COMSTOCK TO SPEAK TO CHEMICAL SOCIETY

Unusually Interesting Talk On Related Sciences For Tomorrow.

This Friday evening at seven forty-five Professor Comstock will speak before the Chemical Society in the Union. Dr. Comstock is a graduate of the Institute, having received his diploma in 1894. He received his Ph.D. from the University of Basel two years after leaving the Institute, which he entered in 1896. He is now Professor of Theoretical Physics.

Dr. Comstock will give his talk on "Modern Physics and Chemistry," pointing out the effect of several of the latest and recent discoveries in Physics, and showing how these have greatly aided both Physics and Chemistry.

The speaker is a firm believer in the idea that these two sciences are a great aid to each other, and that many of these new researches in Physics will throw a great deal of light on some of the Chemical theories. Prof. Comstock is perhaps known as an authority on the constitution of matter, and his lectures on this subject have attracted attention because of their interest and thoroughness. Everyone who attends the meeting is sure to come away with a better and broader knowledge of both Physics and Chemistry.

President Dickson will make a further announcement in regard to the trip which the Society is to make to Worcester on the first of April. Some of the plants to be visited are the Norton Alumina Co., the American Steel and Wire Co., and one of the largest tanning and leather-belt manufacturing plants in New England. It is probable that the Pin and Shingle Committee will also make reports.

INTERNATIONAL NIGHT

Cosmopolitan Club Will Feature "Peace Conference."

Promptly at eight o'clock Saturday morning the members of the Cosmopolitan Club will meet in the Union, and the meeting will be opened with a song. Dr. H. B. Dates, who accompanied the Electrical Engineers, graduated from the Institute in 1894. He is now head of the Department of Electrical Engineering at Case.

In recognition of his past work and increasing popularity of the crew, the M. I. T. A. A. last night passed a motion to award annual medals to the men rowing in the first crews of each class in the interclass races. This should prove a big incentive for men to come out and row in the spring. The first bic crew meeting will be held on Wednesday, April 1, at 4:30, in the Union. At this meeting all the plans for the coming year and the possibilities of future rowing will be discussed by the members and officers of the present boat club. New members to the club will also be admitted.

MEET POSTPONED

The Freshman-Sophomore wrestling meet, which was scheduled for Saturday evening, March 28th, will be postponed one week.

Delta Upsilon won the bowling cup at Lehigh this year.

ARTISTIC APPEARANCE ASSURED BY EMPLOYMENT OF EXPERT SPECIALISTS.

The good appearance of a book does not depend alone upon the quality of the art work in it, nor the kind and arrangement of the type. In present day book-making there is a great deal of attention being paid to the different kinds of paper used and the artistic arrangement and study of each separate page, as well as the study of the whole. Technique 1915 has sought to reflect the spirit of the times in its makeup this year, and, as a result, the book will differ materially in appearance from the books of former years.

The first matter to be considered by the board was the selection of the paper to be used. For this purpose the printer furnished full sets of samples, printed from extracts from last year's " Technique," in all sorts of inks and papers. Week after week was spent by the board in carefully going over these samples and sorting them down until they finally

NO EXTRA DRILL.

Army Inspector Changes Plans—Two Hour Drill Next Week.

The two-hour drill to which the freshmen were looking forward yesterday did not materialize on account of a change in the plans of the army inspector. The following general order was read in drill yesterday afternoon:

The Regimental Inspection will take place on Wednesday, May 6, 1914, at 8 p.m. The drills will take place on Wednesday from 3 to 6 p.m., beginning April 1. Monday and Thursday drills will be omitted after this week.

By order
L. F. Hamilton, Col. Commanding,
per C. R. Gardner, Capt. and Adj.

CLASS DAY COMMITTEE

The first meeting of the Class Day Committee will be held on Friday, March 31st, at five o'clock in 31 won E, Eng. C. It is essential that all members be present as the marshals for Class Day are to be elected at this meeting.

JUNIOR CLASS PICTURE

The Junior Class picture is now on sale at the Class. Those who hold receipts for the deposit already made can obtain the picture by presenting the receipt and the second deposit of seventy-five cents.

CAMBRIDGE PREACHER TO ADDRESS STUDENTS

Baptist Minister Who Attracts People With Plays To Be At Union.

The T. C. A. will have the Rev. Mr. Austin T. Kempston speak at the meeting this noon in the Union at 12:30. Mr. Kempston is pastor of the Northampton Baptist Church of Cambridge, and comes to the Institute as a T. C. A. speaker for the first time. He has chosen for his subject, "True Mauindy," which the T. C. A. expects to have an unusually large attendance at today's meeting, for the speaker is well known in and around Greater Boston.

The various daily papers have devoted considerable space in their columns to him and his novel church methods. He has received notably particularly through his giving plays in his church on Sunday evenings, thereby solving one of many church problems that confront the clergyman of today. The plays are given by home talent.

INSPECTION TRIP

Today the Seniors in the departments of Civil and Electrical Engineering of Case School of Applied Science arrive in Boston to visit some of the places of interest. Professor H. R. Dates, who accompanied the Electrical Engineers, graduated from the Institute in 1894. He is now head of the Department of Electrical Engineering at Case.

CREW MEETING

Numerals To Be Awarded to Members of Class Crews.

M. E. TALK HAS MANY POINTS OF INTEREST

H. K. Rowell Tells of Practical Experiences in Mill Construction.

It is seldom that the Mechanical Engineering Society has heard as practical a talk on any subject as was given yesterday afternoon on the arrangement of machinery and the distribution of power in textile mills. The speaker, Mr. H. K. Rowell, was well fitted to speak on the subject as he has devoted a great deal of time to the construction of some of the most up-to-date and efficient mills in the country.

Mr. Rowell started in by showing slides which illustrated the position of the various groups of machines with reference to each other. The arrangement should be such that as little time as possible shall be consumed in transferring the material from one machine to the next. It is also desirable to have the material travel around in a circle as far as is practicable.

Although shaft and belt driving involves less initial cost, individual electric drive has been found to work out more satisfactorily. The latter

Saturday, March 28, 1914.
8.00—International Night. Huntington Hall.
The decision of the Athletic Association to award the W.T. under certain conditions to members of the wrestling team is a recognition of true merit which will be welcomed by the whole Institute. The hard, regular work which these men have put in would alone entitle them to the recognition in this matter, but in putting this into effect the consideration of their true merit which will be welcomed. The wrestling team is a recognition of the hard, true merit which will be welcomed.

Every stroke counts!

It was a happy stroke of ours that put Fatimas cigarettes first of all in the college towns. Everybody liked those Pure, splendid tobacco—"mighty good"! And today more Fatimas are sold in this country than any other brand of cigarettes.

Simple, inexpensive package—quality all in the tobacco.

Every stroke counts when you are out to win!

THE TECH UNION BARBER SHOP.
Tuxedo—the Most Enjoyable and the Most Healthful Smoke

The most enjoyable smoke is a pipe. But many men deny themselves this pleasure because they have had unhappy experiences with pipe tobaccos.

Likely you have paid 35 cents to 50 cents for a tin of "fancy mixture," and it burned your mouth or throat, or was unpleasantly strong. Too bad—but you got the wrong tobacco. The hundreds of thousands of men who have tried Tuxedo have found the answer to their smoke problems. Tuxedo is the mildest tobacco made. It cannot bite the tongue or dry the throat. You can't get any better tobacco because nothing better grows than the mellow, perfectly aged Burley leaf used in Tuxedo.

If you try Tuxedo for a month and cut out other smokes, you will not only have had the best month of smoking you have ever had in your life, but you will have made a mighty big saving in your pocket money!

YOU CAN BUY TUXEDO EVERYWHERE

Convenient pack. Tuxedo is cored 5c

FREE

Send us 2 cents in stamps for postage and we will mail you a free coupon for TUXEDO tobacco to any point in the United States. Address
