TECHNOLOGY MONTHLY MAKES ITS FIRST APPEARANCE TODAY

Marks A New Era At The Institute: Enters [The Field Of Collegiate Literary Monthly Magazines

One of the biggest undertakings ever completed at the Institute is realized today in the appearance of The Technology Monthly. It brings to every student in the Institute a peculiar personal appeal. It unites the man of each course with those of the other departments; it cements together the energies of men of every class. The Technology Monthly is the foremost integrating agency of the undergraduates. It marks the actual transition into the spirit of New Technology.

Not only does the new publication express that phase of undergraduate interest not previously exploited at the Institute, but it stands in the collegiate world as Technology's literary representative. It fills a long-felt need for an exponent of the more carefully prepared discussions of the student speakers at the next meeting.

Ever since the announcement of the new enterprise was made last month, the students as well as the faculty and the alumni have been waiting for the appearance of the Monthly.

Today their expectations are realized. The Monthly is at hand. It contains articles by men connected with undergraduate as well as graduate and faculty departments of the Institute.

Much general information has been disseminated at various times concerning the work at the new site; but in this issue of the Monthly the architect's local representative presents the concise details of the construction and the specific organization under which the new buildings are being erected. To illustrate this discussion two photographic reproductions have been obtained by the staff photographer. Much difficulty was experienced in obtaining these pictures because of the secrecy maintained at the ground. The photographer finally obtained permission of those in charge to climb to the top of the concrete construction tower and later obtained a picture from the parapet of Riverbank Court, the apartment building on the Esplanade.

One of the features of the magazine is a supplement insert page which may be framed. The drawing was made by one of the professional artists for a Western publication. The list of articles contained in the first issue has been announced by posters and in the columns of the daily press.

Circulation Manager, Homer Hopkins, outlines the distribution plan for the New Monthly as follows: "The subscription rate is twenty-five cents per copy, $1.25 per year. Eight issues. Subscription cards may be obtained from the office, posted, and deposit it at the grounds. The protogress of the monthly will be mailed to his address free of charge."

FRESHMEN PROGRESSIVE
Will Hold Prom Same Night As Juniors.

An innovation was introduced at the Freshman Executive Committee meeting which was held this noon. It was officially decided to hold a Freshman Prom. This is to be held on the same night as the Junior Prom, and a committee consisting of D. E. Bell and Leonard was appointed to take charge of the details of the affair. Manager Stevens of the Baseball Team also presented a provisional baseball schedule for the coming season, which included some ten games. Details of this will be announced later.

CATHOLIC CLUB

The Catholic Club is expecting a big crowd at the next meeting which will be held in the Union tonight at 6 P.M. There will be the usual dinner, after which Dr. Thos. T. Huntington, Director of Hygiene in the Boston Public Schools, will deliver the address of the evening.

Manager Stevens of the Baseball Team also presented a provisional baseball schedule for the coming season, which included some ten games. Details of this will be announced later.

COLLEGE NEWS

Open warfare has been declared between the Pre-Shenon and Sopho-

nians of the University of Utah, in the shape of a shaving contest. Last

week the Pre-Shenon issued an edict that there would be a head shaving

bath in honor of the Sopho-

nia. The next day two Pre-Shenons appeared with no hair, and since then any lower

classman venturing to appear on the

campus alone, has been in danger of being captured and treated to a

"snow application."

Medical students at Michigan have been eating food containing sulphur in a

seal which the middleman is conducting to determine whether sulphur

will produce albumen in the hu-

man body.

Doctor Sato, a Japanese agricultu-

list, is delivering a series of lectures on his profession at the University of North Carolina.

Minnesota students became so ab-

sorbed in the new dances that they were ignorant of the fact that fire-

men were working to put out the flames and in the basement of the campus ar-

my, which threatened the building with destruction. When the fire was

discovered the orchestra leader was instructed to keep up the "rag" and

ever fifty persons continued dancing until the fire was extinguished.

When it was out and they were told of the danger which they had just passed, the custom ary

finding took place.

Three hundred eighty-eight men of the mid-year class had a total of sixteen hundred eighty-

seven absences during the first sem-

ster. These figures include the three

men who were ignorant of the fact that fire-

men were working to put out the flames and in the basement of the campus ar-

my, which threatened the building with destruction. When the fire was
discovered the orchestra leader was instructed to keep up the "rag" and

ever fifty persons continued dancing until the fire was extinguished.

When it was out and they were told of the danger which they had just passed, the custom ary

finding took place.

COMMUNICATION

Editor's note: We have received the following answer to the commu-

nication printed in yesterday's issue of THE TECH.

Dear Sir:

In reply to "A Student's" ques-

tion I would say that the M. I. T.

Forum is an organization open to students and especially Tech students

who wish to deal intelligently with whatever social and economic questions. We are not

particular about what our members think on these questions so long as

they think as we think. We feel that stu-

dents and especially Tech students are interested in such a way that their

interest will be stimulated and that they will be in some measure proof

against the flood of misinformation that pours from newspaper offices

and lecture platforms.

To clear up some apparent misun-

derstanding, I would add that the

officers of the club as well as its

members found under the "Tech" etc. and this may be table or diagram is readily turned to (the draughtsman's chief point).

Senior Portfolios Going Rapidly

Great Rush for Sign-Up Slips—Limited Number of Books Being Printed.

The sign-up slips for the 1914 Senior Portfolio have now been out for three days and the passionate longing that the Seniors have evinced to part with their money is surprising. One man who had been entrusted with a sign-up book Monday night came in to the Committee Tuesday morning with twenty dollars and with tears in his eyes begged for another book. In order that he might satisfy the demands of his friends, who, fearing that the number of books to be published would not be sufficient, were pleading with him to sign them up at once. This is the attitude with almost the entire class. Of course there are a few of those who, to revive an expression which probably only the Seniors have heard, are “theoretically dead,” but they are in the minority.

Only two hundred and twenty-five copies will be ordered by the Portfolio Committee, and so it seems only a question of doubt that the supply will be sufficient to meet the demands of the class. More copies may be printed, but those who delay in signing up will probably have to wait until after graduation to get their books.

The Committee has made final arrangements for placing the contract and Friday the final negotiations will be carried out. One of the members was interviewed by THE TECH concerning the new book and although he would not give any information as to the appearance of the book, the enthusiastic tone of his speech was striking. It was hinted that the book would be greatly different from all others. Portfolio, more beautiful to the eye. It was said before the demands to sign up are so great and so it be-hooves the men who want a book to sign up with one of the following men: Crowell, Duffield, Morse, Stone, Watts, Harrat, Calver, Dawson, Durante, Fox, Flaner, Gasney, Hines, Hiller, Morrill, Pessole, Salisbury, Treat, Tudor, Weel, J. M. White and Wilson.

Sophomore Meeting

There will be a meeting of the Sophomore Class this noon at one o'clock in Highlights Hall. The meeting is called for the purpose of adopting the new uniform class constitution.

Cosmopolitan Club

The tickets for the informal banquet of the Cosmopolitan Club to be held at the Hotel Westminster on Wednesday evening, March 14th, are now for sale by the banquet committee and at the Capo for $1.50. The tickets are to be sold only to members of the club. Any other students who wish to attend the banquet please communicate with J. Masferrer '14.

Further details will appear in this paper in the near future.

Pink! That's our recipe for taking the bite out of good tobacco leaf. We hang the leaf in the warehouse for two years—temperature and ventilation perfect—all harmfulness disappears. A mellowness prevails that gives superb flavor and a smoothness seldom found. This is the good old fashioned way of maturing good leaf—and Velvet is a startling example of tobacco goodness. Sometime when your pipe is running hot and the taste is flat—try Velvet. At all dealers.

work of the surveyor if necessary. As to the third point, the speaker made the statement that a good specification writer is a rarity and he added a list of engineers whose specifications he said were very bad.

In conclusion Mr. Emerson made the point that a heating or plumbing system. Such specifications are not a factor in the decision of the salesman, but they are often a factor in the decision of the buyer. He stated that the best way to specify a heating or plumbing system is to consult an engineer who is familiar with the latest developments in the field. This meeting will be the same as for Saturday: F. P. O'Hara, R. C. Erb. D. B. Bell in the dash; E. D. Sewell and G. P. Bel in the hurdles; J. J. Donnelly and M. C. Brock are both fast men in the 100 and 200 as well as D. C. Thompson in the 400.

The makeup of the team will be the same as for Saturday: F. P. O'Hara, R. C. Erb. D. B. Bell in the dash; E. D. Sewell and G. P. Bel in the hurdles; J. J. Donnelly, M. C. Brock, A. C. Litchfield in the 1000; D. C. Thompson, L. Williams and R. C. Erb in the 400; F. P. O'Hara, R. C. Erb and L. Williams in the 300; E. W. Curth, R. D. Sewell, G. R. Blevens in the shot-out; Capt. W. A. Sullivan, J. W. Doone, N. W. Gokey in the high-jump; E. D. Sewell, A. H. Knapp in the pole-vault. The relay team will be made up of L. Cady, H. Knapp, F. P. O'Hara, D. C. Thompson and R. C. Erb.

JUNIOR PICTURES

Those who want the Junior Class picture which was taken on Rogers Steps are requested to give their names to a member of the Picture Committee before next Saturday. A deposit of fifty cents must be made when the order is given. The Committee members are G. T. Rooney, C. W. Fay and M. L. Foster.

FRESHMEN VS. ANDOVER TRACK MEET TODAY

Dual Meet Postponed from Last Saturday To Be Held Today.

The meet between the Freshman Track Team and Andover, scheduled for last Saturday, will be run off this afternoon at 4 o'clock. The team will have for Andover on the 2.4 train from the North Station. The prospects of winning the meet are somewhat brighter than Saturday as Andover will be at full strength with the exception of J. H. Day in the hurdles. This will be a serious loss, however, as Day was our best man in his event.

F. P. O'Hara, the old B. A. sprinter, is practically assured of first place in the dash and 440 run. Capt. W. A. Sullivan, if in his true form, should win the high-jump, although he will have to jump in anders and may be handicapped by his as he is not accustomed to them. We are especially strong in the shot put with E. W. Curtis and B. D. Sewell sure point-winners. Sewell, our most versatile man, should also place in the hurdles and pole-vault. J. J. Donnelly and M. C. Brock are both fast men in the 100 and 200 as well as D. C. Thompson in the 400.

TRIP TO ARSENAL

The Watertown arsenal will be visited by the Mechanical Engineering Society Saturday afternoon, March 14th. Those who wish to go must hand in their names before one o'clock on Thursday as it is desired to know the exact number taking the trip. The Seabees will give their names to H. W. Treat, the Juniors to F. G. Purinton, and the Sopho- mores to either Treat or Purinton.

NAVAL ARCHITECTS

Professors H. A. Everett will address the Naval Architectural Society Friday afternoon, March 13th, at 4.00 P. M. on the subject of "The Relation of the Naval Architect to His Client." This meeting will be held in room 33 Eng. C.
