

THE TECH

VOL. XXXIII. NO. 4

BOSTON, MASS., SATURDAY, APRIL 5, 1913

PRICE TWO CENTS

LAST CHANCE TO GET RESERVED TICKETS

All Seats For Show to Be Turned Over to Herrick After Tonight.

Tickets for Tech Show, applied for last week, will be held until 5 o'clock this afternoon. After that they will be turned over to Mr. Herrick, and the men will have to get them through this agency.

Up to this time very few reserved tickets have been applied for, although there was a notice in THE TECH last Monday morning to the effect that they would be on sale from 1 to 2, and from 5 till 6 o'clock every afternoon this week. This afternoon Treasurer Price will be in the Show Office from 1 to 5 o'clock. This will be the last opportunity to get tickets from him. At 5 o'clock the office will be closed and the remaining tickets sent to Herrick.

This afternoon and evening the entire company and the Orchestra must be at the Opera House for rehearsal. The men are to report there at 2 P. M.

All men who fail to attend will be fined \$1.00, and all who are late will be fined 50 cents. There will not be a dress rehearsal tonight, as stated before but all men will have to stay until 11 o'clock. The rehearsal will be suspended at 6 o'clock, and the men will be allowed an hour for dinner.

This rehearsal is exceedingly important since it will be the last practice of the entire Show before the first performance—at Northampton on Friday night.

BIOLOGICAL MEETING.

Dr. Page Addresses Society On Bacteria Identification.

Yesterday afternoon, at 4.15 P. M., Dr. Galvin G. Page, of Harvard, addressed the Biological Society in Room 28, Pierce Building. The subject of the talk was: "The Fermentation of Different Carbohydrates as an Aid to the Identification of Bacteria Ozaenae and Bacteria Goli." Dr. Page is an instructor in the Microbiology Department at Harvard, and in this capacity has been able to carry out a great many experiments which are of great importance to the world at large.

The talk was illustrated by many excellent tests and various charts showing the Bacteria in Dextrose, Mannite, Saccharose, Adonite, Raffinose. The cultures which were shown were planted during the first part of the week, and showed the growth which had been attained after an elapse of two days.

After Dr. Page had finished the meeting was opened for discussion, and Professors Sedgwick and Prescott, together with Dr. Armes, gave their views on the subject. When all the questions which arose had been answered the society adjourned, after thanking Dr. Page for his interesting talk.

The men who advertise in THE TECH are good men to get acquainted with.

ALL-TECHNOLOGY SMOKER ATTENDED BY LARGE NUMBER OF STUDENTS

Appreciative Audience Pleased With Many Novel Features of Program---Result of Vote On Constitution Announced.

The All-Technology Smoker, held last night in the Union, proved a rousing demonstration of Tech Spirit, and was also a specimen of what Tech men can do when they start in to have a good time. From Dean Burton's speech, which started things going, to the final singing of the Stein Song, not one of the guests experienced a dull moment. Songs, instrumental selections, recitations, speeches, and drinks, cats and smokes followed in rapid succession, not to forget the interesting athletic features of the program. The best part of the meeting was the genuine Tech Spirit shown by all present. About four hundred men were on hand, and all agreed that the celebration was the best that Tech has seen in a long time.

The festivities began with a speech by Dean Burton, who was introduced by W. R. Mattson, the major domo of the evening. Mattson said, "Let's get started," and that was the keynote of the evening. The Dean compared the advantages of studying engineering under the instruction of specialists with those of studying in a large school. He said the former method had its advantages, but the latter was far superior.

Men who go to a large institution, like Technology, have the opportunity of associating with men of the same age who have the same interests and ambitions, and this is of great value; furthermore, they are taught loyalty to an institution, and the ability to feel an unselfish loyalty to some worthy thing does much to make a man great. He showed that the greatness of Lee and Lincoln was really due to their complete devotion to two great causes. He said in closing that such meetings as the Smoker were of much importance to Institute men, as they encouraged good-fellowship, and taught loyalty to Tech and the things Tech stands for.

By this time the fellows had gotten into the spirit of the jollification, and were ready to join with a will in singing "Take Me Back to Tech." After this Katz and Alton rendered a mandolin and guitar duet which called forth such vigorous applause that they were compelled to give an encore to pacify the audience.

Mr. Clarke then gave a piano solo, which was highly appreciated, and showed that Tech men can get enthusiastic over something else besides ragtime.

A speech by Mr. Weeks the General Manager of Tech Show, was the next feature. He spoke of the prospects of success for this year's Show. The Boston performances will be held at the Opera House, and a very good show is promised. Mr. Weeks urged the fellows to get together and show their spirit by supporting the Show. A number of tickets are still obtainable, and he said every student

should be glad to buy a seat, as the money will be used to put the Athletic Association on a sound financial basis.

There seemed to be a strong desire on the part of the audience to relieve its feelings in song, so Mr. McDaniels was called to the piano to play some ragtime. "Alabama," "In My Harem" and others were sung with great enthusiasm.

All had been eagerly awaiting the announcement of the returns from the vote on the Constitution, so H. D. Peck was introduced. The total vote was 1049; 855 were unconditionally in favor of the Constitution, while 44 voted "yes," but suggested changes; 115 voted "no" unconditionally, and 22 were opposed, but proposed changes. After announcing the result Mr. Peck went on to explain the purpose of the Constitution. It is not intended to give the Institute Committee despotic power over activities, but is essentially a formulation of principles which have been understood among the students but which have never been put down in writing and officially approved. Only those features of the different activities that affect the whole student body will be regulated by the Institute Committee. Mr. Peck assured the audience that the committee is not looking for increased power, but is trying to do the best possible thing for the student body. He closed by expressing thanks to the fellows for their decisive expression of opinion with regard to the Constitution.

Next the audience was treated to a novelty in the shape of Chinese music. Mr. Chow, accompanied by Mr. Hsi, on the flute, sang a number of Chinese popular songs. They were not much like our ragtime, but were nevertheless highly appreciated, and called forth loud and long applause. Another Oriental feature followed, being a recital by Mr. Salibi of the famous Arabian "Call to Prayer."

Much has been written about the impressive effect of this chant, and Mr. Salibi's performance justified the impression conveyed by the books. As an encore, he recited a piece of Arabian poetry, which represented the dying words of a chief who had become lost in the desert while returning to the sweetheart from whom he had been long separated. Though the listeners did not understand the language they did not lose the fine effect of the poem.

Mr. Mattson then called for the singing of "Dear Old M. I. T." All rose and sang the inspiring song with a spirit that showed their feeling. After this there was a general adjournment to the two smaller rooms, where the cats and drinks had been set out. On account of the big crowd it was hard to serve everyone and

REGULAR MEETING OF INSTITUTE COMMITTEE

Motion Is Passed to Regulate Soliciting of Ads By Activities.

The Institute Committee, at a meeting yesterday afternoon, gave ratings to the offices on the new board of THE TECH and received reports from several of its sub-committees.

Several of the offices on the new Managing Board of THE TECH have had no rating to date. After consultation with the Advisory Council and the members of the staff of THE TECH the Point System Committee drew up a report in which it recommended the following ratings: Adver-

(Continued to Page 3, Col. 1.)

1915 BASEBALL TODAY.

Sophomores Meet All-Star Team This Afternoon at 2.

The Sophomores will meet the All-Stars of the Cambridge Latin School at 2 o'clock this afternoon in a practice game at the Field. The All-Stars' team is composed of men who are out of the game on account of studies. Among them are some of the best players in the school. This team beat the regular team recently by the score of 3 to 2. This speaks well for the ability of the team and they ought to be able to give the Sophomores a good game. The Sophomores in their turn have been hard at work for several weeks with a squad averaging 22 men. With this work and these candidates to pick from they ought to be able to produce a team that will give the All-Stars a good fight. Captain Caffrey will attempt to work out as many men as possible in the game this afternoon.

COSMOPOLITAN CLUB.

Tonight in the Union the Cosmopolitan Club will hold a "Ladies' Night." It is to be a strictly cosmopolitan affair, the programme consisting of various "stunts" from most of the nationalities represented.

The officers of the club promise a good time and extend a cordial invitation to all who are interested to be present.

WEATHER.

Forecast for Boston and vicinity: Rain Saturday; variable winds, becoming southerly and increasing.

CALENDAR.

Saturday, April 5, 1913.
2.00—Tech Show—Complete Rehearsal—Opera House.
2.30—Soph-Freshman Cross-Country—Back Bay Station.
7.00—Harvard-Tech Chess Meet—Union.
8.00—N. E. Wireless—Harvard.
8.00—Cosmopolitan Club—Union.
Monday, April 7, 1913.
1.30—E. E. Society Meeting—6 Lowell.
4.10—M. E. Society Meeting—11 Eng. B.
4.00—Freshman Baseball—Field.

SHOW TICKETS NOT HELD AFTER 5.00 P. M. TODAY

THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

SATURDAY, APRIL, 5, 1913

If we could put into this editorial the enthusiasm that was shown at last night's smoker in the Union and could in some way give an idea of the enjoyment which everyone present felt, we would indeed do so and thereby properly congratulate the Institute Committee. We thank them for the evening and are sure that we are expressing the gratitude of everyone who was present. The affair was a great success.

Something more than just the enjoyment should be spoken of. The Union was more crowded than it has ever been before at any such gathering. Loyalty to the Institute through the activities is growing. This is the point that we wish to emphasize. Other activities tell the same story. More Tech Show seat applications were received this year than ever before and 1913 has been a record year for the sale of Techniques. Here is the spirit that is giving Technology a more and more important position in the world of educational institutions.

SHOW POSTERS OUT.

The new Tech Show Posters and Postal Cards are now on sale at the Union, both at the Cage and in the dining room. The Poster this year is the most striking that has ever been seen at Technology. It was drawn by Mr. Henry O. Glidden, a Senior in Course IV. Mr. Glidden has always been noted for his excellent drawings, and his poster this year is extraordinary in style and color.

Every Tech man should have at least one Poster, and he should also send away several postal cards to his friends. The Posters may be purchased for twenty-five cents each and the Postals for five cents apiece.

JUNIOR CLASS PICTURES.

There are still five 1914 Class pictures at the Cage which have not been called for. These pictures are now on general sale at \$1.00 each. Those Juniors who wish to get the benefit of their deposit must call at the Cage immediately, as the pictures will all be sold within a few days, and no deposits will be refunded.

CHESS CLUB MEETS HARVARD TONIGHT

Crimson to Send Strong Team to Oppose Technology's Night Men.

Saturday evening the Technology and Harvard Chess Clubs will meet for the final match to decide the championship between the clubs. The two teams have each won a match apiece, and a great deal of interest is being exhibited as to which will be the victor in the decisive tournament. Harvard will send eight men to meet the following men chosen to represent Technology: H. T. Chandler, '15; W. E. Merrill, '13; I. Paris, '14; C. E. Norwood, '14; Wm. Grant, C. P. Jones, '14; L. E. Woodbridge, '16, and L. B. Hoyt, '13.

The opposing team is composed of very strong men but a good fight will be put up and the two teams are so closely matched that no prediction can be made as to the outcome. Anyone who is interested in chess, and particularly in this match, is invited to attend the tournament.

ALL-TECH SMOKER.

(Continued from Page 1, Col. 3.)
each man had to look out for himself. Fortunately no one was bashful, so all managed to get at the eats and drinks some way. The Committee had thoughtfully provided glasses for the ginger ale, but the guests thought they could get their drinks much more quickly by taking the bottles so the glasses did not see much service.

When the guests had obtained their food and had returned to the big room to enjoy it, they were entertained by the "Wayward Trio" of coon singers. The scene was supposed to be laid in the Cafe Wayward, which fact was expressed in the Shakesperian manner by a placard stuck up on the wall. The troupe, composed of Messrs. Alton, Katz and Lowenburg, gave a cabaret stunt which was so realistic that some of the fellows thought they were in a real cafe, and began to call for "beer." Besides singing some of the popular coon songs they got off some jokes that made the audience howl. A parody which expressed the eagerness of Tech to combine with Harvard brought much applause, for they said, among other things, that we needed the institution across the river "like a baby needs tobacco" and "like a drowning man needs water." There were also two poems showing why Doctor Maclaurin was so badly needed as President of the Institute. This need was said to be "like the cornbeef needs its cabbage."

As soon as the singers had gotten tired of responding to repeated encores Messrs. Rankin and Sherman took the floor with a banjo duet which proved a great success. They also received their share of encores.

A speech by "Pa" Coburn, called by Mr. Peck "the father of the new Constitution," was next in order. This was not on the program, but as Mr. Coburn happened to be present he was called on to talk. He was graduated with the class of '97, and has been active in instituting the present organization of the Alumni. His suggestion of the advisability of organizing the undergraduates resulted in the drawing up of the recently passed Constitution. Instead of giving an extemporaneous speech he recited a poem dealing with the proposed combination of Tech and Harvard. The poem, though not very new, has never been published, probably because of some slightly unconventional language it contains. At any rate it decidedly does not favor the proposed union, and the hearty applause that it called forth clearly showed the sentiment of the students. After the cheers had subsided Mr. S. H. Taylor gave a vocal solo, accom-

PROM INVITATIONS AND PROGRAMS OUT

May Be Had by Men Who Have Paid Up at the Cage Any Day Next Week.

A meeting of the Junior Prom Committee was held yesterday, at which it was decided that the programs and invitations for the Prom might be obtained at the Cage every day during the week of April 7 to 12, inclusive, from 1 to 2 o'clock. No programs or invitations, however, will be given out to men who have not paid their six dollars. This fee may be paid at the time of getting the programs. Tickets may also be obtained then.

An innovation will be introduced this year in that Galvin, the noted decorator, will have charge of the adornment of the hall.

All men who expect to bring chaperones with them are requested by the committee to notify one of its members as soon as possible.

CROSS-COUNTRY RACE.

Freshman and Sophomore Teams Meet This Afternoon.

The annual Freshman-Sophomore cross-country race will be run this afternoon. The teams will leave Back Bay at 2.34 for the course at Highlands.

From past performances it seems safe to give Benson, '16, the first place, unless he is again the victim of an unfortunate accident like that of last Saturday. The second place should go to Wall, '15, who has been working regularly at the Field. To most men the lack of practice over the course might be fatal, but Wall's experience should effectually counterbalance this disadvantage. Hill, '15, and Guething, '16, will take the next two places in doubtful order. Hastie, '16, and Best, '15, will be the competitors for the fifth and sixth places.

After these it is hard to tell who will finish next. Cook is handicapped by lack of practice, but last year, under practically the same conditions, he secured fifth place. Zeffler, who came into prominence in the Freshman-Sophomore indoor meet, is in good form. Lovell, Pollard, Bassett, Enebuske and Brown are all possible scorers on the Sophomore team.

The Freshmen have Graff, Murchough and Gray, who showed up well last Saturday, and they should support the leaders of their team well. Dean, the half-miler, will run, but his only experience on the course is a walk, and this may handicap him severely.

About 20 men are expected to start, but every Freshman and Sophomore who can run at all may enter. Every man finishing before the sixth man on the other team is helping his own team.

CAMP LEADERS WANTED.

There is an opportunity for Seniors and Juniors to act as leaders at a boy's camp at Lake Squam. The season lasts from about June 27th to September 8th. Men will have all their expenses paid and will receive a moderate compensation besides. Any upperclassmen interested should see Bursar Rand at once and obtain particulars.

The story of the countryman who blew out the gas when he came to the city doesn't sound strange now to the burner, in the MFW MF WMFW FWF Freshmen who saw Prof. Talbot attempt to blow out the Bunsen burner, which he had used to light another burner, in the Chemistry lecture.

SPRING TENNIS MEET.

Arrangements for the Annual Tournament Being Made.

With the coming of warm weather the tennis enthusiasts are beginning to plan for the Spring season. The courts of the Field are in poor condition, and it is hoped that some arrangement can be made with Harvard whereby their courts may be used. A Spring tournament consisting of preliminaries, semi-final and finals, will be held this year, as usual, to determine the most skillful players. Last Fall's tournament, a very successful one, was finished before the end of the season. H. R. Stewart, '16, the winner of the singles in the Fall tournament, and a member of the Amherst Varsity tennis team last year, will be a strong contender for honors in the Spring meet, which, in all probability, will begin in about a week. From the men making the best showing a team will probably be picked to represent the Institute in the Intercollegiate at Longwood. Meets have been arranged with Harvard and Tufts.

COMMUNICATION.

To the Editor of THE TECH:
Dear Sir:—Those depending upon the supply rooms established in the Institute buildings have during the last few days, been informed that the supply of certain materials has run out. It so happens that the second year Course IV men are ready to start work on drawings due April 15. The paper required is not to be had either at the supply room or at the store controlling the same. This is but one of a number of cases. Time and again the freehand classes have been unable to obtain paper. Not only is this lack of proper supply and management evident, but it seems at times that the price of those supplies on hand are in excess of their proper value.

As an example of the evident arbitrary prices, one pays for two half sheets of water-color paper 24 cents, while he must pay 30 cents for a whole sheet of the same paper. Another case that might be cited is that of the detail paper. The students are now paying six cents a sheet for a paper of a quality inferior in every way to that for which they paid six cents a few weeks ago.

In an institution, fostering as it does a spirit of democracy and independence, is it not rather incongruous to establish an institution devoid of competition, controlled by one man, and forced, in a way, upon the students? We must have them, and yet one man is allowed to make money as a result of the needs of others. The rushing of Freshmen to supply counters so conveniently provided is a familiar sight to all. To me this seems the height of arbitrary control of parasitic propaganda.

With the Institute Committee now in possession of full power to act upon all Institute activities, could it not, for the benefit of the student body, set on foot plans for Institute ownership and control of the book and stationary supply rooms? Can profit pay only the cost of maintenance and whose purpose is to serve only the interests of the students for whom they exist? Now that we have an Institute Committee that can act, let us look for better conditions.

Yours truly,
A Course IV Student.

TECHNIQUE SIGN-UPS.

Seven hundred and fifty of the available eight hundred and twenty-five copies of the 1914 Edition of Technique have been signed up already. Sign-up blanks for the remainder will close Thursday afternoon at 5 o'clock.

MINING SOCIETY.

Professor Lindgren to Address Meeting on April 9.

Wednesday afternoon, April 9, at 4.15 P. M., Professor Waldemar Lindgren, the head of the Department of Geology, will address the Mining Society at its meeting in Room 11, Eng. B., on "The Mining Interests of Mexico." Prof. Lindgren has just returned from Mexico, where he was detained because of the troubles brought about by the late revolution, and he will be able to give some very interesting news on the existing conditions as well as on the mines. The officers of the Mining Society feel exceedingly fortunate in having such an excellent speaker at this meeting, and every man in the Institute is invited to attend. The lecture is not to be technical.

Prof. Lindgren was formerly Chief of the United States Geological Survey, and at the present time is one of the best known economic geologists in the world. In his professional work he has carried on a large amount of research work which has been of vast importance to the science of Geology.

INST. COM. MEETING.

(Continued from Page 1, Col. 4.)

Using Manager, Circulation Manager and Treasurer, 8 points; News Board, 7; Assistants, 6, and Business Board and Editorial Staff, 5 points.

THE TECH reported that they have recently been prevented from getting an advertisement by some member of another activity who was trying to secure an advertisement from the same party. It was not the fact that someone had been trying to obtain an "Ad" which caused the complaint, but, because of the language that the solicitor used, both he and the representative of THE TECH were unable to get the "Ad." In view of this the Institute Committee passed the following motion: No person claiming to represent an Institute activity may solicit advertisements without the authority of the Institute Committee. All those soliciting in this manner must present to those with whom they are negotiating for advertisements a card which shows that they have the authority to do so. The president shall have the power to appoint a committee which shall have charge of arranging for the printing of these cards and which shall supply the different activities with the required amount of them.

M. E. Langley, the chairman of the All-Technology Smoker Committee, reported that the committee had arranged an excellent program and that the affair had been given good publicity in spite of the fact that some of the posters had been stolen.

Mr. Brewster, of the Constitution and By-Laws Committee, who reported in the absence of the chairman, said that the results of the balloting would be declared at the Tech Smoker, and that the By-Laws would have to be considered next.

The treasurer reported a balance of \$67.59 in the treasury.

The subject of change in representation will be considered later.

The following men were absent: Peck, C. T. Guething, Germain, Rankin, Brett, Albee, Walsh and Tolman.

1916 MEET POSTPONED.

The track meet between the Tech and Tufts Freshmen has been indefinitely postponed. This meet was to have been held next Thursday, April 10, but the Tufts team were unable to accept this date. Manager Webster is now trying to arrange for a meet at some other time which will be suitable to both teams, and the first or second Saturday in May will probably be the date decided upon.

WIRELESS MEN HEAR INTERESTING TALK

Mr. A. A. Merrill Talks on Use of Wireless for Air Crafts.

Yesterday afternoon the Wireless Society held a meeting in Eng. B. President Affel introduced Mr. A. E. Merrill, who gave an informal talk on the application of wireless telegraphy to aeroplanes and dirigibles.

Mr. Merrill first explained how an aerial can be obtained by trailing a long fine wire below the aeroplane and using the structure of the machine as an electric counterpoise. By such methods communication has been established between aeroplanes and land stations for a distance of some sixty miles. It is, however, very difficult to receive messages owing to the excessive noise of the engines. When satisfactory mufflers have been devised this difficulty will doubtless be eliminated.

The installation of wireless apparatus on dirigibles was next discussed. Up to the present time radio-communication has been satisfactorily carried on for over 500 miles. As the dirigible offers many advantages for wireless installation this record ought to be shortly exceeded. An informal discussion closed the talk.

Announcement was made of the meeting of the New England Wireless Society which is to be held in Pierce Hall, Harvard, Saturday evening. Prof. A. E. Kennelly is to speak on the important subject of the "Daylight Effect," and all members should make an effort to attend.

WRESTLING MEET.

Novice Entry List Gradually Increasing—Big Crowd Wanted.

Friday, April 11, there will be held a novice wrestling meet in the Gym. Everyone is eligible to this except men who have participated in Varsity matches. The idea of the wrestling team in holding such a meet is to promote interest in wrestling, and see what material will be available for next year's team. For this reason they are anxious to have a large entry list.

So far few entries have been received, except from the members of Mr. Gracey's class among the Freshmen. This meet is distinctly a novice one, and no one need be afraid to come out because of a lack of knowledge of the fine points of the sport. These men are the very ones the management wishes to have out, and anyone interested in wrestling, especially among the upper classmen, is urged to send in his entry at once, as the entry list closes Tuesday, April 8. If enough men enter the matches there will be preliminary and final rounds. Matches will be held in all the usual classes, and also in the 105-pound class. In the latter class there has been only one entry received, so the little fellows have an especially fine opportunity.

Ribbons will be awarded in each bout, and if enough men come out bronze medals will be substituted for the ribbons. An entry fee of twenty-five cents will be required in case it is needed to pay the expenses of the meet otherwise no payment will be asked. It is not apt to be enforced. Tickets are for sale at the Cage, from any men taking wrestling, and from members of the team. The price of admission is twenty-five cents.

The entries which have been received are: Heavy-weight class, Owen, Norton, Bolton; 155-pound class, C. W. Lawrence, K. L. Harper; 145-pound class, R. B. Blakeney, R. S. Burnap, L. R. G. Bousquet, E. B. Goodell; 135-pound class, T. A. Berrigan, R. G. Berger; 125-pound class, J. E. Doherty, G. D. Anderson; 105-pound class, J. I. Connolly.

FACULTY NOTICE.

The list of candidates for the de-
gree of Bachelor of Science the pres-
ent year has been presented to the
Faculty, and all persons whose names
are on it have been notified individ-
ually. The list cannot now be changed
except by vote of the Faculty, and any
student expecting to be recommended
for the degree this year should con-
sult me if he has not been notified
that his name is on the list.

A. L. MERRILL,
Secretary.

**FIRST YEAR, SHADES AND
SHADOWS.**

The first exercise will begin April
3, and will be held in Room 40A,
Pierce Building.

Students should come prepared to
do the first exercise in Shades and
Shadows, after reading beforehand as
far as Page 32 in the text book. Text
books are not to be used in the class
room. For the first exercises students
are to bring T-square, Triangle, Scale,
Drawing Instruments, Thumb-tacks,
Pencils and Erasers. Paper will be
furnished. The text books may be
obtained from M'ss Whipple, Room
35, Pierce Building.

ALL-TECH SMOKER.
(Continued from Page 2.)

panied by Mr. Clark. "On the Road to
Mandalay" was the first, and he found
it necessary to make the encores short
because so many of them were called
for.

Athletic events were the next thing
on the program. A ring was cleared
in the centre of the room and mats
were laid down for a wrestling bout.
The contestants were: H. W. Treat,
captain of the Wrestling Team, and
A. U. Walter. After the six-minute
bouts of snappy wrestling neither man
seemed to have the advantage and a
third bout was necessary for a deci-
sion. Treat got the decision by a fall
after two minutes of the third bout.
The two men were then matched in a
"Chinese" bout. For this form of con-
test the men are blindfolded and made
to lie down on the mat, each grasping
the same hook with his left hand and
having a roll of newspapers in the
other hand. When "Time" is called
each whacks with all his might, trying
to land a telling blow on some part of
his opponent. This bout may have been
less scientific than real wrestling
but provoked merriment from the spec-
tators. No one was seriously hurt, as
most of the blows landed on the mat.

The next to the last number was a
selection by a sextette from the Man-
dolin Club, which rendered "In My
Harem," and gave a realistic imitation
of a bagpipe concert. One of the mem-
bers played a novel instrument re-
sembling a cello but having only one
string, which produced some unusual
sounds.

The singing of the "Stein Song"
closed one of the most successful social
gatherings ever held in the Institute.

The first tennis enthusiasts were
busy on the courts at Tech Field Sat-
urday afternoon. They reported the
courts in poor condition.
