

THE TECH

VOL. XXXIII. NO. 35

BOSTON, MASS., WEDNESDAY MAY 21, 1913

PRICE TWO CENTS

TECH WILL FIGHT FOR SECOND PLACE IN MEET

Dartmouth Is Conceded First in New England Championships. Tech Team Is Weak.

As the date of the New England Intercollegiate approaches it becomes more and more evident that Tech is weaker than in previous years, and that Dartmouth can scarcely be kept from winning. Tech's last year's point winners, and the men who were counted on to do the most toward bringing the championship to Technology at last, have not shown the form which Coach Kanaly expected of them. Captain Germain, who was thought an almost certain winner in the half, has been kept out of condition by sickness and press of Institute work, and it is doubtful if he can come through against such men as Taber of Brown and Dolan of Dartmouth.

Wilkins was slow in getting back into shape, and even now is not quite up to his last year's form. Wilson has had slight trouble with his injured ligament, but is now apparently capable of taking second or third in both sprints.

T. H. Guething, in the quarter, is showing fine form, and while he is a trifle unreliable, he should be able to win the event. He will be opposed by some especially good men from Dartmouth.

Rylund is a likely point winner in the half, and may win if Taber does not run and Germain does not get into last year's form.

Palmer is likely to win third or fourth in the mile, and Cook and Benson are possibilities in the two-mile.

Hall may be good for a fourth in the high, and in the broad jump either McLeod or Fox may take a place. In the shot-put and hammer throw Tech has not the slightest chance, but in the discus McLeod should place.

Tech will be fairly strong in both hurdles, and Curtis and Huff in the high, and Curtis, Huff and Munch in the low, will probably take several places.

INTER-CLASS GAMES.

Freshman and Sophomore Teams to Meet Twice This Week.

On Thursday and Saturday afternoons of this week the Freshmen and Sophomore baseball teams have been scheduled to have two warm battles. The Freshmen have put in more practice than the Sophomores, but several of the men who are out for the latter team have shown themselves to be in good form.

The Freshman lineup has not been definitely made up as yet, but the following men are likely to be used: Ross, 1st; Petit, 2nd; DeMerritt, 3rd; Tapley, s.s.; Smart, p.; Murphy, c.; Foote, Burkhardt and Lovejoy, outfielders.

The men who have reported at the Field as candidates for the Sophomore team are: Parsons, p.; Stevenson, c.; Bauer, 1st; Place, 2nd; Caffrey, s.s.; Franks, 3rd; Morse, i.f.; Spencer and Macintyre, c.f., and Spencer and Holway, r.f. Several new men have also showed up at the Field, and the most promising are Pike, Hall and Seers.

Anyway, most of those who did go to the meet took girls.

E. E. SOCIETY HAS LAST MEETING OF THE YEAR.

Many Members Gave Interesting Talks at the Smoker in Union Last Night.

The Electrical Engineering Society held a smoker last night in the Union, which was the last meeting of the society for the year. Refreshments were served at the beginning of the evening, and when everybody got comfortably settled F. C. Weiss, ex-president of the society, called the meeting to order informally. Mr. Weiss outlined the history of the society in a few words. He said that it is the oldest Electrical Engineering society in America. They have always been so successful in obtaining good speakers that it has not been found necessary to join the American Institute of Electrical Engineers.

All the members and the officers for the coming year were called on in turn to give any ideas which they might have, or to tell any good stories which might occur to them. The incoming officers were wished success and were urged to get all the Seniors out at the meetings next year. H. R. Richmond, the new president of the society, gave a short talk, in which he said that he hoped the Juniors would work with him and strive to make the Electrical Society the best professional society in the Institute. He was followed by the treasurer, who spoke on the importance of the prompt payment of dues at the beginning of the term.

After everyone had spoken on more or less subjects, and the Course VI humorists had told all their jokes, Mr. Weiss gave a closing talk, and the last meeting of the year was adjourned.

NO TENNIS MEETS.

No Team Entered in N. E. I. L. T. A. For Tournament at Longwood.

This Spring's tennis has not progressed very rapidly, and it will probably be impossible to finish the tournament before the end of the term. The meet which was scheduled with Tufts has been called off, and there will be no intercollegiate contests at all. Although Tech is a member of the N. E. I. L. T. A., no team has been entered in this year's tournament which is now being played at Longwood.

TREASURERS TO MEET.

T. J. Duffield, chairman of the Auditing Committee of the Finance Committee, will meet all treasurers of professional societies who are to transfer books this Spring, in the Union next Friday evening, at 7.30 P. M. The treasurers should bring bank statements, all bills (both paid and unpaid), and journals.

The tennis tournament struggles along, but the prospects of finishing it before the exams are very slight.

Interclass baseball gets away to a late start.

Both baseball teams evinced much disgust Saturday at the postponement of the game.

LECTURE ON MINES TO BE GIVEN TONIGHT

Talk in Union Tonight by Mr. Ross, Who Has Traveled in South America.

This evening, at 7.45 o'clock, there will be an important meeting of the Mining Engineering Society in Room B of the Union. The speaker of the evening is Mr. Louis Ross of Brookline, a man of wide and varied experience in the mining world. He is to speak on "Mines and Mining in Peru and Chili."

South American mining propositions are of especial interest to prospective engineers, and particularly to Course III men. Mr. Ross has recently returned from a trip to South America, where he has made extensive tours of investigation. His great familiarity with the field about which he is to speak will make his talk highly interesting. During his stay in the mining regions he has obtained many photographs which will be shown by his stereopticon in connection with his talk.

On account of the exceptionally interesting nature of the subject the lecture will be open to men from all the courses.

TALK ON SOCIALISM.

Former Secretary to Mayor of Schenectady Gives Talk.

On account of grave illness, Rev. John Haynes Holmes, pastor of the Church of the Messiah in New York, was unable to deliver his address on Socialism which was scheduled to be held Monday, at 1.30, in the Union.

Yesterday, at 1.30, the Economics Club met in S Eng. C and listened to an interesting talk on "Socialism of Today," by Walter Lippman, Harvard '10. Mr. Lippman is quite prominent in socialistic affairs, having been secretary to Mayor Lunn of Schenectady, N. Y. He said that by abolishing the conflict between capital and labor through public ownership the people will be presently relieved from their economic difficulties. He drew an interesting diagram showing everywhere corruption must exist where government officials represent both the interests of the people and those of the private corporations.

SENIOR PORTFOLIOS.

Portfolios Will Not Be Held Later Than Next Thursday.

The Senior Portfolio is on sale at the Cage daily from 1 to 2 P. M., and will be held until Friday only, and all men who have signed up will have to procure their Portfolios before Thursday at 2 o'clock. Any books remaining unsold after that time may be purchased by those on the waiting list.

The committee is forced to set these dates owing to the proximity of the end of the school year and the necessity of settling at an early date the finances connected with the publishing of the Portfolio.

We are pulling hard for second place at the N. E. I. C. A. A. meet.

Guething is a favorite in the quarter Saturday.

BUSINESS COURSE TO BE ESTABLISHED

Planned to Give Men a Training in Business Administration and Law.

At the meeting last Monday evening of the Alumni Council the report of the special committee to consider business courses at the Institute was given. The committee in reporting recommends that such a course be established and outlines its requirements. The committee has considered in detail the relation of this course to the existing courses, and the manner in which it can be best introduced. The nub of the discussion is the suggestion to add to the course at Technology Course XV, and name it "Engineering and Business Administration." Harvard, Dartmouth, University of Pennsylvania, and the Carnegie Technical School are most suggestive, but they do not have precisely the same instruction as the Institute.

The idea is not a new one here, for a course in Commerce was suggested as long as fifteen years ago. Post-graduate courses have been suggested in another plan, but that would not be in harmony with the traditions of the Institute. It should be offered to undergraduates, but the quality of the courses in engineering must not be lowered.

The plan that the committee presented combines engineering training with that of business methods, business economy, and business law. The schedule presented demands chemistry, physics and mathematics as fundamental with a strong course in English. It demands that students specialize along engineering lines and spend about one-quarter of their time on economic subjects. Here the usual Tech method of learning by doing will be followed. In the four years 16 per cent. of the hours will be devoted to general studies, 59 per cent. to engineering subjects, and 25 per cent. to business courses.

As in the survey of colleges in this country for points in the construction of the New Institute the best features of a dozen different institutions suggest the modeling of the new course. The committee notes that a somewhat larger instructing force will be needed, but perhaps here will be a good field for the kind of co-operation suggested by President MacLaurin, in which Technology and Harvard may avail themselves of the experience and services of the same authoritative speaker. The committee believes that if Tech is to maintain in the future its present successes in the educational field it must recognize and consider the changes that have come into business life.

(Continued to Page 3, Col. 2.)

WEATHER.

Forecast for Boston and vicinity: Wednesday, increasing cloudiness; moderate northerly winds.

Every year, toward the end of June, a conference is held at Northfield, in the Berkshire Hills, by the leaders of Christian Association work in colleges of this country and Canada, on methods and aims in uplift work among students. The serious work of the conference—religious and social study, business meetings, discussion of plans, and addresses by great men of the country—is accomplished in the mornings, the afternoons being given over to recreation. The conference is wound up by a great demonstration, combining our Independence Day with the Dominion Day of Canada, at which the different delegations compete in college songs and stunts.

Any Tech man who can arrange to attend this year's conference, June 20 to 29, is heartily welcome and may feel assured of a good time, as well as great benefit on social and educational lines. The speakers at these conferences are men such as John A. Mott, who preferred his present work among students to President Wilson's appointment as ambassador to China. William J. Bryan is endeavoring to arrange to speak there this summer.

In spite of its very attractive exterior, the new Senior Portfolio is calling forth considerable unfavorable comment. The quality of the paper is severely criticized for its cheap appearance and texture, and the ink of the pictures has a tendency to smudge. Also, several errors were made in punctuation, fraternity letters, and other details. Many of the write-ups would have been improved by a little editing on the part of the committee, as they appear to have been written by the individuals concerned with the idea of filling as much space as possible.

We know it is a hard and thankless piece of work to get out a Portfolio; that the cost must be kept down, and that the committeemen have other things to take their time, but we think, nevertheless, that the class has a right to expect a better book than the present one for its money.

As the Freshman sits by the window
at night,
Dreaming of mother and home,
sweet home,
Those simple exams are the single
blight
In the atmosphere of this wonderful
drone.

CABOT MEDALS ARE AWARDED FRESHMEN

Physical Examination Charts
May Now Be Obtained
at the Dean's Office.

The Cabot medals, for the greatest improvement in physical training, have recently been awarded, and the unfortunate men to receive first honors and medals were W. T. Knieszner, H. E. White, C. J. Spear, H. H. Porter and E. R. Mellen. The committee which awarded the medals consisted of Dean Burton, F. H. Bailey, Samuel O. Prescott, Frank M. Kanaly and Henry Fay. Honorable Mentions were given to five other men, as follows: G. D. Anderson, W. A. Strangman, H. Lavine, H. P. Clausen and H. R. Bennett.

The charts for the first year men are now ready and they may be obtained in the Dean's office upon application.

COMMUNICATION.

To the Editor of THE TECH:
I have received the following additional details in regard to the "Student Camps" to be held during the coming summer which may be of interest to some of your readers. The camps are, of course, for any of the students of the Institute and not only for members of the military organization.

"On account of a number of requests for the shortening of the period of the camp, many students stating they could not attend the entire period, it has been decided to change the date of expiration of the Gettysburg camp from August 29th to August 15th, and the Monterey camp from August 29th to August 8th, making in both places a camp of about six weeks, starting July 7th and July 1st, respectively.

"The instruction given will consist of real military exercises, such as camping, marching, field individual cooking, precautions for health in camp, care of the person, maneuvering exercises under simulated battle conditions, tactical walks where certain conditions may arise in battle being assumed, the student states what he would do under the circumstances were he in command of a certain unit. Instruction will be given in target shooting with an army rifle. The National Rifle Association of the United States will give to those students making the requisite score over the prescribed course the Regular National Association badge for marksmanship.

"The troops of the Regular Army which it is contemplated sending to this encampment include a battalion of infantry with band, a troop of cavalry, a battery of field artillery, a detachment of the Signal Corps, with latest equipment for wire and wireless communication; also, a medical personnel sufficient to amply and properly take care of accident or sickness.

"Demonstrations will be given by the troops and fully explained by the officers. Informal talks will be given by selected officers of the Regular Army, and will include the explanation of the theoretical principle of tactics and instruction in military needs and policy.

"Opportunities will be offered, if practicable, to those who desire it to have a little experience and training in actually riding the cavalry horses, or in riding the artillery caissons and horses during drill.

"The time devoted to actual physical work will be reduced to the minimum, and will not exceed at the most four hours per day, the afternoons and evenings been given over, so far as practicable with due regard to proper supervision and military necessities, to the students themselves; the

**ANNUAL PRIZE DRILL
COMES NEXT FRIDAY**

Close Contest Expected Both in
Company and Individual
Drills.

The annual company and individual drill contests will be held in the Armory at 8 P. M. next Friday. The company competition will consist of all drills in the school of the company, while the individual contest is to be in the manual of arms and marchings. Tickets may be obtained from the officers of the regiment or from the first sergeants.

President Maclaurin will review the regiment before the drill, and will award the prizes. The latter are gold and silver medals for the first two men in the individual contest, and a gold medal to the captain of the best company. An additional prize for the captain of the winning company has been offered by Mr. F. C. Leonard, of the Jacob Reed Sons' Co. This consists of a regulation sabre with full trappings.

Col. Taft and Lieut.-Col. Pastene will be at the Gym today at 2.30 P. M. to give the contestants in the individual drill some preliminary practice. Those desiring to attend the practice drill may get their rifles from the Armory for the purpose.

BUSINESS LAW COURSE.

(Continued from Page 1, Col. 4.)

With respect to the proposed course the committee makes the following specific recommendations:

1. That the new course be designated "Course XV;" "Engineering and Business Administration."

2. That the new curriculum of the course should combine humanistic and fundamental scientific subjects common to all the Institute courses, with a professional training of engineering studies and of business studies along the general lines shown by the tentative "Outline of the Proposed Course" appended to this report.

3. That in the engineering studies opportunity should be given, by the establishment of options, for some degree of specialization along the lines of Mechanical, Chemical and Civil Engineering, with the object of fitting the men to engage, respectively, in the manufacture of machines and machine-made products, in the manufacture of materials, and in transportation and construction work.

4. That the business studies should include through courses in "Political Economy," "Economic History" and "Economic Geography," "Accounting and Statistics," "Commercial Organization," "Industrial Organization," "Business Law" and "Banking and Finance," as well as briefer courses in "Industrial Psychology," "Argumentation and Reports," "Taxation and Insurance," "Transportation" and "Foreign Trade."

5. That the business studies, like other studies at the Institute, should be taught, for the most part, not by formal lectures of a descriptive character, but by requiring the student, through the solution of problems, the study of specific cases and the preparation of reports, to apply for himself the principles which he is learning.

6. That in providing for the instruction in some of the business subjects co-operation with the Graduate School of Business Administration of the Harvard University should be arranged for if practicable.

7. That the business studies to be included in the proposed course should be open also to graduates of the present engineering courses who may desire, in the fifth year, to supplant their engineering knowledge by a training in business administration. And conversely, graduates of the new course should have the opportunity of rounding out their engineering work by devoting to it a fifth year of study.

Your Bank

The American Trust Company invites you to open an account, whether large or small, and to use the facilities of the company to the fullest degree. We want you to look upon it as "Your Bank," and we shall do everything in our power to make it a real help to you in the conduct of your business and financial affairs—as well as an institution for the prompt and accurate handling of funds.

THESES ARE DUE.
TUESDAY, MAY 27, AT 5 P. M.,

It in no way pays to delay this important part of your last year at school.

Plan to finish your first writing at least two weeks ahead, so that the final form, which is a large factor in the effectiveness of all work, may be well done.

If you wish to have it typewritten at as low a cost as is consistent with careful, painstaking work, bring it in early to those who have had three years' experience with Tech Thesis.

R. H. RANGER.
 Tech Typewriting Bureau,

COMMUNICATION.
 (Continued from Page 2, Col. 2.)

minutiae of drill and precision of movement will not be required. An understanding of the principles involved is considered of more importance in the short time available than the exercise or movement itself.

"Students of the same institution, if they so desire, will be allowed, as far as practicable, to be in the same company and occupy the same or adjoining tents. The companies will be commanded and under the supervision of a regular army officer, or officers, and who will be aided by men selected from among the students themselves."

While the Government has not the appropriations to make these camps free the costs of transportation, \$7.66 per man for uniform, and \$1.75 per week for board, make this an excellent opportunity to spend six weeks in a pleasant camp at very small cost. Besides this those who are interested in military matters will have an opportunity of learning the most interesting features of the art of war in a most attractive way.

Any of the students who desire to go to these camps or who are interested in knowing more about them should see me about the matter without delay. I will be glad to explain as much about the plan as possible, or to advise them about any feature of the plan. I will make an engagement to meet any such students at any time convenient if they will telephone me at the Hotel Buckminster, or send me a note giving available hours and their mail address.

Very sincerely,
 Edwin T. Cole,
 Major, U. S. Army.

Only one week more.
