

THE TECH

VOL. XXXIII, NO. 131.

THE TECH, BOSTON, MASS., MONDAY, FEBRUARY 16, 1914.

PRICE TWO CENTS

COMPETITION FOR STAGE MANAGEMENT OF SHOW

Candidates for Second Assistant To Meet This Afternoon In Union.

The competition for the position of assistant in the Tech Show stage department starts today. The successful freshman will be second assistant stage manager and, if he does his work properly during the rest of this year, he will almost automatically become first assistant next year and manager of the department when he is a Junior. He then has an excellent chance of becoming General Manager of the Show in his fourth year, and General Manager of Tech's annual Show is a position worth looking forward to, even if it be three and a half years away.

The work of second assistant does not require much time and is not difficult. He must, however, know the rudiments of harmony and be able to read music. He will assist in the prompting at the rehearsals and, with the manager and first assistant, will have general oversight over the properties of the play and entire charge of the trips. The actual staging of the Show is done under the direction of his department.

This is the last chance for members of the class of 1917 to become connected with the management of the Show, as the higher positions are filled almost exclusively by former assistants. The staging of the Show is at least as interesting as any work connected with it and the competition should attract a number of men.

Stage Manager David M. Hughes will meet those who are interested at quarter past four today in Room B at the Union. He is prepared to answer questions about the work done by the department and will outline more fully the duties of the second assistant.

CHESS CLUB.

On next Wednesday afternoon at five o'clock there will be a meeting of the Executive Committee of the Chess Club in Room A of the Union. At this meeting the arrangements for the tournament, to take place this term, among the members of the Club will be discussed. Matches with the teams of Amherst, Brown, Colby and Harvard will also be discussed. This is a very important meeting and it is desired that all members of the Executive Committee be present.

Worcester Tech has instituted courses in logic and philosophy. These have been placed in the curriculum with a view toward more liberal education.

TECH WINS DECISIVELY IN HARVARD MEET

Wrestlers Win by a Score of 6 to 1—Enthusiastic Crowd Attends Match.

At the last wrestling of the year to be held in the M. I. T. gym, a large crowd turned out to watch Tech defeat Harvard. The enthusiasm and interest shown by the body of undergraduates present was extremely gratifying to the wrestling team, which has worked faithfully now for nearly two seasons. For many members this was the last appearance in a match at the gym, and it was fitting that so many Institute men should show their appreciation of the work of the team. The meet throughout was a thriller, but from the very first, the determination of the Tech men foretold the ultimate result. When the first three matches were

NEW BURSAR TO SPEAK AT T. C. A. MEETING

Mr. Horace S. Ford To Appear Before Students for First Time At Institute.

The T. C. A. is expecting an unusually large attendance at the coming Thursday noon talk, for the speaker will be Mr. Horace S. Ford, the new Bursar at the Institute. This will be the first time that Mr. Ford will come in direct contact with the student-body, and the T. C. A. talk he will give will serve to get him acquainted with the students. The subject of the Bursar's talk will be "Self-Service or Some Other Kind."

Mr. Ford has been Bursar at the Institute since January 5th, when he succeeded the late Frank H. Rand. He came to the Institute from the Old Colony Trust Company, where he held the position of Assistant Cashier.

FRESHMAN BANQUET A GREAT SUCCESS

184 Men Attend—Dean Burton and Profs. Talbot and Miller Speak.

College and class enthusiasm ran high Saturday evening at the Union, when one hundred and eighty-four jubilant Freshmen gathered at the 1917 class dinner. From six o'clock until eight they feasted, first on roast turkey and then on the instructive and entertaining words of Dean Burton, Professor Talbot, and Professor Miller, the speakers. Professor Russell, who was scheduled to speak, was obliged to cancel his engagement because of illness. The general jollity which prevailed loosened not only the tongues, but also the pocketbooks of those present, so when Manager Rausch appealed for better support of the basketball team, he received a ready response. Immediately before dinner was served, a flashlight photograph was taken of the diners; before the evening was over, it had been printed and circulated, and found a ready sale. At eight o'clock nearly one hundred of the Freshmen adjourned in a body to the Tech-Harvard wrestling match.

Toastmaster Hulburd, before introducing the speakers, complimented the class upon the spirit it has shown, saying that the only particular in which it fell behind the other classes was that it had no class baby; but that it probably would have one in a year or so. He then presented, as the first speaker of the evening, Dean Burton.

The Dean said that the question, "Is Tech a College or a Professional School?" could be answered like the question of the pronunciation of "neither"; it is "nayther." It is something better than either one. It differs from a college in that when a man enters Tech he has chosen his profession, and starts immediately to fit himself for it. In college, on the other hand, he is merely being prepared for a course in a professional school. Tech is not a professional

TECH WRESTLING TEAM.

won in quick succession by the Tech team, the meet was practically settled and the nervous tension of the spectators was relaxed. An abundance of high spirits was then manifested by them in the hearty cheers and shouts of encouragement to the matmen.

The first match, in which Thayer of Harvard was pitted against Captain Kelly of Tech, soon resolved itself into the question of how long the Harvard man could withstand his opponent's attack. Four minutes and twenty seconds were necessary to pin Thayer's shoulders to the mat, with a head scissors and arm hold.

A handicap match was then put on, in which Loomis of Harvard agreed to throw Manager Smythe-Martin with-

TECHNOLOGY CALENDAR

Now on Sale at the Cage—Design Attractive.

The Technology calendar for the year 1914 is now on sale at the Cage. It is made up in an attractive cover in red and grey and contains six pages. On each page with a two months calendar are pictures representing the various Institute activities. This is the first Institute calendar which has been published in quite a number of years. The price is seventy five cents; already quite a number have been sold, and as the supply is limited those who desire calendars should purchase them at once.

THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

IN CHARGE OF THIS ISSUE

Editor—J. M. De Bell, '17.
Associate—H. E. Lobdell, '17.

We have often in the past, in urging men to come out for work on the paper, made sweeping statements about the advantages to be obtained by coming out for activities in general and THE TECH in particular. The students, of course, take these statements at a discount, since they come from a not wholly unprejudiced source. They have no basis for taking in this way the statement made by Dean Burton at the Freshman dinner Saturday night: "I think every member of the first year class should seriously consider some activity. I don't believe there is one of these which rivals the opportunities offered by THE TECH and the new Monthly."

The crowd that attended the wrestling meet, last night illustrates the fact that holding two undergraduate events on the same evening is not always objectionable, and may even be made highly advantageous by a little careful arrangement. In this case the fixing of the times of the two events made it not only possible, but easy and natural for the Freshmen to go directly from their dinner to the Gymnasium; as a matter of fact most of them did so.

"Technology is not a college or a professional school; it is something greater than either." These words of Dean Burton constitute both a retrospect of a glorious past and a view into the future. They are the keystone of the Institute's present position in American education as well as a promise of further achievement. "Gentlemen, I believe this is the greatest school in the United States."

SPIKES.

The performances of T. H. Guething and C. Fox in making both teams in the fast time were most promising. Coach Kanaly is thinking seriously of running the men in the longer distance if that race comes first at the Providence meet although nothing is at present finally decided.

At the I. C. A. A. A. Track and Field champs to be held at the 1915 Panama-Pacific exposition there will be a 440 yard straightaway and the longer distance races will be held on a track, a third of a mile long to a lap. This will be the first time that the champs will be held in the West. It may give the Eastern colleges a better chance to see the handicaps of a week's trip before the races. This has been the reason advanced for the poor showing of the Western teams in former I. C. A. A. A. meets.

Coach George Huff expects to establish a school of Athletic coaching at the University of Chicago in the near future. This school would train men for track, football, basketball and many other important branches of athletics. Such a course is at present given at the Harvard Summer School as well as at Chautauqua, N. Y.

H. S. Benson is back in the game again after having suffered from foot trouble for several weeks.

Tech has sent a greater number of individual entries to the management of the Providence meet than she has to any open meet in the last seven years or more. This would indicate that the men are really taking an active interest in the work and are trying hard for places on the team. Such spirit can bring the N. E. Champs to Tech this year! This is not an idle pipe dream either. We have improved wonderfully over last year and the other colleges have lost an amazing number of point winners!

WRESTLING MEET

(Continued from Page 1.)

in nine minutes. The Harvard man, however, must have thought better of his agreement, for, instead of throwing Smythe-Martin, he barely escaped being thrown himself.

Griffiths of Harvard held off Treat of Tech for a long time in the 145-lb. class bout, but as soon as the latter got his man upon the mat, the match was all Treat. The Tech man was unable to throw his opponent within the nine minutes, although it looked at one time as if a head scissors would end the bout.

In the 158 pound class, Goodell of Tech was matched against a more experienced man, but for a time he worked upon even terms with him. The experience of the Harvard man, however, gradually began to tell, and he received the decision,—the first for his team.

The heavyweight bout was short and decisive. At the start both Crowell of Tech and Brennan of Harvard were cautious. Then suddenly

OPPOSITE THOMPSON'S SPA

Crowell obtained a hiplock, and threw his man heavily to the mat. Soon both shoulders of the Harvard man were down, and Tech had two more points added to her score.

An exhibition bout was next staged, Loo and Means being the contestants. Then came a most bewildering spectacle of rolls, cartwheels, and somersaults, which caused as much merriment among the wrestlers as among the spectators. All those who witnessed the bout are certain that two perpetual motion machines have been discovered right here in the Institute.

The summary:

125-pound class—Kelly, Tech, defeated Thayer, Harvard, 4m. 20s.

Handicap match—Martin, Tech, 138 pounds, defeated Loomis, Harvard, 143 pounds, decision.

145-pound class—Treat, Tech, defeated Griffiths, Harvard, decision.

158-pound class—Tyler, Harvard, defeated Goodell, Tech, decision.

Heavyweight class—Crowell, Tech, defeated Brennan, Harvard, 2m. 51s.

COSMOPOLITAN CLUBS

Harvard and Technology Clubs
Banquet Together.

The committee in charge of the joint banquet of the Cosmopolitan Clubs of Harvard and M. I. T. request that all members who intend to be present leave their names at the Cage for J. Masferrer so that arrangements can be made for the time and place of the banquet. Announcements of the date will be made later in these columns.

**MUSICAL CLUBS
CONCERT FRIDAY**

**Framingham High School Seniors
Entertain Tech
Clubs.**

After the Musical Clubs Concert at Framingham High School Friday night the Senior Class of the High school entertained the members of the clubs with a dance. Men who were present at the concert report that they had the best time so far this year. During the concert the members took advantage of the opportunity afforded to look over the crowd, and when they saw so many pretty girls in the audience they decided to stay to the dance.

During the progress of the dance the principal of the school stopped the dancers and requested that they refrain from ragging.

A special car was chartered for the trip and it left for Boston at 11.45.

The concert itself proved to be one of the most successful ever held. The audience enthusiastically applauded the numbers especially the reading by Mr. H. G. Mann, '16.

The next concert will be at Holliston, Mass., on February 27th, Friday evening. A special train will be chartered. Announcements on further arrangements will be made later.

The program of the concert at Framingham follows:

1. The Sword of Ferrara Bullard '87
- Glee Club
2. Darkies' Dream Lansing
- Banjo Club
3. Quartette Selected
4. Reading Selected
- Mr. H. G. Mann, '16

FRESHMAN DINNER.

(Continued from Page 1.)

school because it teaches academic subjects under different conditions. President Rogers founded the Institute on the principle that when a man enters college he is beginning his life's career; a lawyer or doctor may need an academic training, but an engineer should start his engineering studies at the earliest possible moment. In short, Tech represents a new type of education, which has been further developed by the Harvard alliance. This new education, the Dean believes, is the ideal one for American young men; this is why Tech men are the best of their kind. In closing, the Dean added a few words on the importance of students taking part in Institute activities. He said that no activity offered better business or practical experience than the new monthly or THE TECH. He thinks that Freshmen who received nothing but C's should go out for THE TECH, and see if they could not reduce their marks to P plus. Even if Tech men have accomplished unusual things, they are not in a position to "sit by and admire."

Doctor Talbot began his talk with several humorous anecdotes of Freshmen's struggles with Chemistry. He then spoke of the great physical and social changes which have come over the Institute since his own Freshman days. He remembers when Rogers was the only building for instructional purposes, and the site of the present Walker Building was occupied by the gymnasium, where Freshmen drilled every week with painted wooden guns. We have an advantage over Doctor Talbot's class because we have a better preparation; but for this very reason, we are expected to "end further along the line." The difficulties nowadays are chiefly due to the large classes, whose size prohibit much personal acquaintance with the professors. Doctor Talbot's class numbered 108, of whom 29 graduated. There are three kinds of men, however, for which Tech has no use: The men who do not know the names of their

ELECTORAL COMMITTEE OF TECHNIQUE 1916

Result of Saturday's Elections Announced—Tie in Balloting.

The election for the Technique 1916 electoral committee closed Saturday afternoon at 4 o'clock. It was very close, and twenty-six men instead of twenty-five compose the Committee, owing to a tie. Kemerton Dean received the largest number of votes, getting fifty-five. The list of those elected is as follows:

Steven Ross Berkowitz, Paul Henry Buxton, Jasper Blanchard Carr, Kemerton Dean, Harvey Field Dewson, Paul Harrington Duff, James Morrison Evans, Hovey Thomas Freeman, Gonzalo Garita, Jr., Carl Theodore Guething, Frank Bowman Hastie, Lucius Tuttle Hill, Tredick Kittredge, Edgar Louis Kaula, Levering Lawarson, Nelson McRae, Charles Salisbury Makepiece, Howard Grover Mann, Ralph Mann, Olen Carter Norris, George Roper, Jr., William MacIntyre Shakespeare, Henry Bradbury Shepard, Allston Everett Storm, Kenneth Murchison Sully, Donald Blake Webster.

RELAY TEAMS CHOSEN

T. H. Guething and C. Fox Qualify for Both Teams.

Last Saturday afternoon the final choice of men was made for the relay teams that are to run at Providence. There were several possible men who did not take the trials but nevertheless the times made were good, decidedly better than those made at the last trials, and the teams chosen may be relied upon to give the Harvard men a good rub. The Harvard team, the shorter distance one especially, is undoubtedly the fastest one in Intercollegiate ranks. For this reason it will not be an easy task to lead them across the tape, but the chances seem bright.

For the 352-yard squad the following men were chosen: T. H. Guething '14, C. Fox '14, K. Dean '16, F. P. O'Hara '17, H. S. Wilkins '14 and C. Loomis '14. If the longer distance relay is run first at the games it is possible that the last two men may run, but the team, at present, comprises the first four men.

For the 704-yard team the following men qualified: T. H. Guething, C. T. Guething '16, C. Fox, J. J. Donnelly '17, H. S. Benson '16, K. Dean and M. C. Brock '17. From this squad four men are to be picked, but the actual choice will probably not be made till the men come on the floor at Providence.

FRESHMAN DINNER (Continued from Page 3.)

instructors, the men who do not know what books they are studying, and the men who do not know their records. Tech men have a splendid opportunity, and should make the most of it.

Professor Miller, the next speaker defined engineering in general as composed of 90% commonsense and 10% technical knowledge. He said that a great many men try to acquire so much of the latter that they seem to have lost what little of the former they might have possessed. Each man has made a contract with M. I. T. by which knowledge is sold him for \$250 a year: the student should get the most possible for his money, and not burden his mind with formulae when plain commonsense is all that is necessary. There is a limit to every man's capacity, and the engineer should memorize such fundamentals as will aid him to reason out problems approximately at a moment's notice.

A regular M. I. T. cheer was given for each of the speakers, and the dinner broke up with a deafening cheer for 1917.

Organized baseball and the Federal league are at present in a fast race to see who gets the greater number of college baseball stars.

Hockey teams representing the Harvard Crimson and the Lampon will meet on the Basin tomorrow afternoon.

Harvard and Amherst will hold a swimming meet on Saturday of this week.

WANTED IMMEDIATELY.

Three young men to apply now for summer positions in hotel. Excellent money making positions. Clean work. Contracts must be signed not later than Feb. 25th. Apply by letter only to W. R. AMESBURY, 334 Boylston St., Boston, Mass.
