Generous Handicaps to Be Given

New Men—Admission Will Be Free.

Saturday afternoon of this week, at 2:30, a handicap meet will be held at the Field. This meet is to be conducted, similar to those of last fall, and to those held in the Gym during the winter. All of the regular events will be polled off, including the runs, hurdles and field events.

The idea of having these handicap meets is to give the fellows on the track more experience in both competitive races, especially the new men. Many of these fellows, it is believed, will improve greatly into powerful runners, but as yet they have not awakened to that fact as they have with no opportunity to really exert themselves and do their best. These weekly competitive races are expected to go a long way toward bringing out the fight and grit still hidden in these men.

The old men in the scratch events have had their days, perhaps, because they are always given as easy winners, but in these handicap races they are required to court themselves fully in order to come home among the leaders. The handicap on Saturday will be given generously to the new men, not only in order to give them a fair chance of winning against the older ones, but to bring out the best running qualities of the 'Varisty men. The only events that will not require any record-breaking starts by the regular track men to win will be the field events, in which there is a lack of fast-class trained men.

BOWLING LEAGUE.

The standing in the Technology Bowling League is as follows:

ECONOMICS CLUB.

The recently organized Economics Club is making plans for an important meeting this noon at 1:30 o'clock in Room S, Engineering. The officers of the club wish to have as many members of the club to attend, and also any other student interested in finance, economics, and the principles of economic, social and political problems.

ARCHITECTS' MEETING.

The meeting of the Architectural Society has been postponed until further notice, and the regular monthly officers will take place at this meeting.

As effort will be made to hold a track meet at the Field, the record will not now until the N. E., I. C. meet.

HANDICAP MEET AT FIELD ON SATURDAY

LAST T. C. A. TALK TO BE GIVEN THURSDAY

Rev. Mr. Allan A. Stockdale Will Answer Questions Asked by Students.

Next Thursday noon the last T. C. A. talk of the year will be given by the Rev. Mr. Allan A. Stockdale, of the Cambridge Congregational Church, this city. Rev. Mr. Stockdale is to no means unknown to Institute folk, as last year he gave a talk in the form of a series of answers to questions asked by various men. The talk was as interesting as it was instructive, and there was very well received by the large number of men who attended in the Union to hear his discussion of vital questions pertaining particularly to student life.

This year Mr. Stockdale again consented to conduct a "Question Box," and accordingly T. C. A. issued a call for questions. The questions have been as numerous as to where and there is plenty of opportunity to send in a few more. Preference will be given to students in their first two years in the School.

Of the questions already sent in several are very good, and refer particularly to Institute life and conditions. A few are even better, so any one asking the following: "Can a man be a Christian without doing certain things?" a reply might be: to his church, he is a church member, but finds that he cannot find the time to keep up in his studies properly, what should he do?"

Another requests Mr. Stockdale to answer: 
"Freely a man case up in the morning, firmly determined to live an upright life to help his fellowmen and to live up to his ideals. When night comes he realizes that he has failed. Is there anything in religion that can help a man to live up to the ideals he has set before himself?"

A third man wishes information on the following subject: "Is there a Christian?" he asks. A man who lives up to the teachings of Christ, but who does not believe in the church rituals, a Christian? If he does he is an agnostic. It is a very difficult question to answer and If the questions are of very much interest to individuals, and will be published in the next issue of THE TECH.

The talk will be the last one of the year.

ELECTRICAL ENGINEERS.

Smoker to Be Held in Union Thursday Evening

Thursday, at 7:30, in the Union, the Electrical Society will give a smoker and hold a smoker. The men will be addressed by Mr. W. H. Polhemus, a man of wide experience in the profession and one of the oldest men in it today. He has been on the faculty of the Union for some years, and his presence will be of inestimable value to the members as well as for the instruction, as Mr. Polhemus is one of the foremost teachers of electronics engineer.

This is an opportunity which every member should take advantage of this opportunity.

FRESHMAN BASEBALL SCHEDULE ANNOUNCED

Team Has Many Games to Play During the Remainder of Term.

The Freshmen will make another attempt to begin their schedule next Wednesday, when they are looked to meet the strong Boston Latin nine. This game should be a good starter for the Freshmen and give them a good chance to show their metal. The lineup is comprised of men who have been well received in the preliminary workouts and it is believed the Freshmen will have a good contest.

The Freshman baseball season has not been completed to date but the following games have been arranged for:

The ticket may be obtained for $1.00, either at the Cage or from any Senior or Freshman.

TELEPHONE CALLS.

New Board Has Been Placed In Union Opposite Cage.

The new board in the entry hall of the Student Union which was made through the efforts of the TECH in a communication has been installed by the management. The board is in a prominent place, but across from the place where it will attract the attention of the public, and it is a square backboard of about a foot and a half in breadth and 20 inches in height, with a sign, "Telephone Calls for—

The washing room had a real jamboree.

WEATHER.

Forecast for Boston and vicinity: 
Sunny; moderate to brisk easterly winds.

CALENDAR.

Tuesday, April 29, 1913.

3:00—Ball-Cambridge at Field.

4:00—Chase Club Finals—Union.

4:00—Arch. Society—Elmwood.

4:15—Baseball Practice—Bolles.

5:15—Intercollegiate Prize—Union.

Wednesday, April 30, 1913.

2:15—Course II (Third Year) Trip to South School. 4:30—Intercollage Prize—Bolles.

M. E. BANQUET TOMORROW

To Be Held at Boston City Club—Elections to Be Announced.

The Mechanical Engineering Section will hold its last banquet tonight at 6:30, at the Boston City Club, No. 4 Beacon street. The society has been very fortunate in being able to obtain several excellent speakers for the evening. Prof. Miller, who is at the head of the Mechanical Engineering Department, Professor Havas, also of the Department; Mr. Henry Babcock, chairman of the local branch of the A. B. M. E. and Mr. W. A. Snow are the speakers for the occasion.

The trip to South School which the luncheon which is to take will not interfere with their coming to the banquet. The party leaves Trinity Place at 10:15, which will enable them to start at 4:45, getting into Boston at 3:30. Since the banquet is to be informal this will allow ample time for preparation.

The results of the election of officers for the coming year will be announced during the evening.

It is necessary that all the ballots be in before 6 o'clock on the day before the election, as none will be received after that time.

The tickets may be obtained for $1.00, either at the Cage or from any Senior in 21 B.

NEW DELTA PSI HOUSE.

That the fraternity is becoming more and more of the march of Technology to Cambridge is evident by the fact that the Delta Psi have broken ground for their new building at the corner of Charles River Road and Pembroke street, three blocks west of the site of the New Technology. The building is to be a threestory affair of brick and ornamental stone. The structure, which will be erected in the fall, will be known as the new Anthony Hall. It is expected to be completed by September 1.
THE TECH

Electricals to Visit Telephone Exchange

Trips to be Made Thursday and Friday Conducted by Mr. Keating.

On Thursday and Friday afternoons of this week the Electri cal Engineering Society will conduct two trips to the New England Telephone Company on Milk Street. The telephone exchange at this place is typical of an exchange in a large city such as Boston, and the trip will be of great interest to all the men in Course 1. Mr. Keating is to conduct the two trips personally, and in order that all men interested should be able to attend, the excursions have been scheduled for two separate days. All men unable to go on Thursday will have an opportunity to do so on Friday, and Mr. Keating will present on both days. These trips were to take place last week, but owing to conflicts they were postponed to this week.

A large number of men are expected to take advantage of this opportunity on both days and the trips are bound to be of great value to all attending. All men who intend to inspect the exchange are to meet at the New England Telephone Company's offices on Milk Street at 2 o'clock each day.

CREW PRACTICE HELD.

Bad Weather Conditions—Good Opportunity for New Men.

The New York trip, which was postponed to this week, will now take place on Thursday and Friday afternoons. Mr. E. I. Williams, '09, is exhibiting his work to the public, not to provide a separate and exclusive opportunity for those who are planning to go. The present day Tech man is inclined to ignore the task of making good and good-looking work, and has benefited by the production of ‘Money in Sight.’

The question of the financial success of the Show is a most vital one, for although the present day Tech man is inclined to forget it, the purpose of the production is not to amuse the student body, the alumni, or the public, but to provide a separate and distinct activity for the school, which is not only to be shown, but to be respected. The present year's Show was a rather disappointing example of this, and it is with much pleasure that we welcome the statement from this year's management, that they have cleared a considerable sum. They are to be congratulated, for they must have taken the proper viewpoint.

The question of a New York trip, as held at the dinner Saturday, is rather a difficult one, but we are inclined to agree with Dean Burton. The Hope at present is that the trip will be arranged, and the present condition of the school is such that there are to be many opportunities during the rest of the year to make good use of this opportunity. All men who are interested should go.

If there is any possibility of getting a trip, the question is not whether to provide for the future, but how to do it. We'll show you a proposition with 400% profit, and our CORDIAL WELCOME plan that ensures you will enjoy yourself. We are also willing to arrange for the future, of course, at a cost of $50 per trip. This is only an estimate of the cost, and it is possible that the actual cost may be lower. If you are interested, please write to the Office of Student Life, 20 Warren Street, New York, N. Y.

With the Provident Man

the question is whether to provide for the future, and how to do it.

CHARLES H. JOHNSON, M. I. T. '05
REPRESENTING
NEW ENGLAND MUTUAL LIFE INSURANCE CO.
CHARTERED 1835

Bylund and Guething are both running very fast, and when the latter gets into better condition they will be a hard pair to beat.

Porter, '18, is developing well in the throws and hammer throw, is a fine workman, and shows great promise.

In Wilson, Wilkins, Adams and Loomba, Tech has the fastest bunch of sprinters in several years.

Laurason, '16, is showing considerable improvement in the pole vault.

A steam roller was run over the track Friday and Saturday, and as a result the track was in splendid condition. Several men who had not been practicing entered Saturday's meet. Among these were Leslie and Plant, who should prove valuable additions to the team.

Beach, '14, and Mathill, '13, are practicing hard in the weight events, and may prove point winners in the dual meet with W. P. I.

The B. A. A. men were running trials at the quarter yesterday, but the poor condition of the track made fast time impossible.

C. C. Clough, of W. P. I., was at the track Saturday to determine the prospects of the latter school in the coming meet with Tech. Clough is a weight thrower, and scored in the New England intercollegiates last year.

MATHMATICIANS MEET.

Harry E. March, of the Technical High School, Springfield, will open the spring meeting of the Association of Mathematics Teachers of New England, to be held at the Walker building, May 3, with a discussion of "Originals in Geometry." Others who will speak are Professor L. M. Pansano, of the Institute, on "Efficiency in the Classroom vs. the Individual." A. Harry Wheler, English High School, Worcester, "Certain Classroom Devices in Algebra." Bertram C. Richardson, English High School, Boston, "A Method of Extracting the Square Root of Numbers." Frederick W. Gentilhomme, Mechanics Arts High School, Boston, "Mathematics for Technical and Manual Training High Schools."

YALE REQUIREMENTS.

Chinese students entering Yale will hereafter not be required to take Latin. For this they may substitute a knowledge of the literary language of China. They must, however, pass an oral examination on their knowledge of the English tongue.

JUNIOR MECHANICALS

TAK6 TRIP TOMORROW

Course II Men in Third Year to Visit International Boiler Works.

Tomorrow afternoon, at 12:45 P. M., the Juniors who are taking the Mechanical Engineering course will leave the Trinity Place Station for South Pittsfield. From there the party will be conducted to the works of the International Engineering Company, which is situated a little outside of the town proper.

The construction of boilers will be followed very closely by the very fine boys of (Continued on Page 4.)

STUDENTS TO SUBMIT
CO-OPERATIVE REPORT

Investigations Made by Members of
Prof. Pearson's Class
Now Completed.

The report on a plan for a new M. T. co-operative society, which
is being prepared by four members of
Professor Pearson's Argumentation
and Debate class, will be submitted at
the regular meeting of the class
today. These students have been
carefully investigating the possibility
of organizing an improved co-operat-
ive system, but it is expected that
their report will include many ran-
dom elements. The report is to be
made public next Friday, when it will be
presented to those interested for dis-
cussion.

The committee has been largely
aided in its investigations by the study of the Harvard Co-operative
Society. At Harvard the society
buys a store, at which goods are sold
at the usual prices. The profits are
divided between the shareholders in
the proportion of the amounts they
have purchased. The shareholders
also have the privilege of obtaining
discounts at different retail stores.

TRIP TOMCROW
(Continued from Page 3)
laying out and marking the base
plates to the finished product. The
drafting room, where all plans and
details for the boilers are carefully
worked out, will be visited first. The
process of laying out and marking the
base plates will be next observed. Then
the party will be shown around the
boiler plant, each step being carefully
pointed out to them by a guide.

On Friday of last week the Mechanical
Engineering Society had as a
speaker Mr. J. W. P. Skidmore, who
is connected with this company. His
talk, which was fully illustrated by
slides, described in detail
the manufacture of boilers and gave
the men an idea of what they will see
very soon.

Pretty fast times made at that Penn
railway central. It was the first time
in several years that the track was
in good condition.
