

THE TECH

VOL. XXXIII. NO. 157.

BOSTON, MASS., SATURDAY, MARCH 21, 1914.

PRICE TWO CENTS

TECHNIQUE PICTURES BETTER THAN EVER

**Art Department Will Cost Twice
As Much As Last Year—Six
Color Plates.**

The art department of *Technique* 1914, which cost a little over four hundred dollars, elicited a great deal of favorable comment, but the 1915 Board, having doubled this expense, claims to have outdone all previous efforts. The book contains six full color pages, as against the single one last year, and other factors have been improved in similar proportion.

The cost of these color drawings, while not out of proportion to their value, is high. Every color plate that goes into the book requires four separate engraver's plates and four separate printings. For the reproduction of one color drawing the engraver charges fifty dollars and the printer's charge for doing the extra printing is anywhere from fifteen to twenty-five dollars. A full page black and white drawing costs five dollars at the engraver's, and every small heading adds one dollar to the engraver's bill.

A little mental arithmetic will soon convince one that to scatter pictures through a book may bring great pleasure both to him who places them there and to him who looks at them, but few realize the amount necessary to insure the success of the book financially.

This year's book has insisted that all hackneyed ideas be eliminated and that only drawings expressing a new and original idea be considered. This has resulted in a work that is full of interest and life. Those few who have seen any of the work have declared that no *Technique* before has ever equaled it. In fact many express their doubts as to whether next year's book will be able to come up to the standard set by this one.

SENIOR CLASS DAY

**Ballots for Election Coming in
Slowly.**

The ballots for the election of the Senior Class Day Committee, which were mailed to members of the class on Wednesday, are coming in very slowly.

The Election Committee again wishes to emphasize the importance of this election, as the outcome will determine largely the success of Class Day. Every Senior is expected to leave his vote at the Cage before noon Tuesday, March 24, at which time the election closes. Only the names of those men who have paid their dues for this year were included in the list, and only those ballots which are signed by men who have paid their dues will be counted. The dues, however, may be passed in with the ballot and the vote will be valid.

SOUTHERN CLUB DANCE TONIGHT

**Everything in Readiness for
Event in Copley-Plaza
at 8 O'clock.**

This evening at the Copley Plaza the Technology Southern Club will give its second dance of the year. An attractive program of eighteen numbers has been prepared, and from all indications the affair will be even a greater success than the preceding one. Dancing will begin at eight o'clock, and the floor committee urges everyone to be present at 7.45, so that the dancers may be introduced. "Breaking in" on the encores will be allowed.

The patrons and patronesses are Dean and Mrs. Alfred E. Burton, Professor and Mrs. Frank Vogel, Dr. and Mrs. Henry B. Phillips, Professor and Mrs. W. E. Wickenden, Major and Mrs. Edwin T. Cole, and Dr. Joseph Blackstein.

A. B. Williams, President of the Club, is Chairman of the Dance Committee.

MUSICAL CLUB CONCERT

**Performance Well Attended—
Quartet Singing a Feature.**

The concert of the combined Musical Clubs, given at Natick last night, was an immense success. The performance was given in the First Congregational Church before a large audience, who thoroughly enjoyed the clever work of the Tech men. The snappy songs and pleasing musical selections held the attention of everyone from the start.

The Glee Club quartet, comprising Tallman, Parkinson, Blakely, and Tabbut, rendered several selections and were encored again and again. Tallman's song, "The Little Irish Girl," was well received and he was obliged to sing "In Spain" before the audience would allow him to depart.

The Banjo Club trio, consisting of Rankin, Brown, and Sherman, played Bacon's "Troopers," and for the encore, Rankin and Sherman played a gymnastic duet, tossing their banjos into the air while they played.

The Glee Club then rendered several songs and the Banjo Club made its final appearance, playing Lansing's "Darkies' Dream." As an encore they played a lively one-step, "Bean Club Musings." The harmonica artists had everybody marking time with their lively tunes, and they were obliged to repeat them several times.

The concert was so successful that it will probably be repeated in the near future.

NEW PLAN FOR TECH COOPERATIVE SOCIETY

**Proposed on Foot for Combining
With the Harvard Society.**

In order that the Alumni Council might take up the reorganization of the Cooperative Society at their meeting Monday night, the Institute Committee held a special meeting yesterday afternoon to hear the report of the committee on the reorganization, and to take up other matters of business.

After the roll call the report of the committee on the reorganization was read and accepted. It was decided that a proposal for the combination of the Technology and Harvard Cooperative Societies be placed before the Alumni Council, so that this body might act upon the matter at their meeting Monday night, March 23.

The report of THE TECH Advisory Council was next read. It consisted of a proposal for the managing boards of THE TECH and TECHNOLOGY MONTHLY, the combination to be known as the Technology Publications, and to invest governing powers in a board of directors, consisting of the Editor-in-Chief of TECH, the Editor-in-Chief of the Monthly, the Managing Editor of THE TECH, the Managing Editor of the Monthly, and the Business Manager of the Technology Publications.

(Continued on Page 4.)

HARE AND HOUNDS

**Leave Trinity Place Station at
2.05 for Newton.**

The runners in the Hare and Hounds Club chase will leave Trinity Place Station this afternoon on the 2.05 train for Newton, where the chase will be held.

The course at Newton is one of the most popular among those visited by the club. It consists of a good deal of road work and easy field running with a few rolling hills. There will be two squads, one starting several minutes before the other, so that they will finish at about the same time. The slow squad will set a slow enough pace so that everybody will be able to keep up and nobody should hesitate in coming out because he has done no running this year. The run will start and finish at the Newton Y. M. C. A. Besides the excellence of the course a great attraction for this trip is the swimming pool at the Y. M. C. A. which will be at the disposal of the men. This pool is one of the best and largest in the state.

The men will take the 5.30 train back to Boston. Chase Captain Best will have tickets on sale for the round trip for 25-cents at the station before the train leaves.

TECH VS. B. Y. M. C. U. LAST MEET OF SEASON

**M. I. T. Wrestlers Will Defend
Title to New England Club
Championship.**

Tonight the Tech wrestling team will have the hardest and final meet of the season when they meet the Boston Young Men's Christian Union at the latter's hall. This meet will decide the club championship of New England, which Tech now possesses. Neither team has lost a game this season and this will make the men fight all the harder. Captain Kelly says that it will be even harder than the Yale meet which made the men work very hard to win, and then was only won by one bout. Kelly, however, is confident of victory as his men are all in perfect condition, and, what is as important, are confident of their own ability and strength. Treat's arm is still a little sore but he will be able to do his best work. Captain Kelly wishes that some men would go down to the B. Y. M. C. U. tonight to cheer the team as it will help very much. The meet will take place at the Union's rooms, 48 Boylston St., next to the Hotel Touraine. The admission will be twenty-five cents.

The match tonight will close the season for Tech and the men are planning a banquet in the near future to officially break training.

The following men will compose the Tech team:

115-pound class: Loo.
125-pound class: Means.
135-pound class: Capt. Kelly, Mgr., Martin, Rounds, Durkee.
145-pound class: Treat, Wood.
158-pound class: Walter, Goodell.
Heavyweight class: Crowell, Leslie.

T. C. A. ELECTIONS

As the result of the recent elections of the T. C. A., C. C. Norton will in the future occupy the position of President, with George N. Alt-house Vice-president and N. E. Kimball Treasurer. All of these men have been prominent in T. C. A. affairs and the news of their election will be received with much satisfaction throughout the Institute.

WEATHER

For Boston and Vicinity: Today fair; moderate north to northwest winds.

CALENDAR

Saturday, March 21, 1914.
2.05—Hare and Hounds leave Trinity Place Station for Newton.
8.00—Wrestling Meet. Tech vs. B. Y. M. C. U. at B. Y. M. C. U.

IN CHARGE OF THIS ISSUE.

Editor: W. F. Johnson, '17.

Assistant: J. F. Maguire, '16.

We are constantly in receipt of communications which, for one reason and another, it is impossible to print. The most common failing is so atrocious a use of the English language that it would require complete rewriting by the editors to make the matter presentable in our columns. Another common deficiency is a total lack of subject-matter which would have the slightest interest for our readers. A three-page attempt, for instance, to extract humor from a very mediocre play upon words, recently found its way into the office waste basket.

But a large number, also, which in themselves would be entirely suitable, must be suppressed for reasons of policy. Some present a destructive or pessimistic view of some student affair; some would not be acceptable to the Institute authorities; while some must be suppressed because of their effect on our advertising. This last point we regret as much as anyone can. THE TECH ought to be an unbiased medium of expression for the students, but if the latter will not give the paper sufficient financial support, we must cater in some measure to those who will, namely, the advertisers.

COLLEGE NEWS

Police statistics at Ithaca show that the number of arrests of undergraduates at Cornell have decreased over fifty percent in the past four years. This is attributed to the fact that the saloons have been eliminated and other amusements have taken their places.

Plenty of spirit was shown last St. Patrick's Day at Purdue. In accordance with the rule made by the Class of 1911 all Freshmen appeared on the campus wearing green caps. The day's issue of "The Exponent" came out printed in green ink.

To further the interests of co-education, Otterbein students have purchased five pairs of gray squirrels for their college campus.—The Oberlin Review.

The Intercollegiate Bowling League, composed of alumnae of different colleges, finishes the season this week with Wisconsin in the lead. Her record was forty-three matches won and two lost. Cornell, Union and Purdue were tied for second place.

Bowdoin has appointed a Limitations Board to investigate over-participation in athletics and student activities.

If present plans mature the Pennsylvania clubhouse in New York city will be purchased and ready for occupancy in about a week. The property under consideration is one of the first-class smaller hotels.

Coach Gill of Illinois has announced that he will enter his men in several of the track and field events and probably in the two-mile relay at the big races in Philadelphia on April 25th.

A student at Bryn Mawr has been awarded the European Fellowship in Criminology, offered by the Association of Collegiate Alumnae.

Danger of flood from the Ohio River is reported at Purdue.

The banquet of the Eastern Association of Purdue Alumnae will be held this evening in Albany at Keeler's.

Twelve men have been chosen to represent Penn in the Interscholastic Architectural Competition at New York. Over a hundred and ten designs were submitted in the preliminary contests.

The Roister Doisters at the Massachusetts Agricultural College will repeat their presentation of the "Comedy of Errors" again next Wednesday evening.

SOPHOMORE BASEBALL

Meeting Well Attended—New Material Promising.

The meeting for the 1916 baseball candidates, held yesterday at the Gym was well attended. Most of last year's team reported and a large number of new men turned out. The most promising of these are Poteat, former captain and first baseman of the University of South Carolina; Simpson, a left handed pitcher from Ohio State University; Allen from the University of Virginia, and Lawrence who formerly played on his class teams at Andover. The veterans back are Ross, Petit, Demeritt, Tapley, Lovejoy, Krigger, Morse and Smart. Practice

ARCHITECTS MEETING

Life of Students Abroad To Be Described by W. T. Aldrich.

The Architectural Society holds a Smoker tonight in Room 42 Pierce. Mr. W. T. Aldrich, of Bellows & Aldrich, Architects, and instructor of design in the Department of Architecture will give a talk on "Student Life at the Ecole des Beaux Arts at Paris."

Mr. Aldrich spent several years at the Ecole, and is well fitted to tell about the life of the Architectural student abroad. All who are interested are urged to attend. After the talk, the usual "feed" will be provided. This is the last opportunity to obtain tickets of the officers of the society.

RIFLE CLUB

Practice To Begin Tomorrow at Walnut Hill Grounds.

Outdoor rifle practice will begin tomorrow at the Walnut Hill range.

A party in charge of T. D. Parsons will leave the North Station on the 2.00 P. M. train. Each member must get his rifle from the South Armory with an order, which may be obtained from Capt. Haslam, Pres. Caselman, Vice President Dunn, or Secretary Parsons, officers of the Club.

The outdoor team, which is to be entered in the Intercollegiate match, will consist of six men and a substitute. Competition for membership on the team is expected to be lively, so all ambitious men are expected to take this opportunity to begin practice early. Inclement weather would, of course, prevent practice tomorrow. There will be no practice at the First Corps Armory tonight.

FACULTY NOTICE

The course of five experimental lectures by Professor Goodwin begins this afternoon. The lectures will be given Friday afternoons at 4 o'clock, Room 23W.

**WORK AT NEW SITE
PROGRESSING RAPIDLY**

**Large Force of Men Start Work
with Advent of Good
Weather.**

During the month of February the weather prevented much progress at the buildings of the Massachusetts Institute of Technology on the Esplanade, Cambridge. Since the melting of the snow, however, activities have been resumed and today there are three hundred men employed. The principal seat of activity at the moment is in the group of buildings forming the three sides of the eastern, minor court. These are the structures that are to be devoted to general studies and Biology and Public Health. There has been some delay in the plannings, well established as they were a while ago, for the co-operation with Harvard University, whereby the numbers at Technology will be increased by some Harvard men, both students and professors, has made some rearrangement necessary.

Within the east court, which is in its foundations about three hundred feet square, there are now five pile-drivers at work, and this portion of the piling is likely to be completed first. Altogether in the constructions there have been driven about five thousand piles, about one-quarter of the whole number required. It is interesting here to note that the demand for piles has been quite important as such demands go, and instead of ordering from a single dealer no less than fifteen different sources of supply have been sought.

The little Venice that is to be a part of the hydraulic laboratory is now one of the important features that is being considered. There is to be a great suction well which will have a capacity of twenty or thirty thousand gallons, for the testing of pumps, while a number of canals of different sorts for testing different kinds of water flows will run beneath the basement floor of the building. It has been necessary to determine on these before the piling for the foundations can be driven.

The wall itself is surrounded by 2300 square feet of steel sheet piling, within which the concrete walls of the well will be set. The excavation is now completed and the concrete mat for the bottom will be placed early next week.

Stone & Webster have their own locomotive on the grounds and the tracks in place which give access to every portion of the grounds. The system is connected with the Boston & Albany R. R. and already 750 carloads of material—the piles not included—have been received and distributed to the different sections. The locomotive is the forty-ton one that was very busy building the Keokuk dam, and it travels now nearly fifty miles a day backwards and forwards over the mile of track in the grounds.

The lumber yard looms up as one passes in the vicinity of the constructions and here there has been unloaded more than a million feet of lumber. This is for concrete forms and is to be handled in a shop that

COMMUNICATION

The Editor of THE TECH,
Dear Sir:

I see by the paper that Miss Pendleton, President of Wellesley College, says that owing to the fact that all laboratory facilities were destroyed at the recent fire work can not be resumed for some time. This means that the number of students will be enormously reduced.

As engineers we should consider what effect this will have on the B. & A. R. R. Its Saturday and Sunday evening earnings will fade away to the vanishing point causing depreciation of the stock and tremendously reducing the dividend. This will bring starvation to thousands of widows and orphans; the gaunt wolf will grow fat.

This calamity is avoidable. After much thought I have evolved a plan, which I offer through you, to prevent this great catastrophe. This plan will bring added returns to the widows and orphans; it will drive the wolf back to the tall, tall timber; it will increase the revenue of the Institute, and it will be the source of inestimable pleasure and profit to us as students and to Wellesley as a college.

I propose that the Institute freely extend the privileges of its vast and well-equipped laboratories to our sister college. I am sure there is plenty of room,—for instance there is a vacant desk right next to mine; and even though it were crowded what true Tech man would be so discourteous as to refuse the half of his desk to a fair neighbor in distress? The profits of the supply room could be enormously inflated by adding candy and hairpins to the stock in trade. The adoption of this plan would increase the interest of the students in their work. I will wager everything I have saved for Junior Week that, if it be adopted, no student will cut lab for the next eight weeks. Since of late we have been prone to co-operate with everything at the slightest provocation, I see no reason why, when the benefits to be derived are so general, that we can not embrace this particular opportunity.

It behooves us to act quickly in this matter lest another institution, recently absorbed by us, whose students have been our rivals in this field before, should beat our time. I am, sir,

Respectfully yours,
GALE SHEDD, Jr., '14.

is practically ready for work. This has saws of all descriptions and planing and jointing machinery. A company of twenty workmen will be required when the constructions are fairly under way. One ingenious idea here is the employment of saw-filers to keep the tools of the workmen in order. It is a step in advance of having every man at his own pleasure and in his employer's time do his individual filing work. An electric motor of thirty-five horsepower will be required to run the carpenter's shop.

One of the features of general interest is the fact that surveyors are at work on the new athletic grounds. These are in the northeast corner of

ORCHESTRA PICTURE

To Be Taken This Afternoon—
No Rehearsals Today.

This afternoon is the last chance for a group picture of the Tech Show Orchestra to be taken for the program. Every member should make it a point to be at Sarony's, 146 Tremont street, promptly at two o'clock.

The competition for Freshman Assistant Stage Manager of the Show has been keen, and at present Stage Manager Hughes is unable to pick the best man. This afternoon at two they are to be given an examination in harmony.

There are to be no rehearsals in any department this afternoon but there will be a full rehearsal Monday, when every member is expected to be present.

NEW TECH SITE
(Continued from Page 3.)

the grounds and since Technology has disposed of the field at Brookline, measures will be taken to replace it by partial preparation of the new one. One of the matters that has apparently affected the sporting world is the fear that the Harvard field will be overrun by the Tech men to the discomfort of both companies. These fears may be allayed, for Tech is going to have its own grounds and at hand and presently a gymnasium that will follow the most efficient models.

The village that has grown up on the site is continually receiving reinforcements. It has been found necessary to enlarge the headquarters, the engine has a little square "round-house," a number of pump houses have sprouted in different parts of the lot, the gate-keepers have houses to shelter them, while across on Vas-sar street there has been established a laboratory for testing purposes in which both professors and students of Technology will be at work adding to the sum of knowledge about concrete.

One of the minor operations has been in the way of borings to make further studies of the underlying land. Twenty-four such holes have been made, a few to the depth of eighty feet. It is only occasionally and very locally that the earlier survey of Professor Crosby has not been absolutely correct. There are considerable differences within short distances and sometimes the row of piles in the sixty-foot stretches will begin with spruce and end with oak because the former will not penetrate the hard lower soils.

COSMOPOLITAN CLUB

Dance To Be Feature of Club's Entertainment.

The Cosmopolitan Club are making extensive preparations for the entertainment which is to be given by them on Saturday, March 28th. The first part of the evening's program will be a novel form of entertainment given in Huntington Hall, and this will be followed by a dance which will be held in the Union.

The program given in Huntington Hall will consist of five numbers, each a specialty of its own. The last number will be the "Peace Conference" and this last number should easily prove to be the most interesting and entertaining part of the program.

Question has arisen as to whether or not the entertainment is to be a dress affair. The committee in charge has decided that everyone will have a better time if the whole affair is an informal one.

Tickets will be on sale daily in the Union at one o'clock and are not limited to Tech men. Application may be made by mail care of T. C. Hsi at the Cage or to any of the club members. Dance programs may be obtained at Huntington Hall on the evening of the entertainment.

COOPERATIVE SOCIETY

(Continued from Page 1.)

The attitude of THE TECH was conservative, as it seemed better that a well established activity at the Institute should not attempt combination with the Monthly at the present time. It was pointed out that the Monthly is still an experiment, not yet recognized by the Institute Committee, and that sentiment regarding it or its financial success cannot be at present ascertained.

At the close of the meeting, the Union Committee, in speaking of the conflict of "International Night," which is to be given March 28 by the Cosmopolitan Club, and the Freshman Sophomore basket ball game on the same night, said that the various activities had not always been careful in handing in cards of their future dates. He also said that entries had been made on the Calendar by others than those on the Calendar Committee, a condition, which if not remedied, would necessarily lead to the discontinuance of the Calendar, and a reversion to the former chaotic state of affairs.
