BOSTON, MASS., SATURDAY, MARCH 28, 1914.

PRICE TWO CENTS

C. E. FOX ELECTED CLASS DAY MARSHAL

Duffield, Second Marshal, and Guething Third—Policies of Committees Outlined.

At the Class Day Electoral Committee held yesterday afternoon, C. E. Fox was elected first marshal, T. H. Duffield, second marshal, T. H. Guething, third marshal. J. M. White was elected secretary and E. E. Dawson, treasurer.

Murdock, '13, then outlined the policies of each of the various committees. These committees consist of the Class Day Committee of five, the chairman of which is the second marshal; the Dinner Committee, the chairman of which is the third marshal; the Dance Committee of five men; and the Printing, Picnic, and Sermon Committees of one man each. The following were nominated for the Class Day Committee; V. Tallman, C. P. Fiske, A. C. Dorrance, D. L. Sutherland, W. P. Keith, H. W. Treat, T. J. Duffield, and A. F. Peaslee. Owing to the shortness of time, no election took place.

The picture of the Class Day Committee will be taken Thursday at four P. M. at Hearn's Studio. The next meeting of the committee will be held on Monday at five o'clock in the Union.

M. I. T. A. A. MEETING

Decide Rules Whereby Wrestling and Hockey Men Get Their "T."

At the meeting of the M. I. T. Athletic Association held last Tuesday, certain qualifications were determined for awarding the "T" to members of the hockey and wrestling teams. The requirements were unanimously accepted by the Athletic Association but before they can go into effect they must be ratified by the Advisory Council. The qualifications were as follows: Members of the hockey team, in order to receive the letter, must be members of a team that has won three-fourths of all the college games played during the year. At least six different college games must be played.

Each member of the wrestling team, to get his "T," must win two-thirds of his bouts in intercollegiate competitions, and must participate in three-fourths of all the meets of the season, including at least three with colleges. He must also be a member of a team winning two-thirds of all its meets and three-fourths of all college meets, including one with Harvard or Yale.

New York University's Gym team is champion of the team and individual divisions as a result of the dual meet at New Haven Thursday.

CIVILS HEAR TALK ON ROAD BUILDING

Mr. Perkins Shows Many Interesting Views of Construction Work.

The meeting of the Civil Engineering Society, held last evening in Huntington Hall, was very well attended and, despite the unfavorable weather conditions, several members of the fair sex were present. Mr. Perkins, Superintendent of the refineries of the Warren Bros. Co., which is a well known road building company, was the speaker of the evening and spoke about the composition, laying and life of the roads used today.

Pres. Morrill, of the Society, opened the meeting and gave a few introductory remarks on the problem of roads versus automobiles. Mr. Perkins first gave a short account of the history of road building and stated that bicycles were the first cause of better road building. This was shown by the number of cinder paths that were built for the benefit of bicyclists. Colonel Pope was the prime mover in this road scheme and he afterward put much attention to better roads in general. Macadam, however, was the first to advance the first law of good roads—complete foundation drainage. The water which collects under a road works through it and speedy disintegration results. At first, asphalt on the top of the road was used, but this was little more than a dust layer and while satisfactory for automobiles was unable to stand up under teaming for here the heavy wheels cut into and broke off pieces of the surface, after which the autos brushed the pieces aside.

He next took up the various kinds of road mixtures used today and discussed their composition and the effect of the composition on the road's wearing qualities. If the mixture contains too large a proportion of fine material or coarse material "voids"

(Continued on Page 3.)

FRESHMAN PRACTICE

1917 Baseball Squad Will Start Outdoor Practice Monday.

The freshman baseball practice will start in earnest next Monday at Tech Field. By that time it will be suitable for practice. This week all the candidates and especially the pitchers have been working out at the open space next to the Gym. No opinion can yet be formed as to the calibre of the men but a more definite idea can be obtained when outdoor practice starts. In case the practice time is changed it will be posted in THE TECH before Monday. The season will start April 4 when the Freshmen play Hyde Park High or St. John's Prep. But it is likely that the former will be played.

SHOW APPLICATIONS DUE TODAY

Best Seats To Be Allotted To Those Who Apply Before Five O'Clock.

The best seats at "A Royal Johnnie" will be allotted to those whose applications are received before five o'clock this afternoon. If any tickets are left after that time they will be sold at the Tech Show office next week. As a large number of applications have already been received, any seats that are obtained after the first distribution must necessarily be well toward the rear of the house.

ARTHUR T. MUNYAN, '15.

Any applications that are made out today should not be mailed, but left at the Show office, addressed to Arthur T. Munyan, Treasurer Tech Show, 1914. In order to prevent mistakes these must be legibly filled out, preferably printed. The space after "Class" should contain the class letter, as explained in the circular of information, and not the year of the student. These circulars, together with the rest of the material, may be obtained at the Union.

Seats at any of the five performances may be applied for, and excursion rates will hold for trips to the outside towns. Information regarding these rates may be obtained at the Show office.

Students are again urged to apply for afternoon seats, as a great many applications have come in from alumni who are unable to attend any but an evening performance.

WEATHER

For Boston and vicinity: Probably rain today, lowering temperature; moderate variable winds.

Cambridge captured the Annual Track and Field Games held with Oxford. Rhodes scholars showed up well in several events.

INTERNATIONAL NIGHT PROGRAM ANNOUNCED

Entertainment Will Be Followed By An Informal Dance In The Union.

The program of "International Night," which a large number of the Institute men are so expectantly awaiting, has at last been announced and gives promise of being even better than the most favorable conjectures concerning it. It has been arranged as follows:

Violin Selections,
"Chinese Schooldays,"
Banjo Duets,
Sword Dance,
Tenor Solo,
"Magic,"

The Argentine Tango,
"International Conference,"
Dance at the Union—10 o'clock.

Everyone who had the good fortune to attend "Chinese Night" last November will remember how comical was the scene in a Chinese school room. The fact is, it was so good that it is to be given by request as the second number on the program tonight. The author has revised it so that it will not only be more enjoyable than before, but it will also contain new interest for those who have seen it.

The Sword Dance is to be given by an unknown person who, it is rumored, is a relative of "Mr. Smith." This is to be absolutely his first and last appearance on the stage, as it was with the utmost difficulty that he was persuaded to appear.

The "Magic" that is to be presented is the result of research of one of the students here, who has perplexed large audiences of men of science many times in this country.

Those who attend tonight will have an excellent chance to see the "Argentine Tango" as it really is. A few of the South American students have made a special study of it and will also give some Spanish dances.

"International Conference" is a play that will make you laugh but is at the same time serious. The time of the conference is in 1965, the fiftieth anniversary of the "New Technology." Germany and England are at war. The other nations of the world are

(Continued on Page 3.)

SATURDAY, MARCH 28, 1914.

IN CHARGE OF THIS ISSUE

Editors: B. N. Stimets, '16; W. F. Johnson, '17.

Assistant: J. F. Maguire, '16.

The decision of the Athletic Association to award the T under certain conditions to members of the hockey and wrestling teams, which we recently endorsed in these columns, is shortly to come before the Advisory Council for approval. It is our earnest hope and, we believe, that of the great majority of supporters of Technology athletics, that it will be ratified.

The men in the activities concerned, like all others who are working for a cause, will be spurred on and aided by having a definite goal to work up to. An instance in support of this is the sudden slump of the hockey team immediately after its failure to secure the award of the T at a time when it was at the zenith of its success.

While it is the duty of an Advisory Council to be conservative at all times, we think that to grant the insignia under the arduous conditions stated in another part of this issue would not be a dangerously radical step. This view is supported by the unanimous vote cast by the Association in favor of it.

On the last day for filing Tech Show applications, we should not forget that there are other performances besides those in Boston, and that trips with the Show to other points have in the past been attended with much jollity.

Seven basketball "C's" were awarded Thursday at Columbia.

COLLEGE NEWS

This week is the anniversary of the great floods of the Ohio river, which began March 22nd of last year. The flood did especially great damage at Purdue University. Buildings were in many cases wrecked by the force of the waters. One student lost his life trying to rescue parties from flooded buildings.

Penn has ordered the "Bowl" for the annual "Bowl Fight," which will take place this year on the seventh of April. The committee on the affair expect to introduce several innovations but these cannot be decided until the "Bowl" comes.

Data, which has been collected by the College of Engineering at Purdue and is soon to be published in the Alumni Register of the University, shows that only 173 of the engineering graduates have not followed their professional work. The remainder or about 90% of the 2165 alumni are engaged in engineering or architectural vocations.

The Chicago Tribune last week devoted about half a column a day to lauding Chicago University's chances in the Western Conference track meet. When Illinois walked away with the meet leaving Chicago a poor third the Tribune did not even publish a news note of the result. Illinois authorities "wonder why."

Dean Calvin H. Crouch of the College of Engineering at North Dakota is visiting many of the technical schools in the upper Mississippi valley, preparatory to enlarging the courses at his institution.

The first conference of Ohio State alumni takes place yesterday and today in the Ohio Union. One hundred and twenty-five speakers are scheduled for these two days. The program, which began yesterday at two, called for speeches by the eleven deans during the afternoon. At the evening session eighty-eight one-minute talks were to be given.

FACULTY NOTICES

Fourth Year.

Exercises in Electric Wiring of Buildings will be held Mondays at 9 in 26 Lowell and Thursdays at 12, in 23A Lowell, beginning Thursday, April 2nd.

WALTER HUMPHREYS,
Registrar.

First Year—Course IV.

The exercise in Shades and Shadows scheduled on the Tabular View for Monday 2-3 has been transferred to Tuesday 9-10. The first exercise will be on Thursday, April 2, in room 40A Pierce. Students may obtain the textbooks of Miss Whipple in Room 35 Pierce; price 40 cents. For the first exercise prepare as far as paragraph 32. Bring to each exercise a small T-square, triangle, scale, instruments, thumb-tacks, etc. Paper will be furnished.

WALTER HUMPHREYS,
Registrar.

FRESHMEN ELECT

This afternoon, at 1.15, in the Union, the Freshman wrestling squad will meet to elect a captain for the Freshman-Sophomore meet.

BINDING OF TECHNIQUE ON PAR WITH THE BOOK

Will Be Covered With Rich Ooze Leather—Book Has Now Gone To Printer.

Technique 1915 is all on the press. Today saw the last forms set up and as the work of printing has been going on for some time, those departments which were prepared earlier having already been printed the book will soon be in the binders' hands.

As with all other parts of the book, the board has spent a great deal of time in the selection of their binding. This year's book will be all that the name "de luxe" implies. Rich ooze leather is being used and the form of binding adopted is lasting and durable. As to color and arrangement of the cover itself the board refuses to divulge anything but the assurance that the cover will be a fitting container for the work that is within.

The writing and proof-reading has been a big task, and to see it so soon and so well completed is a thing for which the board is indeed thankful, for there were times when the material came in very slowly. Certain individuals, not appreciating the need of immediate action, have, through their carelessness, caused the board much extra work.

From now until the book comes out on the fifteenth of April the board will devote all their time to working up plans for the rush. Ideas as developed so far promise some interesting schemes by which the anxious student striving to obtain the first Technique will find the path strewn with anything but roses, but, the board asserts, he will find his mighty struggles amply rewarded when he opens the box containing the first copy of the wonderful production of Technique 1915.

INTERNATIONAL NIGHT

(Continued From Page 1.)

meeting in Boston to try to bring about peace. The nations of South America have united to form the South American Union and Africa is divided into two countries—the North African League, and the South African League. Albania is a strong nation; the women there are in the ascendancy and a woman is at the head of the government.

The entertainment will start promptly at eight o'clock in order that the dancing may begin before ten o'clock. The whole affair will be informal. The matrons of the dance are: Mrs. A. E. Burton, Mrs. C. M. Spofford and Mrs. R. P. Bigelow.

A homelike, first-class hotel, proud of New England traditions, dating from Gen. Warren, yet newly furnished with every comfort & convenience.

or air spaces result which cannot be easily filled and which allow the surface to shift and go to pieces. A better proportioned mixture, but one which varies according to the size and quality of the materials to be obtained, is one that has enough large material to fit quite solidly together and enough small material to fit into and fill the intervening spaces. Unless this is the case water goes through it, the material shifts and soon there is a hole in the road. A striking example of the difference in wearing qualities of the Bitulithic, as the better mixture is called, and the Asphalt Macadam which contains a large proportion of large stone, is shown by the Commonwealth Avenue road on the intown stretch at Naples Road near the Packard Auto Building in Allston. Here the Warren Company put in a stretch of road using a special binder of their own called Warrenite, and the road today is in as good condition as when it was laid over two years ago, while the adjoining road had holes in it within two months after completion.

The Warrenite is laid while it is still hot and after it is laid, a three-ton load of the material may be driven over it, even before it is rolled. This is done while it is still warm without leaving any bad depressions and a road may be open to traffic immediately after the steam roller has finished. Crushed stone or gravel may be used for the coarse material and on a road in Maryland oyster shells were successfully used.

Mr. Perkins had several motion picture films which showed the mixing of the material and laying of the roads. Several portable mixers were shown, one of which was built on a railroad car. A much used form is, however, the truck. With the type used four batches can be taken care of at once. The first batch is measured out in wheelbarrows and is ready for the machine, the second is in the hopper of the machine, the third is in the heater, for the material is warmed first, and the fourth is in the mixer. After this is transferred to the wagons, each batch is advanced on a place. Thus a constant flow of material is kept up. After the mixture is laid a film of the fluid is poured over the top and fine crushed stone is then spread over it, after which it is rolled.

Mr. Perkins then showed some slides showing how the composition stood up under the trying conditions of the flood in the middle states where some stretches were several feet under water, and other stretches were undermined for distances of six to eight feet without the material breaking up.

SHOW REHEARSAL

Owing to a misunderstanding, the rehearsal which was announced in yesterday's THE TECH was not held. There is, however, to be a very important rehearsal at 2.15 this afternoon. All members of every department are expected to report.

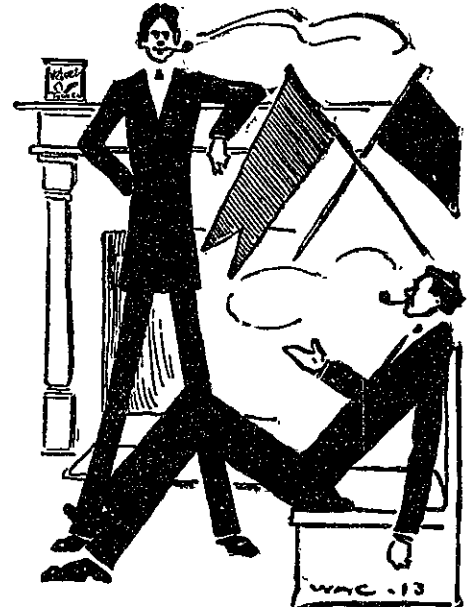

Velvet

THE SMOOTHEST TOBACCO

All the comforts—

When good fellows get together—then Velvet is supreme. This superb leaf has hung in the warehouse over two years—a tremendous change—all harshness is nullified—the leaf grows rich—remarkably smooth—and in the pipe, Ye gods! what a smoke! It's too smooth to bite—too mellow to be anything but the best smoke on earth. That's why it's called Velvet. One tin is a revelation. At all dealers.

**ANNUAL SPRING CROSS-
 COUNTRY RUN**

Train Leaves Back Bay At Two-
 Forty—Large Number Ex-
 pected To Run.

The spring run of the Hare and Hound Club takes place today and is expected to draw a large number of men. In addition to the regular squad, a large number of men who have not been doing any running, have signified their intention of coming out. This year marks a new departure in the form this run will take. Heretofore it has been an inter-course race, but this was so on-sided that interest lagged. Beginning this year the squad that goes out will be divided up into two teams of equal strength making the race more even. Since every man that runs will score it will be an incentive to every man to do his best no matter how far back he is.

Next Saturday comes the Freshman-Sophomore race. Today's run will be the first and only chance for men who intend to enter the inter-class run to get acquainted with the course, which is likely to be changed somewhat since last year as many houses are being built and roads cut at the start. In addition many men have been induced to consider taking the run as it will be excellent training for them. The fine weather of the last week has dried out the ground sufficiently so that the footing is fairly firm and free from mud.

The men will leave the Back Bay station at 2.40 for Newton Highland where the run starts. The first part is up hill with rather rough going as several sunken roads have to be crossed. From this point on, the course lies through fields with rolling hills and a few fences. The last mile and a half is road work ending up with a lap around the track at the field. The length of the run is four and a half miles and will probably allow the men to finish by four o'clock. The fare for the round trip will be twenty-five cents.

SPRING MEET

First Outdoor Meet of the Season To Be Held in Junior Week.

The first outdoor meet of the season, the Spring Meet, will be held at Tech Field on Friday, April 17, at 10 o'clock. This is one of the most important meets of the year. In the first place it enables the coach to get a line on the men, to find out just who will represent Tech in the future meets. In the second place, every man who wins a first place is award-

ed a aTa. Thirdly, three cups, offered by members of the Alumni, are to be contested for. These cups are the Hurd Cup, to be awarded in the high hurdles; the Batchelder Cup, to be awarded in the one mile run, and the In all, fourteen events will be contested. These include the 100 and 200 yard dashes; the quarter, half, mile, and two mile runs; the 120 and 220 yard hurdles; the shot put, hammer throw, discus, high jump, broad jump, and pole vault. As an added attraction the 1914 relay team will attempt to break the track record.

TECHNIQUE BAND

All men who played in the band at the Technique rush last year as well as all other men in the 'Stute who can play any musical instrument, are requested to meet at the Union at 5 o'clock Monday.

EPISCOPAL DINNER

There will be an informal dinner for Tech Episcopals next Tuesday evening in the Trinity House, 93 St. James Avenue, at 6.30 o'clock. Tickets may be had from Messrs. Casselman, Barratt and Dowell for the sum of 50 cents.

The speaker of the evening will be Rev. F. C. Tanderburn, Vicar of St. Stephens. Plans for the observance of Holy Week and the Corporate Communion for Tech men on Easter will be discussed.
