RECENTLY RETURNED FROM MEXICO

Mr. Eugene B. Sanger To Be at Tech Show Rehearsal Today.

Few men in the Institute are aware that the war in Mexico seriously endangered the success of this year's Tech Show. Nevertheless such was the case, for the men upon whom the greater part of the responsibility for the successful result rests, Mr. Eugene B. Sanger, has only recently returned from the scene of action. Before taking the trip Mr. Sanger signed a contract to shape the Tech Show once again, and it is possible that the success of the battles there have given him valuable suggestions.

Mr. Sanger was first connected with the Tech Show in 1911, when he staged "Princess French." He was chosen from among those who were considered for the place because of the able manner in which he had staged other productions, particularly several of the more successful of Daniel Frohman's musical comedies. He has had charge of a large number of the more important amateur plays which have been given throughout the country. Of late years he has made a specialty of college dramatics. Some of the better known of the college dramatic clubs with which he has been connected are: The Princeton Triangle Club, the Columbia Club of New York, the College of the City of New York, the Harvard College Club, the well known "Fest non Sing" Club at Union and the "Hasty Pudding" Club at Harvard.

EUGENE N. SANGER

THE REAL PURPOSE OF INTERNATIONAL NIGHT

Cosmopolitan Club In Giving Entertainment To Equip New Rooms.

Much has been said about the International Night which is to be given by the Cosmopolitan Club on March 24th, but the purpose of this entertainment is probably known to only a few people. It is the intention of the successful committee to raise the equipment of its new rooms in the Walker Memorial Hall at the New Tech Show in Cambridge.

Three years ago the Cosmopolitan Club had a ballroom on Boylston street, but, owing to the large expense of maintaining such a room, it was given up. At present the large number of foreign students in the Institute necessitates a room where the fellow Cosmopolitans,—people of other nations as well as Americans,—can gather to gain a better knowledge of other nations and to cultivate a closer friendship. The authorities of the Institute have realized the need of such a place, and have provided the Club a big room in the Walker Memorial Hall.

The Cosmopolitan Club has been one of the most active organizations of the Institute, and has given a series of entertainments each year with the main purpose of giving a better understanding of foreign nations. With such a purpose in view, all such entertainments have been given at the expense of the Club to all the students.

Preparation for Spring Meet Begins

Varsity Squad To Discontinue Practice Until Field Is Opened.

Beginning today all track work for the varsity squad will be discontinued until the Field at Brookline is opened. This step is deemed advisable on account of the present inclemency of the weather and in order to afford the mental and physical rest up between indoor and outdoor seasons.

All Freshmen who are substituting Track for Gym, however, with the exception of those who participated in both the Andover and Lowell meets, will be required to report to the Gym tomorrow.

When the frost is finally out of the track at the Field the work for the spring will be pushed forward with an earnestness and a vigor which is calculated to culminate in the most successful season that Track has yet enjoyed. The Spring Meet this year is to be one of the chief attractions of Junior Week, coming on the morning of Friday, April seventeenth, at ten o'clock, and the survivors of the Spring Concert and the Show, male and female alike, will witness a most superb exhibition of Technology's Mercury in the prime of its existence.

The added attraction this year will be the four class relay race over the Field Day distance, one and one half miles, each team composed of twelve men, each man to run two hundred and twenty yards. All the heroes of past Field Days will compete. Nineteen fourteen's ancient record breakers will be there, many of them old, obese and infirm, but some of them

SENIOR CLASS DAY

Ballots Due at the Cage on Tuesday at 5:00 P.M.

All ballots for the Senior Class Day Committee must be handed in at the Cage not later than five o'clock tomorrow. As the ballots so far have been coming in very slowly, the committee in charge of the election has extended the time limit from today at 5 P.M. to tomorrow at 5 a.m. as was printed in the ballot, to run a final for the election, Tuesday, at 5.

The committee in charge of the election again wishes to emphasize the importance of this election, as the results will largely determine the success of Class Day. Only the names of those men who have paid their dues for this year were included in the list of names on the ballot, and only those ballots signed by men who have paid their dues will be counted. The dues, however, may be paid in with the ballot and in that case the ballot will be valid.

CALENDAR

Monday, March 23, 1914.

4.00—Short Story Contest for the Technology Monthly Chess, Cage.

5.00—Glee Club Rehearsal, Union.

6.00—Union Dinner and Dance.

7.00—T. C. A. Bible Study, Room A, Union.

Tuesday, March 24, 1914.

3.00—Meeting of Electoral Committee Technique 1915. 23 Rogers.

5.00—Choral Rehearsal, Union.

6.00—1914 Class Day Ballots Due, Cage.

8.00—Lowell vs. U. S. A. Technology Bowling League. Trinity Place Alleys.
THE TECH

THE TECH SHOW

(Continued from Page 1)

The cold weather did not prevent a large crowd from taking the Hare and Hounds Run on Newton on Saturday. Next Saturday the Hare and Hound Club will hold its Spring Run under the Tech courses in West Roxbury. All those who go out will be divided into two teams under captains chosen by lot and every man will score on his team. It is proposed to call one team the "Reds" and the other the "Grays." Prizes will be given for the first six places.

Both the University of Chicago and Penn started outdoor running last week. Our team did some work on the Oval but this week we go to the Field.

At the Conference Indoor Games held last Monday in the Fayerweather Gymnasium in western Massachusetts the men had the advantage of a cinder track.

The holding of the Spring Meet on the 17th of April in the midst of Senior week festivities is certain to help make a success of the event. With the house parties being held in several of the fraternities, and the number of men participating in the various attractions of the week a crowd rivaling that of Field Day should grace the stands when the track chosen makes its debut in the outdoor season.

The men of the University who have received an "I" have formed a club to foster good fellowship among the athletes and advance athletics in general.

A book called "Athletic Training" has just appeared at Penn. It is a collection of various articles by the late Mike Murphy compiled and edited by Edward R. Bushnell, sporting editor of the "Press." The book contains thirty illustrations and is especially devoted to the study of Track.

Oberlin suffered a defeat at the hands of Wesleyan to the tune of 54 to 39 in a track meet held on the 18th. The score was tied at 30 but with only three events to be run off, the Methodists came through in fine shape and won a handy victory.

Hail to the Wrestling Team! What a record to be proud of! Now let us give a show of appreciation for putting on waves the Intercollegiate Wrestling meet to be held next Saturday night.

Jim Rice, coach of the Columbia crew, came out unreasonably Satur-
day against the four-mile race for college oarsmen. He maintains that the crew's do not have time to train for such a race.

TECH SHOW

(Continued from Page 1)

Mr. Sanger is well fitted for the work. With a natural ability for acting, his years of experience and public speaking, he has made him to take part in a play and act it to perfection. He is very versatile and after working with the cast and chorus over the ballets instruction in the finer points of dancing. The annual Tech Show gives him an excellent chance to exhibit this versatility, for he has charge of every important detail of the production from the choice of the host to the direction of the final dress rehearsal.

Since his return from Mexico he has been on excellent terms with his fellow students, and he still has the cast and chorus drill this afternoon at 4:15. All members of the cast, chorus, and band are expected to be on hand.

COSMOPOLITAN CLUB

(Continued from Page 1)

members of the Institute and their friends. This coming International Night will be the first entertainment at which admission will be charged, but the executives of the Club feel this is necessary in order to be able to equip the new clubroom. Those in charge are working most energetically for the good purpose for which this entertainment stands, and they expect that a large number of the faculty as well as students will help out. Even Dean Burton has kindly volunteered to sell tickets. These can also be obtained at the Cage Supply Room at Eng. A, or from the members of the committee, R. Alfaro, F. E. Stern, T. C. Hsi, L. W. Snow and K. Horakowski. The admission is fifty cents for the entertainment and dance.

PORTFOLIO SIGNS UP

All Seniors who have signed up books for the Senior Portfolio are requested to be in the Union about noon at one o'clock. This meeting will not take more than five minutes but is important to the Portfolio Committee.

The first educational institution in the country, to be located entirely by electricity was the "Electric High School" at Rupert, Idaho.

TECH WRESTLERS END SEASON UNDEFEATED

M. I. T. Takes Last Meet—Kelly Wins from M. E. Amateur Champion.

By winning the meet with the H. Y. M. C. U. last Saturday evening, the Wrestling Team established its record of remaining for 16 seasons undefeated. The team has wrestled Harvard, Brown, Yale, and all the strong teams in the vicinity.

The feature of the meet was the bout in the 125-lb. class between Kelly of Tech and O'Hara of the Union. Captain Kelly has a fine record, and is well known for his skill, while O'Hara is the 125-lb. amateur champion of New England. This match was eagerly looked forward to by the spectators, and it fully came up to expectations. O'Hara had evidently lost an easy win, but Kelly soon threw his man to the mat, and worked on top of him. Kelly had no trouble in remaining on top, and kept on the advantage throughout. During the second round, he strained his wrist somewhat, but for all that he held his man, for odds and won the decision easily.

The first match was between Means of Tech and Karavas of the Union. It ended unexpectedly, as Means threw his opponent heavily, dislocating his elbow. It was not thought that Karavas was badly hurt, however.

Treat of Tech met Davis of the Union in the second match. He out-governed his man from the start, and was never in danger. He won the decision easily, as he was on top all of the time.

In the third bout, Loo of Tech defeated Rosenthal. They worked upon their feet for some time, until Loo secured a body hold and tripped his man. Loo also kept on top and won the decision because he was more aggressive and skilled.

In the 145-lb. class Manager Smythe-Martini lost to Green of the Union. Green is a hard man to beat, and had abundant endurance. Martini fought hard, but could not get him.

In the next match, Rounds lost by decision to Parker, B. Y. M. C. U. Rounds seemed to have the advantage in the first round, but Parker came back strong in the second. This match was mostly footwork.

The seventh bout was a win for Ryan of the Union over Goodell. Ryan has much experience, and a fine reputation. Goodell worked hard, and kept from being thrown.

Walter lost to Innes, although he seemed to be the better man. Up to the second round, he had everything his own way, but luck was against him.

The only fall of the meet was in the match between Durkee and Mintz, in which Durkee threw his man in 2:20 with a double arm hold. Leslie decided the meet by defeating Mallock in the lightweight class. His determination was a large factor in winning the event. The summary:

125-lb. class—Loo, M. I. T., gained decision over Rosenthal.
145-lb. class—Booth, on account of injury to Karavas.
158-lb. class—Kelly, M. I. T., gained decision over O'Hara.
165-lb: class—Goodell, B. Y. M. C. U., gained decision over Mallock.
175-lb. class—Ryan, B. Y. M. C. U., gained decision over Green.
215-lb. class—Treat, M. I. T., gained decision over Davis.
225-lb. class—Ryan, B. Y. M. C. U., gained decision over O'Hara.
285-lb. class—Innes, B. Y. M. C. U., gained decision over Martin.

The music was extraordinarily good, and much favorable comment was expressed on the excellent choice of selections. Calls for encore were numerous, to which the orchestra responded very graciously.

During the encore "breaking in" was allowed, and to the chagrin of a number of fellows who were unwilling to yield up their fair charges to less fortunate comrades.

The floor was not overcrowded, and there being just about the right number present to insure a very enjoyable occasion without the drawbacks of an overly crowded number. Although considerable haywire was exercised in the character of dancing, at no time did it exceed the bounds of propriety.

Refreshments in the shape of charlotte russe, cake, and coffee were indulged in during the course of the evening, and proved so popular that the demand shortly exceeded the supply.

At about five minutes to twelve the authoring was of necessity broken up with regret, and the hope was expressed that another dance would be given at an early date as possible.

SHOW BLANKS OUT

Application blanks for seats at this year's Tech Show were mailed today to faculty, Alumni and students. Tickets will be allotted this year as usual and to receive the benefit of the reservations, the show management requests that the blanks be filled out and returned as soon as possible.

JOSEPH SCHUMPETER

Professor Joseph Schumpeter of Graz University, Austria, sailed Saturday after a six months' tour of American colleges. He announced that he thought American students gained more in their four years than those of European schools.

Columbia crews will begin outdoor practice this week.

125-lb. class—Kelly, M. I. T., gained decision over O'Hara.
145-lb. class—Treat, M. I. T., gained decision over Davis.
158-lb. class—Innes, B. Y. M. C. U., gained decision over Martin.
165-lb. class—Ryan, B. Y. M. C. U., gained decision over Goodell.
215-lb. class—Ryan, B. Y. M. C. U., gained decision over O'Hara.
225-lb. class—Ryan, B. Y. M. C. U., gained decision over Green.
285-lb. class—Treat, M. I. T., gained decision over Davis.

ATTENDANCE NUMBERED

There were more students present than the show management had ever anticipated, and the floor was filled out and returned as soon as possible.
A TALK ON CONCRETE HIGHWAY CONSTRUCTION

Civil Engineering Society To Hold Meeting on March 27 in Huntington Hall.

While this is the concrete age it is not generally known that concrete has been successfully being put to use for the construction of country roads. Mr. G. H. Perkins of Warren Bros. Co., in his talk next Friday under the auspices of the Civil Engineering Society at 8 p.m., in Huntington Hall will make a special reference to bituminous concrete mixtures for roads. He will tell of the process in detail and by means of lantern slides will illustrate the difference between various mixtures in use by contractors and manufacturing concerns. The result obtainable from the use of different concrete constructions are not all the same. It will be of interest to note the cost in the completed roads.

Mr. Perkins will show slides of completed streets and roads both at the time of construction and ten years later, where the wear and tear have taken effect on them. This feature should be of particular interest to Juniors in Course 1, taking Highway Engineering in this anti-auto subject, as there is a great deal of speculation as to the causes of rapid deterioration of considerably good roads. Roads built for heavy trucking cannot stand automobiles, and a road should be built especially for the particular use for which it was intended. Mr. Perkins will tell these details and explain why certain methods of construction will not hold good for roads that were not designed for automobiles, in fact he will explain all causes for the failures of many types of roads and the remedies for them.

But the actual details of construction, the operation of the paving plant and the laying of pavements and curbs, the man is the one who really makes the interesting. Come and hear all about it on March 27 at 8:00 p.m. in Huntington Hall.
