FIRST CALL ISSUED FOR TECH SHOW CANDIDATES

Annual Exploitation of Local Talent To Begin This Afternoon.

Today at 2 p.m. real activity begins in the stage department of "Royal Johnnie." Business arrangements have been progressing for some time but today marks the first call for men who will actually take part in the Show. This contest will be judged solely upon a man's ability to sing, while his dancing ability will have nothing to do in his selection. The judging will be based upon applause each man receiving a certain numerical grade, and the men with the highest percentages will be chosen. Although at times the rehearsals become monotonous and tiresome, these performances themselves are a real pleasure and a successful competition is well repaid for his efforts to make Tech Show a success. Even if a man is not chosen for a principal role or makes the chorus he is fully compensated for his work is much easier and he has no time to remember. There will probably be two or three trips and this feature should be quite a drawing card. Northampton may see "A Royal Johnnie" this year, and closely associated with this town is Smith College.

Besides the pleasure of the trip and the performance, a man has a chance to broaden his field of acquaintance and meet a great many men whom he probably never saw before, especially if he is a Freshman. This is a very great experience and will do a man a great deal of good during his stay here.

Besides these benefits, which he may derive, he is directly behind the cause of athletics and this is something to his credit. The primary and main object of the Show is to contribute to the support of athletic sports at Tech and successful competitors help to make this possible, while unsuccessful men would have done the same thing had they had the opportunity.

Stage Manager D. M. Huggins will have charge of the competition and he will give some ideas as to what the men will have to do, together with the benefits they derive from their labors.

COUER II PLANT TEST

Begun Last Tuesday, It Ends This Morning At 8:00.

This morning at eight o'clock the plant test which the Seniors of Course II have been conducting since last Tuesday will come to an end.

TECH VS. HARVARD AT GYMNASIUM TONIGHT

Wrestling Meet Last Here This Year—Student Body Urged To Attend.

Tonight at eight o'clock, the Tech wrestling team undertakes its hardest task of the season—the meet with Harvard. Captain Kelly and Manager Smythe-Martins have exerted themselves to the utmost to make the match attractive and the men of the Institute can reap them only by turning out in large numbers. The freshman banquet will be over at ten minutes to eight to allow time for the men to get over to the gym. The team has at present many heavy ex- cesses to overcome, but little support from the Athletic Association. The meet depends upon the ticket receipts for its funds. In other words, it depends upon the student body for support.

For the meet, five matches will be played in all. The following are pending. The following.

The Tech team will arrive at 12:40, the two meeting at Albany Station. The New York company will take train No. 19 and will leave at 10:30, the 19th, while the Tech train will leave at 1:30, the 19th.

RELAY TRIALS TODAY

Final Try-Outs for Long Distance Team To Run at Providence.

Final trials for the long distance relay team to run at the Providence Meet next Saturday will be held this afternoon in the gymnasium. Each man on the team is to run four laps of the Providence Armory, a distance of 704 yards. This distance is 15 yards short of eight laps on the gymnasium track. Good times are expected as several of the men won through a fast six laps last Thursday. Fox and O'Connell, who will undoubtedly be on both the long and short relay teams, are to try a fast four after their eight laps. This is to determine if they could possibly run both distances against Harvard.

In addition to the 704 yard trials, there is another meet which can be held this afternoon. The Tech team will leave at 10:36, the 19th, while the New York company will take train No. 19 at 1:30. The Tech team will leave at 12:40, the 19th.

Six to Two—Second Half Poorly Played.

The Columbia Hockey game last night at the Arena.

The first half started fairly even. The puck was pushed back and forth, but it could not be pushed by the defense men. The first goal was scored by the two after eleven minutes of play in a rather unusual way. The puck was brought down the line by Foster, On his pass out from back of the Columbia cage he lifted the puck over the goal tender's head to O'Connell who fed it into the net. A minute later Elchorn scored on a long shot from the center of the rink. After an interval of individual pushing by the members of both teams, Captain MacLeod scored Tech's third goal on a smear shot from Columbia's cage.

Columbia's first and only score this half was due to Barlow who pushed the puck in on a face-off in front of Tech's goal. A few minutes later Elchorn repeated his former

TECH SHOW CANDIDATES

TECHieres, as well as Turley Dinner—Innovations.

Freshman Class Spirit is high today, and the 1917 Dinner this evening in the Union promises to be a live affair. A large death rate among turkeys is reported, and the committee promises the Class a good feed as well as a good time. Incidentally, something original in the souvenir line (not Patinas), is to be given out, but as to the nature of these the Committee remains silent.

The Dinner will start promptly at six o'clock, and will close at ten minutes to eight, at which time the Class will adjourn in a body to the Tech-Harvard Wrestling Meet, a body to the Tech-Harvard Wrestling Meet.

TECHNOLa SPRINGS SURPRISE BY VICTORY

Defeats Columbia by Score of Six to Twelve—Second Half Poorly Played.

Charismatic of the usual student support of undergraduate activities at the Institute, less than a hundred students attended the Technology-Columbia Hockey game last night at the Arena. The teams were evenly matched, but the poor physical condition began to tell on Columbia's men and the Tech players easily ran away with them. Previous to tonight's game, Columbia had played two consecutive games with St. Paul's and Dartmouth, both hard fought contests. Columbia was the easy star for Tech. His rushing and all around work made him stand out from the others as a good collegiate hockey player. For Columbia the work of Webb, who played rover, excelled that of his teammates. By his hard work during the entire game, he kept the score down from a complete walkaway.

The first half started fairly even. The puck was pushed back and forth, but it could not be pushed by the defense men. The first goal was scored by the Tech team after eleven minutes of play in a rather unusual way. The puck was brought down the line by Foster, On his pass out from back of the Columbia cage he lifted the puck over the goal tender's head to O'Connell who fed it into the net. A minute later Elchorn scored on a long shot from the center of the rink. After an interval of individual pushing by the members of both teams, Captain MacLeod scored Tech's third goal on a smear shot from Columbia's cage.

Columbia's first and only score this half was due to Barlow who pushed the puck in on a face-off in front of Tech's goal. A few minutes later Elchorn repeated his former
The last two performances of this season of the Yale Dramatic Club will be held this evening in the grand ball room of the Waldorf-Astoria, New York City.

With the completion and opening of the Yale Bowl in the fall the suggestion has been offered that the Army-Navy football might be played at New Haven. While this would offer an excellent solution of the problem which has confronted the Army and Navy officials some doubt is expressed as to whether the Navy would object on account of the distance.

For the second time in four years the basketball team representing the St. Lawrence University was defeated on its own floor. The St. Lawrence team is one of the strongest colleges for basketball in New York State.

In conjunction with the appointments of the Harvard authorities to bring a western team to the stadium in the fall it might be noticed that at the present time Notre Dame University has her basket ball team engaged in a series of nine games in the East. The schedule includes: Syracuse, Rochester, Union, Colgate and Clarkson Tech.

The report of the Associated Students of the University of California organization for January 1, 1914, gives its present wealth as $177,317.83. This includes over $20,000 on deposit with the United States National Bank of San Francisco, and $41,434.15 as the estimated surplus of the Associated Students' Store. The only liability of the A. S. U. C. is a bill due A. G. Spalding Bros., for $5,679.55.

Chemical Society
Hears Fine Talk

Prof. Whitaker of Columbia University Makes Hit With Tech Men.

Prof. M. C. Whitaker, Head of the Department of Chemical Engineering at Columbia University, spoke to the Chem Society last night, and presented some of his results "The Future of Chemical Engineering," and illustrated talk been given before the Society.

Prof. Whitaker took for his subject "The Future of Chemical Engineering," and presented some of his views, and made a hit with the Tech men. Seldom if ever has such an interesting and at the same time instructive talk been given before the Society.

The principal difficulty, he said, with the young Chemical Engineer, he said, is the inability to change at a jump from laboratory to plant methods. To remove in part this difficulty, is the function of the Chemical Engineering Laboratory in the curriculum. The average young man becomes more or less familiar with Civil, Electrical, and Mechanical Engineering appliances before starting his technical education, and this familiarity is increased all through his course, but in only recent years have Chemical Engineering Laboratories and indeed Chemical Engineering Courses, been introduced, and the prospective Chemical Engineer thus enabled to get his hands on the appliances of his art. The failure of the young graduate to make a good impression is also largely due to the fact that he has been studying reactions with small quantities so long that he cannot apply them to large amounts.

Hockey Game
(Continued from Page 1)

a beat by tallying on a long shot. This ended the scoring for the first half.

Tired out by the first half both teams went into the second period in a listless manner. After a score by Winton for Tech, it lost all semblance of a hockey game and developed into a long scrimmage. Neither team could get away to start any new work.

They seemed so tired that when one of them did get the puck he allowed it to be taken away without even a fight. Cochrane was the only man on either side that showed any signs of real life. There was absolutely no team work. Toward the end of the half Columbia scored her last goal on a chance shot from the middle of the rink, H. Miller being responsible for the point. Cochrane retaliated after a few minutes by scoring Tech's last goal from a scrimmage.

Summary:
Columbia Tech
H. Miller r w .......... r w Plocher Bartow c .......... c Winton Weil s r s .......... r s MacLeod S. Miller I w .......... I w Sawyer Dobrabe c p .......... c p Cochrane Reynolds p .......... p Eichorn Millaub (Capt.) g g g Lowengard Substitute: Todd for Bartow for Columbia. Gosler For Tech, Cochrane (2), Winton, MacLeod, Richorn (3). For Columbia, Bartow, H. Miller, Pensties, Cochrane, for tripping. Referee's: Moody and Fester.

Special trains.
(Continued from Page 1)

The Itinerary in Chicago includes two strenuous days. On Friday morning, February 20, there will be registration, informal reception and the swapping of experiences by the members of the assembled company, with a luncheon at 12 noon, the Blackstone Hotel being the headquarters. At two there will be a choice of trips to inspect one or another of Chicago's features. At 6 there will be the departmental dinners, these being at the University Club. Such occasions are of greatest interest since they bring together the men in the same line of work. A member of the Technology faculty will preside over each dinner. A 8 o'clock there will be a smoker in the College Hall of the University Club where there will be an address by President R. G. Maclaurin on the new Technology buildings (illustrated by Eastern slides), and on the cooperative arrangement with Harvard.

On Saturday there will be the opportunity for class breakfasts. At 9:30 on a special train the Tech men will set out to visit the plant of the U. S. Steel Corporation at Gary, Ind. In the afternoon there will be a grand reception, followed in the evening by the banquet, both of them at the Blackstone Hotel. The meeting is to be under the auspices of the Northwestern Alumni Association which acts as host and tenders to the visitors many courtesies and departmental lunches.

The New No. 5 Printype Oliver Type-writer makes an ideal machine for students' use. It is a marvel of simplicity, durability and ease of operation. Printype your notes and they will be twice as valuable to you. Easy terms if desired.

New T. C. A. Executive Officers Elected

C. G. Norton '15 Elected President—John Homan '15 Now Vice-President.

Yesterday afternoon, at 5 o'clock, the T. C. A. election for president and vice-president closed. Charles G. Norton '15 was elected to the office of president. Norton, of the Junior Class, is a member of the Landa Chi Alpha fraternity. He is a Course 17 man, and has been connected actively with the T. C. A., serving on the Membership Committee for some time. When he was elected vice-president last year, he assumed the chairmanship of that committee, by virtue, according to the constitution, of his office as vice-president. He is also a member of the Glee Club, and of the Combined Musical Clubs.

The election placed John Homan, also of the Junior Class, in the position of vice-president. Homan is a member of the Theta Xi fraternity. He has been serving on the Membership Committee of the T. C. A., and his new office places him at the head of that committee.

PLANT TEST

(Continued from Page 1)

The men have been working in eight hour shifts, six men on each shift, for the last ten days. Continuous observations have been made on the boiler plant, and the efficiency of the Parsons-Westinghouse turbine and generator has been tested.

During the last all possible allowances have been made to alleviate the sufferings of the workers. Hot coffee has been brought from the Union to each shift, and smoking was not prohibited. Lunch was served to the men at their stations.

NOTICE.

If there are any members of the Technology Aero Club now in the attitude they would kindly communicate with J. M. Livermore, '15, by leaving their names at the Cage.
