BOSTON, MASS., THURSDAY, MARCH 12, 1914.

PRICE TWO CENTS

## TECH BEATS ANDOVER IN CLOSE CONTEST

Track Meet Won by Four Points  
—O'Hara Defeated in 300  
Yard Dash.

The Freshman track team registered a win over the Phillips Andover team in a close fought contest. Considering that Day and Knapp were absent from the hurdles and the pole vault, respectively, the Freshmen did well to finish in the lead, although the meet was in no respect a walk-away. In fact the result was in doubt until the finish of the next to the last event,—the shot put. With the placing of Curtin and Sewall in second and third, respectively, enough points were assured to win the meet. All the running events were run off on an outdoor board track, 224 yards to the lap, while the field events were held in the gymnasium. The board track was slightly raised from the ground which gave a peculiar spring to the boards. For that reason most of the men did not like the track. Still, the times made in all distances were very good, which would make it a fast one.

O'Hara easily won the first event, the 50-yard dash, in 5 and 2-5 secs., with Prescott and Gould of Andover in the 2nd and 3rd places. Captain Rodman of Andover got 1st place in the high hurdles with 8 secs. Sewall would have taken 2nd if he had not knocked down all his hurdles in the finals. As it was, Dwight, Andover, got the place; Bell, 3rd. Both the dash and the hurdles were altogether match-races, there being room for only two lanes on the board track. The third event was the 1000-yard run, won in the good time of 2:26:4. Andover had the choice of position at the start so Donnelly was

(Continued to Page 2.)

## ARSENAL TRIP

A large number of the Mechanical Engineering Society have availed themselves of the privilege offered by Saturday's trip to see the U. S. Arsenal at Watertown. Any more members of the Society who wish to go must hand their names to Treat or Purinton before one o'clock today, as the size of the party must be known in advance. The trip will start from Rogers Building at 1.45 Saturday afternoon, March 14th.

## HOCKEY TEAM DINNER

The Hockey Team will hold its annual dinner tonight at six-thirty at the American House. Those men who were in the picture taken for Technique are eligible to attend the dinner.

## PORTFOLIO COMMITTEE DESIRES INFORMATION

Gives Names of Men Who Have  
Not Signified Definite  
Intentions.

Below is given a list of men regarding whom the Senior Portfolio Committee desires and must have information. They are the men who have not as yet given the Committee evidence of their intentions to participate in the Portfolio. Some of these men are at present taking the majority of their subjects with the Class of '14, and are therefore eligible to have their picture run in the Portfolio. Some, on the other hand, may not desire to have their pictures taken and published in the Senior book. The Committee hopes that all those men who have been with the Class of 14 for any length of time, or who entered with that class, will have their pictures taken and submit them to the Committee.

A representative of the Committee will be in the Union this noon and tomorrow noon in order that the men named below will have the opportunity to sign up, and to signify their intentions definitely, whether they wish to have their pictures taken or not. The Committee is hindered considerably in the quick dispatch of its work because it does not know just what these men intend to do regarding the Senior Portfolio.

(Continued on Page 4.)

## SOPHOMORES MEET.

Father of Late Classmate Made  
Honorary Member.

The Class of 1916 yesterday followed the example of the Juniors and adopted the uniform constitution drawn up by the Institute Committee. It bettered the attendance of the higher class, however, forty-one Sophomores being present.

The father of the late Harvey Dewson, who by his son's death has been brought into close feeling with the class, was at this meeting elected an honorary member of the class. This action was taken by the class at his request that he might come more closely in touch with his deceased son's classmates.

## COSMOPOLITAN CLUB

The Cosmopolitan Club banquet, which was announced in THE TECH last week as set for the twenty-fifth, has been indefinitely postponed. It was later deemed advisable to defer specifying a particular date until arrangements could be made with the Harvard Cosmopolitan Club for a joint affair. Further particulars will be published later.

## WORKING MODEL SHOWS AUTOMATIC WEIGHING

Self-Recording Scales Subject to  
Many and Varying Ap-  
plications.

With a working model in full operation and a lucid explanation of the principles involved, Mr. G. K. Hough spoke before the Mechanical Engineering Society yesterday on the subject of "Automatic Weighing and Automatic Weighing Machinery."

Mr. Hough is manager of the Boston branch of the Richardson Steel Company, which manufactures automatic scales of all descriptions and sizes, and spoke to his audience from the wide experience of his firm in this line.

The speaker took up his subject with a statement of the two systems used in weighing scales: the "even beam" scale and the "multiple beam" scale. The multiple beam scale is very inaccurate because the slightest jar is liable to change the length of one of its many levers, and for that reason, only scales made on the even beam principle are used in the Richardson products. The even beam scale has a single equal-arm beam, one end of which carries the load to be measured, the other sustaining the known weight. This is the principle used on all accurate scales for scientific work.

The scales made by the Richardson Steel Company will measure grain to one-thirtieth of one percent. However, the accuracy of an automatic weighing device depends very largely on the material to be weighed. A lumpy substance such as coal cannot be weighed with an accuracy of much better than one and a half percent. Sticky substances which do not flow readily also do not permit of very accurate weighing, although results good to one percent can be obtained.

(Continued on Page 3.)

## INSTITUTE COMMITTEE

Important Meeting at Five—  
Reports To Be Read.

The Institute Committee will hold an important meeting today at 5 p. m. instead of 4.30, the usual time. The meeting will be held in room 8, Engineering C. Reports will be read from the Yish-Ka-Bibble Committee, the Committee in charge of the sale of 1910 Techniques, and the standing committees.

## SHOW REHEARSALS

The Tech Show cast and chorus will rehearse together today for the first time. The rehearsal will start at 4.15, and will be on the second act only.

## DR. J. A. ROCKWELL TO SPEAK IN UNION

Subject of T. C. A. Talk This  
Noon Will Be "Some Health  
Suggestions."

Dr. J. Arnold Rockwell will speak in the Union this noon under the auspices of the Technology Christian Association. He makes his first appearance as a T. C. A. speaker, but not his first appearance before Tech students. Dr. Rockwell is well known to Tech men, and he has always taken an active interest in undergraduate activities, particularly in athletics.

Dr. Rockwell is the Medical Adviser at the Institute, having been appointed to that position at the opening of this school year. He will speak on "Some Health Suggestions." He has chosen a subject on which he is indeed well qualified to speak, and a subject which is of interest to everyone. For these reasons the T. C. A. is expecting a large crowd at the meeting this noon in the Union.

The Medical Adviser was one of the speakers at the big convocation held by the Walker Club immediately after the announcement of the New Technology plans. He told of the proposed facilities for athletics at the new Institute across the river.

## WEATHER

For Boston and Vicinity: Today  
fair; moderate northerly winds.

## CALENDAR

Thursday, March 12, 1914.

1.15—Show Board Picture. Sarony's.  
1.30—T. C. A., Dr. Rockwell, Union.  
4.15—Cast and Chorus Rehearsal.  
Union.  
4.30—Technique Art Editor Contest.  
Technique Office.  
5.00—Institute Committee Meeting.  
Room 8, Eng. C.  
5.00—Officers Boat Club. Union.  
6.30—Hockey Team Dinner. American House.

Friday, March 13, 1914.

1.00—Freshman Class Meeting.  
Huntington Hall.  
4.30—Naval Architectural Society.  
Room 32, Eng. C.  
4.30—Chemical Society. Room 22,  
Walker.  
5.00—Glee Club Rehearsal. Union.  
8.00—Senior Smoker. Union.

Saturday, March 14, 1914.

1.45—M. E. Society Trip to Water-  
town Arsenal. Meet at Rogers.  
8.00—Wrestling Meet with Yale at  
New Haven.

The official budget for Columbia calls for an expenditure of \$3,731,215 between the first of July, 1914, and a year hence.

# THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

THURSDAY, MARCH 12, 1914

## IN CHARGE OF THIS ISSUE.

Editors in charge: W. A. Houser, '15, and G. H. Stebbins, '17.  
Associates: D. H. Parker, '17, and M. C. Brock, '17.

The enthusiastic reception which has been accorded the Technology Monthly justifies the belief of its founders in the need for such a publication, as well as their confidence in the spirit and loyalty of Technology men. The success of this new adjunct to Institute life depended primarily upon its ability to secure buyers and subscribers, for without circulation that equally necessary item of support, advertising, is not forthcoming. Both these factors now seem practically assured, due to the loyal support of the students, and all that is now necessary for permanent success is a sufficient number of men to keep the thing going, particularly in the business department.

The reorganization which will be inevitable in the near future makes it particularly necessary to have a number of good men to take positions, and also renders the time most advantageous for them to come out. The calls recently issued in THE TECH have met with moderate response only, and men are still needed for both circulation and advertising. An inquiry at the office almost any afternoon will place the applicant in touch with the proper department.

The college show at St. Lawrence this year will be a presentation of "The Little Minister."

Two hundred fifty copies in nine minutes. How about it?

The varsity track men have been given a rest this week by Coach Kanaly. The men will start work for the outdoor season next Tuesday on the oval.

Eddie Germain, captain of last year's track team, was over to the gym yesterday doing a little track work. It is possible that Germain will run this summer in several of the meets around Greater Boston.

Bowers of Lowell will probably prove a hard man for the Freshmen to beat in their meet with Lowell on Saturday. Bowers won the 1000-yard run at the B. A. A. schoolboy games recently.

Harvard is somewhat crippled in the broad jump since Cable has left college. Captain Barron has asked the majority of his sprinters to report for the jump.

Carl Gram, a former M. I. T. track star, has been married recently.

The Missouri Valley colleges are to try a novel stunt this spring in having competitive track meets by telegraph. Personal competition will be lost and this will probably not result in any records being broken. The scheme is at least original and many advantages are claimed for it.

Varsity field events will not be in a very bad condition this spring. With several Freshmen steadily practicing there are also Doc Leslie, Charlie Fox, and a new man at the Institute, L. G. Miller, who is a good man with the hammer.

Some very fast times were recorded at the 1917-Andover track meet. "Buck" Donnelly and M. C. Brock put up a fine race in the 1000 and at the finish Donnelly led by only a couple of yards. 2 min. 26 4-5 seconds is faster than either has done before this season.

## NOTICE TO SENIORS

Have you paid your fourth year dues and is it so recorded on the bulletin board at the Union? If not, you are not eligible for the Class Day Committee, the election of which takes place next week. Attend to this at once, for the names to go on the ballots will be taken directly from this list.

No changes can be made after Friday noon.

Dues can be left at the Cage for C. H. Ober, Treas., or may be paid to any of the regular collectors.

H. W. TREAT, Chairman,  
WM. H. PRICE,  
GEO. A. BEACH,  
Election Committee.

America owes it to the college youth today that we are enthusiastic sportsmen!

A few years ago we evolved a high-quality cigarette—of purest and most choice tobacco, and every college man knows that the answer was a wonderful popularity. Today more Fatima Cigarettes are sold in the United States than any other cigarette!

Anything in America that is most worthy always wins!  
Plain package—quality all in the tobacco—twenty cigarettes!

## TECH BEATS ANDOVER IN CLOSE CONTEST

(Continued from Page 1.)

the only '17 man in the front rank. However, the Andover men made very slow starts, enabling Donnelly, '17, to take the lead, with Brock, '17, right behind him, and Allen, '17, in 4th place. Throughout the rest of the race there was no change in position, although Moorehead of Andover made a game attempt to pass Brock on the last lap.

The 300-yard dash was the feature event, producing a hair-raising finish. O'Hara, '17, took the lead at the start, with Prescott and Clarkson, Andover, forcing him to the limit. On the back stretch Prescott repeatedly tried to get the lead, but each time O'Hara fought him off. When it came to the home stretch, however, Prescott let out a wonderful burst of speed and slowly succeeded in nosing past into first place, with the time of 32 and 2-5 secs.

In the low hurdles Capt. Rodman, Andover, took first again, this time in 8 and 2-5 secs. Sewall, '17, and Bell, '17, placed 2nd and 3rd. The 600-yard run was the next on the program. The Andover men took the lead and set a terrific pace. Thompson, '17, and Williams, '17, hung on in 3rd and 4th places, running easily. On the last lap Thompson let out

and passed the field. Williams, fighting every inch of the way, just nosed out Swift, Andover, for 2nd place. The relay race was marred by the fall of the second Andover runner. However, it was apparent that Tech, '17, would have won, as a large space was opened up after the accident. In the high jump Capt. Sullivan, '17, was the only Freshman who jumped up to form. Capt. Rodman, Andover, got his third first place by winning the shot-put. He won 16 points altogether, getting third in the high jump in addition. Sewall, '17, tied for second in the pole vault.

Summary:

40-yd. high hurdles—Rodman, A.; Dwight, A.; Bell, '17: 8 secs. 50-yd. dash—O'Hara, '17; Prescott, A.; Gould, A.: 5 2-5 secs. 1000-yd. run—Donnelly, '17; Brock, '17; Moorehead, A.: 2:26:4. 300-yd. dash—Prescott, A.; O'Hara, '17; Clarkson, A.: 32 and 2-5 secs. 45 low hurdles—Rodman, A.; Sewall, '17; Bell, '17: 8 and 2-5 secs. 600-yd. run—Thompson, '17; Williams, '17; Swift, A.: 1:18:3. Relay—won by '17 (Erb, Cady, O'Hara, Donnelly): 1:40. High jump—Sullivan, '17; Hill, A.; Rodman, A.: 5 ft. 5 in. Shot-put—Rodman, A., 42 ft. 6 in.; Curtin, '17, 39 ft. 7 in.; Sewall, '17, 37 ft. 6 in. Pole vault—Sewall, '17, tied for second. Score: Andover, 41; Tech '17, 45.

## CATHOLIC CLUB HAS DINNER IN UNION

Dr. T. H. Harrington Gives Interesting Talk on Public Health.

A large number attended the dinner of the Catholic Club held last night at the Union. After the dinner Mr. L. F. Walsh, the president of the club, introduced Dr. Thomas H. Harrington, Director of Hygiene in the Boston Public Schools, as the speaker of the evening.

Dr. Harrington first spoke of the great opportunities for Catholic boys in scientific life. He said that there should be co-operation between religion and science as religion is the soul and backbone of science and a scientific education goes best with deep religious conviction. Again, when a man meets a problem in the scientific world if he goes back to his religion for a solution he will never be wrong. The speaker at this point gave several examples as illustrative of his point.

The great demand of modern civilization is for the efficient man; the man who can conserve; who can prevent as well as correct. The great striving of the age is for the prevention of waste of energy and resources. One by one each of the terrible diseases known to man have been conquered through careful study of their causes and methods of combating them. Real medicine is the study of preventing disease, not curing it.

In closing, Mr. Harrington gave a few hints on personal hygiene, saying that sunlight, fresh air and exercise are the best preventives of disease. Many people have the elements of disease in their systems but as long as they keep in a healthy condition the disease is dormant. Such a person, when greatly fatigued, is in danger from the incipient malady. By taking thought beforehand this can be avoided.

## FIRST ISSUE OF MONTHLY APPEARS

Publication Great Success—  
Fourth Shipment This Morning.

With less than half of the undergraduates supplied with copies of the New Technology Monthly, three shipments of complete copies have already been exhausted. The first shipment of two hundred and fifty copies arrived at the Institute about ten yesterday morning and was sold in exactly nine minutes. The second lot was received at two in the afternoon. These went at the same rate. The third shipment was received at 3.45 p. m., and was sold out before 6 p. m. The fourth shipment will arrive at the institute before eight o'clock this morning and the final one will be made during the day.

Tables have been established in the various Institute buildings at which copies may be obtained. THE TECH Office will be open most of the day, and anyone failing to secure a copy at the subscription tables can obtain one at the lower office. The edition is limited, and advance subscribers are being given first chance to secure copies.

Although the staff expected but little trouble in disposing of this first issue, such a tremendous welcome as the magazine has received was unthought of, and consequently the supply was limited as stated above. However, if thought advisable a second edition will be printed.

## WORKING MODEL SHOWS AUTOMATIC WEIGHING (Continued from Page 1.)

Scales are designed for special purposes and to meet varying conditions, finding use in many industries. The smallest automatic weighing scale is one of two-ounce capacity, which is used for weighing spikes. It is a very delicate instrument and must be kept under a glass case. The largest scales are of five tons capacity and are in service in grain elevators at Quebec.

Coal is weighed in two ways. It may be fed into a hopper, which is weighed and emptied. Or it may be weighed while it is travelling on a continuous belt. In this case a section of the belt nine feet long is supported by one end of the scale beam, and the amount of the coal carried by the belt is recorded automatically.

Automatic weighing scales are widely used in manufacturing establishments for preventing wastes and insuring higher efficiency of production. Mr. Hough defined this efficiency as the ratio of the material in outgoing product to the raw material entering the factory.

The model which Mr. Hough brought with him materially helped to visualize the principles involved. This duplicated the operation of the larger machines with sand as the weighed substance, where grain and coal would be the actual materials.

Ogelthorpe University at Atlanta, Georgia, is to be refounded after a lapse of more than forty years.

## CHEMICAL SOCIETY

### Meeting Friday Will Plan Trip to Worcester Plants.

On Friday afternoon at four-thirty there will be a special business meeting of the Chemical Society in 22 Walker. The meeting is called for the purpose of considering the adoption of designs for pins for the Society and new shingle designs. At the meeting it will also be decided upon what day the trip to Worcester will be made. On this trip it is hoped that the members will be able to visit the plants of the American Steel and Wire Company, the McGratton Leather Belt Company and the Norton Alundum Products Company, if time permits.

### PORTFOLIO COMMITTEE DESIRES INFORMATION (Continued from Page 1.)

The men in question are as follows: L. S. Baird, F. C. Balke, D. W. Douglas, H. C. Edgerton, W. T. Schaurte, R. Smythe-Martin, F. E. Waters, L. R. Weiss, A. D. Wheeler, H. R. Aldrich, L. D. Bartlett, V. S. McDowell, M. T. Ortin, W. R. Lewis, M. W. Salamonson, H. Chin, K. Y. Chin, R. Williams, L. W. Mason, J. W. Conover, A. P. Gutierrez, P. S. Platt and G. H. Ramsdell.

The men continue to show the characteristic extreme slowness in returning their proofs and they are thereby delaying the publication of the Portfolio. The Committee again wishes to warn the men that the time for returning their proofs is very limited, and that they should be returned at once.

### CHAUNCEY HALL CLUB

Nominations for President, Vice-President and Secretary-Treasurer of the Chauncey Hall Club must be handed in before four o'clock, Monday, March 16th. All nominations must be signed by five members.

F. J. WALL, Chairman.

### SEAVER AT ART MUSEUM

Prof. Henry L. Seaver, Assistant Professor of English at the Institute, will appear Sunday, March 15th, at the Museum of Fine Arts. The occasion is a Sunday Dozent Service under the auspices of the Department of Classical Art of the Museum. Prof. Seaver's subject will be "An Ancient Fraud," in the Late Greek Room. The lecture will be at three in the afternoon and is free to all who wish to attend.

### NOTICE

The following men are requested to meet W. L. Graves on Thursday or Friday at four o'clock in the Show office: C. W. Brown, R. D. Brown, M. B. Lewis, Jr.

dards at the University.

Plans have been made for a \$75,000 Y. M. C. A. building at Michigan.

## There is a Great Difference in Tobaccos

Tuxedo is the Mildest, Sweetest, Most Pleasant Smoke in the World, Because—

*First*—No one but the makers of Tuxedo is willing to spend the money necessary to buy the mildest, choicest, most thoroughly aged, selected Burley tobacco.

*Second*—No one but the makers of Tuxedo knows how to treat this Burley tobacco so that every bit of pleasantness and goodness remains in the tobacco and every bit of unpleasantness and harshness is taken out.

# Tuxedo

The Perfect Tobacco for Pipe and Cigarette

Tuxedo was born in 1904. Its first imitator appeared two years later. Since then a host of imitations have been born and are clamoring for your patronage.

*No imitation is ever as good as the original.* No amount of advertising, no amount of bluster and bluff, can ever make an imitation tobacco as good as Tuxedo.

If you are not a pipe smoker, you are denying yourself the greatest smoking pleasure known to man. *Try Tuxedo in your pipe this week.*

YOU CAN BUY TUXEDO EVERYWHERE

V. STEFANSSON  
famous explorer

"Tuxedo is mild, cool and soothing—just the sort of tobacco I need. Tuxedo goes with me wherever I go."

V. Stefansson.

G. RANDOLPH CHESTER  
famous author

"Why shouldn't a man be willing to recommend a tobacco which gives as cool, sweet and satisfying a smoke as Tuxedo?"

G. Randolph Chester

J. N. MARCHAND  
famous illustrator

"Fill my pipe with Tuxedo and I'm content. You can't beat Tuxedo for mildness and purity."

J. N. Marchand.

The New No. 5 Printype Oliver Typewriter makes an ideal machine for students' use. It is a marvel of simplicity, durability and ease of operation. Printype your notes and they will be twice as valuable to you. Easy terms if desired.
