M. E. SOCIETY MEETS MONDAY AFTERNOON.

Mr. Ralph E. Curtis Will Speak On "Mechanical Drawings and the Drafting Office."

On next Monday afternoon, at 4 o'clock, the Mechanical Engineering Society will meet in 11 Engineering B to hear Mr. Ralph E. Curtis, who will speak on "Mechanical Drawings and the Drafting Office."

The talk will deal with the purpose of mechanical drawings and how they are made and used in actual practice. The subject is full of interest to all the members of the society, and a large attendance is expected.

Mr. Curtis is a member of the class of '97, and was an assistant in the laboratory here at the Institute for a short while after his graduation. He was later connected with the Babcock & Wilcox Co., the well-known boiler manufacturer, and is at present Assistant Mechanical Engineer and Chief Draughtsman of the Edison Electric Illuminating Co. of Boston.

He has charge of the plotting of the plans for the new J. Street Station of the New York Edison Co., and has charge of the work on many of the new improvements which the company has made recently. He is the secretary of the committee of five which has charge of the plan of the buildings of the American Society of Mechanical Engineers, and is at present as secretary of the Society.

The members are again reminded that nominations for the officers for next year must be handed in at the Class of 4 P. M. on Thursday, April 10th.

FINAL CHESS MATCH.

Last Meet With Harvard to Be Held Saturday in Union.

The final match between the Tech and Harvard Chess Clubs will be held this day, in Union. Each club has so far won one match and lost one. This final match will be the third between the clubs. A four-way match was to be played with the Harvard and Cornell clubs, but these new men have been chosen to meet the strong men of the Tech.

The contest will be very close and undoubtedly full of interest. Everyone who takes any interest in chess is invited to attend the match.

PRIZE ARCHITECTURAL CONTEST RESULTS

Two Technology Architects Get Mention in Class I—U. P. Wins First Prize.

The results from the Lloyd Warner, Architectural contest, in which the technology architects took part, have just been received. The prizes are given for the best designs for certain types of buildings. The contest is open only to students at different colleges, and includes all men who are candidates for a degree this year, and Class II, including all men who are candidates for a degree next year. Class I was won by W. F. H. Hough, a Senior at Harvard University of Pennsylvania, also of M. I. T., was given second mention. The subject for this class was "An Art Museum."

Mr. Mulready, the subject for which "A College Library" Tech received no mention. The total number of entries and preliminary work was much larger than class I, and the college was as follows:

University of Pennsylvania     Cornell
Harvard     M. I. T.

WIRELESS MEETING.

Mr. A. L. Merrill to Speak On "Wireless On Aeroplanes."

This afternoon, at 4.15, the Wireless Society will hold a meeting in Rooms 1, Engineering E, Mr. A. L. Merrill, who recently gave a series of lectures on the aeroplanes at the Institute will address the members on "The Use of Wireless in Aeroplanes," and he will explain the apparatus and installations of this new apparatus on air craft. This branch of wireless telegraphy is in its earliest stages and very uncertain as yet, but is expected to become of great interest in the future.

He will disabuse himself of the notion that wireless telegraphy can be learned in a few hours, and he will deal with the subject in full detail.

In view of the fact that the talk is to be non-technical, the officers of the society have decided to make the evening a very social one, and anyone who wishes to attend should invite Mr. Merrill cordially to attend the meeting.

The members of the society will be interested to learn that the Board of Control of the Wireless Society will hold a meeting next Tuesday evening, April 5th, in Pierce Hall, Harvard College. Professor A. E. Kennelly, of the War Department, will speak on "Daylight Streets," a subject of great importance to the wireless telegraphy, and "The Tech for further particulars.

MANDOLIN CLUB.

There will be an important reception at the Mandolin Club this afternoon at 1:15, in Union, at the Crazy Club Hotel. Mr. Mulready will be present, and it is the only opportunity he will have to meet the club this year. All the members are requested to come and meet Mr. Mulready is obliged to leave at 3:30.

BOSTON, MASS., FRIDAY, APRIL 4, 1913.

PRICE TWO CENTS

F. C. A. TALK WELL RECEIVED BY STUDENTS.

Mr. Mulready Discusses Advantages of Probation System for Delinquents.

The regular weekly F. C. A. talk was given yesterday by Mr. Edvin Mulready, secretary of the Massachusetts Commission on Probation and treatment, with the subject of probation and the great advantages that have been given to the young men by the use of the system. Mr. Mulready said that the first requisite for studying the subject is the proper point of view. The men here at Technology have many opportunities in life and much to look forward to. He believes that if the students will be interested in the work of the society, they will be interested in the work of the country as a whole.

Mr. Mulready said that the attitude of the society's members has changed greatly in recent times. There is a great lack of the right attitude among many of the youth, and this is due to the fact that the people of the time are not interested in the same things as the people of the past. Today the public recognizes that criminals are not so very bad, and that the people who have been captured are not so very bad. The public recognizes that the use of the system is not a matter of chance, and that the people who have been captured are not the same as the people who have been captured in the past.

In conclusion, Mr. Mulready said that the system is very much improved, and that it is a much better system than it was. He said that the system is much better now, and that the people of the time are much more aware of the system than they were in the past.

ALL-TECHNOLOGY SMOKE S 7.30.

WEATHER.

Forecast for Boston and vicinity: Today, becoming wintry southw.

7:30-Mandolin Club—Union.
8:00—All-Technology Smoker—Union.
9:00-Technology Chess Club Meet.

ALL-TECHNOLOGY SMOKE S 7.30.
The Technology Smoker is to be held tonight. Here is an opportunity to show your Tech spirit. Yes, and it is a chance to get out of your shell and meet some of your fellow sufferers and have a good time. There is such a thing as getting stale, and we all must look out for it, absolutely white at the Institute. Too much recreation is fatal, and all "good fellows" become small. You know it's narrowing to think in terms of science always, and it does not take long for a "good fellow" to become small. There is a business value in knowing how to have a good time and how to give enjoyment to others. Really there is a thought with more in it than the bravado.

You have read the news article and know what a variety and wealth of activities which they represent, who have sacrificed all of their free time, and the activities which they represent, to show your Tech spirit. Yes, and it is a chance to get out of your shell and meet some of your fellow sufferers and have a good time.

An extremely important meeting of the Institute Committee is to be held today in Room C, at 4:15 P. M. At this meeting the question of denying representation on the committee to the Wireless Society and to the Architectural Society will be discussed. Reports will be received from the sub-committees of the Institute Committee.

Shoes That Represent
The character of the man who wears them— that assist him in presenting himself at his best.

That is the distinctive characteristic of the shoes we present to you in many desirable, dependable lines.

Prices $5 to $10.50

WHAT IS LIFE INSURANCE
Something which cannot be burned, lost, stolen, misapplied, attached or depreciated in any way. It remains intact for you, is negotiable and guaranteed to increase in value every year.

Good intentions delay generally product regrets. Life Insurance is good intentions capitalized.

CHARTERED 1835

TELEPHONES [MAIN 897] 176 Federal St. BOSTON, MASS.
I of the most useful forms of service trust reposed in them. He believes that character test. He believes that a person's goodness lies in stretching forth one's hand to fellowman, and lifting him to a better side of his nature and becoming a useful member of society. Experience has shown him that criminal instincts are largely due to the enforcement of law much cheaper. The remainder of the program promises to be almost as exciting and as the adventures of Dauntless Durham. The suspense, as H. D. Peck rises to announce the result of the vote on the Constitution for the Undergraduate Association, will, according to the committee in charge of the festivities, be almost equal to that for THE TECH team while the crack pitcher is "winding up." The Prices Range from $3.00 upward. (According to the Quality of Material)

THE ADVANTAGES WE OFFER

PROGRESSIVE methods, large resources and two conveniently located, thoroughly modern bank buildings, combine to make this institution the most desirable depository in New England.

Interest-bearing accounts subject to check may be opened either at Court Street or Temple Place, and the two offices are interchangeable for the transaction of your banking business.

You are cordially invited to inspect the modern Safe Deposit Vaults at either office.

Study

A certain wise man said—"Read not to contradict and confute, nor to believe and take for granted."
No—you'd better smoke

Velvet

It is its own most convincing argument. We cannot tell you the full richness—the delightful smoothness, of Velvet. Nor can anyone else. You must learn that from your pipe.
