T.

The T. C. A. Asks For Men
to Help Incoming Freshmen.

The New Student Work Committee
in the Techmen connected Act-

met last Wednesday, and made

plans for next year's Freshmen.

Summer of the T. C. A. did very

extensive work for the new men just enter-

ing. Many men, their atten-

ions in the Institute, answered the

call for volunteers, or were asked by

officers of the association to write let-

ting to prospective and incoming stu-

dents, offering them aid and making

arrangements to help them register at

the University.

This year the T. C. A. again asks

for the co-operation of all. The

committee hopes that as many as

possible will be able to go to work

in the summer. This will be

more important this year than ever,

because of the incoming Freshmen

will help them. The work will

take place in the Student Work

Committee.

The New Student Work Committee
met last Wednesday, and made

plans for next year. Several

To a casual observer the class spirit prevailing in the Institute might seem to be a negative quantity. It is true it is not measured for the most part in the criticism of class officers and aspirations as to what sort of a scheme the class treasurer will evolve next to facilitate the collection of dues. This is all very well, provided the criticism is constructive rather than destructive, but there is a far better way to manifest class spirit, namely, get out to the Field this afternoon and cheer your fellow class-mates, who are doing all in their power to uphold the honor of the class.

This matter of supporting athletic teams is one in which the students of the Institute are sadly deficient. They, at least, have the reputation for having no regard for the honor of their class to get out and do their best to support the athletes. We do not recommend that every man of the class should get out and endeavor to win points by personal effort, but we do recommend that every man of the class should get out and support the efforts of those who are doing all in their power to uphold the honor of the class.

The men who are entered in the various events are showing the spirit of the Institute. They are by far superior to the horse teams and to the motor vehicles pointed out that the motor vehicles are often as dependent on the cheering of the students as on the work of the athletes. We do not recommend that every man of the class should get out and support the efforts of the horse teams and the motor vehicles, but we do recommend that every man of the class should get out and support the efforts of those who are doing all in their power to uphold the honor of the class.
MECHANICALS HEAR INTERESTING TALK

Mr. J. W. F. Macdonald Describes Manufacture of Modern Boilers.

At 4:15 P.M. yesterday afternoon, the Mechanical Engineering Society held a meeting in 11 Board, when they were addressed by Mr. J. W. F. Macdonald of the International Boiler Works of South Framingham. The subject of Mr. Macdonald's talk was "Modern Boiler Making Practice," and it was excellently illustrated with slides made from photographs taken at the works in Framingham.

Mr. Macdonald began his address by first showing the slides of the factories themselves, and then those showing the entire process of manufacturing the boilers and works, said the speaker, are not necessarily repulsive to engineers and designers, but are necessarily repulsive to engineers and designers, and that is the process of manufacturing boilers. The slides show the entire process, from the handling of the materials to the final testing of the finished product. The International Boiler Works were designed specifically for the manufacture of boilers, and the entire plant is made up of steel structures, reinforced with concrete.

In any modern boiler plant the inspection of storage must be especially attended to. At Framingham the rivets are stored in five separate bins, and the slides are designated on the outside of the bins. All plates are stored in racks made for the purpose, and they are all kept by the State inspectors before being placed in the racks.

The first and most important step in the manufacture of boilers is that of the layout of the plant. All the plates and parts are first brought to the laying out benches after being finished in the various departments. When the plates are all marked out they are passed to the splitting shears, and here they are trimmed up exactly to size. They are then brought to the punching shears, and here all the holes are punched. All holes punched must be smaller than the finished size in order that they can be reamed to give a tight fit.

All steps in the manufacture were carefully outlined and several tests were described showing the advantages and disadvantages of certain types of boilers. A large number of slides were shown of modern boilers being installed in the different parts of the country by the International Boiler Works.

INSTITUTE COMMITTEE.

(Continued from Page 1, Col. 1.)

then taking up in connection with this the following motion was passed: If a representative of any class, society or activity is absent from two consecutive meetings of the Institute committees, the representation thereof shall immediately lose all representation on the committee, which activity shall not be reinstated until the Institute Committee shall have received from the executive of the activity in question a formal petition for reinstatement; the committee to pass upon the same in conjunction with the requirements for admission to the Institute Committee as stated in the Constitution.

This motion is to be interpreted to mean that if one of the representatives of the classes is absent from two consecutive meetings the class will lose its representation.

There will be a special meeting of the committee next Friday to further discuss this By-Law. The following were absent: C. T. Guesling, T. C. Jewett, Constable, H. S. and Allbee.
MEETING OF CHINESE CLUB THIS AFTERNOON

Six Members to Participate in Debate on Timely Subject

This afternoon, at 3 o'clock, the Chinese Club will hold an important meeting in the Union. After the regular business has been attended to, a debate, given in English, will take place between six of the members of the society. The subject to be discussed is "What is Christianity?" The debate will be attended by Chinese students and will probably be debated with a great show of interest by the attendants. Resolution A: "Christianity is not a religion." Resolution B: "Christianity is a religion." The affirmative will be put forward by C. C. Tseng, of the Chefoo Mission. The negative side will be upheld by M. C. Hoo, of the Nanking Mission. The judges are to be appointed at the meeting.

T. C. A. VOLUNTEERS

(Continued from Page 1, Col. 3, V.

It will be their duty as advisors to secure the freshmen at various times throughout the year and give them any aid and make helpful suggestions when necessary.

Men who are willing to assume this position of advisor to新生men are asked to communicate with the T. C. A., either through the Secretary, C. R. Colwell, who can easily be found in the T. C. A. offices in B. G. or any other of the association's officers.

HARVARD CHOIR

The Appleton Chapel Choir of Harvard University, consisting of 25 male voices, will sing at the Central Church (Congregational), corner of Berkeley and Newbury streets, at the teatime service this coming Sunday, April 27th, at 4:30 P. M.

The selections will be as follows:

"Lo, How a Rose E'er Blooming." (Handel: "Allegro" No. 2.)
"Hymn of Venus." (Bach: "Choral No. 15.
"Domine Noster." (Hassler: "Cantate Domino.
"Lo, How a Rose E'er Blooming." (Proutorius: "Lo, How a Rose E'er Blooming.
"Sane: "Domine Noster." (Sane: "Domine Noster.

This will be the first appearance of the Appleton Chapel Choir in the Boston area. All those selections will be sung a cappella. The choir will also be accompanied by organ music and a string ensemble. The service is open to the public.
