Dartmouth Is Conceded First in New England Championships.

Tech Team Is Weak.

As the date of the New England Intercollegiate approaches it becomes more and more evident that Tech is weaker than in previous years, and that Dartmouth can scarcely be kept from winning. Tech's last year's point winners, and the men who were counted on for help in bringing the championship to Techology at last, have not shown the form which Coach Kanaly expected of them. Captain Germann, who was thought an almost certain winner in the half, has been kept out of condition by sickness and press of Institute work, and it is doubtful if he can come through against such men as Taber of Brown and Delah of Dartmouth.

Wilkins was slow in getting back into shape, and even now is not quite up to his best, or to tell any good stories has had slight trouble with his injured fingers, which may prevent him from being capable of taking second or third in both options.

T. H. Ghedel, in the quarter, is showing fine form, and while his form will not count as much as that of some of the others, it is likely that he will be good for a fourth in the half, and may win if Taber does not run and German does not get into last year's form.

Palmer is likely to win the third or fourth in the mile, and Cook and Hen-son are given places in the two-mile. Hall may be good for a fourth in the mile and a half, and in the wood hurdles, and Curtis and Huff in the hurdles, and in the broad jump should place.

In the shot-put and hammer throw, and in the high jump, and in the long jump one is likely to see some exciting contests.

The Senior Portfolio is on sale at the New England Institute, and while the price is high, those who can afford it, and who will have to be in shape, should order it for the meeting.

INTER-CLASS GAMES.

Freshman and Sophomore Teams to Meet Twice This Week.

On Thursday and Saturday afternoon of this week the Freshman and Sophomore teams will be met to have two warm battles. The Freshman have got more practice than the Sophomore, but more of the men who are out for the latter team have not been as well satisfied with the opportunities as have been afforded the former.

The Freshman team has not been definitely made up as yet, but the following are likely to be used:

Harry, r. f.; Taft, s. e.; R. S. Smart, p.; Murphy, c.; Funn, c.; Burkart and Lovelace, out fielders.

The men who have reported at the field as probable candidates for the team are: McLeod, p.; Peabody, r. f.; Botsford, 1st base; Franks, 3d; Morse, 1st; Spencer and Blunden, 2nd and 3d base, respectively. Many others are expected to come in late.

Anyway, most of those who did go to the meet took girls.

E. E. SOCIETY HAS LAST MEETING OF THE YEAR.

Many Members Gave Interesting Talks at the Unioin Last Night.

The Electrical Engineering Society held a smaker last night in the Union, which was the last meeting of the society for the year. Refereences were served at the beginning of the evening, and when everybody got comfortably settled B. C. Weisen, ex-presi- dent of the society, called the meeting to order informally. Mr. Wailes then told the club of the society in a few words. He said that it is the oldest Electrical Engineering society in America. They have always been so successful in obtaining good speakers that it has not been found necessary to join the American Institute of Elec- trical Engineers.

As the members and officers, for the coming year were called on to give any ideas which they might have, or to tell any good stories which might occur to them. The in- terest of the members were wakened up, and we were urged to set all the Senior portfolio, and to raise the money which was needed to raise the Junior portfolio. A. R. Richland, the president of the society, gave a short talk, in which he said that he hoped the Junior would work with him and strive to make the Electrical Society the best profession- al society at society at the Institute. He was followed by the treasurer, who spoke on the importance of the prompt pay- ment of dues at the beginning of the term.

After everyone had spoken on more or less subjects, and the Corps VI and the junior portfolio, the meeting adjourned.

NO TENNIS MEETS.

No Team Entered in N. E. I. L. T. A. For Tournament at Longwood.

This Spring's tennis has not pro- gressed very rapidly, and it will pro- bably take a little bit of time before the end of the term. The matches which were scheduled with Tech has been called off, and there will be no intercollegiate contests at all. Although Tech is a member of the N. E. I. L. T. A., no team has been entered in this year's tournament which is now being played at Long- wood.

TREASURERS TO MEET.

T. J. Duffield, chairman of the Auditing Committee of the Finance Committee, will meet all treasurers of professional societies who are to report to the Union next Friday evening, at 7, 30 P. M. The treasurers should bring back statements, all bills (both paid and unpaid), and journals.

The tennis tournament struggles along, and in the first of the matches, the matches before it, the games are very slight.

Interclass baseball gets away to a late start.

Both baseball teams evinced much enthusiasm during at the postponement of the game.

LECTURE ON MINES TO BE GIVEN TONIGHT.

Talk in Union Tonight by Mr. Ross, Who Has Traveled in South America.

This evening, at 7, 60 o'clock, there will be an important meeting of the Mining Engineering Society in Room 3 of the Union. The speaker of the evening is Mr. Lewis Ross of Brook- line, a man of wide and varied experi- ence in the mining world. He is to speak on "Silver and Mining in Peru and Chili." South American mining propositions are of especial interest to prospective engineer and, particularly to Course III men. Mr. Ross has recently re- turned from a trip to South America, where he has made extensive roars of investigation. His great familiarity with the field about which he is to speak makes his talk highly interesting. During his stay in the mines he has obtained many photog- raphs which will be shown by the stereopticon in connection with his talk.

On account of the exceptionally in- teresting nature of the following lecture, it is expected that the lecture will be open to men from all the courses.

TALK ON SOCIALISM.

Former Secretary to Mayor of Schenectady Gives Talk.

On account of grave illness, Rev. John Hughes Holmes, pastor of the Church of the Messiah in New York, was unable to deliver his address on Socialism which was scheduled to be held Monday, at 1:30, in the Union. Yesterday, at 1:30, the Economics Club met in 8 Eng. C and listened to an interesting talk on "Socialism" by W. B. Lippman, former Secretary to Mayor Lunn of Schenectady. Mr. Lippman is quite prominent in socialistic affairs, having been sec- retary to Mayor Lunn of Schenectady. He said that he was abolished the conflict between capital and labor through public ownership the people are politically relieved from their economic difficulties. He drew an in- teresting diagram showing everywhere where government-aided firms represent both the in- terests of the people and those of the private corporation.

SENIOR PORTFOLIOS.

Portfolios Will Not Be Held Later Than Next Thursday.

The Senior Portfolio is on sale at the Cage daily from 1 to 5 P. M., and must Friday evening. All women who have signed up will have to deliver their Portfolios before Thursday, at 2 o'clock. Any book remaining unpaid after that time may be charged by these on the waiting list.

The committee is forced to set Thursday as the end of the school year and the necessary before the demand is too large and the finances connected with the pub- lishing of the Portfolio.

We are putting hard for second place at the N. E. I. L. A. A. meet.

Guesting is a favorite in the quarter Saturday.

BUSINESS COURSE TO BE ESTABLISHED.

Planned to Give Men a Training in Business Administration and Law.

At the meeting last Monday evening of the Alumni Council the report was recommended that the business courses at the Institute be established and outlines its recom- mendations as to the courses to be established in the business and law fields. The organization in the detail of the relation of this course to the existing courses, and the matter in a state of being learned by the- duced. The not the discussion is the selection of the courses to be offered at the Technology Courses, and the course Engineering and Business Administration.

Harvard, Dartmouth, Uni- versity of Pennsylvania, and the Car- negie Technical School are most suc- cessful, but they do not have the same instruction as the institu- tions.

The idea is not a new one here, for a course in business administration is suggested as long as fifteen years ago. Post- graduate study in business administration is another plan, but that would not be in harmony with the traditions of the Institute. It is suggested that the undergraduates, but the quality of courses in engineering not be lowered.

The plan that the committee pres- ents combines engineering training with that of business methods, busi- ness economy. The schedule presented demands chemi- stry, physics and mathematics as fundamental with a strong course in English. It demands that students specialize along engineering lines in the coming year were called on in- terclass baseball gets away to a late start.

Both baseball teams evinced much enthusiasm during at the postponement of the game.

WEATHER.

Forecast for Boston and vicinity: Wednesday, increasing cloudiness; moderate northerly winds.

CALENDAR.

Wednesday, May 22, 1913.

7:45—Mining Society Meeting—Union.

THE TECH, BOSTON, MASS., MAY 21, 1912

THE TECH
Entered as second-class matter, Sept. 15, 1879, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Physical Examination Charts May Now Be Obtained at the Dean’s Office.

The Cabot medals, for the greatest improvement in physical training, have recently been awarded, and the fortunate men who received them were W. T. Wyman, H. E. White, and J. M. Meader, assisted by H. H. Porter and R. E. Mellen.

The committee which awarded the medals consisted of Dean Horace V. Talcott, Samuel O. Prescott, Frank M. Noyes, and Henry Pay.

Honorable Mention was given to five other men: namely, O. D. Anderson, W. A. Stangman, H. Lanvile, H. F. Clumpon, and H. Bennett.

The choice for the first year men are now ready and they may be obtained at the Dean’s office upon application.

COMMUNICATION.

To the Editor of THE TECH: I have received the following additional details in regard to the "Student Camps" to be held during the coming summer which may be of interest to some of your readers. The camps are, of course, for the benefit of the students of the Institute and not only for members of the military organization.

On account of a number of requests for the shortcomings of the period of the camp, many students stating that they could not attend the entire period, it has been decided to change the date of expiration of the Gettysburg camp from August 29th to August 13th, and the Monterey camp from August 23rd to August 28th, making in both places a camp of about six weeks, starting July 7th and July 1st, respectively.

The instruction given will consist of real military exercises, such as camping, marching, field individual instruction, prize giving for fullest health in camp, care of the person, maneuvering over ground under simulated battle conditions, tactical walks where certain conditions may arise in battle being simulated, the student stating what he would do under the circumstances, he in command of a unit. Field instruction will be given in target shooting with an armory made for the purpose.

The National Rifle Association of the United States will give to those students making the requisite score on the prescribed course the Regular National Association hunting license.

"The Troops of the Regular Army which it is contemplated sending to this encampment include a battalion of infantry with hand, a troop of cavalry, a battery of field artillery, a detachment of the Signal Corps, with latest equipment for wire and wireless communication; also, a medical department sufficient to supply and properly take care of accident or sickness.

"Demonstrations will be given by the officers and troops fully explaining the officers. Informal talks will be given by selected officers of the Regular Army, and will explain the doctrine of the principles of training and instruction in military needs and policy.

"Opportunities will be offered, if practicable, to those who desire to have a little experience and training in actually riding the cavalry horses, or in riding the artillery caissons and horses during drill."

"The time devoted to actual physical work will be reduced to the minimum, and will not exceed at the most four hours a day, the afternoon exercises having been given over, so far as practicable with due regard to proper supervision and military necessity to the students themselves; the (Continued on Page 4, Col. 2.)

**ANNUAL PRIZE DRILL COMES NEXT FRIDAY**

Close Contest Expected Both in 'Company and Individual Drills.'

The annual company and individual drill contest will be held in the Armory at 5 P. M. next Friday. The company competition will consist of all drills in the school of the company, while the individual contest is to be in the manual of arms and march- ing. Tickets may be obtained from the officers of the regiment or from the first sergeants. President MacArthur will review the regiment before the drill, and will award the prizes. The latter are gold and silver medals for the first two men in the individual contest, and a gold medal to the captain of the best company. An additional prize for the captain of the winning company has been offered by Mr. P. C. Leonard, of the Jacob Reed Sons Co. This competitive regulation is safe with full trapping.

Col. Taft and Lieut.-Col. Pastene will be at the Gym today at 3:30 P. M. to give the contestants in the individual drill some preliminary practice. Those desiring to attend the practice drill may get their rifles from the Armory for the purpose.

**BUSINESS LAW COURSE.**

(Outlined from Page 1, Col. 4.)

With respect to the proposed course the committee makes the following specific recommendations:

1. That the new course be designated "Course XV," "Engineering and Business Administration."

2. That the new curriculum of the course should combine humanistic and fundamental scientific subjects common to all the Institute courses, with a professional training of engineering studies and of business studies along the general lines shown by the tentative "Outline of the Proposed Course" appended to this report.

3. That in the engineering studies opportunity should be given for the establishment of options, for some degree of specialization along the lines of Mechanical, Chemical and Civil Engineering, with the object of fitting the men to engage, respectively, in the manufacture of machinery and machine-made products, in the management of materials, and in transportation and construction work.

5. That the business studies, like other studies at the Institute, should be taught, for the most part, not by formal lectures of a descriptive character, but by requiring the student, through the solution of problems, the study of specific cases and the preparation of reports, to apply for himself the principles which he is learning.

6. That in providing for the instruction in some of the business subjects cooperation with the Graduate School of Business Administration of the Harvard University should be arranged for if practicable.

7. That the business studies to be included in the proposed course should be open also to graduates of the present engineering courses who may desire, in the fifth year, to supplement their engineering knowledge by a training in business administration. And conversely, graduates of the new course should have the opportunity of rounding out their engineering work by devoting to it a fifth year of study.

TUESDAY, MAY 27, AT 5 P. M.

It is no way pays to delay this important part of your last year at school.

If you are interested in military matters will have an opportunity of learning the most interesting features of the art of war in a most attractive way.

The companies will be composed of a regular army officer, or officers, and non-commissioned officers taken from among the students themselves.

We are now in a position to make these camps free from the costs of transportation, $7.50 per man for uniform, and $1.75 per week for board, thus making an excellent opportunity to spend six weeks at a pleasant camp at very small cost.

Besides this those who are interested in a pleasant camp at very small cost.

Any of the students who desire to participate in the exercise or movement itself.

That $25.00 suit will be a pleasant surprise to you if you are not acquainted with it.

We have everything you need in the furniture line at the right.
