

**LE MONNIER'S EXHIBIT ATTRACTIONS ATTEND**

The general exhibition of all the drawings of Professor Albert Le Monnier recently acquired by the Institute for its department of Architectural Engineering, shows him beyond the fortunate find that he was at first believed. In the half dozen pieces which have been through the hands of the artist, the idealist who stays on earth, which augurs well for his students. His drawings, which will remain for some time in the exhibition room on the fourth floor of Pierce Building, are a revelation and an inspiration. The gestations are almost entirely monocrome, so that one may detect a spiritual air of French tradition in them. This is markedly so in the drawing of a corner of a room - the feature of an extreme richness and unexamined splendor is given by well disposed masses and beautifully chosen values.

One feature of his work which makes a universal appeal is the fact that it is all original.

**ARCH. SOCIETY MEETING**

R. D. Emerson Speaks In 22 Pierce—Next Meeting Open To All.

This afternoon at 4 o'clock the Architectural Engineering Society will hold its meeting in Room 22 Pierce Building. Mr. R. D. Emerson, Engineer for Coddin and Desprez, the local engineering firm, will speak on the topic of "The Relation of Architecture to Engineering" and will talk from the viewpoint of the engineer.

The next meeting of the society will be open to all students. The society is in good standing and is interested in Architecture and will be well attended. A discussion on "Flat Slabs" will be led by two engineers, a double number of other engineers will be present to carry it on. The date of the next meeting is subject to the middle of next month.

**TECH TO MEET YALE AT NEW HAVEN**

Wrestling Team Will Have Hard Task Winning—A Fine Match Is Expected.

Next Saturday the Wrestling Team meets Yale at New Haven. There are seven bouts arranged for the meet, one in each class. An extra class, the light-heavyweight, is also agreed upon, although the Tech men have not had any matches at this weight before.

The Yale team has a fine reputation and will prove the hardest test which the Institute team has yet undertaken. Recently Yale beat Pennsylvania, and has garnered a good record in the Intercollegiate League to which it belongs. On the other hand, the Tech wrestlers have not met defeat in two years in spite of the fact that they have met all the strong teams in the country, and now hold the New England Team Championship. Last week Lou, the 115-pound wrestler, sprained his ankle and his match was at first feared that he would be unable to go to Yale. Now, however, he is coming along well and should fill his position in fine style. The other members of the team are in first rate condition and both Captain Kelly and Manager Smythe-Martin are confident of victory.

**INSTITUTE COMMITTEE MEETING**

Important Meeting Thursday—Committee Report.

There will be a meeting of the Institute Committees Thursday in Room 8, Engineering C. The time of the meeting is 5 p.m., instead of at 4.30 as usual. There will be reports from the Yish-Ka-Ellele Committee and also one from the Committee in charge of the sale of the 1916 Techniques. The standing committees will make their reports.

**ANNUAL T. C. A. ELECTION**

On March 20th the Technology Club Association will hold its annual election for officers for the ensuing year. Nominations are due now and should be signed by at least five members of the association. The nominees must be members of the T. C. A. and the election will be held in the Cage in the Union at the T. C. A. office in Fling. B. not later than Tuesday, March 17th.

It takes $55 to train the average athlete for the football team at Ohio State.

**GABY DESLYS CANNOT SUBSCRIBE TO MONTHLY**

Actress Left Boston Sunday But New Monthly Will Be Issued Tomorrow.

Two thousand copies of the first issue of the new Monthly Technology will be delivered to the office of THE TECH late tonight and the entire edition will be sold early Wednesday morning. The first issue is being mailed to subscribers, and the subscriber is requested to return the form with the number of copies he desires. The next issue will be mailed March 20th. A great deal of talk is abroad in the Institute to the effect that the editors will be sold out before non-subscribers secure their copies. The same fear was expressed by the Managing Editor today. Since this cannot be helped, he suggests that the students place their subscriptions at once and thereby safeguard themselves against the possibility of missing this first issue. As an indication of the way the subscriptions are selling a few characteristic cases are cited. Several orders for twenty copies to be sent to one address in other cities have been received. At the rate subscriptions are being received, it is more than probable that the paid subscription list will nearly equal the issue, and any before the case the regular subscribers will be given the preference. Any copies left over after the subscribers are provided for will be sold at the regular price, twenty-five cents each.

The first issue contained much of general interest to Tech Men. The

**WEATHER**

For Boston and vicinity: Fair to-day; moderate westerly winds.

In charge of this issue: Editors, Vol. XXXIII.

**TECHNICIQUE COMMITTEE**

There will be a meeting of all candidates for the position of Art Editor and of Assistant Art Editors for the 1916 Techniques at the Tech Show office at 4:31 Thursday afternoon. The chairman of the Art Committee will preside and the candidates for the positions.

Indiana has arranged a basketball series for the championship of the state. Seventy-five high school teams are expected to compete.

**TECH SHOW COMPETITION ENDS TODAY**

Measurements for All Wigs and Costumes To Be Taken.

This afternoon the list of those who are to take part in this year's Tech Show will be complete. A final trial for members of the chorus is to start at 4:31, when eight show girls and nine men will be picked from among those who have already succeeded in passing their voice trials. This includes those who were out for the cast before the final choices were made, as well as those whose names were included in the chorus list published in THE TECH recently.

All members of cast, chorus or ballet must report this afternoon, as they are to be measured for their wigs. Those who have not already been measured for costumes will have the measurements taken today.

**SOPHOMORE BASEBALL**

Team Has Promising Schedule—Interclass Games Included.

The 1916 baseball team will have a pretty interesting season this year, according to the schedule. On the 7th of April they play the Juniors at Tech Field, then the freshmen at the same place on the 17th. On the 23rd the men will be up against Dorchester High in Dorchester. The final game with the Juniors will be played on the 25th, followed by a trip to Doctor in the 29th to play Powder Point.

The next three names will take place at the Tech Field; on the 1st of May with the Boston Latin on the 9th. The game with Wellesley High will be played in that town on the 16th, and with Lowell Tech in Lowell on the 19th. After the last contest with the freshmen on the 21st at the usual place, the season will be closed on the 3rd of June at Ashburnam, where the team will play Cushing.

Indiana has arranged a basketball series for the championship of the state. Seventy-five high school teams are expected to compete.
The block signal system now commonly adopted in combination with track contacts has done wonders in reducing the risk of accidents. The result may be a collision with loss of life. It will therefore be seen how desirable it is that each train should have its own means of creating about it a certainty zone quite independently of the fixed track and block signals, these zones to be communicable to other trains directly, in this fashion producing a safety system within a safety system and can that would be immediately available at every point along the line. Wireless telegraphy promises to do the needed work.

A single line of wire arranged like a rectangle is strung from four low stations placed at each corner of the car roads, actually below the crest of the road. By doing this, giving a total length of aerials of something like 550 feet, an arrangement has been reached, all wireless networks admirably and incidentally subscribes to the physical limitations of light thrown up by structures along the road. But while this placing of the wires sufficed when running over open country, there was still a doubt about what would happen when the train skirted along winding rivers with mountains looming in the view and seemingly offering an obstacle to the sending and the receiving of wireless impulses. It is along parts of the road of this character that the wireless telegraph would be of the greatest service, because the sinuous paths of the track make it impossible for the towerman to see trains for more than a short distance, and block signals worked by track contacts are similar to towers of fairytales in the route.

The messages leaving the moving train, however, are unquestionably capable to get past intervening mountains and to climb from the meandering valleys and find their way to the antennae of the towers at Saratoga and Binghamton.

It was only a few years ago that we first started to sell Fatimas. We first offered them in the college towns. The purity and choice quality of the tobacco was instantly appreciated by the students—now Fatimas hold the record for the greatest punt in cigarette history—the biggest sale of any brand in the United States today! No expense wasted on the package—quality ad in the tobacco Twenty good ones! $0.20 per pack. Distinctively Individual.
