The Freshmen held a short class meeting yesterday in Huntington Hall at 10 o'clock. A constitution modeled after that of the Junior Class was presented and passed by a unanimous vote. Then Temporary Chairman Hall appointed ten men who are to take leading parts in the dance procession after the Freshman Dinner tonight.

The activities tonight will be the first chance for the Freshman Class to get together as a class for a general good time and as such should draw a large crowd, not only of members of the class of 1917, but of the class of 1916 as well. According to a Boston paper, the Freshmen have sworn eternal friendship to the Sophomores, explaining that members of the latter are somewhat "peev'd" that the youngsters took so much responsibility. As a result the dinner and the excitement following promises to be interesting.

DINNER TO ENTERTAIN CLASS COMES TONIGHT

The TEC Entertains Freshmen in Unit After Dean Burton to Speak.

Tonight comes the second big social event of the year for the Freshmen, the dinner given by this group. It promises to be a successful occasion, as the date, November 14, has been a royal good time has been perfected, and there will be a lot of good things that are not on the program, so it is highly probable that any new social organizationer with proper qualifications will kick himself when he sees the amounts counter-morning.

The main feature that should be mentioned is the feed. This will be provided by "Professor" Colton, other than Colton, and the entire thing is run by the Tech Union. In former years this dinner was enlivened by beer, but that is now tubed. If the class of 1917 does its part, however, the attendant events will be more stimulating than any alcohol.

The speakers have been carefully chosen to give the new men an idea of different sides of the Institute life. New students do not know Dean Burton very well, but when they have heard him speak a few times they will be able to get a clue to his offi

TROUBLE AT THE TECH UNION

Science Conspicuous, the publication of the Institute, in the current issue presents for its leading article "The Doom of the Lobster," by John Ritchie, Jr. This is a comprehensive statement which sets forth some very plain facts. The main point of this is that commercialism has reduced the number of this crustacean to extinction levels. All legislation in the way of protection has been biologically absurd. Mr. Ritchie states that if anything is to be done, it must be the sober and scientific treatment of the situation, while the matter will grow complicated by competitions and varying requirements to that any adjustment must be international in character. The article is authoritative, in that Mr. Ritchie is one of the few who work on the country in the neighborhood and allied science of conchology, and takes kindly to this treatment of the facts of the case. The article is the first to make an absolutely plain statement of the matter.

WEATHER

Forecast for Boston and vicinity: Fair, light to brisk northwesterly winds.

More Freshmen than Sophomores seem to be turning out for the relay team.

T. C. A. RECEPTION VERY SUCCESSFUL

Get-Together Evening Replete With Good Food and Music.

Last night a large and varied assembly of Tech men met in the Union, and enjoyed the evening to their heart's content. The invitation to the Freshmen class given by the Technology Christian Association was gathered together in its large numbers from all classes, the upper classes especially, and the latter, together with the addresses and entertainments of the evening, helped greatly to make the affair a real success.

The Freshmen class was lacking in representation, for quite large was the number of Tech men who, after the event was over with, left the Union, feeling not as strangers but as real enthusiasts Tech men, with the spirit of the Tech Union.

Mills E. Langley, in a brief introductory speech, said that not only the T. C. A. stood for a good work, but that it also offered the weekly Thursday talks held in the Union. He said, "This is the chance to get acquainted with Tech men. It's a good opportunity to get acquainted with Tech men."

HARE AND HOUNDS RUN

Train Leaves Trinity Place for Newton at 2.05 Today.

The initial Hare and Hounds run of the season will be held at Newton this afternoon. The train leaves Trinity Place at 2.05. A goodly number of men are expected to turn out to the run included especially those trying out for the Cross Country Team. However, this does not mean that the course will be covered at all rapidly, and men who have not run before should take this opportunity to try themselves out and at the same time enjoy some wholesome exercise. If enough run on it is to be expected that the affair will go on for some time.

The course starts at the Newton Y. M. C. A. and after a circuit of several miles over roads, few hills and a golf course, ends up at the station.

THE BOAT CLUB

OFFICERS ELECTED FOR YEAR

Call For Candidates Issued—Prospects Good For Fine Crew.

At the first meeting of the Technology Boat Club yesterday afternoon in the Union the following men were elected officers for the coming year:

President, L. R. G. Bosquet, '16; Vice-Commodore, E. W. V. C. Lucas, '16; Commodore, N. C. MacRae, '16; Assistant Manager, R. T. C. Jewett, '16; Assistant Manager, W. B. Rivers, '14; Treasurer, J. B. Carr, '16; Auditors, C. W. Lovins, '15; A. B. Neff, '16.

The election was held as a part of the regular meeting of the club. The new officers were then installed in office.

The first meeting of the club was held in the Union last evening. The meeting was called to order by the commodore, who then introduced the executive committee. The commodore then introduced the officers of the club and the executive committee.

The meeting was then adjourned to meet on the 14th of this month.

T. C. A. RECEPTION

Saturday, October 4

The splendid success of the T. C. A. reception last night promises great things for the coming year and for the Technology of the future. The large crowd, the good time enjoyed by all, and the sport displayed by the new men indicate almost positively a wonderful increase in enthusiasm and the spirit on which we take a great pleasure in commenting.

It was our misfortune during the past year to be obliged to criticise the students on various occasions for the apparent lack of this same enthusiasm and spirit, and we rejoice as every true Tech man now, at the splendid display given last night. Our thanks to the T. C. A.

The Freshman dinner, given by THE TECH this evening, is one of the important landmarks of the year, and as such deserves the support of every one of our brothers. Never again during your four years here will your class turn out in the numbers and with the enthusiasm that will be displayed tonight. Get in on it, men, of 1917, and show us the Freshmen this year as the best crowd in the Institution.

NEW CONSTITUTION
ADOPTED BY CHEMISTS

At First Meeting Yesterday Dues Are Raised and By-Laws Are Changed.

The Chemical Society held its first meeting yesterday afternoon in 23 Walker. The meeting was for the consideration of the constitution which was drawn up by a committee last year, but which did not come to a vote at that time.

After President Dickson had called the meeting to order and had announced that the old constitution and by-laws would be suspended through this meeting, Secretary Gould read the new constitution and by-laws. These new drafts had been presented to the Society twice last year for preliminary approval, and no action or discussion of each separate article was taken.

After the constitution and by-laws had been read, Dickson outlined the principal changes that have been made. The dues were raised from fifty cents to one dollar, and the majority of those present, made necessary for the carrying of measures instead of a three-fourths vote, in quorun fixed at one quarter of the total membership, and provision made for representation on the Institute Committee and on the Finance Committee.

On a motion by A. H. Waitt the question of the adoption of the constitution as read was taken up separately. On a rising vote the new constitution was accepted unanimously by those present. Then after considerable discussion as to the need of raising the dues a vote was taken on the by-laws, and they were also accepted unanimously.

Hale, speaking on behalf of the Program Committee said that the increased dues would enable the Committee to procure several important speakers from other cities, and would enable the Society to have as speakers the men who are at the head of their particular line of work. He outlined some of the work the Committee has already done and said that he hoped to have two speakers from the General Electric Company who would speak on some of the many topics connected with electrochemistry, and a man from Washington, who could give an illustrated lecture on the interesting branch of pure chemistry which is concerned with the use of liquid ammonia instead of water as a solvent and ionizing medium.

The Program Committee has also arranged for a meeting to be held at the end of the month, at which Dr. Albers, Special Lecturer on Business Law, will be the speaker. At this meeting the result of the special election for the Senior member of the Executive Committee will be announced. The position was made vacant by the resignation of Watson, who has gone to Harvard. Nominations for this office, signed by ten active members, are due at the Cage by 4:00 P. M. Wednesday, October 14.

Founds--A gold signet ring October 2d, corner of Dartmouth and Boylston streets. Owner may have same by proving ownership. Apply to THE TECH office.

An excellent room, large, well furnished, can be had on Newbury street with another student at a reasonable figure. It is most desirable both for the surroundings and its nearness to the Institute. Apply to the Bursar.

TENNIS CLUB MEETS TO ELECT OFFICERS

Hurlburt, ’14, Elected President With Carr, ’10, as Vice-President.

Officers of the Tennis Club for the year 1913-14 were elected yesterday at the noon meeting in 22 Rogers.

Kenneth W. Roy, ’12, vice-president of last year’s club acted as temporary chairman, presiding the election. Frederick E. Hurlburt, ’14, was chosen president; J. Blanchard Carr, ’10, vice-president; and Gerald W. Blakeley, ’14, secretary-treasurer.

Entries were received from the men present for the full tournament, which is to start next week. It has been difficult in previous years to have all the matches played in the fall, and in order to insure the finish of the season and to expedite the closing of the entries has been set early. Practically all of the twenty flights present at the tournament signed up, and with the men who may enter in the entries keen competition for the fall honors is probable. Games may be played at Jarvis Field, if convenient, on any place that is convenient. The courts at Tech Field Brookline are in very poor shape and probably cannot be used.

Entries may be left at the “Coug” up to Monday afternoon of 6 o’clock, addressed to either President Hurlburt or to the Tennis Committee.

The fee for the singles will be fifty cents and for the doubles seventy-five cents for the teams. It is earnestly requested that all men who are interested watch THE TECH and its bulletin boards in the corridor of Rogers for the announcement of the drawings and other matters regarding the tournament.

T. C. A. RECEPTION

(Continued from Page 2)

markable how the troubles and difficulties of registration and entering the Insitute had been relieved in recent years. This, he said, was due entirely to the work of the T. C. A. through which the Association the plan was devised.

As an Association and student activity, the data thought the T. C. A. was a great factor in developing loyalty, and in destroying that prevalent desire for self-advancement, creating loyalty, respect and duty to something outside of the man himself. Dean Buron stated that the Institute was one of a small number of colleges which were devoid of any religious exercises, and in whose curriculum religion had no place. At Technology, he said, the religious side of college life was developed involuntarily, and developed, in fact, by the Christian Association here at the Institute.

In closing, Dean Burton expressed the hope that the T. C. A. might flourish and grow, and become as vital a part of Institute life.

President Langley then gave the floor to A. C. Dorrance ’14, “Chief Engineer of the Institute.” Dorrance gave the Freshmen an excellent idea of the various activities at the “State.” He began with THE TECH, and he told in some detail of the Institute’s daily paper. He spoke of the valuable experience that the men gain not only on the field side, but also in the news department of THE TECH. As a close rival to THE TECH, Dorrance mentioned Tech Show, and he told how many of the positions in the Show were made by competition; he told of the trips the Show has made, and of the great opportunities open to progressive men. Last year’s Show, he said, handled about $300.

Dorrance took up Technique 14. He spoke of the various improvements made each year in the year book, and he told the Freshmen of the Technique Rush. To those musically inclined, Dorrance said that the musical clubs offered plenty of opportunities and he mentioned the different concerts and trips that these clubs have. The professional societies at the Institute were also given proper attention, and finally, the Freshmen, said Dorrance, were not eligible to membership.

As an example of the doings of the T. C. A. the speaker referred to the success of last evening’s gathering. The student activity. He spoke of the technical clubs of the Institute while at the Institute, stating that almost every country on the globe has a technical club. The President and the Dean, he said, were very much in favor of having students go out for the various activities, and he urged the Freshmen to do so. Dorrance told the men that the activities are open to all, and gave the men an excellent idea of what they were like.

Greeing ’14 was then introduced, and he spoke very interestingly about Institute athletics. He urged the men to go out for athletics, and said that each man owed it to his class to go out to make the coming Field Day a success. He presented athletics at Technology in a very coarse manner, and spoke of the strong place M. I. T. has in the ranks of colleges in the country run. He told of the progress the wrestling team has made, and of the victories M. I. T. has won in track and field.

The reception was invested with much importance. The Student Council decided that the reception, and expressed his desire to become acquainted with Tech men more closely.

The men out on the track Thursday experienced some difficulty getting around the quarter without getting into several pools of water.
