ELECTRICAL SOCIETY HOLDS SMOKER

Mr. B. A. Behrend Addressed Course VI Men in the Union Last Evening.

Last evening the Electrical Engineering Society held a very successful smoker in the Union, at which occasion Mr. B. A. Behrend spoke on "The Historical Development of Electrical Engineering." Mr. Behrend is a very important figure in the electrical development of electrical engineering, but also of the latest engineering projects which are now interesting the public.

Of the engineering marvels now before the people, Mr. Behrend mentioned the building of the Panama Canal. The building of the Canal was abandoned by the French because they would be of no use to them, but the American Government, because they think it will be of advantage to them. Whether the Americans are correct in this theory or not, the building of the Canal is being built is that the many rivers and streams in the region surround

The Historical Development of Electrical Engineering

Mr. Behrend spoke of the various engineering marvels now before the people, among which he mentioned the building of the Panama Canal. The building of the Canal was abandoned by the French because they would be of no use to them, but the American Government, because they think it will be of advantage to them. Whether the Americans are correct in this theory or not, the building of the Canal is being built is that the many rivers and streams in the region surround

THE Dupont Cup, the competition for class president this year, was won by Edward E. Alt, of class 2, 4.90, followed by D. B. Baker, 4.93, and J. E. Hough, 4.90. Alt made very fine records in all the events in which he tried, and showed clearly his right to the all-around championship. He was closely pressed by Baker, who was many points behind those two.

BIOLOGICAL SOCIETY WILL HEAR MR. KERR
Talk on Artificial Clam Culture to Be Interesting and Instructive.

This afternoon, at 4:15, in 42
The Biological Society will hold a meeting, at which a talk by Mr. Andrew Kerr will be given. The talk, "Artificial Clam Culture," should prove very interesting, as Mr. Kerr is especially fitted to present his original idea in an original way. Mr. Kerr studied Biology at the Institute from 1912 to 1914, and has since been making a careful research study of clam culture. He has leased a number of acres of sea bottom from the State and planted clams there; in this way he was enabled to make a special model of the artificial culture of the clams. The talk will be given by Mr. Charles T. Main, the electrical engineer. The talk will be illustrated with lantern slides showing the production of the cultivated shellfish.

YOUNG MEN, MIDDLE AGED MEN

OH YES! and OLD MEN

Men of every age and condition of life feel the impact of the glad springtime.

IS THIS TAILORING TALK? "IT SURE IS." HOW?

We can give the best expression to the joy felt at this season, in clothes, in which every stitch and seam and weave make for happiness.

Our prices are not so low as to be absurd, nor are they "fancy" ones. We cater to real men, who want real style, real woolen fabrics and real values in every detail.

SUIT OR OVERCOAT $25.00 to $50.00
