, and Blue was lucky to get off without being thrown. Crowell, the Tech heavyweight, tied his man all up, and after a little heaving and hauling, rolled him upon his shoulders for a fall. The summary:—

115-pound class—Loo of Tech defeated Rice of Brown on decision. Time—Three periods, 6, 6 and 2 minutes.

125-pound class—Capt. Kelly of Tech defeated Bell of Brown. Straight throw. Time—49 sec.

135-pound class—Durkee of Tech defeated Brackett of Brown on decision. Time—15 min., three periods.

Rounds of Tech defeated Tewhill of Brown on decision. Time—18 min., four periods.

Sullivan of Brown defeated Martin of Tech on decision. Time called, 13 1-2 min.

145-pound class—Treat of Tech defeated Owen of Brown. Straight fall. Time—4 min., 21 sec.

Morse of Tech defeated Wells of Brown on decision. Time—Three periods, 15 min.

Wood of Tech defeated Davenport of Brown. Straight fall. Time—15 min., 17 sec.

158-pound class—Walter of Tech defeated Gottshall of Brown. Straight fall. Time—9 min.

Referee—Dr. W. F. Provan; timer—Cady.

ALUMNI DINNER

(Continued from page 3)

ogy. I do not see how any Tech man can reasonably complain of the conditions in this agreement.

"Mr. Smith" and Co-operation

Let me give you the impression regarding this matter made on the mind of one who will always be held in honor by every alumnus—I mean "Mr. Smith." I hesitate to give you further information about him lest against his wish I should disclose his identity, but I will risk this much. Having formerly said that he is not a Tech man, I now tell you that he is not a Harvard man. He "enthusiastically endorses present plan of co-operation," and when I explained it to him, his first remark was, "That is surely the greatest compliment ever paid to an institution of learning. It is a public and carefully considered expression on part of Harvard, the oldest and most famous university in the country, and one singularly well placed to know all that can be known

about Technology, that it has absolute confidence in that institution and in its power to do the best that can possibly be done in its chosen field. If Technology men do not appreciate that compliment, they will surprise and disappoint me."

Harvard's Intentions.

In conclusion, need I say, gentlemen, that the appreciation of Harvard's noble attitude in this matter will not be confined to Tech men. All who understand will recognize that such an arrangement as has been entered into could be possible only because Harvard, fortunate in many things, is peculiarly fortunate in being governed by men of broad and liberal spirit. These men at every stage of our negotiations showed that they had no other thought than to strengthen both institutions for the common good.

COMMUNICATION

To the Editors of THE TECH:
With all this talk of Technology-Harvard co-operation I feel that the Institute should take steps to explain just what this means to the student who is at present studying at either of the institutions. Personally I do not find the papers sufficiently clear to understand it. It has been suggested that President MacLaurin call a Convocation and clear up many of doubtful points of the matter. This I think will be satisfactory to most of the men and prevent a good deal of meaningless discussion and criticism among students who are not certain of the facts.

Yours respectfully,
A Junior.
