SECRETS IN MAKE-UP OF TECHNIQUE
Mysteries To Be Divulged Later
—Licensed to Tech's Mr. Smith.

There are two big things that it is not customary for the Technique Board to divulge before the appearance of the book, but Technique 1915 does see why there should be so much mystery concerning all good things. They have stated without hesitation that they are giving the students the best book that has ever been published and that they have enumerated the various good points of their publication. They have not merely said that their book was the best but they have had it published and they have enumerated the men who are interested in the crew.

April 1 in order to get together the men who are interested in the crew. The corporation has their mysterious Mr. Smith and last year's board had their mysterious leather cover, but Technique 1915 does see why there should be so much mystery concerning all good things. They have stated without hesitation that they are giving the students the best book that has ever been published and that they have enumerated the various good points of their publication. They have not merely said that their book was the best but they have had it published and they have enumerated the men who are interested in the crew.

CLASS DAY COMMITTEE
BALLOTS DUE TODAY

To Be Left At The Cage By 5 O'Clock—All Ballots Must Be Signed.

All Ballots for the Senior Class Day Committee must be in at the Cage this afternoon by five o'clock. The committee in charge of the election wishes particularly to call attention to the fact that the success of Class Day depends largely upon a full vote of the class.

Several unsigned ballots have been handed in. All Seniors should remember that all these will be thrown out. In case men have not paid their class dues, they may hand them in at the Cage with their ballots, and their votes will be counted. The ballots may be obtained at the Cage.

TECH BOWLING LEAGUE
Garrison Team Still in the Lead
—Matches This Week.

At the end of the fourth week of the Tech Bowling League season the Garrison team is still in the lead with the faculty Rogers team second and the Pierce five third with one match still to roll off. Mr. MacKensie is now tied with Voss for the high average at 95, both having dropped off a couple of points. Voss's three string total is still good. The Garrison have captured the team total rolling 1499 against the Walker team. The schedule for this week is Lowell vs. Union, Tuesday at eight o'clock; Pierce vs. Walker, Thursday at 4:30 o'clock; Rogers vs. Garrison, Friday at 4:30 o'clock and a postponed match between the Pierce and Lowell teams, the date of which is not yet decided.

The standing to date is:

The members of the League have now claimed orders, after that, will be sold. In filling out these blanks the application must be signed to put his school year after his name and, under the space marked "class," put his rating, whether he be Class "A," "B," "C," "D," or "E." On any doubt exists as to what the applicant intended, the application that he be Class "A," "B," "C," "D," or "E." Any doubt exists as to what the applicant intended, the application for seats will be filled out by arbitrary choice of the management. Therefore, care must be used in making out the cards. The postals must be returned with the applications and with the name and address on the proper side. Of the two Boston performances, the afternoon is intended particularly for the undergraduates, but there will probably be good opportunities for the students to secure good seats at the evening presentation. On April 4th, all seats will be turned over to Herrick's, and the various theatres where the Show is to be given, for a general sale. The prices there will be the regular box office prices, as the management has arranged for their sale without any extra charge. Any man who did not receive an application blank, or any man who wants another application card, may get them this week at the Show Office.

W. P. KEITH

APPLYING BLANKS FOR SHOW SEATS DUE

Must Be In Saturday Afternoon
—Public Safe To Start

Sunday morning and afternoon the application cards for securing the seats at Tech Show were mailed and they should have been received by now. These must be returned properly filled out as destined before 5 p.m. Saturday. The applications will be filled as far as possible and held in the Show office for five days. Unclaimed orders, after that, will be sold.

W. P. KEITH

SHELLS NEARLY READY

Work on the two Technology shells is now progressing rapidly. Constructor Davies says they may be ready even before April fifteenth, since one is already planked and will be finished. The other shell is still a ways off and is ready for planning. They are forty feet long and twenty inches wide.

A general meeting will be held April 1 in order to get together the men who are interested in the crew.

THE TECH
ENGINEERING AND SCIENTIFIC NOTES

Wireless Notes.

Communication was held last week between the wireless station at Nasen, Germany, and one at Wind-hoek, Cape of Good Hope, South Africa, a distance of approximately six thousand miles. The messages that passed were clear and distinct. At various times there have been reports of messages traveling six thousand miles or more, but very few, if any, of these have been directly confirmations. March seems to be a favorable month for making long distance records.

A motor-driven life boat, equipped for wireless telegraphy, has been fitted to the new Allan liner Austrian, which recently left Liverpool, bound for a round trip to Canada. The boat, of mahogany and teak, is 32 feet in length and has a beam of eight feet. It is very compactly built, and is especially designed to encounter heavy seas. Over half the length is decked in and there is not a water tight self draining cockpit aft of the cabin, from which the boat is driven and steered.

The engine is a four-cylinder Genset persistence motor, but the most striking feature of the boat is a complete wireless installation which has a range of 100 miles. This boat and similar craft were put through a series of trials on the Clyde recently during a moderate sea, and showed up well attaining a speed of nearly 7½ knots. The motor power is sufficient to tow eight or ten ordinary ship's boats in a moderate sea.

Large Electric Power House

The new generating station of the United Electric Light and Power Company, which ranks among the largest of its kind in the world, was recently placed in commission. The purpose of this station is to supply the growing upper section of New York City, and for that reason it is built to permit the installation of further equipment.

At present it contains three 10,500 kw. turbo generators and there is sufficient space for five additional units. The building, which is of brick, concrete and steel throughout, is several stories high in the main part although the equivalent height in the boiler house is divided into only two tiers. Above the boiler section is a coal storage space having a capacity of 15,000 tons. There are four chimneys each 22 feet in diameter and 325 feet high. All the operations are controlled from a gallery on the second floor, containing the generator control board and the semi-circular feeder control boards, from which all switches are controlled. On the first floor in the storage battery and the generator house. On the basement floor, which is on the level with the street, are the control board, meters and transmission transfer houses.

Fencing is springing into prominence at many eastern universities on account of the approach of the intercollegiate, which occur next Satur-

FRENCH CLUB TO MEET

Professor Langley To Give Talk Friday, Room A, Union.

This evening at 7.00 there will be a meeting of the Cercle Français in Room A of the Union. Professor Langley of the French Department will give an illustrated talk upon "The Evolution of Paris." The  st affection being entertained, and well worth seeing, as they are pictures from Professor Langley's private collection and have seldom been shown.

The members of the section in Intermediat French (L 63) will have an opportunity of viewing many of the scenes told of in their "Notre Dame de Paris." All who are interested are invited to attend. The Cercle Français expect a large number at the meetins as the club feels sure that the evening will be very enjoyable.
GOVERNOR WALSH MEETS ALUMNI COMMITTEE

Conference Held to Consider How Institute May Improve Service.

Last Saturday President Maloquin and an alumni committee conferred with Governor Walsh at the State House, discussing plans whereby the Institute may improve its service to the State. The alumni committee announced recently has been in charge of Whiting of the Association to consider this matter, and the Governor invited it to the conference.

During the conference, Mr. Whiting referred to the address of Governor Walsh at the Alumni banquet, noting that the committee is the direct result of a suggestion made there. He sketched brie fly the help that Tech has given the Commonwealth in the past, and the desire that the Institute and the State might become still more closely united, so that "Technology may become the strong right arm of science to Massachusetts."

Governor Walsh deplored the lack of research information available on public problems, saying that Massa chusetts is far behind the other states in this respect. He further said that it is impossible for the Senators and Representatives themselves to investigate and study public questions; this could very profitably be done by some institution of higher learning like Tech. It is in a position to give material help to the State, and the Governor expressed his wish that this help might be given as thoroughly as possible by doing this work, the Institute would gain better support from the people.

President Maloquin replied that the Institute existed only for the service of the State, and that it was to be hoped that the Institute would play the leading specialists in science and maintained science laboratories. He said that the new location, Bantam, in connection with Harvard and other institutions, would be the co-operation of the people with the Institute would also tend to increase the efficiency of its service. He further expressed the great benefits of Tech to the State and the services was done in physical, chemistry, bacteriology, and the different engineering lines.

At the close of the session Professor Jackson outlined some of the things in which the University of Wisconsin is assisting its State.

The members of the Alumni Committee are President Whiting, Secretary Walter Hampstead, Judge J. F. Meany, Professor Jackson, H. C. Brush and Robert G. Valentine.

BASEBALL PRACTICE

The candidates for the Freshman baseball team will practice tomorrow afternoon at 1:15 on the Diamond. All those who played in the band at the TECHNIQUE rush last year were asked to join the new team. All who are interested in playing for the Freshman team are requested to meet South Brooks, the leader, in the Union, Thursday afternoon at 3 o'clock.

IOWA EXPECTS TO HAVE $135,000 GYM SOME TIME NEXT YEAR.

There are still one hundred Seniors who have not yet handed in their senior portfolios. All blanks to the Senior Portfolio Committee. It is necessary that these be turned in at once, as the material must be sent to the printer before the end of the week.

A few have not turned in their proofs and they should get them in immediately. Proofs were ready at the photographer's yesterday for Larrabee, Campbell, Bluster, Maier, Sandburg, and Spaulding. These men are requested to call at once if they have not already done so.

The contract for publishing the books has been let and already one hundred fifty prints have been sent to the engraver. The work of the Committee is progressing well but much trouble is occasioned by the delay in returning the statistics blanks and proofs. Members of the class will be asked to bring forth with April 1 and sign up for Portfolio. Those not then signed up are liable to lose their chance of getting the books or of having them ready until the middle of summer, if enough desire to publish a second edition, since the number contracted for is two hundred twenty only. About one hundred seventy-five have signed up to date.

BOSTON OPERA HOUSE TO CLOSE THIS WEEK

Special "Gala" Bill Saturday To Mark End of Present Season.

With the forthcoming week the ses sion of the Boston Opera Company comes to an end and it performances of Opera in Boston for nine months, as the Opera House will not reopen until the first of next month. The week will bring forth bills that will awaken the interest of the public and show the company at its most versatile best. The subscription performances of the week will consist of a classic and a modern opera of both the French and Italian schools; the Saturday night offering will be a "mixed" bill; and on Tuesday two special performances of "Hansel and Gretel" and "Tosca" will be given in New Haven.

"Aida" will be sung on Wednesday night with the same splendid cast that presented it so nobly on Saturday: Mme. Lucille Weingartner as Aida, Mme. Gay as Amneris, Mme. Zanelli as Radames and Mr. Ancona as Amonasro, with Mr. Dangekiss conducting. Verdi's spectacular and brilliant music-drama will be given a final performance in every respect worthy of it.

The performance of "Faust" on Friday evening will be a notable occasion. In the first place, it will be the farewell of the Weingartner and Mr. Marucchi in roles in which they are altogether too little known. Again, it will be the farewell of the Weingartner and of Mr. Muratore. The cast will include Mme. Weingartner as Marguerite, Mme. Swarts-Morse as

Schiele, Mr. Muratore as Faust, Mr. Marucchi as Mephistopheles, and Mr. Dan tec as Valentio, with Mr. Wein gartner directing.
On Saturday afternoon "The Jewels of the Madonsa" will be sung, fl arly closing the subscription perfor mances of the year as it began them. Miss Elizabeth Ameden will be the Malice, a role which she as sumed at one of the extra-subscrip tion performances of the Wolf-Perrat opera earlier in the season; Mme. Gay will impersonate Carmela; Mme. Zanelli will be the Gennaro, and Mr. Ancona the Raffaele, with Mr. Moroncini conducting.
On Saturday evening a "gala" bill will be presented. First "The Geograph of One-act opera," will be sung by Miss Hesshauser and Mr. Norwari, with Mr. Rindini conducting. The second act of "Faust" will follow with Mme. Berina as Marguerite, Mr. Lafitte as Faust and Mr. Lutskar as Mepi stopheles, Mr. Tournon conducting. Then will follow the third act of "Faust," with Mme. Berina as the Antoia, Mr. Dan tec as the Dectora Micle, and Mme. Fers as Hoffmann, with Mme. Berina as the Antoia, Mr. Dan tec as the Dectora Micle, and Mme. Fers as Hoffmann, with Mr. Stroud direct ing. To close the evening's entertain ment the delightful ballet, "The Dance of the Hours," from "La Gioconda" will be presented by the entire corps de ballet of the Opera House, with a solo dance by Miss Dolores Galli; Mr. Schiavoni conducting.
Mr. Litchfield Named Manager for Alumni
To Keep Associations Informed on Affairs of the Institute.

At the last meeting of the Alumni Council, a movement for the purpose of bringing the Alumni associations closer relations with the Institute was initiated. It was voted to appoint a "field manager" whose duty it will be to visit the associations and keep them in touch with the Institute and its progress.

I. W. Litchfield, '94, who already serves the association as editor of its publication, has been named field manager. He is already on his way to Buffalo, New York, where on Tuesday night there will be a meeting of the Buffalo association. Rehearsals will be held on Wednesday, where the Tech men in the Kodak and other works have formed a strong local association.

On Thursday, Mr. Litchfield will meet and talk with the Syracuse alumni, and will explain to them the plans of the new buildings and tell of the cooperation with Harvard.

The number of associations is now forty-five and it is expected that by another year there will be fifty. The London alumni are considering the matter, and it is also proposed to form a Tech Club in Paris.

Faculty Notice
March 3, 1914.

The course in "Storage Batteries and Their Applications" will commence the week of April 6th. The course will be given at the hours and in the rooms which are at present allotted to the lectures in Alternating Current Machinery.

Applicants for this course are requested to notify Professor F. R. Lawrence before March 31st, of any conflict.

Walter Humphreys, Registrar.
