The time before the production of "Yish-ka-bible" in Huntington Hall on Saturday of this week is growing short. Hundreds of tickets have been sold and it only remains now to sell the few that still remain in order that the place may be packed to the very doors when the first curtain goes up. This may be accomplished means upon all of you students that have not yet bought tickets should do so at once.

The men are now with tickets for sale report that things are going splendidly and that it is assured that the performance will be a financial success and will doubtless net a tidy sum for the benefit of athletics. Still the more money that is collected the better the condition that the Athletic Association will be in. Also it is equally true that now the expenses of the affair have been covered every additional ticket that is sold will go to swell the profits by the face value of that ticket.

The dance that is to follow the performance in the Union is sure to be the greatest affair of its kind that the Institute has ever known. When the project was first mentioned it was expected that the event would pass without any result, but the great success that has attended it is a very encouraging omen for the future. A sum of money will be raised that will be very glad to hear from any who are interested in the sport.

The student body is interested in the sport.

E. E. Trip Called off

The E. E. Society will not take the trip to the General Electric Company Lamp Works at East Boston Friday, March 8th, nor extend for, since no visitors can be received this week. A trip to the Lamp Works will be made later in the term. Announcement will be made if permission is later received from some other company for an excursion Friday afternoon. Further announcement will be made in THE TECH.
THE TECH, BOSTON, MASS., TUESDAY, MARCH 5, 1914.

THE TECH

Entered as second-class matter, Sept. 19, 1913, at the post office at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily except Saturday. Designed exclusively for the students of the Massachusetts Institute of Technology, the Tech is the official organ of the Institute. It is published by the Institute News Publishing Company, Inc., of Boston, Mass.

OFFICERS CLUB

"Extended Order" Subject of Major Cole's Talk This Evening.

This evening the Officers Club of the M. I. T. Cadet Corps will hold its first open meeting in the Union at 7.30. Major Cole will be the speaker and will talk on "Extended Order." In his talk the Major will cover the skirmish work as it will be taken up in the near future by the Regiment in drill. He will probably stress points on practical combat principles also. What he will have to say will be of much value to all the officers, commissioned and non-commissioned alike, and the officers of the Club hopes that a large number will be present so as to learn just what is expected of them when the Extended Order formations are taken up. There will be an opportunity to ask questions about any point in drill which is not clearly understood. The meeting is open to all, and any who are interested in military work are invited to attend.

Major Hamilton will make a report on the annual results of the Military Hop held Feb. 28th.

RELAY PICTURES

Today at quarter past one the pictures of the Varsity one- and two-mile races of yesterday will be taken at Notman's, No. 3 Park street. On the one-mile team are the following: C. P. O'Hara '17, K. Dean '16, C. P. Fox '14, T. H. Guething '14. The two-mile team comprises: C. E. Fox '14, H. S. Ben- ton '14, C. T. Goeaing '14, T. H. Guething '14. These men are asked to be present at 1.30 sharp as it is necessary that they be on time for the pictures.

JUNIOR PICTURE

The Junior Class picture which was taken on Rogers Steps is now on sale. Those desiring one of these pictures should give their names to G. T. Roo- ney, C. W. Fry, or M. L. Foster. A deposit of fifty cents must be made when the order for the picture is given. The cost of the picture is $1.50, and a sample copy may be seen at the Cash.

TECH RIFLE TEAM

Holds Eighth Place in Present Intercollegiate Matches.

Reports from Washington show that after the fifth week's matches of the Intercollegiate Gallery Shooting League, Tech is occupying eighth place in Class A with a record of two wins and three losses, which is comprised very good, as Tech has not had the benefit of professional coaching as have the other teams of the league. Michigan Agricultural College leads the class with a record of five straight victories. The Massachusetts Aggies come second.

"There, look it over!"

That's just what we said one day to you about Fatima Cigarettes. You did, and that was the start of Fatimas—to day the biggest selling cigarette in this country. No other cigarette has ever held the sway in college life, nor given the satisfaction that Fatimas have. Always in a plain package—no expense wasted on triumphant-quality ad in the cigarettes—purer and best tobacco.

"ROPE DRIVING"

M. E. Society To Hear C. B. Saw-er on Rope Transmission.

There will be a talk on "Rope Driv-ing" given before the Mechanical En-1ggineering Society on Wednesday at 4:00 o'clock in 11 Engineering B. Mr. C. B. Sawyer, of the Dodge Manu-facturing Co., will be the speaker. The Dodge Manufacturing Co. make all kinds of rope transmissions and allied machinery. Mr. Dodge will illustrate his talk with lantern slides and dem-"ostrate the English and American systems of roll back and forth. This charac-teristic features of both systems will be pointed out.

As this subject is of great impor-tance to Engineer, especially Mechani-cal Engineers, the Society is expect-ing a large audience.

"YISH-KA-BIBBLE"

(Continued from Page One.)

remembered that it was found neces-sary to obtain additional room in which to hold the dance. Followed this came the starting announce-ment that both the upstairs and downstairs parts of the Union would be filled up with a separate echocana for the two places would be opened up for dan-cing. And the extra tickets that have been issued have been selling as rapidly as the original three hun-dred.

It is hoped that a total of five hun-dred of these 75c blue tickets ad-mitting to both the Vanderlyle and the Union will be filled up practically an assured fact. If this total can be sold a large dance with just about the right sized crowd to fill the two places comfortably is cer-tain. There is absolutely no reason why this goal should not be attained, with 1700 men in the Institute it only takes 250 of these to each buy two tickets to sell the five hundred. Not only should this number of blue tickets be assured but likewise from the 1550 students left it should not be difficult for the other five hundred to fill Huntington Hall to its capacity of 1000.

The Society notice also says:

"There will be an important busi-ness meeting of the Board of Di-strict Officers on Friday afternoon, March 4th, at 5.15 sharp in Room 27 Rogers. The (upper) Tech Office will be open on this day for the business of the District Officers."

The Junior Prom prize waltz com-petition is to be held on Wednesday at 4:15, in the Union. An increase has been made in the number of men to be kept and the following are requested to be present: Baker, Hulburd, Couch, Han-ders, Smith, Lauer, Bid-ley, Hulburd, Hall, Shufla, Gillespie, Holy, Lowe, Duff, Cooper, Hardwick, King.

There is to be a rehearsal of the chorus this afternoon at 3:05 in the Union. An increase has been made in the number of men to be kept and the following are requested to be present: Baker, Hulburd, Couch, Han-ders, Smith, Lauer, Bid-ley, Hulburd, Hall, Shufla, Gillespie, Holy, Lowe, Duff, Cooper, Hardwick, King.

The time of the Smoker Rehearsal of the Musical Clubs has been changed from 7:00 o'clock Wed-nesday evening, March 7.

DANCING TRIALS HELD FOR SHOW

Over Twenty-Five Men Out—Increased Number for Chorus.

The Tech Show dancing trials yester-day afternoon attracted over twen-ty. Each man danced a waltz with Mrs. Adams, the dancing instructor for this year's Show, who selected those who are to be given further trial. These then distorred themselves in vain attempts to imi-tate correctly some of Mrs. Adams' arm movements. After a short prac-tise she told them to practice at least ten minutes a day and to be on hand Wednesday at quarter past four. The following men are retain-ed: Ford, Couch, Hummer, White-brow, Bidwell, Hall, Shufla, Gillespie, Holy, Lowe, Duff, Cooper, Hardwick, King.

There is to be a rehearsal of the chorus this afternoon at 4:15, in the Union. An increase has been made in the number of men to be kept and the following are requested to be present: Baker, Hulburd, Couch, Han-ders, Smith, Lauer, Bid-ley, Hulburd, Hall, Shufla, Gillespie, Holy, Lowe, Duff, Cooper, Hardwick, King.

FRESHMEN MEET SOPHOMORES TONIGHT

Odds Are In Favor of Freshmen—Guething Will Be Unable To Run.

The annual Freshman-Sophomore meet that comes tonight will be full of surprises for all. The quality of many of the stars is known and these can be depended upon to take the first places in the various events. The results in the second and third places will probably be the deciding factors in the contest. The Fresh-"men will probably get firsts in the short, jump, hurdles and dash. The 440, 880, mile and pole vault are in the favor of the Sophomores.

Loomis and Day will be the chief contenders behind O'Flara in the dash. A large number have entered in the event and several heats will be run off with semi-finals and finals. O'Flara, who competed in the New England Championships and ran last night in New York is practically as-sured first place.

The 440 will undoubtedly be the feature event of the evening. Reed and Lewis will be well in the front in his class with Dean as the probable win-ner. Zeb and Williams are among the best of the Freshmen entered, and if O'Flara runs this also, the three will prove a rather formidable trio.

The Sophomores will be heavily handicapped by the loss of Guething in the half and mile. Dean and Grafton will switch over to the half to cover up this loss of Guething, who would undoubtedly take an easy first. They will oppose either Donnelly or Brock in this event, and should put up a good fight for the majority of places.

The mile seems to be all Donnelly with Donnelly or Brock as second man. Others entered in this event are Grafton, Hulburd, and Gray of the Sophomores, and Haviland and Parker of the Freshmen.

The other events excepting the pole vault will be strongly in favor of the Freshmen and should win them the meet. Sullivan in the shot and Day in the hurdles are also ex-pected to win their events.

TECHNIQUE ELEC. COMM.

There will be a meeting of the TECHNIQUE ELEC. COMM. on Tuesday at five o'clock in Room 5, Eng. C.

President Maclarin

(Continued from Page One)

... offering institutions. The movement thus initiated will not only increase economy and efficiency, but it will improve the spirit of educational work everywhere and thus it everywhere be felt to have a profound effect on education for generations to come. The other great result emphasized by Mr. Vail was the possibility that will be afforded of building up an institution of unparalleled power for serving the country in the field of applied science—i.e., the head of a great enterprise, Mr. Vail is well-placed to appreciate the importance of such a school, realizing, as does the more and more intelligent, that the industry must join hands with science, and advances must come from men of trained intelligence.

"I need not take up much of your time," said the president, "in explaining what the agreement is. A complete accurate copy of the agreement was printed in THE TECH of January 13th. The main feature of the agreement is that in the future Harvard's work in engineering will be carried on in the buildings of Technology, under the executive control of the President of Technology. The laying out of courses and the giving of instruction will be entrusted to the Faculty of Technology,—not to the Faculty as a whole, but to the Faculty of Technology, not to the Faculty of Technology at all, but to the Executive Committee of that Faculty, and whose appointment Harvard has had under the executive control of the President of Technology, and that both institutions will bear their part in educating the youth of America in all the different branches of engineering, under the executive control of Technology. The movement thus initiated will not only increase economy and efficiency, but it will improve the spirit of educational work everywhere and thus it everywhere be felt to have a profound effect on education for generations to come.
