

THE TECH

VOL. XXXIII. NO. 134.

BOSTON, MASS., FRIDAY, FEBRUARY 20, 1914.

PRICE TWO CENTS

BUY-A-TICKET.

Of course everyone has his own particular idea of what a typical Back Bay matron should be like. Why even the veriest freshman who is still going through the throes of Military Science has been in Boston long enough to have formulated his impression on this subject. But no matter what the impression is which may be now prevalent, there can be no exaggeration in saying that the best delineation of this character that has ever been done on a Boston stage will be presented in the one-act, four scene musical comedy drama that is to be given in "Yish-ka-bibble."

The playwrights have spent hours in depicting this society matron, Mrs. Cooper-Cooper by name, and have succeeded in producing a character which is screamingly funny in all of her actions. Moreover she is very amusing in her lines which portray her very distorted views on life as she sees them with eyes which look only for society prestige and family connections. Mrs. Cooper-Cooper will take Huntington Hall by storm on March 7 as the man who has been chosen to interpret the part is one of the ablest actors in the Institute who has more than once held audiences of Tech Show spellbound.

In this same little skit there is one other character who is bound to find favor in the eyes of the Technology undergraduate. He is a Harvard man. And what a beautiful type of Harvard man! He is exactly the kind that the

(Continued on Page Four)

M. E. SOCIETY TRIP

Details of Boiler and Turbine Rooms of Plant.

The M. E. Society has picked out the Edison Plant on L street for their trip next Tuesday and Wednesday afternoons. The plant is the largest in Boston and supplies electricity to greater Boston even taking their wires down as far as the Rhode Island line. The power is used for street and house lighting purposes as well as to furnish power to factories.

In the boiler room of the plant there are six rows of boilers, making a total of sixty boilers, each having a rating of 500 H. P. The total horse power developed is 30,000. The boilers are fed by automatic stokers of the Murphy and Roney types. The turbine room has two Curtis vertical turbines rated at 7500 KW each, three 12,000 KW generators, three 16,000 of the same kind and six 1800 KW compound Corliss engines.

Members of the society wishing to take the trip are to turn in their names to Purinton, telephone BB 21825 if they are going on Tuesday or to Treat BB 4907-R if on Wednesday.

BURSAR H. S. FORD SPEAKS FOR T. C. A.

New Bursar Gets Acquainted With Tech Students in Noon Talk Yesterday.

Yesterday noon, in the Union, Mr. Horace S. Ford, the new Bursar, spoke to a crowd of men that nearly filled the room. He spoke on the topic "Self-Service or Some Other Kind." In opening his talk, Mr. Ford said that he was very glad of this opportunity he had to get acquainted with the men, and that he wished to voice his hearty approval of the work of the T. C. A. He was pleased to see that in the Institute there is an organization like the T. C. A. and carrying on such work as the association had been doing in the past. He said that the keynote of an organization like the T. C. A. must be "Service."

In accepting the position of Bursar at the Institute, Mr. Ford said that he had stepped out of a large and happy business family, and had entered a large and equally happy educational family. In doing so, he regretted that he can not say that he is a Tech man, a graduate of the In-

(Continued on Page Three)

NOVICE WRESTLING MEET

Tech Men To Meet Allen School Saturday Night.

Tomorrow night a novice wrestling meet is to be held at the Allen School in West Newton. The Allen School team is composed of the following men: Gustafson, 170 lbs.; Horgan, 165 lbs.; Blinn, 150 lbs.; Hauson, 142 lbs.; Manning, 140 lbs. Corral, 133 lbs.; Hopkins, 110 lbs.; Prouty, 135 lbs. The Tech team is to be picked from the following men: Mertz, Peterson, Dowell, Stevens, Astorian, Farnsworth, Bone, Berger, Demond, How, Blakeney and Stebbins. Last year's Tech team defeated the Allen School team, winning six bouts and drawing one. The practice at the Gym today will be spirited as the competition is to decide which of the men are to make the trip.

C. E. SMOKER TONIGHT

"Pa" Coburn To Be Speaker of the Evening.

The Union is to be the scene of another Civil Engineering smoker tonight at eight o'clock. "Pa" Coburn in his "Rambles with a Dam Builder," will tell of some of his experiences incident to his connection with the Ambursen Construction Company. Novel refreshments, free cigarettes and tobacco, and still other additional attractions are the special drawing cards of the meeting.

MILITARY HOP TONIGHT IN HORTICULTURAL HALL

Extensive Preparations Have Been Made for the Occasion by Committee.

Tonight will usher in the annual Military Hop of the M. I. T. Cadet Corps which is a prominent feature of the year's activities. The arrangements have been under the supervision of Col. L. F. Hamilton who heads the committee. The order of dances which includes twenty selections contains the latest popular music that could be had. Refreshments are to be served during intermission. Flowers will not be allowed, as is the usual custom at this dance. Commissioned officers are to report in full dress at 7.25 to help in the receiving line. Non-commissioned officers and privates are expected to appear in uniform with side arms.

Mrs. Maclaurin, Mrs. Edw. T. Cole and Mrs. E. F. Miller are to be the matrons for the occasion. Horticultural Hall has been very artistically decorated for the event by the committee in charge. The main part of the decorations consist of Tech banners and streamers. Several officers of other military organizations in Boston, Wakefield, Stoneham, Brockton and Salem are to be present as guests and will appear in full uniform.

BOAT CLUB OFFICERS MEET

Plans for Spring Discussed—Many Crew Men Back in Institute.

The officers of the boat club including MacRae, chairman; Bousquet, Lucas and Wellington met in the Tech Show office last night shortly after five o'clock. Berkowitz of last year's freshman crew was also present. The alumni have presented in the vicinity of \$200, so that the crews expect to do something this year. The Union Boat Club was voted more favorable than the B. A. A. Boat Club which was used last year, because the rates are more reasonable, and because of its proximity to the Institute. The officers also voted to buy two four-oared shells, a few oar-locks of which will have to be refurbished. The Institute also possesses an eight-oar shell.

Last year's Junior crew are back consisting of Gear, bow; Sweet, 2; Affel, 3; Short, stroke; Karns, cox. The 1915 crew including Marion, bow; Mumphord, 2; Sifton, 3; Sabin, stroke; Anderson, cox, and the championship freshman crew of Bousquet, bow; Duff, 2; MacRae, 3; S. R. Berkowitz, stroke; Lucas, cox, are back for hard work.

Candidates for the freshman crew (Continued on Page Two.)

PROVIDENCE MEET ON SATURDAY NIGHT

Two Relay Teams Entered Again at Harvard—Many Entries for Other Events.

Saturday night at the Providence Armory meet Tech has entered two relay teams against Harvard. These relays are the 352 yard and 704 yard distances. The races between Harvard and Tech are to be the feature events of the program and will attract considerable attention as both teams are fast and should set a record breaking pace. Tech won her relay match in the B. A. A. meet against Dartmouth while Harvard also turned out a winning team the same night. With the two winning teams pitted against each other an exciting finish is looked for. Barron, who ran in the B. A. A. meet for Harvard is not to run Saturday night, giving Tech a better show to come out a winner. K. Dean, T. H. Guething, Fox, O'Hara, Loomis and Wilkins are entered in the short relay, while Benson, C. T. Guething, T. H. Guething, Fox, Brock, Dean and Donnelly will make up the longer relay unless some changes are made later.

Tech has entered a large number of men in the different events from the short and long distances to the field events. In the 50-yard dash Curtis, Day, Erb, Huff, O'Hara and Wilson are signed up. The 880-yard run has Brock, C. T. Guething, Loomis, Milliken, Nye, Peacock, and Peaslee entered. In the mile Cook and Nye will represent Tech. Curtis, Day and Huff have signified their intentions to enter the 50-yard high hurdles and should prove a strong trio. Several have entered in the high jump including Hall, Sullivan and Teeson.

The men who are running Saturday night will leave Back Bay station at 3.29 in the afternoon and will probably return on the 10.20 or 11.20 from Providence. The meet is to be held at the Providence Armory on Crans ton street, at 7.15 p. m.

FRIDAY, FEBRUARY 20, 1914.

IN CHARGE OF THIS ISSUE.

Editor, H. P. Gray, '16.
Assistant, A. D. Nute, '17.

With the mid-year exams now tucked safely away in the past we note with wonderment the growing number of men whose time is so nearly all monopolized in the pursuing of card games in the Union. The same faces every day—occasionally a new one is welcomed and becomes part and parcel of the "crowd." Surely here is wasted time. Dr. O. P. Gifford once told an audience of Tech men, in his inimitable way, that: "Time is one thing that no one can get a monopoly in—that no one can 'corner' and of which everyone has all that there is. Nobody has ever found a method of using time twice."

Activities are all in need of men. In exchange for services they give excellent business preparation—every one of them. Come out for the activities. You will be the better for it. Form new friendships, real friendships that will last a lifetime. And at the same time help the Institute.

THE TECH recently issued a call for new men that received but meager response. Tech Show—according to all published reports—has the smallest number of candidates in several years. These are the two largest activities. Fellows, come out. Make your Tech Spirit tell. Broaden yourself. Don't waste time.

ELECTORAL COMMITTEE

The meeting of the Technique Electoral Committee will be held today at 4.30 in 27 Rogers. Owing to a mistake the time and place were announced wrongly in yesterday's issue.

TALK ON "THE STATE CARE OF INEBRIATES"

President of St. Vincent de Paul Society Speaks at Catholic Club Dinner.

About sixty members of the Catholic Club attended the dinner at the Union Wednesday evening. The speaker of the occasion was Dr. John A. Horgan, president of the St. Vincent de Paul Society and now connected with the Foxboro State Hospital.

Dr. Horgan's subject was "The State Care of inebriates," the treatment and care of habitual drunkards being the field of his particular investigation and work. The speaker cited a number of cases showing the effect of an over-indulgence of alcoholic stimulants upon the human brain and body, and described the methods employed to overcome these effects and to restore the inebriate to normal health.

A man's mental powers, declared the speaker, as measured by the quickness of his perceptive faculties, decrease in proportion to the degree of drunkenness. He also emphasized the danger of beginning by moderate drinking, describing further the attendant symptoms which proclaim the habitual drinker.

The treatment of inebriates taken to the Foxboro institution does not depend upon the reaction of drugs. In fact, Dr. Horgan said that no medicine was used at all in these cases. The remedial efforts are all aimed towards keeping the subject away from the taste of alcohol and improving his general physical condition. In this connection, the speaker said that the State had purchased a farm to facilitate this method of treatment, to which the Foxboro inmates will be moved.

Dr. Horgan closed his talk with a few suggestions to his listeners for helping any unfortunate who in the future might come to their notice.

At a short business session of the club a committee was appointed, consisting of McGuire, Quigley and Caffrey, for the purpose of investigating the housing of the Catholic Club in new quarters when the Institute moves to its new site.

E. E. SOCIETY TRIP

Members To Inspect New Boylston Street Subway Tomorrow.

Tomorrow at two o'clock the members of the E. E. Society who have signed up will leave the Library in Lowell for an inspection trip of the new Boylston Street Subway, now in the process of construction. Through the courtesy of Mr. Hugh Nawn, the contractor, the men will be enabled to get a glimpse of the inner workings of the great enterprise, and it is expected that the practical value of the ideas gained during the expedition will prove of material value to them. Mr. Nawn has arranged to have one of the officials of the company to conduct the party.

Seniors at the University of Miami have adopted the wearing of white gloves as their distinctive dress.

GLEE CLUB REHEARSAL

There will be a Glee Club rehearsal this afternoon at five in the Union. As the concert at Holliston comes next Friday evening it is, therefore, important that everyone come, as there will be but two more rehearsals. There will be no Mandolin Club rehearsal Monday; the next rehearsal will be held Thursday.

1917 EXECUTIVE COM.

The picture of the Freshman Executive Committee will be taken at Notman's today at 1.15.

According to the latest reports,

Prof. Korn, who is the inventor of the photo telegraph system, states that progress on his invention has progressed to such a degree that next year he believes he will be able to transmit photographs across the ocean by cable. He hopes to be able to send them from Europe to New York and from thence to the Panama-Pacific Exposition at San Francisco.

BOAT CLUB OFFICERS MEET.

(Continued from Page One.)

will probably be called about the first of April. The class of 1917 has a promising bunch of men, and a large number of fellows are expected to report for business as soon as the call is issued.

ENGINEERING AND SCIENTIFIC NOTES

Our readers are doubtless somewhat familiar with the methods of motion picture projection by which a series of pictures is flashed upon the screen at a rapidity of sixteen per second. About 75 percent of the time the screen is actually illuminated and during the remaining 25 percent it is darkened by a shutter which comes in the path of the projecting ray while the picture is being changed. Owing to a physiological phenomenon known as persistence of vision, the mental impression of the image upon the retina of the eye persists long enough to produce an apparent continuous motion if the pictures are "run" at this rate.

The sense of vision is, of course, considerably strained in viewing these pictures, much as the auditory nerves are strained in listening to the imperfect speech heard in a telephone receiver, and the eyes soon become tired by the blinking effect caused by the revolving shutter. Furthermore, the films, which are made of celluloid, are usually just on the point of ignition with even the instantaneous exposure in the intense light and heat which must be maintained in order to produce a sufficiently clear image upon the distant screen. Thus there is a considerable risk of fire and extreme precautions have to be taken in moving picture houses.

The Scientific American for Feb. 14, 1914, describes a new form of "movie" machine, called a vanoscope, which the inventors claim will do away with many of the objections to the old machines. There is no revolving shutter, no troublesome blinking. A continuous visual image is given from a steadily moving film by an apparatus which causes one image to dissolve into the next. This effect is produced by an arrangement of revolving mirrors by means of which the projecting beam of light is focused on the film in such a manner that during the period of transition of one picture into the next, both of them are illuminated by one half of the total illumination, which total always remains constant.

With this machine the pictures may be taken at longer intervals and need to be run at only about eight per second, thus enabling a "1000-foot play" to be run on a 500-foot reel. This process is not so dependent upon the persistence of vision and consequently it is not necessary to run the reels so rapidly, thus making the motion picture more valuable in a critical study of such motions as running, jumping, etc. The dissolving images make the pictures "stand out" with a remarkable life-like perspective. Because a weaker projecting ray may be used the reel may be run slow at will and the risk of fire is reduced. One of the most important improvements claimed for this machine is the substitution of a steady for an intermittent motion of the film and the consequent elimination of a somewhat jerky, indistinct image and noise of operation.

The University of Pittsburgh is offering a course in Esperanto this year.

BURSAR H. S. FORD SPEAKS FOR T. C. A.
(Continued from Page One)

stitute. He had spent several years in the vicinity of the Institute, and had come into considerable contact with Tech students. He told several interesting anecdotes and incidents of his experiences with Tech students. This influence, he said, had made him feel as though he were a part of the school, but his chief regret was that he could not say that he actually was.

Mr. Ford paid a tribute to the late Mr. Rand, saying that the finest legacy that his predecessor left was the good will and the esteem in the hearts of all Tech men, and all whom he came in contact with.

The keynote of modern life, said the Bursar, is "Service," and serving one another. Tech men at the Institute are here for knowledge, they are seeking knowledge, and the light of ideals. They are doing this only as a means to an end, a means to fit them for life-work, for service. Self-service, superior service, the Bursar thought, to be the foundation of the Institute.

Tech men should not forget that on leaving the Institute, that there is a higher type of service. Such service was that kind which, when raised to the nth power, made a Washington, or a Lincoln. Not self-service now, but service to the community, and to fellow-man. A glimpse through the register of Tech graduates, said the Bursar, will show the kind of service that Tech men are doing; it is distinctly the higher type of service. Mr. Ford, in closing, said that he hoped that the students considered and made use of the T. C. A. as a means for carrying on that higher type of service.

Dr. O. P. Gifford, of Brookline, who has spoken at T. C. A. meetings previously, will be the speaker next Thursday.

SHOW REHEARSAL

At the Tech Show cast rehearsal yesterday afternoon both acts of "A Royal Johnnie" were read through. There will be another rehearsal this afternoon at four, and each afternoon at the same time until the show is given. The names of those who were kept for the chorus will be published in "THE TECH" next week. The first chorus rehearsal will be held Tuesday afternoon at four o'clock, in the Union.

**TECH AND WILLIAMS TO
PLAY HOCKEY GAME**

Teams Will Play at Williams-town Saturday—Odds Are in Tech's Favor.

The Tech Hockey Team will play Williams at Williamstown on Saturday afternoon at three o'clock. Although the Williams team has not played many games this year, it has the earmarks of being a strong seven. This is shown by its defeating Rensselaer Polytechnic Institute by a score of 8 to 0 and by holding the strong Yale team to a 6 to 1 game.

Owing to the fact that Captain Rogers of the Williams team will be unable to play the team will be somewhat weakened. Cole will however take his place at goal. From the form that Tech has been displaying lately in practice the game will undoubtedly be closely contested with the odds in Tech's favor.

The following men have been chosen to take the trip and will meet Manager McRea in the Union at 8.45 Saturday morning: Sawyer, Winton, Fletcher, Cochran, Eichorn, Lowengard, Ross and Captain MacLeod.

BUY-A-TICKET
(Continued from Page One)

"Yale Record" so delights in depicting. He is also the kind which makes him a wonderful match for Mrs. Cooper-Cooper's daughter. To miss seeing him on the stage as he will be given by another Tech Show man would be to miss a feature which any man would be sure to regret the rest of his life.

And then there is the Tech man, tall, strong, with no care for society, but a great longing for the hand of the fair daughter. Hence there enter complications. But to discuss this playlet further would be to tell too much. Rather let this much information serve to whet the appetite for a further knowledge of the denouement which is to come with "Yishka-bibble."

Besides this act there will be three others. Space forbids that more than one other can be mentioned in this issue, but watch the TECH for more. The one that can be mentioned is a musical concoction which has already had the approval of the crowned heads of Europe and which was secured for this entertainment only through the most strenuous efforts on the part of a well known New York producer.

In the first place its opening is novel. Let this be sufficient information on this point—it is one of the most spectacular beginnings that was ever devised for a musical combination. And then the music. To attempt to describe its wonderful harmony, the beauty and sweetness of its remarkable tones, and the perfect technique with which it will be rendered were sacrilege. Symphony Hall has never heard such sounds and there is no artist in the Metropolitan Opera House able to compare with those two who are to compose this part of the program. But description were in vain. Rather let no one fail to come and hear this remarkable treat.

Remember the tickets that are to be put on sale this Saturday, and do not fail to watch this space tomorrow morning for a sensational announcement that will exceed in its astounding proportions anything that has yet been said concerning "Yishka-bibble."

SENIOR PORTFOLIO

Feb. 28 has been set by the committee as the last day when Seniors can sign up for their sittings with the photographer. After that date it will be impossible to get any appointments with him. At the present times about three-fourths of the class have signed up and about one-half
