

THE TECH

VOL. XXXIII. NO. 16

BOSTON, MASS., THURSDAY, APRIL 24, 1913

PRICE TWO CENTS

COPIES OF TECHNIQUE NOW BEING DELIVERED

Sign-Up Slips May Be Redeemed in Union—General Sale Later.

Copies of Technique, 1914, are being given out every day from 1 to 2 P. M., in the Technique office, on the third floor of the Union. These deliveries are only for those who are holders of sign-up slips, and will continue until a week from next Monday. On that day, at 1 P. M., a general sale of the remaining books will be started.

Already a large number of men who did not get sign-up slips have applied for books. For their benefit a waiting list has been started. The alumni have shown great interest in this year's Technique, and a large number of applications for books have come from them. These applications go to increase the size of the waiting list, where they are given precedence, and there is such a demand for the books that the holders of sign-up slips will have to call early to get their copies, as none of the books signed for will be held after Monday, May 5.

FRESHMAN BASEBALL.

Team Meets Tufts' Dental Next Saturday at Field.

The Freshman baseball team will play its first game of the season at the Field Saturday afternoon with the Tufts' Dental nine. This will be an interesting game inasmuch as it is the opener, and one which the Freshmen will have to do their utmost to win, as the dentists have a strong team, including several former college stars and New England players. To beat this aggregation will be quite an accomplishment, but the Freshmen seem confident of putting up a good, stiff fight and coming off victorious. The squad has been an unusually large one and there are many good players among its numbers. They have been practicing steadily for several weeks and the players are showing fine form and plenty of speed.

Captain Murphy wishes all the men who can to report for Friday's practice. He will endeavor to try out as many as possible, and those who do come out will have the best chance of getting into the game Saturday.

CLASS DAY COMMITTEE.

The Senior Class Day Committee will hold its regular meeting today in Room 8, Eng. C, at 5 o'clock. The most important of the business to be considered by the committee is the arrangements for sign-up books for class day. These books will be placed in the hands of different members of the class so that all will have an opportunity to sign up.

CERCLE FRANCAIS.

Owing to the small attendance, yesterday's meeting of the Cercle Francais was adjourned to a later date, when a greater number will find it possible to attend. At the later meeting Vignal will talk in French on the French army. President Lucas would like to hear from the various members as to what day would be most desirable for meetings.

THE TECH ISSUES NEW CALL FOR CANDIDATES

Meeting in Lower Office Friday Noon—Splendid Chance For Next Year.

On Friday, April 25, 1913, at 1.30 P. M., in the lower office of THE TECH a meeting will be held for all candidates for the three departments of the paper, news, business and editorial.

This seems to be rather an unusual time of the year for THE TECH to issue a call for candidates, but it has been found from experience that a man coming out now has an excellent opportunity to make the paper in May, so that when he comes back next year he is an active worker in the biggest activity in the Institute.

The next year's Managing Board has been at work since the first of April, so that a man coming out now can see how work on the publication is started. He will also have the advantage of getting a great deal of help from the members of last year's board, who are helping the new board to get into shape to make next year's paper the best ever.

Candidates need not let the fear that there will be too much work on the paper before examinations keep them from coming out now. The more men that come out the less work there will be for the individual candidates. The total work is evenly divided and the burden does not fall heavily upon anyone. During the week just before the exams the paper comes out only every other day, thus giving the men time for their other work.

There is an excellent opportunity for men in all the departments of the paper, but this is especially true of the business end. The latter is short of men, and those who would like a chance to get a good business training in connection with work on THE TECH will find it to their advantage to come out at this time. In any event, if a man is at all interested in the paper, whether or not he may want to join now, he is invited to attend the meeting on Friday, at 1.30 o'clock in the Lower Office, and hear what the heads of the departments have to say.

PENN RELAY CARNIVAL.

Many Enter in Both Collegiate and Scholastic Events.

At Philadelphia, next Saturday, there will be held a monster Relay Carnival under the auspices of the University of Pennsylvania. In this meet over a score of strong colleges from all over the Union have entered teams. Seventy-three colleges and almost two hundred schools will be represented in these races. In the other events as well, there will be many stars competing, such as Craig of Michigan, Lippincott and Meredith of Pennsylvania, and others in the sprints. Wright, world's record holder, will compete in the pole vault. In the high jump there will be Richards of Utah, Olympic champion; Burdick, intercollegiate champion, and Nicholson, champion of the Western Conference Association.

In the Interscholastic events much interest is being displayed, and with reason, as the schools show signs of great possibilities. Boston is well represented in this division as Commerce, English, Newton and Chelsea are all sending teams. From all appearances it promises to be a memorable meet and is attracting a lot of attention.

WORLD PEACE TALK TO BE GIVEN TODAY

Well Known Swiss Lecturer to Speak on Foreign Student Movement.

The regular T. C. A. talk for today will be on the subject of "The World's Students and Their Power For Peace," and will be given by Mr. Edmond Privat a graduate of Geneva University. The students of foreign universities have taken a prominent part in the movement for world peace, but such work is little known in the educational institutions of this country. It is expected that Mr. Privat will explain the nature of the work done abroad, and for this reason the speech should present a novelty to Tech students. The fact that a conference on the subject of world peace is soon to be held in the United States lends interest to this topic.

Mr. Privat is a graduate of the Sorbonne in Paris, as well as of Geneva University in Switzerland. He is a Swiss, and has kept very closely in touch with the student movements of Europe. Though still a young man, he holds the position of lecturer at the University of Geneva, and is also a teacher in an important English school.

The lecturer is endorsed by the World Peace Foundation, in whose interest he is making a tour of the United States. The Foundation is a world-wide organization which has done much to further the cause of international arbitration, and the fact that such an important organization has selected Mr. Privat as its representative speaks well for his ability. Mr. Edwin D. Mead, director of the World Peace Foundation of Boston, an authority on the subject of arbitration, speaks highly of Mr. Privat. He says: "He is an unusually fine speaker and an accomplished scholar. His command of English is perfect. I know of no young man more familiar with the student movements of Europe."

Mr. Privat is also active in attempting to spread the universal language, Esperanto, and has traveled very widely in this cause.

The T. C. A. feels that it is a high compliment to have this speaker give a talk under its auspices, as Mr. Privat is much in demand, and is not able to give his time to any unimportant work. Mr. Mead first suggested this talk, and it was his work that secured the speaker. Mr. Mead himself spoke before the Association last year, and was so impressed with the

(Continued to Page 2, Col. 1.)

SOPHOMORES VS. RINDGE.

Team to Meet in Union This Noon—Pitchers Reported Weak.

The Sophomore baseball team is expected to meet today at 1.45 P. M., sharp, in the Union, to leave for the Rindge game. All men out for the team can, and are expected to go on this trip, and although the game will in all probability be a hard one, Capt. Caffrey will try out as many men as possible. The Sophomore team is reported as being very strong in all the positions except on the mound, but as this one weak spot can make or break the whole team, the management hopes that any Sophomores with talent in this line will not be backward in coming out.

TECH SHOW DINNER SATURDAY EVENING

All Men Connected With This Year's Show to Be Guests of Management.

Saturday night, at 7 o'clock, the Show will hold its annual dinner in the Union. Only those men, including the orchestra, connected with this year's Show, are invited by the management to attend. There will be plenty of "eats" "smokes" and "drinks," all of which will be free of charge to the men present, and the managers of the different departments will give informal reports of this year's Show, telling approximately how successful financially "Money in Sight" has been.

Besides these speakers there will be several popular men from the Faculty who will offer their views and advice. Coach Sanger is also expected to say a few words and tell how he got the production in shape for the performances.

Tonight Tech Show, 1913, will be produced for the last time, and Malden is to have the honor of seeing it. The train will leave the North Station at 5.37, and every man is expected to be there on time as this is not a special, the Show having two special cars attached to the regular train that leaves for Malden at that time. The management hopes that every man will do his best tonight and cause "Money in Sight" long to be remembered.

FREIGHT HANDLING.

Interesting Talk Expected at Meeting in Lowell.

Dr. Harold Pender, H. F. Thomson and C. F. Eldred will have some very interesting facts to present at the meeting of the Boston Section of the American Institute of Engineers and the Boston Society of Civil Engineers, to be held tomorrow evening in the Lowell Building. The subject for consideration will be "The Delivery and Handling of Freight at the Boston Freight Terminals." The Edison Electric Illuminating Company furnished a large part of the funds, and the investigation was of a very thorough nature, covering not only the question of the vehicles themselves, but also the allied problems of street congestion and paving. All the men interested are cordially invited.

Did you see yourself in the Technique "movies?"

No excuse for the night editor not running the weather these days.

THE WEATHER.

Forecast for Boston and vicinity: Probable showers today; moderate variable winds.

CALENDAR.

Thursday, April 24, 1913.

1.30—T. C. A. Talk—Union.

Friday, April 25, 1913.

1.30—Candidates for THE TECH—Lower Office.

4.10—M. E. Society Meeting—11 Eng. R.

THURDAY, APRIL, 24, 1913

We had a little to say in yesterday's issue about the support of the various track teams which will represent their classes in the meet on Saturday next. Now just a word to the men in the classes, who for one reason or another have not been able to train this year, but who have ability in track athletics. There are a good many of these men who are unwilling to enter. They feel naturally enough, that to enter the meet on Saturday without having trained would be unfair to themselves. They would not be doing their best and they would be competing under an unfair advantage. This is all true enough, but the class that has a large number of entrants stands a proportionately good chance of winning. The third and fourth places are big helps in the team totals. Everyone here realizes that the men here are not here to become athletes, and instead of having a critical point of view, the students look on a man with appreciation who doesn't shine in his event but comes out and does his best. Sacrifice a bit of personal pride and work for your class. We speak of this because it has come to our ears that several men, noticeably of the Sophomore class, have refused to enter the meet because they are afraid they won't show up well. The meet was not arranged for individuals to show their prowess; it is to decide which class deserves the track supremacy. Consider this when you are making up your mind whether to enter or not.

T. C. A. PEACE TALK.

(Continued from Page 1, Col. 3.)
work of the T. C. A. that he has given it his support ever since. The officers of the Association hope that the attendance at this talk will justify Mr. Privat's expenditure of his time and will reward Mr. Mead for his efforts in securing so prominent a speaker.

Next Thursday the last T. C. A. talk of the season will be given. Rev. Allen A. Stockdale will conduct a question box. The officers wish all questions to be turned in as soon as possible. Those turned in first will be answered first.

INSTITUTE COMMITTEE WILL MEET FRIDAY

Proposed Changes in Constitution to Be Discussed at Meeting.

A regular meeting of the Institute Committee will be held Friday afternoon, April 25, at 4.15, in 8 Eng C. Because of the important business that is to be brought before this meeting a full attendance is greatly desired, and all members are requested either to be present in person or to send representatives.

The business that is to be brought before the meeting, as outlined by the Executive Committee, is as follows:

Report of the committee on the Constitution and By-laws. In this report the proposed changes to the constitution as it was accepted by the student body will be considered, especially as regards the representation of the activities. Members of activities whose right to representation is questioned are cordially invited to present their side of the question.

Discussion and possible action aiming towards a more efficient Technology Co-operative Society. This matter has been referred to in recent communications in THE TECH, and is one which should be of interest to the whole student body. The Harvard Co-operative Society has been carefully studied and may be taken as a model for the Tech society.

Attendance at meetings. This is another question which has had considerable publicity through the columns of THE TECH, and has been the cause of some rather sarcastic comment.

The Treasurer's report and the report from the Tech Show Advisory Council will constitute the remainder of the business. Anyone who desires to express his views on any of the above subjects is requested to be present.

CALIFORNIA PETROLEUM.

Production Increased Six Million Barrels in Year.

The production of petroleum in California in 1912 increased to 87 million barrels, from 81 million barrels in 1901, chiefly on account of large gushers developed in the Midway field and the number of good wells opened in La Habra Valley, according to David T. Day, of the United States Geological Survey. The production of the Coast field declined markedly. A number of good producers in the Midway and other valley fields were ruined by an influx of water, which turned the oil to a valueless emulsion. Consumption increased so that the additions to stocks were not as great as was expected. The total stock at the end of 1911 was 44,240,118 barrels. This increased to 48,000,000 barrels at the end of 1912, a gain of less than 4,000,000 barrels, while production increased 6,000,000 barrels, showing that the consumption in 1912 was over 2,000,000 barrels greater than the production of 1911.

The features of particular interest during the year were the development of large wells at unusual depth in La Habra field, the continued development of large gushers in the valley fields, the decline in old Santa Maria field, the extension of the Coalinga territory by the development of good wells to the south, the increased utilization of natural gas, including the enterprise for piping natural gas from the valley fields to Los Angeles, and the increased amount of gasoline obtained by compressing natural gas. Progress was also made, especially in the Midway field, in cracking crude oils to obtain greater yields of gasoline.

Among trade features of interest should be noticed the purchase of 10 million barrels of surplus crude from the Independent agency by the Union Oil Co.

At the request of Jack Ryder, the B. A. A. coach, the dual meet between that club and Tech will be held Friday, May 9, instead of Saturday, May 10.

Several of the distance men were given time trials at fair speed for the mile Tuesday afternoon.

H. S. Benson is slowly recovering from the injury which prevented him from taking part in the Sophomore-Freshman meet last Saturday.

Half a dozen of the B. A. A. men practice daily at the Field. Among them is Gene Marceau, of last year's Tech team.

H. S. Wilkins went through a fast 220 under the watch Tuesday. He is showing great speed and should do better this year than last.

N. D. MacLeod, of last year's team, is out for practice regularly now, and is already in good condition.

Captain Germain is in very poor condition but expects to round into form before long.

Byland, Dean, and a couple of others had a brisk brush for about three hundred yards yesterday, finishing with Byland well in the lead.

Some of the half-milers, after seeing that cup on display at the Union, have decided that they can finish a mile in good shape.

Wilson, Adams and Wilkins promise a great race Saturday. They are all rounding into shape, Adams having done the 220 in 23 flat last Monday, while Wilson is credited with fast time in a 150 trial yesterday.

FOUR TEAMS TO BOWL.

Luxuries Meet the Moguls and Meccas Roll Fatimas.

This evening the last four teams in the standing of the Tech Bowling League will roll on the Trinity Court Alleys. The Meccas will be opposed by the Fatimas, and the Luxuries will try to overcome the Moguls. The standing of the teams now shows the Faculty team, the Pall Malls, in the lead. The teams that roll this evening however, are well bunched, and a change in the standing may very easily result during the evening. The Faculty has been bowling remarkably all season and looks like an easy winner of the championship. The Lord Salisburys are second, but are not in a threatening position to overtake the leaders. Tuesday the Fatimas and Luxuries had an exciting contest with some spectacular rolling. Vose, '16, was the star, with a fall of 134 for a single string. This is the highest single string score made all season. Vose also took the lead for the three-string individual score, with a total of 312. The Fatimas, by Vose's fine work and fairly high scores by the other members of the team, were able to assume the lead in the single string team score with a total of 514. With this record to uphold the contest to-night will be sure to be interesting.

ELECTORAL COMMITTEE.

As the Show goes to Malden tomorrow it has been decided to change the date of the next meeting of the 1915 Electoral Committee from Thursday to Friday. It will be held at 5 o'clock, in Rogers 21, on Friday, April 25.

THE ADVANTAGES WE OFFER

PROGRESSIVE methods, large resources and two conveniently located, thoroughly modern bank buildings, combine to make this institution the most desirable depository in New England.

Interest-bearing accounts subject to check may be opened either at Court Street or Temple Place, and the two offices used interchangeably for the transaction of your banking business.

You are cordially invited to inspect the modern Safe Deposit Vaults at either office.

JUNIOR BASEBALL TEAM WILL PLAY SATURDAY

Practice Yesterday at Field—
 Nearly All of Last Year's Team Out.

Yesterday afternoon the 1914 baseball candidates took advantage of the ideal baseball weather and put in a hard afternoon's work at the Field. Nearly all of last year's team turned out, and the practice was very fast considering the few times the weather has permitted the men to get out. Manager Gardiner has arranged two games already, and hopes to schedule several more in a few days. Saturday afternoon the team will go to Belmont to play the Belmont High School; the following Saturday they will meet the Cambridge High School team in Cambridge. Last Spring the team had a fairly successful season, winning two out of the three games played with 1915. During the practice yesterday Morrison was in the box with Collins on the receiving end. Hardy was at first, Comber at second, Gardiner at short, and Bryant at third. In the outfield, Williams worked in center field, Dunn in the right garden, and Mackentepe in left. For the rest of the season practice will be held regularly Wednesday afternoons at the Field.

WYOMING'S MOUNTAINS.

Wyoming has a mountain nearly 14,000 feet in height. It is called Gannett Peak and is located in Fremont County, in the western part of the State. Its height above sea level, according to the United States Geological Survey, is 13,785 feet. The lowest point in the State is on Belle Fourche River, 3,100 feet above sea level. Wyoming, which has an average elevation estimated at 6,700 feet, is the second highest State in the Union, being exceeded only by Colorado.
