

THE TECH

VOL. XXXIII. NO. 161.

BOSTON, MASS., THURSDAY, MARCH 26, 1914.

PRICE TWO CENTS

BEST OF PRINTER'S ART GOES INTO TECHNIQUE

Artistic Appearance Assured by Employment of Expert Specialists.

The good appearance of a book does not depend alone upon the quality of the art work in it, nor the kind and arrangement of the type. In present day book-making there is a great deal of attention being paid to the different kinds of paper used and the artistic arrangement and study of each separate page, as well as the study of the whole. Technique 1915 has sought to reflect the spirit of the times in its makeup this year, and, as a result, the book will differ materially in appearance from the books of former years.

The first matter to be considered by the board was the selection of the paper to be used. For this purpose the printer furnished full sets of samples, printed from extracts from last year's Technique, in all sorts of inks and papers. Week after week was spent by the board in carefully going over these samples and sorting them down until they finally

(Continued on Page 3.)

NO EXTRA DRILL

Army Inspector Changes Plans—Two Hour Drill Next Week.

The two-hour drill to which the Freshmen were looking forward yesterday did not materialize on account of a change in the plans of the army inspector. The following general order was read in drill yesterday afternoon:

The Regimental Inspection will take place on Wednesday, May 6, 1914, at 3 p. m. The drills will take place on Wednesday from 3 to 5 p. m., beginning April 1. Monday and Thursday drills will be omitted after this week.

By order

L. F. Hamilton, Col. Commanding,
per C. R. Gardner, Capt. and Adj.

CLASS DAY COMMITTEE

The first meeting of the Class Day Committee will be held on Friday, March 27th, at five o'clock in Room 8, Eng. C. It is essential that all members be present as the marshals for Class Day are to be elected at this meeting.

JUNIOR CLASS PICTURE

The Junior Class picture is now on sale at the Cage. Those who hold receipts for the deposit already made can obtain the picture by presenting the receipt and the second deposit of seventy-five cents.

COMSTOCK TO SPEAK TO CHEMICAL SOCIETY

Unusually Interesting Talk On Related Sciences For Tomorrow.

This Friday evening at seven forty-five Professor Comstock will speak before the Chemical Society in the Union. Dr. Comstock is a graduate of the Institute, having received his diploma in 1904. He received his Ph.D. from the University of Basel two years after leaving the Institute, this being in 1906. He is now Professor of Theoretical Physics.

Dr. Comstock will give his talk on "Modern Physics and Chemistry," pointing out the effect of several of the most recent discoveries in Physics, and showing how these have greatly aided both Physics and Chemistry.

The speaker is a firm believer in the idea that these two sciences are a great aid to each other, and that many of these new researches in Physics will throw a great deal of light on some of the Chemical theories. Prof. Comstock is perhaps best known as an authority on the constitution of matter, and his lectures on this subject have attracted attention because of their interest and thoroughness. Every man who attends the meeting is sure to come away with a better and broader knowledge of both Physics and Chemistry.

President Dickson will make a further announcement in regard to the trip which the Society is to make to Worcester on the first of April. Some of the plants to be visited are the Norton Alundum Co., the American Steel and Wire Co., and one of the largest tanning and leather-belt manufacturing plants in New England. It is probable that the Pin and Shingle Committees will also make reports.

INTERNATIONAL NIGHT

Cosmopolitan Club Will Feature "Peace Conference."

Promptly at eight o'clock Saturday will commence the first entertainment of the Cosmopolitan Club to which admission is charged.

The "Peace Conference Act," which the committee announces as the feature of the program, will come at the last as a climax to a well selected bill of events. Following the program, there will be dancing until twelve o'clock.

Tickets, which are fifty cents and include both the entertainment and the dance, are on sale at the Cage, the Supply Room in Eng. A, or by members of the committee.

CAMBRIDGE PREACHER TO ADDRESS STUDENTS

Baptist Minister Who Attracts People With Plays To Be At Union.

The T. C. A. will have the Rev. Mr. Austin T. Kempton speak at the meeting this noon in the Union at 1.30. Mr. Kempton is pastor of the Northampton Baptist Church of Cambridge, and comes to the Institute as a T. C. A. speaker for the first time. He has chosen for his subject "True Manhood."

The T. C. A. expects to have an unusually large attendance at today's meeting, for the speaker is well known in and around Greater Boston. The various daily papers have devoted considerable space in their columns to him and his novel church methods. He has received notoriety particularly through his giving plays in his church on Sunday evenings, thereby solving one of many church problems that confront the clergyman of today. The plays are given by home talent.

INSPECTION TRIP

Today the Seniors in the departments of Civil and Electrical Engineering of Case School of Applied Science arrive in Boston to visit some of the places of interest. Professor H. B. Dates, who accompanies the Electrical Engineers, graduated from the Institute in 1894. He is now head of the Department of Electrical Engineering at Case.

CREW MEETING

Numerals To Be Awarded to Members of Class Crews.

In recognition of the past work and increasing popularity of the crew, the M. I. T. A. A. last night passed a motion to award numerals to the men rowing in the first crews of each class in the interclass races. This should prove a big incentive for men to come out and row in the spring. The first big crew meeting will be held on Wednesday, April 1, at 4.30, in the Union. At this meeting all the plans for the coming year and the possibilities of future rowing at the Institute will be discussed by the members and officers of the present boat club. New members to the club will also be admitted.

MEET POSTPONED

The Freshman-Sophomore wrestling meet which was scheduled for Saturday evening, March 28th, will be postponed one week.

Delta Upsilon won the bowling cup at Lehigh this year.

M. E. TALK HAS MANY POINTS OF INTEREST

H. K. Rowell Tells of Practical Experiences in Mill Construction.

It is seldom that the Mechanical Engineering Society has heard as practical a talk on any subject as was given yesterday afternoon on the arrangement of machinery and the distribution of power in textile mills. The speaker, Mr. H. K. Rowell, was well fitted to speak on the subject as he has designed and superintended the construction of some of the most up-to-date and efficient mills in the country.

Mr. Rowell started in by showing slides which illustrated the position of the various groups of machines with reference to each other. The arrangement should be such that as little time as possible shall be consumed in transferring the material from one machine to the next. It is also desirable to have the material travel around in a circle so far as is practicable.

Although shaft and belt driving involves less initial cost, individual electric drive has been found to work out more satisfactorily. The latter

(Continued on Page 4.)

INSTITUTE COMMITTEE

There will be a meeting of the Institute Committee this afternoon at 5 p. m. in 8 Eng. C. Plans for the general convocation to be held in the near future will be discussed. In addition to this the standing committees will report.

WEATHER

Rain today, with rising temperature; increasing south to southwest winds.

CALENDAR

Thursday, March 26, 1914.

1.30—T. C. A. Union.
4.15—Tech Show, Cast, Chorus and Ballet rehearsal. Union.
4.30—Mandolin Club. Room B. Union.
5.00—Band Meeting. Union.
5.00—Institute Committee Meeting. Room 8, Eng. C.

Friday, March 27, 1914.

5.00—Technique Electoral Committee. Room 23, Rogers.
5.00—Glee Club. Union B.
5.00—Senior Class Day Committee. Room 8, Eng. C.
7.45—Chemical Society. Union.
8.00—C. E. Society. Ladies' Night. Huntington Hall.
Saturday, March 28, 1914.
8.00—International Night. Huntington Hall.

THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

THURSDAY, MARCH 26, 1914.

IN CHARGE OF THIS ISSUE.

W. A. Houser, '15; D. H. Parker, '17; and C. H. Stebbins, '17.

The decision of the Athletic Association to award the wTt under certain conditions to members of the wrestling team is a recognition of true merit which will be welcomed by the whole Institute. The hard, regular work which these men have put in would alone entitle them to consideration in this matter, but in view of the phenomenal success which has attended their efforts, the wonder is that the grant was not made earlier.

That the Association recognizes faithful and persistent endeavor, even if unattended with good fortune, is proved by the similar decision with regard to the hockey team.

Today the Seniors of the departments of Civil and Electrical Engineering of the Case School of Applied Science, Cleveland, Ohio, come to Boston to inspect the subways and other places of interest. Ordinarily Boston is not considered a scientific metropolis nor an engineering center; but the fact that these technical students from the middle west include this city in their inspection trip suggests the importance of Boston in the engineering world.

The University of Washington expects to establish a School of Fisheries in the near future.

Penn opens her baseball schedule Saturday at Annapolis. The more northern colleges will, most of them, begin at least a week later.

COLLEGE NEWS

The Greek proprietor of a candy store at Bloomington, Ind., has sued the authorities of the University of Indiana for eighty-five dollars' damage caused by the recent celebration over the Purdue-Indiana basketball game.

The agitation for olive drab uniforms at Illinois has been postponed for a little while. The editor of the "Daily Illini" speaks of the situation as follows:

"The arguments in favor of olive drab uniforms so far overbalance those advanced against the proposition that a change to this newer type of dress seems inevitable."

Brown has organized her Interfraternity Spring Baseball League. Twenty chapters are divided into four divisions according to the scheme carried out last year. The schedule will open on the tenth of next month and is expected to finish on May 29th.

J. A. Rackiewicz, a Junior architectural student at Penn, has equaled the record established in the Intercollegiate Matches this year. Two others besides he have made a score of 192 out of a possible 200. It is said that the champion pronounces his name with the accent on the fourth syllable.

In connection with the Wellesley fire it might be remembered that Oberlin has suffered from over six conflagrations, some as serious as the recent one near Boston. Although the monetary loss might have been less, the traditions surrounding the burned buildings were equally as great.

SHOW REHEARSAL

The remaining songs of "A Royal Johnnie" will be given out at a rehearsal this afternoon. All members of the cast, the chorus, and the ballets should come today and get these lyrics, as they must be learned immediately.

Those who are in the ballets or who take part in the specialties are not to join in the song rehearsal, but are to have dancing practice under the direction of Harold O. Whitney.

TECHNIQUE BAND

The Technique Board requests that all the men who played in the band at Technique rush and any other student who can produce harmonious strains from a band instrument to report at the Union at 5 o'clock today. It is absolutely necessary that all men intending to play at the rush this year should be on hand with their instruments.

ARCHITECTS' LECTURE

Geo. Taylor, Manager of the Eastern Expanded Metal Company, will speak before the Architectural Engineering Society on "The Uses of Expanded Metal Lath." The lecture will be given on Tuesday, March 31st, at four o'clock in Room 42, Pierce.

RECENT MEETING OF ALUMNI ASSOCIATION

Association Keeps in Touch With Activities—Tech To Be Better Known Abroad.

At its last meeting the Alumni Association considered a number of important matters, including the increase of students from foreign lands. In the routine business there were a number of reports. I. W. Litchfield, who is the newly appointed field manager, outlined his proposed trip of this week to the alumni associations of Buffalo, Rochester and Syracuse, while the News Service made a brief statement of its work. Announcements were made touching the opening of the new Tech clubhouse in New York next month, of the return of Symphony Hall for the Tech Pop Concert and Mr. Keith, manager of the Tech Show, spoke concerning the presentation of it in the Boston Opera House and elsewhere. It is the custom for the Alumni Association to keep in touch with the student activities by requesting reports on them from time to time.

The principal discussion of the meeting was on means for making the name of the Institute better known in foreign countries and the spreading of Technology methods in countries other than those where it is already well known. To the point here Professor R. H. Richards said that in the mining department a new country had been of late furnishing students, namely, Russia. The first of these men came only two years ago, while today there are three Russians at Tech studying ore dressing, all of them teachers and one of them a full professor in an important Russian technical school.

Jasper Whiting, who two years ago visited the Orient armed with a commission from the Institute to look into educational methods, spoke with reference to China, saying that there is no more important country than this. The members of the government are men of Western education, and the primary aim they have in view is the education of the people.

Mr. F. T. Yeh of Foochow, one of the students at the Institute, was called upon by President Whiting to speak with reference to the point of view of his country. The young men who come to Europe and America are largely sent by the Government, which is devoting to the purpose the large amount of Boxer indemnity money returned to China by the United States government. The number of students is large, and the increase in number is shown by the tally at Tech, ten students in 1899 and forty-two today. "The future of China," said Mr. Yeh, "depends on the quality of the men who are receiving their education. These now come mostly to the United States, there being a thousand such students here, and the Institute is the favorite place for those desiring scientific training. The students have already realized the benefit to their countrymen that a knowledge of the Institute will effect, and they have al-

(Continued on Page 4.)

CROSS-COUNTRY RUN NEXT SATURDAY

Hare and Hounds To Run Over Tech Course—Field Opens Saturday.

The Hare and Hounds Club will run over the Technology course next Saturday afternoon. To add interest to the run the squad will be divided into two teams, the "Reds" and the "Grays," and a dual race run. The captains will be drawn by lot and will choose up the squads. Every man will score for his team no matter how many run so the race will not be decided until the last man finishes. A week from Saturday the Freshman-Sophomore race takes place so all men of the two lower classes who intend to try for their class teams should not fail to be on hand for this run. The time the train leaves will be announced in Saturday's TECH.

Coach Kanaly requests that all track candidates report at the Field Saturday afternoon.

Word comes from the Advisory Council that henceforth no man will be allowed to wear any insignia except class numerals unless they are officially awarded by the council.

BEST OF PRINTER'S ART GOES INTO TECHNIQUE

(Continued from Page 1.)

reached three sheets which appeared to be more attractive and better adapted to the purposes of Technique than all the others. For the final decision the printer was called in and he gave the board his reasons for his choice of the three. The paper selected was not one kept in stock as it was a new paper upon the market, so that all paper used in this year's edition has been made to order. The ink chosen at this same time was also something new, requiring a long, slow drying process, but giving the best results obtainable in the printing art.

Thus equipped, the board felt it well worth their while to devote a great deal of time to the careful consideration of all of the printed work in the book. The services of a man who had made a study of book arrangement were secured, that he might advise the board when they were not certain as to the proper treatment of a page. It was felt that one of the main criticisms of the books of former years was the fact that the pages had a tendency to appear loose and carelessly arranged. To avoid this, where the scarcity of material on a page would inevitably give this appearance, a most novel and interesting device was adopted which pulls the whole book together as well as lends the necessary touch which makes each page complete. This is but one of the many ways in which Technique 1915 has set about to turn out a book new, different and attractive.

From beginning to end this year's book may be said to represent most careful study to the end that it may be a book worthy of the name of Technology.

M. E. TALK HAS MANY POINTS OF INTEREST

(Continued from Page 1.)

is especially desirable in the picking room of cotton mills. Twelve hundred revolutions is about the right speed for a picker and it is best obtained from an overhead motor with a stepped pulley and belt. The belt gives an easy start and greatly reduces the liability of breakage. The motors, having about five horsepower, are light and may be fastened anywhere to the ceiling. One of the chief advantages of this kind of drive is that it minimizes and localizes trouble. With shaft driving it was necessary to close down the whole plant if the main driving belt or some part of the shafting broke.

The speaker next told of a woolen mill in Torrington, Conn., which was designed by himself and which the owners declare has given them perfect satisfaction in everything but a few minor details. One of the features of the plant is the utilization of the exhaust steam from the power plant to heat the factory and obtain hot water for the dye house. This system has been found to be very economical and convenient.

To illustrate the difference between shaft driving and motor driving, a concrete example was cited from this factory. The company wished to keep a number of shaft driven looms which they had on hand and so part of the looms were shaft driven and part were motor driven. The motor driven looms proved to be about five percent more efficient.

RECENT MEETING OF ALUMNI ASSOCIATION

(Continued from Page 3.)

ready sent to China on their own account translations of portions of the catalogue of the Institute that seem suitable for the purpose.

Referring to the field in South America for technical men, President Whiting introduced first President Maclaurin and then Commissioner of Public Works Louis K. Rourke. Dr. Maclaurin noted how South America looks to Europe for its men and its manufactures, and suggested that the way to alter this relationship is to bring bright young men to this country for their education. Mr. Rourke spoke from an experience of more than a dozen years in South American countries. "The most sensible thing that has yet been done," he said, "was when the Chamber of Commerce of Boston sent its delegation to South America." Thus far it had been the custom to treat South Americans with a patronizing air, but before results can be secured this attitude must be changed. "There is no better place in the world," he continued, "with better prospects for the engineer."

The Alumni Council voted for a committee to be appointed by President Whiting to take up the matter of foreign publicity for Technology.

Tuxedo — the Most Enjoyable and the Most Healthful Smoke

THE most enjoyable smoke is a pipe. But many men deny themselves this pleasure because they have had unhappy experiences with pipe tobaccos.

Likely you have paid 35 cents to 50 cents for a tin of "fancy mixture," and it burned your mouth or throat, or was unpleasantly strong.

Too bad—but you got the wrong tobacco. The hundreds of thousands of men who have tried

Tuxedo

The Perfect Tobacco for Pipe and Cigaretts

have found the answer to their smoke problems. Tuxedo is the mildest tobacco made. It cannot bite the tongue or dry the throat.

You can't get any better tobacco because nothing better grows than the mellow, perfectly aged Burley leaf used in Tuxedo.

If you try Tuxedo for a month and cut out other smokes, you will not only have had the best month of smoking you have ever had in your life, but you will have made a mighty big saving in your pocket money!

YOU CAN BUY TUXEDO EVERYWHERE

Convenient pouch, inner-lined with moisture-proof paper 5c Famous green tin, with gold lettering, curved to fit pocket 10c

In Glass Humidors, 50c and 90c

FREE Send us 2 cents in stamps for postage and we will mail you a souvenir tin of TUXEDO tobacco to any point in the United States. Address
